000-715: IBM Certified Soltion Implementer-DB2 Alphablox

Practice Exam: 000-715 Exams

Exam Number/Code: 000-715

Exam Name: IBM Certified Soltion Implementer-DB2 Alphablox

Questions and Answers: 122 Q&As

([IBM certifications II](#))

"IBM Certified Soltion Implementer-DB2 Alphablox", also known as 000-715 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 122 Q&As to your 000-715 exam preparation. In the 000-715 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-715](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications II 000-715 (IBM Certified Soltion Implementer-DB2 Alphablox) examination of original title complete coverage. 000-715 exam questions help you pass the exam.

Just4Study 000-715 Feature:

* High quality - High quality and valued for the 000-715 Exam: 100% Guarantee to Pass Your 000-715 exam and get your IBM certifications II certification.

* Authoritative - Authoritative braindumps with complete details about 000-715 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications II resources, you will minimize your **IBM IBM certifications II** cost and be ready to pass your 000-715 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-715 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-715 Demo Download

Just4Study offers free demo for IBM certifications II 000-715 exam (IBM Certified Soltion Implementer-DB2 Alphablox). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications II 000-715** examination of original title complete coverage.000-715 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-715

Exam Name: IBM Certified Soltion Implementer-DB2 Alphablox(IBM certifications II)

Questions and Answers: 122 Q&A

[IBM 000-715](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination.

Just4Study professional provide IBM certifications II 000-715 the newest Q&A, completely covers 000-715 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-715 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-715

Title : IBM Certified Solution Implementer - DB2 Alphablox

1. Which of the following Alphablox EAR files must be installed on the application server in order to use Alphablox?

- A. AlphabloxAdmin
- B. AlphabloxServer
- C. ApplicationStudio
- D. AlphabloxPlatform

Answer: D

2. A customer has a large number of relational databases. Alphablox supports relational database connection pooling using the Application Server Data Source adapter. In order to take advantage of this feature within Alphablox, the customer must choose from a list of Application Servers to install Alphablox into for this feature to be available. Which of the following options list Application Servers that can use this Data Source adapter?

- A. WebLogic and WebSphere Application Server
- B. WebLogic, WebSphere Application Server, and JBoss
- C. WebLogic, Apache Tomcat, and WebSphere Application Server
- D. WebSphere Portal Server, WebSphere Application Server, Apache Tomcat, and WebLogic

Answer: A

3. A customer finds that DB2 Alphablox is running out of memory due to DB2 Alphablox cubes using large amounts of memory. The customer does not want to restructure the application. Which two of the following actions should the customer take to correct this? (Select Two Answers)

- A. Limit the size of the in-memory cache for each cube.
- B. Install a second instance of Alphablox on the same machine.
- C. Decrease the memory capacity of the computer in which DB2 Alphablox runs.
- D. Limit the number of Alphablox applications running at one time via the Alphablox Administration panel.
- E. Select the Dynamic (Members loaded into memory as needed) option and change the Dynamic Member Cache Settings.

Answer: AE

4. Which of the following statements will help a customer who is new to web applications evaluate the integration options provided by Alphablox for user management?

- A. Alphablox provides three out-of-the-box solutions for security and personalization: Alphablox Repository-based User Manager, LDAP-based User Manager, and an NTLM User Manager.
- B. Alphablox provides two out-of-the-box solutions for security and personalization: Alphablox Repository-based User Manager and LDAP-based User Manager.
- C. Users, groups, and roles are accessible programmatically through the server-side RepositoryBlox API.
- D. Users and roles are accessible programmatically through the server-side RepositoryBlox API.

Answer: B

5. Which of the following is the best way to ensure successful migration of applications from a test environment to a production environment?

- A. Make sure the production server has the latest versions of all software.
- B. Make sure the test server has the latest versions of all software.
- C. Keep the test and production servers at the same software levels.
- D. Keep the test and production servers at different software levels.

Answer: C

6. Alphablox is certified to run on certain versions of the Linux operating system. However, there are certain limitations that must be recognized when using this operating system with Alphablox. Which of the following statements are correct limitations imposed on Alphablox under the Linux operating system? (Select Three Answers)

- A. 64-bit Linux systems are not currently supported by Alphablox.
- B. Alphablox running on Linux on z-Series hardware has a known memory size limitation.
- C. The X11 libraries must be installed on the Linux system for Alphablox to start up correctly.
- D. BEA WebLogic application servers are not currently supported by Alphablox on Linux servers.
- E. Linux on Intel x86 processors are required as a certified environment for Alphablox.
- F. Microsoft OLEDB is currently not ported to Linux which prevents access to Microsoft Analysis Services as a data source for Alphablox when running on Linux.

Answer: CDF

7. Alphablox is installed in an environment that uses ActiveDirectory to authenticate users to the applications. Users also need to be created in Alphablox to complete the authentication process. The best way to keep the users in sync between Alphablox and ActiveDirectory is to do which of the following?

- A. Enable the Automatically Generate User Accounts option on the Alphablox server.
- B. Disable authentication on the Alphablox server and only authorize the user in ActiveDirectory.
- C. Set up a process where user accounts are created in ActiveDirectory and in Alphablox prior to giving access to the user.
- D. Develop a process in the applications to automatically add the user to the Alphablox repository the first time a user logs in.

