000-778: IBM Tivoli License Manager V2.1 Exam

Practice Exam: 000-778 Exams

Exam Number/Code: 000-778

Exam Name: IBM Tivoli License Manager V2.1 Exam

Questions and Answers: 114 Q&As

([IBM certifications II](#))

"IBM Tivoli License Manager V2.1 Exam", also known as 000-778 exam, is a Exam : [000-778](#) IBM certification. With the complete collection of exam questions,

Just4Study has assembled to take you through 114 Q&As to your 000-778 exam preparation. In the 000-778 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications II 000-778 (IBM Tivoli License Manager V2.1 Exam) examination of original title complete coverage. 000-778 exam questions help you pass the exam.

Just4Study 000-778 Feature:

* High quality - High quality and valued for the 000-778 Exam: 100% Guarantee to Pass Your 000-778 exam and get your IBM certifications II certification.

* Authoritative - Authoritative braindumps with complete details about 000-778 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications II resources, you will minimize your **IBM IBM certifications II** cost and be ready to pass your 000-778 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-778 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-778 Demo Download

Just4Study offers free demo for IBM certifications II 000-778 exam (IBM Tivoli License Manager V2.1 Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **IBM IBM certifications II 000-778** examination of original title complete coverage. 000-778 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 000-778

Exam Name: IBM Tivoli License Manager V2.1 Exam(IBM certifications II)

Questions and Answers: 114 Q&A

[IBM 000-778](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination. Just4Study professional provide IBM certifications II 000-778 the newest Q&A, completely covers 000-778 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-778 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-778

Title : IBM Tivoli License Manager V2.1 Exam

1. What is the supported version of DB2 on RedHat Enterprise Linux V3.0?

- A. DB2 V8.1.0
- B. DB2 V8.1.4
- C. DB2 V7.2.0
- D. DB2 V7.2.10

Answer: B

2. What is the purpose of the Tivoli Common Directory?

- A. provides a common location in which Tivoli products are installed
- B. provides a common location in which Tivoli publications are installed
- C. provides a common location in which Tivoli support procedures are documented
- D. provides a common location in which problem determination information for Tivoli products is saved

Answer: D

3. Which method is used to uninstall the IBM Tivoli License Manager (ITLM) catalog manager on a Windows system?

- A. uninstall the ITLM administration server
- B. run the uninstaller.exe command
- C. run the uinstall.catman command
- D. run the wuninst <catman> command

Answer: B

4. On which platform can an IBM Tivoli License Manager V2.1 administration server be installed?

- A. AIX V5.1
- B. SLES V9
- C. AIX V4.3.3
- D. Sun Solaris V2.7

Answer: A

5. A planned installation of the administration server will run RedHat Linux ES V3.0. Which document indicates the correct version of DB2 to install?

- A. IBM Tivoli License Manager (ITLM) V2.1 Release Notes
- B. IBM Tivoli License Manager (ITLM) V2.1 Migration Tool Guide
- C. IBM Tivoli License Manager (ITLM) V2.1 Problem Determination Guide
- D. IBM Tivoli License Manager (ITLM) V2.1 Planning, Installation and Configuration Guide

Answer: D

6. On the administration server, in which directory are the IBM Tivoli License Manager (ITLM) configuration files found?

- A. <INSTALL_DIR>adminconf
- B. <INSTALL_DIR>adminSLM_Admin_Application.earsIm_admin.warWEB-INFconf
- C. <INSTALL_DIR>adminSLM_Admin_Application.warsIm_admin.earWEB-INFconf
- D. <INSTALL_DIR>runtimeSLM_Runtime_Application.earsIm_runtime.warWEB-INFconf

Answer: B

7. What is one of the purposes of the catalog manager?

- A. allows users to modify the DB2 catalog
- B. allows users to modify the list of software vendors
- C. allows users to modify IBM Tivoli License Manager (ITLM) configuration settings
- D. allows users to add additional software to the list of products that can be monitored by IBM Tivoli License Manager (ITLM)

Answer: D

8. Which URL gives access to the WebSphere Application Server V5.x console?

- A. http://<serveraddress>:80/admin/
- B. http://<serveraddress>:80/console/
- C. http://<serveraddress>:9090/admin/
- D. http://<serveraddress>:9090/console

Answer: C

9. A customer wants to improve the throughput of software inventory and agent information in their IBM Tivoli License Manager (ITLM) environment. Which configuration change to the system.properties file accomplishes this?

