

## 000-535 braindumps

### IBM IBM certifications I

#### 000-535: IBM Certified Specialist- Advanced Manufacturing

**Practice Exam:** 000-535 Exams

**Exam Number/Code:** 000-535

**Exam Name:** IBM Certified Specialist- Advanced Manufacturing

**Questions and Answers:** 94 Q&As

( [IBM certifications I](#) )

"IBM Certified Specialist- Advanced Manufacturing", also known as 000-535 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 94 Q&As to your 000-535 exam preparation. In the 000-535 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-535](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 000-535 (IBM Certified Specialist- Advanced Manufacturing) examination of original title complete coverage. 000-535 exam questions help you pass the exam.

#### **Just4Study 000-535 Feature:**

\* High quality - High quality and valued for the 000-535 Exam: 100% Guarantee to Pass Your 000-535 exam and get your IBM certifications I certification.

\* Authoritative - Authoritative braindumps with complete details about 000-535 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 000-535 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-535 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 000-535 Demo Download**

Just4Study offers free demo for IBM certifications I 000-535 exam (IBM Certified Specialist- Advanced Manufacturing). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I 000-535** examination of original title complete coverage.000-535 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 000-535**

Exam Name: IBM Certified Specialist- Advanced Manufacturing( IBM certifications I )

Questions and Answers: 94 Q&A

[IBM 000-535](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

Just4Study professional provide IBM certifications I 000-535 the newest Q&A, completely covers 000-535 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-535 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-535

Title : IBM Certified Specialist- Advanced Manufacturing

1. Which of the following best describes how Takt Management can be used in a continuous improvement process?
- A. Production targets are continually increased based on growing demand resulting in Takt targets increasing to keep up with demand.
  - B. Average hourly Takt information is used to identify weak and strong performers; this information is used to improve the employee appraisal system.
  - C. Detractors and enhancers are identified that highlight which shift is outproducing the others; this information is used in a reward and incentive program.
  - D. Output detractors are identified and reduced while output enhancers are identified and exploited on an ongoing basis resulting in overall output gains.

Answer: D

2. Which of the following process steps is a value-add step in a physician's office?
- A. Complete patient information at registration.
  - B. Administer injection
  - C. Prepare hypodermic syringe
  - D. Relocate patient from the waiting room into the examining room.

Answer: B

3. Which of the following statements best describes strategic kanbans?
- A. They are created to address unforeseen situations.
  - B. They become regular kanbans after the condition ends.
  - C. They are created to prevent output loss due to a known condition.
  - D. They are useful because of their minimum and maximum limits can be easily changed for greater production flexibility.

Answer: C

4. What information would be required to establish a baseline model?
- A. MCE, Takt, and WIP
  - B. Material costs, WIP, and CT
  - C. Batch size, MCE, and capacity
  - D. Batch sizes, number of operators available, process cycle time

Answer: D

5. Which of the following is a critical rule for the successful implementation of a Kanban system?
- A. Limits may be violated by the supplier only.
  - B. Once established, limits should never change, regardless of the reason.

- C. Limits should be reviewed regularly, and changed when necessary by a central authority.
- D. A customer should feel free to request a violation of established limits for any reason, because they best recognize their own needs.

Answer: C

6. A team has a heavily conventional group style. Their solutions are below average and they do not achieve synergy. The team members feel that the group could be doing somewhat better. What is the best suggestion for minimizing the negative impact of this style?

- A. Emphasize the importance of arriving at a consensus decision - one that all members can buy into.
- B. Establish a feeling of unity among group members. Remind the team that when the group wins, everyone wins.
- C. Play "devil's advocate" when group members keep proposing the same safe solution. Ask probing questions to pinpoint the pros and cons of their solution.
- D. Encourage the more reserved group members to speak up. They may be able to supply missing information and a fresh perspective. Make sure to include them so they understand their value to the team.

Answer: C

7. Which of the following is the primary responsibility of the core team, when developing the business case?

- A. Gather data for the industrial engineering (IE) lead.
- B. Provide all necessary information to the financial analyst (FA).
- C. Oversee the AMS process looking for mistakes and taking corrective action when necessary.
- D. Ensure that all appropriate metrics are quantified consistently across all proposed solutions.

