

## 000-641 braindumps IBM IBM certifications I

### 000-641: rational robot

**Practice Exam:** 000-641 Exams

**Exam Number/Code:** 000-641

**Exam Name:** rational robot

**Questions and Answers:** 54 Q&As

( [IBM certifications I](#) )

"rational robot", also known as 000-641 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 54 Q&As to your 000-641 exam preparation. In the 000-641 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-641](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 000-641 (rational robot) examination of original title complete coverage. 000-641 exam questions help you pass the exam.

### **Just4Study 000-641 Feature:**

\* High quality - High quality and valued for the 000-641 Exam: 100% Guarantee to Pass Your 000-641 exam and get your IBM certifications I certification.

\* Authoritative - Authoritative braindumps with complete details about 000-641 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 000-641 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-641 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

### **Free 000-641 Demo Download**

Just4Study offers free demo for IBM certifications I 000-641 exam (rational robot). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I 000-641** examination of original title complete coverage.000-641 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 000-641**

Exam Name: rational robot( IBM certifications I )

Questions and Answers: 54 Q&A

[IBM 000-641](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I

certificate, you also need to participate in other related test, the details you may visit the [IBM certifications](#) | certified topic, in there, you will see all related IBM certifications | certified subject of examination.

Just4Study professional provide IBM certifications | 000-641 the newest Q&A, completely covers 000-641 test original topic. With our complete IBM certifications | resources, you will minimize your IBM certifications | cost and be ready to pass your 000-641 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

Exam : IBM 000-641

Title : Rational Robot

1. Given: You are debugging a test script. What can you add to a script to stop execution at a specified location?

- A. Setpoint
- B. Halt
- C. Wait
- D. Delay
- E. Breakpoint

Answer: E

2. Verification points can be renamed after the script is recorded.

- A. True
- B. False

Answer: A

3. Which of the following statements are correct concerning verification points? (Select all that apply.)

- A. They can be played back if they are copied into a SBL library file.
- B. They test the state of an object across builds of the application.
- C. They contain baseline data to compare to the actual results.
- D. They can be played back with or without a script.
- E. They reside as separate files in the test datastore, along with the scripts.

Answer: BC

4. Given: You have minimized the Robot main window during recording and you are using the default keyboard mappings. Which of the following procedures will bring the Robot main window back to the foreground? (Select all that apply.)

- A. Press F5 .
- B. Click Robot on the Windows taskbar.
- C. Click Open Robot Window on the GUI Record toolbar.
- D. Use the hot key combination CTRL+SHIFT+F .

Answer: BCD

5. What is the purpose of the Menu verification point type?

- A. To compare the properties of a window; e.g. normal, minimized, maximized, or hidden
- B. To compare the location of the application menu across builds
- C. To capture and compare the state, shortcut keys, and content of the application menu
- D. To capture and compare properties of standard Windows objects

Answer: C

6. Which of the following can be viewed through the Comparators? (Select all that apply.)

- A. Causes of application failures
- B. Actual results of verification points for this run
- C. Messages sent to external log files
- D. Baseline data for verification points

Answer: BD

7. Given: You have debugged the test scripts and are ready to use them for automated testing. What kind of window can cause the script playback process to be interrupted?

- A. Expected error window
- B. Expected sequential window
- C. Unexpected active window
- D. Unexpected hidden window

Answer: C

8. What is the Datapool data type?

- A. The database tool used to create the data set.
- B. The specified number of columns of data to use.
- C. The specified number of rows of data to use in the script.
- D. The kinds of data the script will send to the application under test.

Answer: D

9. What procedure is used to access the Rational Comparators?

- A. In the Test Log, select a verification point and view it.
- B. Using Notepad, view the .CMP file directly.
- C. Double-click the compile error in the Robot script.
- D. In TestManager, click File > Open > Comparators .
- E. In Robot, click File > Open > Comparators .

Answer: A

10. How can a synchronization failure between the test script and the application be corrected? (Select all that apply.)

- A. Use external data files.
- B. Use a wait state.
- C. Adjust delays between commands.
- D. View data with the Comparators.
- E. Customize test log messages.

Answer: BC

11. What aspect of the By Location identification method is used with an Object Data verification point?

- A. Screen and pixel coordinate locations
- B. User-defined DLL locations
- C. Columns and Rows By Locations
- D. Value and Key By Locations

Answer: C

12. Given: You are using the Object Finder Tool to select an object to test in the application. What information can the Test Tip display? (Select all that apply.)

- A. Recognition method
- B. Development environment name
- C. Code complexity level
- D. Object type

Answer: ABD

13. For what purpose are global header files used in Robot?

- A. To declare custom functions, sub procedures, constants or variables to be used with scripts
- B. To dynamically add verification points to scripts
- C. To automatically add comments or statements to scripts
- D. To define custom procedures that can be called from scripts

Answer: A

14. Why would timers be inserted in a script? (Select all that apply.)

- A. To keep track of how long it takes to develop (record) the script
- B. To schedule the start time for a script in a suite
- C. To measure the time it takes to perform an activity such as a database transaction
- D. To measure the time it takes a verification point to execute across platforms or builds

Answer: CD

15. What verification points can be tested with selected data in grids?

- A. Region Image, Alphanumeric, File Comparison
- B. Object Data, Object Properties, and By Location
- C. Clipboard, Region Image, and Window Image
- D. Clipboard, Menu, and Object Data

Answer: D

16. The Comparators show a comparison of baseline data and actual data, with the net difference highlighted.

- A. True
- B. False

Answer: A

17. Some window regions (for example, date fields) may change every time a test is run. What Image Comparator feature allows you to avoid such regions during testing?

- A. Baseline image
- B. Actual image
- C. Differences
- D. Mask/OCR

Answer: D

18. Shell scripts can call other shell scripts.

- A. True
- B. False

Answer: A

19. Which of the following are types of verification points available in Robot? (Select all that apply.)

- A. Window Image, Region Image, Masked Image
- B. Data Grid, Numeric Range, Case-Sensitive
- C. Window Existence, Window Image, Module Existence
- D. Alphanumeric, Notepad, File Comparison
- E. Object Data, Menu, Object Properties

Answer: CE

20. What is the purpose of the Object Properties verification point type?

- A. To compare the properties of a window; e.g. normal, minimized, maximized, or hidden
- B. To capture and compare properties of standard Windows objects
- C. To compare the properties of the application; e.g. control location, menu options, etc.
- D. To test data in Windows objects that contain text; for example, pushbuttons and labels

Answer: B
