Practice Exam: 000-257 Exams

Exam Number/Code: 000-257

Exam Name: test 257,ent apdevwwibm rtnl apdev for wbsph software v6.0

Questions and Answers: 98 Q&As

([IBM certifications III](#))

"test 257,ent apdevwwibm rtnl apdev for wbsph software v6.0", also known as 000-257 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 98 Q&As to your 000-257 exam preparation. In the 000-257 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-257](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications III 000-257 (test 257,ent apdevwwibm rtnl apdev for wbsph software v6.0) examination of original title complete coverage. 000-257 exam questions help you pass the exam.

Just4Study 000-257 Feature:

* High quality - High quality and valued for the 000-257 Exam: 100% Guarantee to Pass Your 000-257 exam and get your IBM certifications III certification.

* Authoritative - Authoritative braindumps with complete details about 000-257 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications III resources, you will minimize your **IBM IBM certifications III** cost and be ready to pass your 000-257 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications III demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-257 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-257 Demo Download

Just4Study offers free demo for IBM certifications III 000-257 exam (test 257,ent apdevwwibm rtnl apdev for wbsph software v6.0). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications III 000-257** examination of original title complete coverage.000-257 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-257

Exam Name: test 257,ent apdevwwibm rtnl apdev for wbsph software v6.0(IBM certifications III)

Questions and Answers: 98 Q&A

[IBM 000-257](#) Test belongs to one of the IBM certifications III certified test, if needs to obtain the IBM certifications III certificate, you also need to participate in other related test, the details you may visit the [IBM certifications III](#) certified topic, in there, you will see all related IBM certifications III certified subject of examination.

Just4Study professional provide IBM certifications III 000-257 the newest Q&A, completely covers 000-257 test original topic. With our complete IBM certifications III resources, you will minimize your IBM certifications III cost and be ready to pass your 000-257 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-257

Title : Test 257,ent apdewwibm rtln apdev for wbsph software v6.0

1. A developer runs a Web service client in an unmanaged environment using a generated Java proxy. The client throws an Exception indicating that it failed to create an InitialContext. The same proxy class used in a managed environment works fine. If the developer did not modify the generated code, what is a likely cause of the problem?

- A. The security context for the JNDI manager cannot be propagated in an unmanaged environment.
- B. The transaction context can not be propagated in an unmanaged environment.
- C. The Web service being invoked uses the SOAP over JMS binding.
- D. Java proxies generated by the wizard can only be run in a managed environment.

Answer: C

2. A developer is creating a client to invoke a secured Web service. The service requires that the body of the SOAP request be encrypted. What type of element in the WS Extension page of the client's Deployment Descriptor should the developer configure?

- A. Integrity
- B. Confidentiality
- C. Security Token
- D. Timestamp

Answer: B

3. Which of the following EJB components can be used as the basis for bottom-up Web services development in Rational Application Developer?

- A. Message-driven bean
- B. Stateful session bean
- C. Stateless session bean
- D. Container-managed entity bean

Answer: C

4. If a developer wants to create a Web service that must conform to all supported WS-I profiles, the developer should:

- A. Set the WS-I Compliance preferences to "Require compliance" before creating the Web service.
- B. Set the WS-I Compliance preferences to "Suggest compliance" before creating the Web service and disable related warnings in the Problems view.
- C. Use the New WS-I Compliant Web Service wizard to create the Web service.
- D. Check the "Require WS-I compliance" checkbox in the New Web Service wizard.

Answer: A

5. A developer is working with read-only EJBs that will have exclusive access to the data store. The BEST way to provide better response time at the expense of increased memory utilization is to use the bean cache section of the

EJB deployment descriptor to set:

- A. Activate at ONCE and load at ACTIVATION.
- B. Activate at ONCE and load at TRANSACTION.
- C. Activate at TRANSACTION and load at ONCE.
- D. Activate at TRANSACTION and load at TRANSACTION.

Answer: A

6. While configuring a datasource in the EAR deployment descriptor editor, the drop-down boxes that allow a JAAS authentication alias to be specified are empty. How can the JAAS authentication alias be configured in order for it to be visible in the drop down box?

- A. Add a J2EE security role with associated users in the EAR deployment descriptor editor.
- B. Add the required JAAS authentication alias in the EAR deployment descriptor editor.
- C. Add the JAAS authentication alias to the datasource reference in the EJB deployment descriptor editor.
- D. Use the WebSphere V6 administrative console to add the JAAS authentication alias.

Answer: B

7. A developer is implementing security requirements for a Web module. Which HTTP Methods would be the MOST likely to cover these requirements?

- A. GET and POST
- B. GET and PUT
- C. GET, POST and PUT
- D. GET, POST, PUT and DELETE

Answer: A

8. Which method in an entity bean would a developer have to code business logic in, if the bean contains references to resources that cannot be serialized?

