Exam : **000-377**

"Test 000-377, IBM WebSphere Application Server Network Deployment V7.0, Core Administration", also known as 000-377 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 112 Q&As to your 000-377 exam preparation. In the 000-377 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 000-377 (Test 000-377, IBM WebSphere Application Server Network Deployment V7.0, Core Administration) examination of original title complete coverage. 000-377 exam questions help you pass the exam.

Just4Study 000-377 Feature:

* High quality - High quality and valued for the 000-377 Exam: 100% Guarantee to Pass Your 000-377 exam and get your IBM certifications I certification.

* Authoritative - Authoritative braindumps with complete details about 000-377 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 000-377 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-377 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-377 Demo Download

Just4Study offers free demo for IBM certifications I 000-377 exam (Test 000-377, IBM WebSphere Application Server Network Deployment V7.0, Core Administration). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I Deployment Professional IBM certifications II IBM certifications III 000-377** examination of original title complete coverage.000-377 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-377

Exam Name: Test 000-377, IBM WebSphere Application Server Network Deployment V7.0, Core Administration(IBM certifications I Deployment Professional IBM certifications II IBM certifications III)

Questions and Answers: 112 Q&A

[IBM 000-377](#) Test belongs to one of the IBM certifications I Deployment Professional IBM certifications II IBM certifications III certified test, if needs to obtain the IBM certifications I Deployment Professional IBM certifications II IBM certifications III certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I Deployment Professional IBM certifications II IBM certifications III](#) certified topic, in there, you will see all related IBM certifications I Deployment Professional IBM certifications II IBM certifications III certified subject of examination.

Just4Study professional provide IBM certifications I Deployment Professional IBM certifications II IBM certifications III 000-377 the newest Q&A, completely covers 000-377 test original topic. With our complete IBM certifications I Deployment Professional IBM certifications II IBM certifications III resources, you will minimize your IBM certifications I Deployment Professional IBM certifications II IBM certifications III cost and be ready to pass your 000-377 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-377

Title : Test 000-377, IBM WebSphere Application Server Network Deployment V7.0, Core Administration

1. Why does IBM WebSphere Application Server Network Deployment utilize node groups to implement a distributed environment? To:

- A. segment multiple security domains within a WebSphere cell.
- B. define the logical grouping of application servers to scale horizontally or vertically.
- C. enable mixed nodes with different capabilities within the same cell for administration purposes.
- D. allow application servers having the same applications installed to be grouped logically for workload management.

Answer: C

2. What is the advantage of deploying more than one messaging engine and linking them together in a topology that has multiple interconnected service integration buses (SIBus)?

- A. Enable protocol transformation between buses.
- B. Improve the availability of the persistent storage.
- C. Spread messaging workload across multiple servers.
- D. Preserve message ordering through the messaging engines.

Answer: C

3. A system administrator wants to improve response time and system load of a Web application running in a clustered environment.

What might the system administrator attempt to decrease the response time of the Web application?

- A. Configure dynamic caching
- B. Enable memory-to-memory replication
- C. Configure session replication to use a database.
- D. Ensure that all cluster members are in the same node group.

Answer: A

4. What would have to be configured in order to implement memory-to-memory HTTP Session persistence?

- A. Dynamic cache service and HTTP plug-in
- B. Synchronization service and embedded Web server
- C. Distributed environment settings in the web containers
- D. Fast Response Cache Accelerator (FRCA) and external Web server

Answer: C

5. In order for a deployment manager to participate in a flexible management environment, which one of the following steps must be completed?

- A. Register directly with the job manager.
- B. Register with the node agent on the job managers host.
- C. Register with an administrative agent on the job managers host
- D. First register with a local administrative agent, and then register with the job manager.

Answer: A

6. global security is turned on for a federated cell using a file-based federated repository. The administrator created a new security domain called App1Domain using local operating system registry and mapping it to the application server. The administrator also created a new local operating system user ID App1Admin?

Which one of the following is true when the new security domain is enabled to secure Application1?

- A. The administrator can access Application1.
- B. The administrator can disable Application1 security.
- C. App1Admin can disable Application1 security.
- D. App1Admin can access the administrative console.

