Exam : IBM 000-093

Title : Test093,IBM WebSphere Process Server,V6.0, System Admin

1. Creation of a new profile failed with following error:

Wait until the current creation or deletion operation is complete before continuing.

In order to proceed with new profile creation, what must the administrator do next?

- A. Stop the server, then restart the Profile Wizard.
- B. Terminate any running javaw.exe process.
- C. Make sure to enter a unique profile name from the wizard.
- D. Delete profileRegistry.xml\_LOCK file to release the lock.

Answer: D

2. A manager interacts with an expense application via a human task. What action is appropriate to take if an obscure exception occurs when the manager enters a response and completes the task?

- A. Edit the business data from Failed Event Manager and re-submit the failed event.
- B. Resubmit the failed event with trace using Failed Event Manager for further troubleshooting.
- C. Delete the failed event from Failed Event Manager, then stop and re-start the TaskContainer.
- D. Query the failed event using Failed Event Manager, then send the information to the developer.

Answer: B

3. The SystemOut.log indicates that the installation of an enterprise application failed. If the application contains WebSphere Adapter artifacts, what must be done before attempting to reinstall?

- A. Remove any SIBus destinations or JCA activation specifications created prior to the failure.
- B. Remove the Event Archive table created prior to the failure.
- C. Create new Endpoint Listener to replace the one existed prior to the failure.
- D. Create necessary SIBus destinations and JCA activation specifications manually.

Answer: A

4. When using WebSphere Process Server V6.0.1, the installation of a business process that was generated for WebSphere Process Server V6.0.0 throws UnexpectedFailureException exception. Which of the following must the administrator do next?

- A. Regenerate business process code in V6.0.1 and reinstall.
- B. Run serviceDeploy tool to resolve this problem.
- C. Make sure that Business Process Container has been installed.
- D. Rename the module containing the business process different from the previous version.

Answer: A

5. An event failure occurred due to wrong date format which was sent from component A to component B. What will the Failed Event Manager allow an administrator to do?

- A. Edit the date value and resubmit
- B. Create a human task to notify the event originator
- C. Bypass component B
- D. Re-route the message

Answer: A
