Oracle Other Oracle Certification

1z0-403: Enterprise Linux System Administration
Practice Exam: 1z0-403 Exams
Exam Number/Code: 1z0-403
Exam Name: Enterprise Linux System Administration
Questions and Answers: 113 Q&As
(Other Oracle Certification)

Exam : ***1z0-403***

"Enterprise Linux System Administration", also known as 1z0-403 exam, is a Oracle certification. With the complete collection of exam questions, Just4Study has assembled to take you through 113 Q&As to your 1z0-403 exam preparation. In the 1z0-403 exam resources, you will cover every field and category in Oracle Certification helping to ready you for your successful Oracle Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Oracle Other Oracle Certification 1z0-403 (Enterprise Linux System Administration) examination of original title complete coverage. 1z0-403 exam questions help you pass the exam.

Just4Study 1z0-403 Feature:
* High quality - High quality and valued for the 1z0-403 Exam: 100% Guarantee to Pass Your 1z0-403 exam and get your Other Oracle Certification certification.

* Authoritative - Authoritative braindumps with complete details about 1z0-403 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Oracle Certification resources, you will minimize your ***Oracle Other Oracle Certification*** cost and be ready to pass your 1z0-403 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Oracle Certification demo before you decide to buy it in http://www.Just4Study.com.

Just4Study Guarantee:
Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1z0-403 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1z0-403 Demo Download
Just4Study offers free demo for Other Oracle Certification 1z0-403 exam (Enterprise Linux System Administration). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for ***Oracle Other Oracle Certification 1z0-403*** examination of original title complete coverage.1z0-403 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 1z0-403
Exam Name: Enterprise Linux System Administration(Other Oracle Certification)
Questions and Answers: 113 Q&A

Oracle 1z0-403 Test belongs to one of the Other Oracle Certification certified test, if needs to obtain the Other Oracle Certification certificate, you also need to participate in other related test, the details you may visit the Other Oracle Certification certified topic, in there, you will see all related Other Oracle Certification certified subject of examination. Just4Study professional provide Other Oracle Certification 1z0-403 the newest Q&A, completely covers 1z0-403 test original topic. With our complete Other Oracle Certification resources, you will minimize your Other Oracle Certification cost and be ready to pass your 1z0-403 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com *offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.*

Exam : Oracle 1z0-403
Title : Enterprise Linux System Administration

1. You have configured the system with a static IP address as shown below:
USERCTL=yes
DEVICE=eth0
BOOTPROTO=static
ONBOOT=yes
IPADDR=192.168.0.1
NETMASK=255.255.255.0
ETHTOOL_OPTS="speed 100 duplex full autoneg off"
Which two implications does it have on the system? (Choose two.)
A. The IP address is retained across reboots.
B. The ethtool constraints remain persistent across reboots.
C. Normal users can modify the static IP address of the system by using the ifconfig command.
D. Normal users cannot use ifup and ifdown commands to make the interface active and inactive, respectively.
E. The system cannot contact any other system in the same network because the default gateway is missing in the configuration file.
Answer: AB

2. Which two statements are true about a kernel patch? (Choose two.)
A. Patches are always the part of a released kernel tree.
B. After applying a patch, it is important to remove the kernel sources of earlier versions.
C. After applying a patch, it is important to make sure that the entire kernel configuration and Makefiles are cleaned up.
D. If patches are not built from clean unpatched kernel sources, then a change in one patch may make other patches to fail.
Answer: CD

3. Match the TCP Wrappers tokens with their descriptions:Token Function
1)%a A) the daemon process name
2)%d B) the daemon Process ID (PID)
3)%n C) client username obtained via the ident protocol
4)%p D) the client (server) IP address
5)%u E) the client hostname
A. 1-D, 2-E, 3-C, 4-B, 5-A
B. 1-A, 2-E, 3-B, 4-C, 5-D
C. 1-D, 2-A, 3-E, 4-B, 5-C

D. 1-A, 2-C, 3-E, 4-B, 5-D
Answer: C

4. Match the shutdown options with their descriptions: Option Option Description
1) k a) forces fsck on reboot
2) f b) uses /etc/shutdown.allow
3) F c) skips fsck on reboot
4) a d) sends warning messages to all those logged on without actually shutting down the system
A. 1-d, 2-c, 3-a, 4-b
B. 1-c, 2-b, 3-d, 4-a
C. 1-a, 2-c, 3-d, 4-b
D. 1-b, 2-a, 3-c, 4-d
Answer: A

5. In which two situations would you use TCP as the preferred protocol to transfer data between different systems over a network spread across the globe? (Choose two.)
A. When the integrity of the data is important
B. When you want to retransmit the dropped packages
C. When the connection with the other system is important
D. When you want to establish a connection with another system before sending data
Answer: AD

