IBM DB2

000-702: db2 udb v8.1 for z/os database administration

Practice Exam: 000-702 Exams

Exam Number/Code: 000-702

Exam Name: db2 udb v8.1 for z/os database administration

Questions and Answers: 122 Q&As

([DB2](#))

Exam : [000-702](#)

"db2 udb v8.1 for z/os database administration", also known as 000-702 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 122 Q&As to your 000-702 exam preparation. In the 000-702 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM DB2 000-702 (db2 udb v8.1 for z/os database administration) examination of original title complete coverage. 000-702 exam questions help you pass the exam.

Just4Study 000-702 Feature:

* High quality - High quality and valued for the 000-702 Exam: 100% Guarantee to Pass Your 000-702 exam and get your DB2 certification.

* Authoritative - Authoritative braindumps with complete details about 000-702 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed DB2 resources, you will minimize your **IBM DB2** cost and be ready to pass your 000-702 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free DB2 demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-702 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-702 Demo Download

Just4Study offers free demo for DB2 000-702 exam (db2 udb v8.1 for z/os database administration). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM DB2 000-702** examination of original title complete coverage.000-702 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-702

Exam Name: db2 udb v8.1 for z/os database administration(DB2)

Questions and Answers: 122 Q&A

[IBM 000-702](#) Test belongs to one of the DB2 certified test, if needs to obtain the DB2 certificate, you also need to participate in other related test, the details you may visit the [DB2](#) certified topic, in there, you will see all related DB2 certified subject of examination.

Just4Study professional provide DB2 000-702 the newest Q&A, completely covers 000-702 test original topic. With our complete DB2 resources, you will minimize your DB2 cost and be ready to pass your 000-702 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-702

Title : DB2 UDB V8.1 For Z/OS DataBase Administration

1. The following query can be used to check the catalog for consistency:

```
SELECT DBNAME, NAME
FROM SYSIBM.SYSTABLESPACE TS
WHERE NOT EXISTS
(SELECT *
FROM SYSIBM.SYSDATABASE DB WHERE DB.
NAME = TS.DBNAME);
```

Which specific condition is this query testing?

- A. It validates all of the columns in SYSTABLESPACE.
- B. It finds all of the table spaces in SYSDATABASE that do not have any rows in SYSTABLESPACE.
- C. It finds all of the databases in SYSDATABASE that do not have corresponding rows in SYSTABLESPACE.
- D. It finds all of the databases in SYSTABLESPACE that do not have corresponding rows in SYSDATABASE.

Answer: D

2. The following statement is executed:

```
ALTER TABLESPACE DB2CERT.CERTTS LOCKSIZE ANY FREEPAGE 10
```

Which of the following is the result of the statement?

- A. DB2 chooses the lock size and there is one free page after each 10 pages.
- B. DB2 chooses the lock size and there is 10 percent free space in each page.
- C. DB2 chooses the LOCKMAX value and there is 10 percent free space in each page.
- D. DB2 chooses the maximum number of locks and there is one free page after each 10 pages.

Answer: A

3. A significant increase in getpages reported in performance trace output for a SELECT statement is most likely caused by

- A. a change in access path
- B. a decrease in bufferpool sizes
- C. a run-time reduction in parallel degree
- D. normal insert activity on the objects involved

Answer: A

4. A DBA has detected that incorrect updates to the PAYROLL table in the PERSONNEL database were made recently. In order to determine what application is making these updates, the DBA starts an AUDIT trace. Which of the following is necessary to identify all authorization-ids that update this table in the future?

- A. The AUDIT TRACE is sufficient
- B. ALTER TABLE PAYROLL AUDIT CHANGES

- C. ALTER TABLE PAYROLL AUDIT UPDATES
- D. ALTER DATABASE PERSONNEL AUDIT ALL

Answer: B

5. Periodic incremental image copies are taken on a regular basis. Which of the following would best help reduce the recovery time?

- A. Purge old log records
- B. Purge old incremental copies
- C. Take more frequent incremental image copies
- D. Merge the incremental copies with the last full copy

Answer: D

6. In the PLAN_TABLE for an SQL statement, the ACCESTYPE is "N" and the METHOD="2". Given these PLAN_TABLE values, which type of access path is DB2 using to retrieve the data?

- A. A table space scan with a sort
- B. A non-matching index scan with a sort
- C. A two-column match in a nested loop join
- D. IN-list index access with merge scan join

Answer: D

7. A table encounters heavy insert processing every night. Although the number of inserts remains unchanged, the time that the insert processing takes increases each night. What should the DBA examine?

- A. DB2 log parameters
- B. Free space allocation
- C. Buffer pool thresholds
- D. Primary space allocation

Answer: B

8. Running accounting classes 1 and 2 for performance analysis is recommended for which of the following reasons?

- A. DB2 time can be separated from application time.
- B. A detailed view of the access path is reported.
- C. Detail is reported on the I/O wait time.
- D. Detail is reported down to the package and DBRM level.