Answer: A

8. A customer is using the Alphablox database repository on their production server and wants to schedule regular, automatic backups for the repository. Which of the following tools should be recommended to the customer to accomplish this goal?

- A. The DB2 Alphablox content manager.
- B. The DB2 Alphablox Administration web pages.
- C. The native database's backup/recovery tools.
- D. The DB2 Alphablox repository conversion utility.

Answer: C

9. Performance testing tools such as Rational Robot and LoadRunner can be used to test Alphablox performance using which of the following?

- A. JavaScript
- B. Java
- C. HTTP
- D. HTML

Answer: C

10. A customer desires to customize and personalize the appearance of Alphablox components on their web pages based on a user's profile. Many aspects of the user's profile are already stored in various locations. To pull these together, the customer is considering using Alphablox's support for custom properties. Which of the following is the

correct statement based on this situation?

- A. DB2 Alphablox does not currently support the consolidation of user properties from various locations due to the current RepositoryBlox interface limitations.
- B. The customer will need to purchase another product, such as WebSphere Information Integrator, to pull together various profile settings stored in the various locations for each user.
- C. If the customer is using LDAP-based User Manager or other external user manager (such as NTLM) that has its own editor, the customer can select between External Repository and Local Repository under Property Name on the Alphablox Admin Pages Custom Properties section.
- D. If the customer configures DB2 Alphablox to use a relational database as the Alphablox Repository storage mechanism, this type of activity can successfully be accomplished within the Custom Properties area on the Alphablox Admin Pages without additional data movement from the various locations.

Answer: C

11. A customer currently has data in a relational database. The end users require the ability to drill up and drill down to a desired level of detail within the data. So, Alphablox administrator will review the data to see if it is fit for use with the built-in Alphablox Cube Engine. In order to use the relational data with the Alphablox Cube Engine, the data needs to be in which of the following? (Select Three Answers)

- A. A single table
- B. A star schema
- C. A snowflake schema
- D. A stored procedure
- E. A set of multiple fact tables representing a single cube
- F. a set of non-related tables in a relational database

Answer: ABC

12. When Alphablox is deployed to a WebSphere cluster, which step needs to be taken after the Alphablox installer is successfully run?

- A. Run the Cluster Configuration Tool.
- B. Deploy the AlphabloxServer.ear file to each node.
- C. Deploy the AlphabloxPlatform.ear file to each node.
- D. Run the Alphablox Cluster Manager from the Alphablox Admin pages.

Answer: C

13. Once a data source has been defined in Alphablox, where can the settings quickly be tested to ensure the connection is configured properly?

- A. By using the client tools provided by the database vendor.
- B. From the data source administration page. Select the Test Data Source button.
- C. From the application administration page. Select the Test Data Source button.
- D. From the Blox Sampler application. Select a data source to use in the examples.

Answer: B

14. For an installation of Alphablox in a WebSphere Portal environment, on which server instance should Alphablox be installed?

- A. On the Portal server instance
- B. On the WebSphere server instance
- C. On a separate server running only Websphere
- D. On a separate WebSphere server in the instance

Answer: A

15. Which of the following formats can be used to deploy an Alphablox application into WebSphere application server?

- A. EAR file
- B. JAR file
- C. XML file

D. HTML file

Answer: A

16. A customer is upgrading a production standalone, file-based repository installation of DB2 Alphablox to a horizontal cluster configuration. What basic steps need to be performed to preserve existing applications and configuration settings?

- A. Copy the repository and applications to the lead cluster server node.
- B. Convert the repository to a database and redeploy all web applications to the cluster.
- C. Add the standalone server as a cluster node and the repository and applications will be shared.
- D. Point all DB2 Alphablox servers at the existing file-based repository and redeploy all web applications to the cluster.

Answer: B

17. When is it absolutely necessary to use a database repository for Alphablox?

- A. When the application is using bookmarks
- B. When Alphablox is deployed on Websphere Portal
- C. When Alphablox is deployed to more than 100 users
- D. When Alphablox is deployed in a clustered environment

Answer: D

18. After installing Alphablox on a Tomcat server that uses IIS for authentication, what is the correct order for starting up the servers the first time?

- A. IIS should be started first, then Alphablox, and finally Tomcat.
- B. Tomcat should be started first, then Alphablox which automatically starts IIS.
- C. IIS should be started first, then Alphablox which automatically starts Tomcat.
- D. Alphablox should be started first, which automatically starts Tomcat. Once Alphablox has started completely, IIS should be started.

Answer: D

19. It is important to use version labels in the Alphablox application's source control system in order to do which of the following?

- A. Establish a name for the project.
- B. Check out a file for modification.
- C. Check in new or modified source files.
- D. Recreate a deployed version of the application.

Answer: D

20. An application server serving Alphablox applications is running out of memory. What is the best way to solve this problem?

- A. Install more disk space on the server.
- B. Indicate to retrieve only part of the metadata to the Blox.
- C. Change the report query to include fewer members in the results.
- D. Change the JVM settings on the Application Server to allocate more memory to the application.

Answer: D