Answer: B

7. What are the three possible replication types for the dynamic caching service?

- A. Client mode
- B. Server mode
- C. Not shared
- D. Push only
- E. Both push and pull
- F. Broadcast mode

Answer: CDE

8. When backing up WebSphere Application Server configuration and runtime settings, which of the following commands would be relevant?

- A. backupConfig -location location
- B. restoreConfig -profileName profile_name -backupFile backupFile_name
- C. manageprofiles -backupProfile -profileName profile_name -backupFile backupFile_name
- D. wsadmin -backupConfig -profileName profile_name -backupFile backupFile_name

Answer: C

9. Which of the following items best gives a reason to perform an unattended installation of WebSphere Application Server?

- A. The installation for the particular target platform is being done for the first time.
- B. The installation for the particular target platform has been done before and will be repeated in the future.
- C. The installation for WebSphere Application Server would initially not be able to include administrative security.
- D. The installation for the particular target platform is expected to require a lot of adjustments to be done over several installation attempts.

Answer: B

10. Which type of server is recommended to be placed in the demilitarized zone (DMZ)?

- A. Generic servers
- B. Application servers

- C. Managed HTTP servers
- D. Unmanaged HTTP servers

Answer: D

11. What is the sequence of components which would typically be involved in the flow of a request from a Web browser to a servlet?

- A. External HTTP Server, HTTP Server Plug-in and EJB Container
- B. Load Balancer, Embedded HTTP Server, HTTP Server Plug-in and Web Container
- C. Edge Component, HTTP Server Plug-in, external HTTP Server, and Web Container
- D. External HTTP Server, HTTP Server Plug-in, embedded HTTP Server and Web Container

Answer: D

12. Aside from the administrative console and the addNode command, what other facilities does WebSphere Application Server provide for federating nodes into cells?

- A. wsadmin
- B. The administrative agent
- C. The Profile Management Tool (PMT)
- D. Rational Application Developer Assembly and Deploy Module

Answer: C

13. How could an administrator manage multiple stand-alone application servers on different hosts in a network?

By using:

- A. a job manager which administers multiple application server nodes through administrative agents.
- B. a deployment manager which administers multiple application server nodes through their node agents.
- C. a high availability manager which administers multiple application server nodes through their administrative agents.
- D. an administrative agent which administers multiple application server nodes through their administrative service.

Answer: A

14. Which of the following is an option given in the First Steps application that runs automatically after installation?

- A. Start the server.
- B. Execute wsadmin.
- C. Configure resources.
- D. Run the Snoop servlet.

Answer: A

15. When configuring automated transaction peer recovery for recovering in-flight transactions from the transaction log, what is required from the file system?

- A. RAID disks must be used to host the transaction log
- B. Exclusive read only file locks and the ability to invalidate them
- C. File locking must be disabled for Network File System Version 4 (NFSv4)
- D. Lease-based exclusive locks on files

Answer: D

16. What can the system administrator do to distribute incoming HTTP traffic across a farm of Web servers?

- A. Enable server affinity for each HTTP server in the cluster
- B. Implement the Tivoli Access Manager as a load balancer
- C. Implement the caching proxy server component of the Edge Components
- D. Use the Load Balancer component of the Edge Components

Answer: D

17. Which one of the following can be used to instantiate resource adapter classes for establishing and maintaining resource connections?

- A. a data source

- B. connection factories
- C. connection pool settings
- D. a JMS activation specification

Answer: B

18. Which of the following statements most accurately describes the relationship between a flexible management topology and the network deployment cell?

- A. Flexible management can be an alternative to the network deployment cell model.
- B. Flexible management eliminates the need for node agents in a network deployment cell.
- C. The flexible management topology is a replacement for the network deployment cell.
- D. The flexible management job manager can perform all the tasks of the deployment manager.

Answer: A

19. A system administrator needs to modify the configuration of an enterprise application within a flexible management environment. The system administrator can make the modification using wsadmin scripts by connecting to which of the following components?

- A. Node agent
- B. Job manager
- C. Work manager
- D. Administrative agent
- E. Deployment manager

Answer: BE

20. What is the Data Replication Service (DRS) used for? Please choose three from the following.

- A. Node agents
- B. Web servers
- C. Caching Proxy
- D. Dynamic cache replication
- E. HTTP session persistence and failover
- F. Stateful session EJB persistence and failover

Answer: DEF