Answer: D

8. Which of the following best describes the benefits of Takt Management in a manufacturing line?

- A. Hourly output is monitored versus hourly demand so that production shortfalls can be identified and addressed.
- B. Hourly fluctuations in WIP are monitored and reasons for special cause variation are identified and addressed.
- C. As constrictions, or bottlenecks, move throughout the manufacturing line, the bottleneck is identified and Takt targets are increased.
- D. Ongoing process improvement is achieved by identifying enhancers and detractors to output resulting in improvement opportunities for the line.

Answer: D

9. Which of the following explains the purpose of manufacturing values?

- A. They allow each part of the organization to handle challenges as they see fit.
- B. They provide flexibility in decision-making in a constantly changing environment.
- C. They make decisions by managers predictable to the workforce and consistent with common shared beliefs.
- D. They allow each department to dictate its own reasonable set of values and operate in a way that makes the most sense, given their processes.

Answer: C

10. One of an organization's productivity values is "Prioritization is a major barrier to production." Which of the following run rules supports that value?

- A. First In First Out (FIFO) will be practiced in all areas.
- B. Engineering builds are exempt from any prioritization run rules.
- C. Complete Takt charts hourly.
- D. Respect customer Kanban limits.

Answer: A

11. Which of the following is the best example of how improving cycle time increases competitiveness?

- A. Improving cycle time requires a substantial financial investment which results in higher cost of goods sold.
- B. Improving cycle time requires more employees which enable the factory to better respond to the customer's needs.
- C. Improving cycle time results in less inventory, reducing the cost of goods sold and improving cost competitiveness.
- D. Improving cycle time requires more WIP in the factory which creates a greater capacity to meet the customer's

needs.

Answer: C

12. Which of the following best describes how to increase the Manufacturing Cycle Efficiency (MCE) in a manufacturing process?

- A. Eliminate waste in the process.
- B. Increase the overtime requirement.
- C. Increase the time spent on testing the product.
- D. Increase the number of operators in the process.

Answer: A

13. Which of the following WIP management techniques promotes the concept of root cause analysis?

- A. A capacitated release strategy implementation
- B. Dynabans implementation
- C. Kanbans implementation
- D. Takt management implementation

Answer: D

14. Which of the following best describes how Group Technology is applied in Manufacturing?

- A. It combines workers with similar skills into groups so that workflows can be optimized.
- B. It combines common process equipment into a group so that the use of equipment resources can be optimized.
- C. It combines common people skill and equipment into groups so that the people and equipment resources can be optimized.
- D. It combines products with similar raw process times, routings, and product-critical attributes so that product flow can be optimized.

Answer: D

15. Which of the following is the best definition of Manufacturing Cycle Time?

- A. It is the total time it takes to process, ship and deliver a product to a customer.
- B. It is the total time that it takes to process a product through a Manufacturing line.
- C. It is the total time it takes to process a product from receipt of raw materials to stock through delivery to the customer.
- D. It is the total time it takes to process a product from receipt of raw materials through the last manufacturing operation excluding non-value-added process steps.

Answer: B

16. Which of the following is a common cause of a constriction in a manufacturing line?

- A. Overproduction by suppliers overwhelms the bottleneck with too much WIP.
- B. The step following the bottleneck is NOT pulling product quickly enough.
- C. Large batch sizes and long setup times create excess WIP at the bottleneck.
- D. Excess resources are allocated, which elevate the output of the constriction.

Answer: C

17. Which of the following best describes an example of subordinating all decisions to the output capability of the constriction, or bottleneck?

- A. Additional capacity is obtained by purchasing the capital equipment needed to keep up with demand.
- B. The output of all operations in front of the bottleneck, including release, is reduced to match that of the constriction.
- C. The output capabilities for processes downstream from the bottleneck are increased so that product will move quickly once it passes the constriction.
- D. Capacity figures for all resources are reviewed and compared with demand in order to determine the bottleneck department so that work schedules can be established.

Answer: B

18. Which of the following is a constructive cultural characteristic of an effective team?
- A. The team leader is expected to provide initiative.
  - B. The team takes a "failure is not an option" attitude when identifying goals.
  - C. Individual accomplishment is recognized and rewarded as a model for other team members.
  - D. People are encouraged to be decisive, take moderate risks, take initiative and be accountable.

Answer: D

19. Which of the following is an attribute of an effective team?

- A. Works toward reaching consensus
- B. Expects conformity from team members
- C. Uses a democratic process for decision-making
- D. Encourages discussion until the leader closes the topic

Answer: A

20. Which of the following is the most effective technique for performing queuing analysis?

- A. Process Mapping
- B. Pareto Analysis
- C. Simulation Modeling
- D. Statistical Process Analysis

Answer: C
