

000-253 braindumps IBM IBM certifications II

000-253: Test253. IBM WebS.App.Svr.Ntwork Development V6.1.Core Admn

Practice Exam: 000-253 Exams

Exam Number/Code: 000-253

Exam Name: Test253. IBM WebS.App.Svr.Ntwork Development V6.1.Core Admn

Questions and Answers: 108 Q&As

([IBM certifications II](#))

Exam : [000-253](#)

"Test253. IBM WebS.App.Svr.Ntwork Development V6.1.Core Admn", also known as 000-253 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 108 Q&As to your 000-253 exam preparation. In the 000-253 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications II 000-253 (Test253. IBM WebS.App.Svr.Ntwork Development V6.1.Core Admn) examination of original title complete coverage. 000-253 exam questions help you pass the exam.

Just4Study 000-253 Feature:

* High quality - High quality and valued for the 000-253 Exam: 100% Guarantee to Pass Your 000-253 exam and get your IBM certifications II certification.

* Authoritative - Authoritative braindumps with complete details about 000-253 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications II resources, you will minimize your **IBM IBM certifications II** cost and be ready to pass your 000-253 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-253 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-253 Demo Download

Just4Study offers free demo for IBM certifications II 000-253 exam (Test253. IBM WebS.App.Svr.Ntwork Development V6.1.Core Admn). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications II 000-253** examination of original title complete coverage.000-253 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-253

Exam Name: Test253. IBM WebS.App.Svr.Ntwork Development V6.1.Core Admn(IBM certifications II)

Questions and Answers: 108 Q&A

[IBM 000-253](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination. Just4Study professional provide IBM certifications II 000-253 the newest Q&A, completely covers 000-253 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-253 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-253

Title : Test253. IBM WebS.App.Svr.Network Development V6.1.Core Admn

1. What does a WebSphere application server provide to support the installation and deployment of JSR 168 compliant portlets?

- A. An embedded portlet container
- B. A scaled-down version of the WebSphere Portal Server
- C. Several J2EE applications that render and aggregate portlets in a browser
- D. An embedded version of WebSphere Portal Express

Answer: A

2. When altering the level of logging information, which level provides more detailed logging information than the default (info) level?

- A. Fatal
- B. Warning
- C. Severe
- D. Config

Answer: D

3. An application has 15 concurrent users and a connection pool size of 10. Each user uses 3 prepared statements. For this application, what is the recommended prepared statement cache size?

- A. 10
- B. 15
- C. 30
- D. 45

Answer: C

4. An application server is using data source connections being managed thru connection pooling. However, the server is logging database errors resulting from lack of connections. In this context, what applies to tuning database connections?

- A. Data sources are abstracted from the JDBC drivers to permit database upgrades without impacting the application logic. The administrator should decrease the connection timeout value.
- B. The connection pool is managed by the application server container, so in addition to increasing the connection setting, additional connections allowed must be configured on the database.
- C. The data sources are released at the end of the commit phase when using Type 4 JDBC drivers. New connections will be created upon the next database access.
- D. It is necessary to tune the applications before tuning WebSphere application server. Connections not returned to the pool are often caused by programs not closing connections properly.

Answer: D

5. What is the correct syntax when running the backup configuration of administrative server files when WebSphere Security is enabled?

- A. backupConfig WebSphereConfig user <name> -password <password>
- B. backupConfig WebSphereConfig backup.zip nohalt user <name> -password <password>
- C. backupConfig WebSphereConfig -cell user <name> -password <password>
- D. backupConfig WebSphereConfig profilename=AppSrv01 user <name> -password <password>

Answer: A

6. Which Web module parameter adjustments would result in improved response time for Web clients?

- A. Disable load on startup
- B. Enable pre-compile JSP option
- C. Set the distributable flag
- D. Set the reload interval to 20 seconds or less

Answer: B

7. If an administrator configures session management for an application server to use SSL ID tracking, which two other session tracking mechanisms should also be enabled?

