

## 000-154 braindumps

### IBM Solutions Developer

**000-154: test 154,web developer**

**Practice Exam:** 000-154 Exams

**Exam Number/Code:** 000-154

**Exam Name:** test 154,web developer

**Questions and Answers:** 120 Q&As

( [Solutions Developer](#) )

"test 154,web developer", also known as 000-154 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 120 Q&As to your 000-154 exam preparation. In the 000-154 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-154](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM Solutions Developer 000-154 (test 154,web developer) examination of original title complete coverage. 000-154 exam questions help you pass the exam.

#### **Just4Study 000-154 Feature:**

\* High quality - High quality and valued for the 000-154 Exam: 100% Guarantee to Pass Your 000-154 exam and get your Solutions Developer certification.

\* Authoritative - Authoritative braindumps with complete details about 000-154 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Solutions Developer resources, you will minimize your **IBM Solutions Developer** cost and be ready to pass your 000-154 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Solutions Developer demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-154 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 000-154 Demo Download**

Just4Study offers free demo for Solutions Developer 000-154 exam (test 154,web developer). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM Solutions Developer 000-154** examination of original title complete coverage.000-154 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 000-154**

Exam Name: test 154,web developer( Solutions Developer )

Questions and Answers: 120 Q&A

[IBM 000-154](#) Test belongs to one of the Solutions Developer certified test, if needs to obtain the Solutions Developer

certificate, you also need to participate in other related test, the details you may visit the [Solutions Developer](#) certified topic, in there, you will see all related Solutions Developer certified subject of examination.

Just4Study professional provide Solutions Developer 000-154 the newest Q&A, completely covers 000-154 test original topic. With our complete Solutions Developer resources, you will minimize your Solutions Developer cost and be ready to pass your 000-154 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

*Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.*

Exam : IBM 000-154

Title : Test 154,web developer

1. From the perspective of an EJB client, what types of EJBs will always be unique for every create() call?

- A. Entity
- B. Stateless Session
- C. Stateful Session
- D. Message-Driven

Answer: AC

2. Consider an EJB named Employee and its home interface named EmployeeHome. The findByDepartment method of the EmployeeHome interface is most likely to have a return value of which of the following types?

- A. Employee
- B. EmployeeHome
- C. Employee
- D. Collection

Answer: D

3. Which method would be used to call a registered servlet with the following attributes?

Site = www.jcert.org

Web application name = testApp

Servlet URI = TestServlet

- A. `getServletConfig().getServletContext().getRequestDispatcher("http://www.jcert.org/testApp/TestServlet").forward(req,res);`
- B. `getServletConfig().getServletContext().getRequestDispatcher("/testApp/TestServlet").forward(req,res);`
- C. `getServletConfig().getServletContext().getRequestDispatcher("/TestServlet").forward(req,res);`
- D. `getServletConfig().getServletContext().getRequestDispatcher("TestServlet").forward(req,res);`

Answer: C

4. Which of the following is NOT a message transfer protocol?

- A. POP
- B. SMTP
- C. IMAP
- D. MIME

Answer: D

5. Assuming variable env is a reference to a hashtable containing the parameters necessary to obtain the JNDI initial context, which of the following obtains a JDBC data source named MyDataSource?

- A. `DataSource ds;`  
`try {`

```

ctx = new InitialContext(env);
ds = (DataSource) ctx.lookup("MyDataSource");
} catch (NamingException ne) { }
B. DataSource ds;
try {
ctx = new InitialContext(env);
ds = (DataSource) ctx.getConnection("MyDataSource");
} catch (NamingException ne) { }
C. DataSource ds;
try {
ctx = new InitialContext(env);
ds = (DataSource) ctx.getNameInNamespace("MyDataSource");
} catch (NamingException ne) { }
D. DataSource ds;
try {
ctx = new InitialContext(env);
ds = (DataSource) ctx.getURLorDefaultInitCtx("MyDataSource");
} catch (NamingException ne) { }

```

Answer: A

6. Where would an EJB reference be found if it were placed in the JNDI location recommended in J2EE 1.3?

- A. java:comp/env/ejb
- B. java:comp/ejb
- C. java:ejb
- D. java:env/ejb

Answer: A

7. Which three of the following may be contained in a WAR file?

- A. Enterprise JavaBeans
- B. Servlets
- C. JavaServer Pages
- D. Applets
- E. Client-side Java applications

Answer: BCD

8. Which two of the following scenarios are better modeled in the JMS point-to-point domain than in the JMS publish-subscribe domain?

- A. A store sends a shipping order to a warehouse to request delivery of a purchased item to a customer.
- B. Headquarters of a chain of stores sends messages that contain price update information to several stores that consume messages independently.
- C. Many sports teams post scores so that fans can see the latest results for their favorite teams.
- D. A client application sends insurance policy data to an application that calculates insurance premiums, and waits for the response.

Answer: AD

9. Refer to the exhibit to answer the question.

Consider the Products relation defined in the exhibit. What is the result of attempting to execute the following Java code segment assuming con is a valid reference to an open Connection object?

1. PreparedStatement ps = con.prepareStatement(
2. "SELECT \* FROM Products WHERE " +
3. "Cost < ?");
- 4.
5. ps.setDouble(0, 10f);

- 6.
7. `ResultSet rs = ps.executeUpdate();`
8. `rs.next();`
9. `System.out.print(rs.getString(1));`
10. `System.out.println(rs.getString(2));`
- A. The code segment displays "1001 Flyback Transformer".
- B. The code segment displays "1004 Grounding Strap".
- C. The code segment displays "Flyback Transformer 8.0".
- D. The code segment displays "Grounding Strap 0.15".
- E. No output is displayed due to a runtime error.