6. You have bound your system to the Network Information Service (NIS) domain ORACLE and all client-side configurations are done. The users report a problem that they are not able to log in through NIS accounts, whereas local users are successfully authenticated, after the system reboots. As a Linux administrator, you executed the nisdomainname command and you get the output "(none)", and no traces of yp are found in the /var/log/messages file. What would you do to resolve this error? (Choose all that apply.)
A. Re-create the NIS domain on the server that runs the NIS domain ORACLE.
B. Restart the ypserv service on the server that runs the NIS domain ORACLE.
C. Restart the network service on the server that runs the NIS domain ORACLE.
D. Use the chkconfig command to set the ypbind service to be on at the desired runlevels.
E. Use the ntsysv command to select the ypbind service to be automatically started with the desired runlevels.
Answer: DE

7. Identify the situation in which you would opt for aggregating multiple networks into a single interface via the Etherchannel.
A. To reduce redundancy in the event of hardware failure
B. To meet the requirement of hosting multiple Web sites on a single computer
C. When multiple IP networks are being used on the same physical network segment
D. When the bandwidth requirements on the network continue to grow beyond the capacity of a single network interface
Answer: D

8. Which two statements are true regarding the local loopback interface? (Choose two.)
A. It can be used to test the basic networking.
B. Only 127.0.0.1 is bound to the loopback interface.
C. It can be used to test a client/server application such as a web server.
D. It is required to configure the local loopback address on a machine only when it is connected to a network.
E. The local loopback address cannot be used to telnet to the machine itself even when the telnet service is configured and running.
Answer: AC

9. As a Linux administrator, you issued the following command:
tune2fs -O ^has_journal /dev/sdb2
What is the purpose of issuing this command?
A. To convert the ext2 filesystem on the /dev/sdb2 disk partition to the ext3 filesystem
B. To convert the ext3 filesystem on the /dev/sdb2 disk partition to the ext2 filesystem
C. To attach the /dev/sdb2 filesystem to the journal block device located on external journal
D. To take a backup of the journal in the /dev/sdb2 filesystem in to the super block of the /dev/sdb2 filesystem
Answer: B

10. The output of the pstree command is shown below:
[root@server1 ~]# pstree | grep login
|-3*[login---bash]
|--login--bash--vim
|
Which command would you use to terminate all login sessions on the text terminals? (Choose all that apply.)
A. pkill login
B. kill -5 login
C. killall login
D. killall5 login
E. kill -KILL login
Answer: AC

11. As a Linux administrator, you created a /dev/sdb5 disk partition with an ext3 filesystem. A persistent configuration for /dev/sdb5 is given in the /etc/fstab file as shown below:/dev/sdb5 /data ext3 defaults 0 0
Which statements are true? (Choose all that apply.)
A. The /dev/sdb5 filesystem is mounted with the rw option on /data.
B. The /dev/sdb5 filesystem would be backed up automatically every alternative day.
C. The users on the system would be able to execute binaries in the /data directory as per the permissions.
D. The normal users on the system would be able to mount and unmount the /dev/sdb5 filesystem on /data.
E. The files copied to the /dev/sdb5 filesystem would be physically written on it with some delay time after the copy is done.
Answer: ACE

12. You want to load the main kernel module for USB support. Which command would help youachieve this task?
A. modprobe usbhid
B. modprobe usbcore
C. modprobe uhci-hcd
D. modprobe ehci-ocd
Answer: B

13. You have the 2.6.9 kernel and want to apply the patch 2.6.9-rc4 on an i686 machine. Which statement is true?
A. The patch can be applied only to a 2.6.10 or later kernel.
B. The patch can be applied after installing 2.6.9-rc4 source rpm.
C. The patch cannot be applied to the available kernel because 2.6.9-rc4 is a predecessor of 2.6.9.
D. The patch cannot be applied on the machine because it is not meant for an i686-architecture machine.
Answer: C

14. As a root user, you issue the following command at the tty1 terminal:[root@server1]# shutdown -k -t 5 now "Server1 is going for a shutdown, Please save all your work" What is the purpose of issuing this command?
A. To shut down server1 by suppressing warning messages

B. To send warning messages to all the users logged on to server1 and then shut down server1
C. To send warning messages to all the users logged on to server1 before server1 goes for a reboot
D. To send only warning messages to all the users logged on to server1 without actually shutting server1 down
Answer: D

15. On an Oracle Enterprise Linux system, upon booting, you got an error message as shown in the Exhibit. Which minimal steps would you take to fix this issue and boot the system successfully? (Choose all that apply.)
A. Run e2fsck on root filesystem / after issuing the root password.
B. Set Security Enhanced Linux (SELinux) on the system to permissive mode.
C. Replace fs_freq and fs_passno in the /etc/fstab file with the value 0.
D. Enter the root password and remount the root filesystem / in read/write mode.
E. Identify the correct label for the root filesystem using the blkid or the e2label command.
F. Change the LABEL=/1 entry with the original label of root filesystem / in the /etc/fstab file.
Answer: DEF