- A. in the runtime server settings, decrease the value of adminUploadPeriod
- B. in the runtime server settings, increase the value of inventoryUpdatePeriod
- C. in the administration server settings, decrease the value of serverWakeUpPeriod
- D. in the administration server settings, increase the value of adminDownloadPeriod

Answer: A

10. An operator has added or modified modules associated with an existing entry in the catalog. What happens when the operator updates the catalog with a new version?

- A. The update engine ignores the changes.
- B. The update engine tries to accommodate changes on a best-effort basis.
- C. The changes are overwritten with new information from the updated catalog.
- D. The changes are preserved, but new modules are added from the updated catalog.

Answer: C

11. Which two IBM Tivoli License Manager (ITLM) configuration files can be modified by the user? (Choose two.)

- A. tlmagent.ini
- B. db.properties
- C. scpServices.xml
- D. system.properties
- E. password.properties

Answer: AD

12. If the runtime server database is deleted during the uninstall process, how is the runtime data recovered?

- A. The runtime server data is lost and cannot be recovered.
- B. Data can be rebuilt from data stored by a backup runtime server.
- C. Runtime data can be rebuilt from data stored on the administration server database.
- D. It can be recovered by restoring the database backup made during the uninstallation process.

Answer: C

13. Which two functions does the agent provide? (Choose two.)

- A. is a repository for information about the software that is installed on itself
- B. generates and sends e-mails to provide notification about events that have occurred on itself
- C. assigns and releases licenses that are assigned to the server according to the rules defined for each license
- D. performs an inventory of the software installed on the node and forwards this information to the runtime server
- E. identifies the starting or stopping of a software product and communicates this information to the runtime server so a license can be assigned

Answer: DE

14. Using the installagent command, how is an install package for distribution created?

- A. run manualDeploy.sh on the UNIX runtime server
- B. run manualDeploy.sh on the administration server
- C. run installagent -c <runtime server name>
- D. run tar -cvf install.tar in the agent install directory

Answer: A

15. Which configuration problem can be identified and resolved using the pdtool?

- A. The ITLM agent fails to plug-in to the runtime server.
- B. The IBM Tivoli License Manager (ITLM) agent inventory scan is not sent to the administration server.
- C. The runtime server fails to plug-in to the administration server because the administration server address that was specified during the installation of the runtime server was incorrect.
- D. The runtime server fails to plug-in to the administration server because the name in the runtime server configuration files does not match any server name registered in the administration server database.

Answer: D

16. Which two parameters are used to authenticate the communication between a runtime server and the administration server? (Choose two.)

- A. Port
- B. SSL Port
- C. Organization Name
- D. Runtime Server Name
- E. Administration Server Address

Answer: CD

17. Which custom field can be added to contracts?

- A. Supplier
- B. Location
- C. Contract Cost
- D. Product Vendor

Answer: B

18. On Windows, what is the default installation directory for IBM HTTP Server?

- A. C:\Program Files\IBMIHS
- B. C:\Program Files\IBMHttpServer
- C. C:\Program Files\IBMIBMHttpserver
- D. C:\WebSphereAppServer\IBMHttpServer

Answer: B

19. What is a function of a runtime server?

- A. central repository of product, license agreement, license usage, inventory, and organization information
- B. identifies the starting or stopping of a monitored software product and communicates this information to the runtime server so that a license can be assigned or released
- C. Web interface that can be used to deploy the agents to nodes that are to be monitored and to produce real-time

reports of usage of software running on the monitored agents

D. Web interface that can be used to perform license management and administration tasks and to produce historical reports of license usage and inventory information over time

Answer: C

20. What does the statusinfo command do?

A. provides informational messages about the status of the WebSphere server

B. collects configuration, trace and database information to send to Tivoli Support

C. collects information about the version of the ITLM components that are installed

D. provides informational messages about the IBM Tivoli License Manager (ITLM) runtime servers that are plugged-in to the ITLM administration server

Answer: B