Answer: E

10. Which of the following is considered the best way to design a flexible API that does not require a servlet per activity?

- A. Embed the activity name in a hidden field. Let the servlet read the field to determine what must occur.
- B. Create a query string containing the activity name as a parameter. Let the servlet read the parameter to determine what must occur.
- C. Use a servlet mapping to make requests with the same suffix. Change the prefix to the action and let the servlet read the whole URL to determine what is required.

Answer: C

11. A running Filter must call what method in order to ensure that the next filter in the filter chain is called?

- A. `Servlet.doFilter(Request,Response);`
- B. `FilterChain.doFilter(Request,Response);`
- C. `Filter.doFilter(Request,Response);`
- D. `Servlet.doChain(Request,Response);`
- E. `Filter.doChain(Request,Response);`
- F. `FilterChain.doChain(Request,Response);`

Answer: B

12. In the JMS API for the publish-subscribe domain, how does a durable subscriber differ from a non-durable subscriber?

- A. Messages in topics that have durable subscribers remain in the topic until they expire or the subscriber connection to the JMS provider is closed.
- B. If a durable subscriber becomes disconnected without unsubscribing and later reconnects, the subscriber receives messages that arrived while the subscriber was not active.
- C. If a topic has a durable subscriber, the JMS provider logs all messages in a persistent media so that an application can inspect the log and extract messages at a later time.
- D. The application server delivers each message in a transactional context so that if a durable subscriber then rolls back the transaction, the state of the message reverts to that prior to delivery.

Answer: B

13. EJB clients must supply which two of the following pieces of information in order to use JNDI services?

- A. The IP address of a Web container
- B. The DataSource name for a JDBC database
- C. A provider URL detailing the location of the name tree
- D. The class name of the initial context factory

Answer: CD

14. Which two of the following are NOT parts of the J2C Version 1.0 Common Client Interface?

- A. `ConnectionFactory`
- B. `ConnectionException`
- C. `ResultSetMetaData`

D. TransactionFactory

E. ResultSet

Answer: BD

15. Given a JDBC data source named myDataSource, which of the following establishes a JDBC connection?

A. Connection con = new Connection(myDataSource);

B. Connection con = myDataSource.getConnection();

C. Connection con = ConnectionManager.getConnection(myDataSource);

D. Connection con = myDataSource.open();

Answer: B

16. What is best method for obtaining a home interface for a bean named Employee?

A. Context initCtx = new InitialContext(System.getProperties());

Object o = initCtx.lookup("EmployeeHome");

EmployeeHome empHome = (EmployeeHome)

javax.rmi.PortableRemoteObject.narrow(o,

EmployeeHome.class);

B. Context initCtx = InitialContext.getDefaultContext();

Object o = initCtx.lookup("EmployeeHome");

EmployeeHome empHome = (EmployeeHome)

javax.rmi.PortableRemoteObject.narrow(o,

EmployeeHome.class);

C. Context initCtx = new InitialContext(System.getProperties());

EmployeeHome empHome = (EmployeeHome)

initCtx.lookup("EmployeeHome");

D. Context initCtx = InitialContext.getDefaultContext();

EmployeeHome empHome = (EmployeeHome)

initCtx.lookup("EmployeeHome");

Answer: A

17. When a context throws a NamingException, which of the following methods can be used to determine which portion of the JNDI name is valid?

A. NamingException.resolvedObj()

B. NamingException.remainingName()

C. NamingException.resolvedName()

D. NamingException.getRootCause()

Answer: C

18. A client has accessed a servlet via a form that uses an HTTP POST request. Which two methods could be used by the servlet to obtain information input within the form?

A. Using the servlet object's getServletInfo method

B. Using the request object's getAttribute method

C. Using the request object's getParameter method

D. Using the ServletConfig's getInitParameter method

E. Using the request object's getParameterValues method

F. Using the request object's getAttributeValues method

Answer: CE

19. Refer to the exhibit to answer the question.

Consider the Employees relation defined in the exhibit and the Java code segment defined below:

```
Statement s = con.createStatement();
```

```
ResultSet rs = s.executeQuery("SELECT * FROM Employees " +
```

```
"WHERE EmployeeID >= 10002 AND " +
```

```
"EmployeeID <= 10004");
```

Which code segments display the entire content of the result set assuming that columns EmployeeID and Extension are of SQL type SMALLINT and column Name is of SQL type VARCHAR?

A. do

```
{  
System.out.println(rs.getShort("EmployeeID"));  
System.out.println(rs.getString("Name"));  
System.out.println(rs.getShort("Extension"));  
} while (rs.next())
```

B. do

```
{  
System.out.println(rs.getString("EmployeeID"));  
System.out.println(rs.getString("Name"));  
System.out.println(rs.getString("Extension"));  
} while (rs.next())
```

C. while (rs.next())

```
{  
System.out.println(rs.getString(1));  
System.out.println(rs.getString(2));  
System.out.println(rs.getString(3));  
}
```

D. while (rs.next())

```
{  
System.out.println(rs.getString(0));  
System.out.println(rs.getString(1));  
System.out.println(rs.getString(2));  
}
```

E. while (rs.next()) E.while (rs.next()) E.while (rs.next())

```
{  
System.out.println(rs.getString("EmployeeID"));  
System.out.println(rs.getString("Name"));  
System.out.println(rs.getString("Extension"));  
}
```

Answer: CE

20. When the JMS API is used, which two subtypes of javax.jms.Message are most appropriate for sending a message to a consumer that is not a Java client?

- A. BytesMessage
- B. MapMessage
- C. ObjectMessage
- D. StreamMessage
- E. TextMessage

Answer: AE