- A. `ejbRemove()`
- B. `ejbStore()`
- C. `ejbPassivate()`
- D. `ejbFindByPrimaryKey()`

Answer: C

9. A client uses a generated Java proxy to make a call to a Web service. Invoking the method on the proxy results in a `RemoteException`. What is a likely cause?

- A. The server hosting the Web service is unavailable.
- B. An application exception was thrown by the Web service.
- C. A handler on the client was configured incorrectly.
- D. The client was run in an unmanaged environment.

Answer: A

10. In an enterprise application EJB_A invokes a method on EJB_B. How must the EJB run-as security identity be configured in the EJB deployment descriptor for the current setting to allow EJB_A to invoke EJB_B?

- A. Set run-as on EJB_A to role_A.
- B. Set run-as on EJB_A to role_B.
- C. Set run-as on EJB_B to role_A.
- D. Set run-as on EJB_B to role_B.

Answer: B

11. A developer can assign container-managed relationship (CMR) fields by:

- A. Coding the `ejbCreate()` method.
- B. Coding the `ejbPostCreate()` method.
- C. Mapping the primary key to the foreign key.
- D. Generating the code with the relationship wizard.

Answer: B

12. A web module defines a J2EE security role, Managers. Using the appropriate deployment descriptor editor, the developer then binds this role to the User Registry user, supervisors. What file would need to be explored to find this specified association?

- A. application.xml
- B. web.xml
- C. ibm-application-bnd.xmi
- D. ibm-web-bnd.xmi

Answer: C

13. A developer is creating a CMP EJB using an existing database and has begun generating the RDB to EJB mapping by creating a new backend folder. The next step the developer should take is to:

- A. Specify attributes for the EJB.
- B. Map attributes to columns.
- C. Create a bottom up mapping.
- D. Create a top down mapping.

Answer: C

14. A developer wants to use form-based authentication to secure resources in a Web application. In the Web deployment descriptor editor, the developer has set the Authentication method to FORM and configured appropriate security roles. What additional entries need to be configured to protect the resources?

- A. Specify a Login page and create a Security Constraint defining the URL patterns of the resources to be secured and appropriate Authorized roles.
- B. Specify Login and Error pages and create a Security Constraint defining the URL patterns of the resources to be secured and appropriate Authorized roles.
- C. Specify Login and Error pages.
- D. Specify a Login page.

Answer: B

15. The relationship fields for a 1:1 container-managed relationship EJB must be of the same type as:

- A. The local interface of the related EJB.
- B. The remote interface of the related EJB.
- C. The primary key of the underlying table.
- D. The foreign key of the underlying table.

Answer: A

16. When creating a message-driven bean, which interface, if any, can be generated?

- A. The home interface
- B. The remote interface
- C. The listenerPort interface
- D. No interface can be generated

Answer: D

17. Which of the following is an advantage of using the Snippets view to generate code for invoking a method on a Session Bean?

- A. The Service Locator pattern is used and the home is cached.
- B. The Service Locator pattern is used and individual bean instances are cached.
- C. The generated code does not require try-catch blocks to handle errors.
- D. The bean on which the method is invoked can be determined at runtime.

Answer: A

18. A stateless session EJB has been created that uses EJB inheritance. A developer is testing the newly created

child EJB using the Universal Test Client (UTC). The developer has invoked the create method on the child EJB's home interface and is now working with a reference to the child EJB's remote component interface. When the developer expands the child EJB's remote component interface reference within the UTC, the methods inherited from the parent EJB are not displayed. What should the developer do in order to be able to see the inherited methods?

- A. Select "Load Class" under the "Utilities" section of the Universal Test Client and load the parent EJB's remote component interface.
- B. Select "Cast Class" under the "Utilities" section of the Universal Test Client and cast the reference to the parent EJB's remote component interface.
- C. Select "Method Visibility" under the child EJB's remote component interface. On the screen that appears, enable the checkbox beside the parent EJB's remote component interface.
- D. Use the JNDI Explorer to find the parent EJB's home interface, invoke the associated create method, and then cast the remote component interface that is returned to the child EJB's remote component interface type.

Answer: C

19. A developer has two J2EE applications that are loosely coupled via Web services. The two applications are designated as the service application and the client application. The Web service is referenced and called from a Web module in the client application. In which set of files would a developer configure JAX-RPC handlers?

- A. The service application's webservices.xml and the service application's web.xml files
- B. The client application's webservices.xml and the service application's ejb-jar.xml files
- C. The client application's webservices.xml and the service application's web.xml files
- D. The service application's webservices.xml and the client application's web.xml files

Answer: D

20. An application uses container-managed persistence EJBs to update a DB2 database. If database support for handling collisions is required, which of the following access intent policies will provide the best performance?

- A. wsOptimisticUpdate
- B. wsPessimisticUpdate-WeakestLockAtLoad
- C. wsPessimisticUpdate
- D. wsPessimisticUpdate-Exclusive

Answer: B