Answer: A

9. A nightly batch job experiences frequent deadlocks with other DB2 jobs. Which of the following should the DBA try to minimize the deadlocks?

- A. Rebind the batch job with repeatable read
- B. Increase the log frequency in the batch job
- C. Increase the DB2 system checkpoint frequency
- D. Decrease the time between commits in the batch job

Answer: D

10. Resource class DSNR is used to protect access to DB2 from different environments. Which of the following profile names in the DSNR resource class could be used to allow access to DB2 subsystem DSN1 from IMS?

- A. DSN1.DLI
- B. DSN1.IMS
- C. DSN1.MASS
- D. DSN1.SASS

Answer: C

11. To minimize storage usage in a stored procedure address space, which of the following parameters could be altered?

- A. APPLENV
- B. CTHREAD
- C. NUMTCB
- D. STORTIME

Answer: C

12. The following command is issued:

```
-DIS DB(DBTST1A) SPACE(*) RESTRICT LIMIT(*)
```

The result of the command shows that TS1 has the status RW,CHKP,COPY.

Which of the following utilities should the DBA execute first to ensure appropriate data integrity and successful execution in removing the restrictions in a production environment?

- A. CHECK DATA
- B. COPY TABLESPACE
- C. REPAIR NOCOPYPEND
- D. REPAIR NOCHECKPEND

Answer: A

13. A DISPLAY of a table space shows that there are pages in the LPL. Which of the following utilities CANNOT be run on this object?

- A. REORG
- B. REPORT
- C. REBUILD INDEX
- D. REPAIR with the SET statement

Answer: A

14. A newly created partitioned table space has been created with the DEFINE NO attribute. Which of the following is the best way to ensure partition parallelism when initially loading the table?

- A. No special considerations needed. Partition parallelism will always be enforced.
- B. For a partitioned table space with DEFINE NO, the initial load cannot use partition parallelism.
- C. Run a load job without specifying the PART n clause. DB2 will automatically use partition parallelism when possible.
- D. Run a load job with an empty data file for the first partition. Then run the load jobs for each partition in parallel.

Answer: D

15. When DB2 is started at a remote site for disaster recovery purposes, the following DSNZPARM value should be in effect:

```
sitetype=recoverysite
```

Which of the following best describes the meaning of this parameter?

- A. The site is named as an alternative for recovery purposes.
- B. Image copies are made for local recovery but can be used at the recovery site.
- C. Image copies are made for recovery site recovery but can be used at the local site.
- D. Image copies are made for remote site recovery but have to be manually registered in syscopy using DSNJU003 to be accepted.

Answer: A

16. A developer with authorization-id DEV1 needs to define a trigger on a table named ACCOUNT in order to support logic to determine the state of the data before it is inserted into the table. Which statement grants a privilege that is necessary to perform the action?

- A. GRANT TRIGGER ON TABLE ACCOUNT TO DEV1
- B. GRANT CREATE TRIGGER ON TABLE ACCOUNT TO DEV1
- C. GRANT BEFORE TRIGGER ON TABLE ACCOUNT TO DEV1
- D. GRANT SELECT TRIGGER ON TABLE ACCOUNT TO DEV1

Answer: B

17. To recover a DB2 subsystem at a remote site, tape backups of all user data are required at the recovery site. The DBA currently has local site image copy on disk. Which of the following should the DBA do next?

- A. Invoke the COPY utility to create a tape remote site backup from the existing disk image copy.
- B. Run IEBGENER to copy the existing disk image copy to tape and manually register this copy in SYSCOPY.
- C. Run the COPYTOCOPY utility to create a tape image copy for the remote site from the original disk local image copy.
- D. Run the DSN1COPY utility to create a tape image copy for the remote site from the original disk local backup and manually register the copy in SYSCOPY.

Answer: C

18. A single index is defined with two columns: COL1 and COL2. Which of the following WHERE clauses is eligible to utilize this index for matching multi-index access?

- A. WHERE COL1 = 1 OR COL2 = 'AB'
- B. WHERE COL1 IN (1, 2, 3, 4, 5)
- C. WHERE COL1 = 1 OR (COL1 <> 2 AND COL2 = 'AB')
- D. WHERE COL1 = 1 OR (COL1 = 2 AND COL2 <> 'AB')

Answer: D

19. The DBA has noticed an increase in FARINDREF and NEARINDREF values from running RUNSTATS. Which of the following is the most likely cause?

- A. Updates to variable-length columns resulting in an increase in the table row length.
- B. Updates to variable-length columns in the row length of a padded index.
- C. Lack of available freespace in the index causing page splits on inserts.
- D. Lack of available freespace causing inserts to be out of clustering sequence.

Answer: A

20. What feature is NOT an advantage of utilizing WLM-established address spaces for stored procedures?

- A. Stored procedures can run as a SUB program.
- B. Incoming request for stored procedures are handled in a first-in, first-out order.
- C. Stored procedures inherit the z/OS dispatching priority of the DB2 thread that issues the CALL statement.
- D. Stored procedures can access protected resources with the authority of the creator of the stored procedure.

Answer: B