- A. Cookies
- B. URL Rewriting
- C. Security Integration
- D. Serial Access
- E. Java2 Security

Answer: AB

8. Which set of parameters can a system administrator adjust to directly improve performance for the EJB container?

- A. Transaction lifetime and client inactivity timeout
- B. Cache size and cache cleanup interval
- C. Data source connection pool and server JVM size
- D. Session timeout and HTTP session object size

Answer: B

9. A J2EE application needs to be configured as follows:

The EJB module and the utility JAR in the application must be loaded by the same Class loader. Web module WAR1 and the EJB module must use the same Class loader and Web module WAR2 must have its own Class loader.

What is the correct Web module Class loader configuration for this application?

- A. WAR1 - Module, WAR2 - Module
- B. WAR1 - Module, WAR2 - Application
- C. WAR1 - Application, WAR2 - Application
- D. WAR1 - Application, WAR2 - Module

Answer: D

10. In a WebSphere cell configuration, which component is a single point of failure?

- A. Deployment manager
- B. Web container
- C. EJB container
- D. HTTP server

Answer: A

11. Which services are implemented by the WebSphere application server?

- A. Security, JMS messaging, Naming and HTTP Plug-in
- B. The user registry, Naming and HTTP Plug-in

C. HTTP Load Balancing service, JMS messaging and Data Replication Service (DRS)

D. Security, Naming, Transaction and Dynamic Cache

Answer: D

12. Session Initiation Protocol (SIP) servMets are packaged in which type of archive file?

A. SAR

B. WAR

C. JAR

D. EJB-JAR

E. SIP-JAR

Answer: A

13. Which approach should be recommended when designing a production topology for WebSphere application servers providing high availability and failover capabilities?

A. Create a design using multiple machines that handle the full production load, enabling the use of application server clustering to provide failover capabilities

B. Utilize load balancers between the Web servers and the application servers to provide failover support at the application server tier

C. Place the Authentication servers outside of the intrusion firewall with the Web servers, since the Web servers will need to access them

D. Use the largest processor engines and least number of physical machines for the application server tier, to minimize the software licensing costs

Answer: A

14. When configuring a J2C connection factory, which setting can be configured using the administrative console?

A. Container-managed authentication alias

B. Component-managed authentication alias

C. Authentication preference

D. Mapping configuration alias

Answer: B

15. What is needed to load balance the HTTP traffic across a cluster of Web servers?

A. Configure a proxy server such as Tivoli Access Manager (TAM)

B. Enable server affinity for each HTTP server in the cluster

C. Implement the caching proxy server component of the WebSphere Edge

D. Use an IP sprayer from the load balancing component of the WebSphere Edge Components

Answer: D

16. Which two components provide workload management capabilities?

A. Node agent

B. Web server plug-in

C. Caching proxy

D. Deployment manager

E. Load balancer

Answer: BE

17. A cluster member has suddenly crashed. The administrator is concerned about aborted transactions holding locks in the database. What can an administrator do to release the locks?

A. Unmount the shared file system such as a Network Attached Storage (NAS) where the transaction log is stored

B. Restart the deployment manager and node agents who manage the transaction log

C. Verify another running cluster member has access to the transaction log

D. Reconnect the database where the transaction log is stored

Answer: C

18. What functionality does the Caching Proxy server provide?
- A. Reverse proxy and content-based routing
 - B. Dynamic content caching and integration with servlet caching
 - C. File serving enabler
 - D. HTTP compression
 - E. Integration with Dynacache and third party object caches

Answer: AB

19. Which Web server plug-in setting is NOT configurable using the administrative console?
- A. Load balancing option
 - B. Retry interval
 - C. Refresh configuration interval
 - D. Minimum number of connections

Answer: D

20. When the application server is experiencing normal to heavy usage, which statement most accurately describes optimal pool usage?

- A. The pools will all show similar numerical values, indicating balanced workload is occurring throughout the application server.
- B. Pools used by the application should be released and rebuilt in conjunction with JVM garbage collection cycles ensuring that no stale connections persist.
- C. The Performance Management Interface (PMI) must be explicitly enabled on the application server to be monitored, since it requires CPU resources on the server being monitored.
- D. Pools used by the application should be nearly fully utilized, indicating that resources are being efficiently used.

Answer: D
