IBM Deployment Professional

000-799: ibm tivoli storage manager v5.3 implementation

Practice Exam: 000-799 Exams

Exam Number/Code: 000-799

Exam Name: ibm tivoli storage manager v5.3 implementation

Questions and Answers: 114 Q&As

([Deployment Professional](#))

"ibm tivoli storage manager v5.3 implementation", also known as 000-799 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 114 Q&As to your 000-799 exam preparation. In the 000-799 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-799](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM Deployment Professional 000-799 (ibm tivoli storage manager v5.3 implementation) examination of original title complete coverage. 000-799 exam questions help you pass the exam.

Just4Study 000-799 Feature:

* High quality - High quality and valued for the 000-799 Exam: 100% Guarantee to Pass Your 000-799 exam and get your Deployment Professional certification.

* Authoritative - Authoritative braindumps with complete details about 000-799 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Deployment Professional resources, you will minimize your **IBM Deployment Professional** cost and be ready to pass your 000-799 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Deployment Professional demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-799 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-799 Demo Download

Just4Study offers free demo for Deployment Professional 000-799 exam (ibm tivoli storage manager v5.3 implementation). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM Deployment Professional 000-799** examination of original title complete coverage.000-799 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-799

Exam Name: ibm tivoli storage manager v5.3 implementation(Deployment Professional)

Questions and Answers: 114 Q&A

[IBM 000-799](#) Test belongs to one of the Deployment Professional certified test, if needs to obtain the Deployment Professional certificate, you also need to participate in other related test, the details you may visit the [Deployment Professional](#) certified topic, in there, you will see all related Deployment Professional certified subject of examination. Just4Study professional provide Deployment Professional 000-799 the newest Q&A, completely covers 000-799 test original topic. With our complete Deployment Professional resources, you will minimize your Deployment Professional cost and be ready to pass your 000-799 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-799

Title : IBM Tivoli Storage Manager V5.3 Implementation

1. What can be customized at both the server and client?

- A. TCPTXNSIZE
- B. TCPADDRESS
- C. TCPPACKETSIZE
- D. TCPWINDOWSIZE

Answer: D

2. A new tape library has just been defined with labeled tapes. What will test to see if the new library is operational?

- A. update volume
- B. query library libname format=detail
- C. status library libname format=detail
- D. checkin libv libname search=yes status=scratch checklabel=yes

Answer: D

3. Which command should be entered to list the capacity of all the storage pools?

- A. query stg
- B. query stg all type=any
- C. query stg format=capacity
- D. query stg all format=detailed

Answer: A

4. Given the following include/exclude list:

```
exclude /.../core
include /home/profile/options.scr
include /home/etc/more
include /home/profile/doodads/drivers
exclude /home/profile/*
include /core/data
exclude.dir /home/monkey
```

Which file is included?

- A. /core/data
- B. /home/monkey
- C. /home/profile/etc/more
- D. /home/profile/options.scr

Answer: A

5. Which dsm.sys file option is used to backup a raw volume during a scheduled backup?

- A. image.raw
- B. include.image
- C. rawbackup=yes
- D. enablerawbackup

Answer: B

6. A bank is using IBM Tivoli Storage Manager (Storage Manager) and has special backup and restore requirements. They want to backup to disk and keep the data available on disk for a minimum of two days before it's moved to an offsite location. Which option would enable them to accomplish this?

- A. Hi=90 Lo=50
- B. MIGPROCESS=2
- C. Cache=YES and MIGDELAY=2
- D. Cachesize 100 and Cachelocation offsite

Answer: C

7. The primary and copy storage pools are defined as follows:

Primary Storage Pool: PRIMPOOL1

Primary Storage Pool: PRIMPOOL2

Copy Storage Pool: COPYPOOL1

Copy Storage Pool: COPYPOOL2

On day one, the following command is run for the first time: backup stgpool primpool1 cypool1

On day two, the following command is run: backup stgpool primpool1 cypool1

What is most likely to occur on day two?

- A. full backup of PRIMPOOL1 to COPYPOOL1
- B. full backup of COPYPOOL1 to PRIMPOOL1
- C. selective backup of PRIMPOOL1 to COPYPOOL1
- D. incremental backup of PRIMPOOL1 to COPYPOOL1

Answer: D

8. When sizing the IBM Tivoli Storage Manager (Storage Manager) tape usage, which type of backup uses the least tape?

- A. synthetic backup
- B. progressive backup
- C. full + differential backup
- D. full + incremental backup

Answer: B

9. A new administrative schedule did not run when it was scheduled. What is the most likely cause?

- A. The Priority = 0.
- B. It was not active.
- C. The node was not registered.
- D. It was not associated with a node.

Answer: B

10. Management has requested a report containing graphical charts of all files backed up during a specific time frame. Which option meets this need directly?

- A. Web admin GUI reporting tool
- B. SQL against the Storage Manager database
- C. ODBC interface and report through a report writer
- D. IBM Tivoli Storage Manager (Storage Manager) report section

Answer: C

11. Which command can be used to cause automatic expansion of the IBM Tivoli Storage Manager (Storage Manager) database?

- A. expanddb yes
- B. extend db auto
- C. txndblimit auto
- D. define spacetrigger db

Answer: D

12. What is an inactive version of a file?

- A. one that has been sent off-site
- B. one that is no longer backed up
- C. one that has exceeded the retention date
- D. one that is not the latest backed up version

Answer: D

13. Which two features of IBM Tivoli Storage Manager (Storage Manager) are designed to save disk storage pool space? (Choose two.)

- A. collocation
- B. reclamation
- C. compression
- D. database mirroring
- E. incremental backups

Answer: CE

14. A company with two departments has only one tape library. The departments need to be on separately-managed storage tape volumes. Collocation will be used for their servers, but not for their workstations. Each of the two departments has both servers and workstations. Backup is to disk, migrating to tape. How many disk and tape storage pools are required for this company storage hierarchy?

- A. four disk and one tape storage pool
- B. two disk and two tape storage pools
- C. four disk and two tape storage pools
- D. four disk and four tape storage pools

Answer: D

15. Company XYZ has an eight-hour backup window in which 10 clients must be backed up. The following has been specified:

Schedmode polling

Maxsessions 8

Maxschedsessions 90

Duration 1

Durunithour

Randomize 50

Maxcmdretries 4

Retryperiod 30

Eight of the clients complete the backup in two hours. Two others are not backed up at all. The communication line usage is 95 percent. What should be increased to address the problem?

- A. the randomization parameter
- B. the duration of the startup window
- C. the maximum percentage of scheduled sessions
- D. the number of session retry attempts by increasing Maxcmdretries

Answer: B

16. A storage device is being configured on the SAN. What allows it to be dynamically mapped?

- A. fibre address
- B. element number
- C. capacity number
- D. World Wide Name

Answer: D

17. A customer has a firewall protected environment. Which feature enables them to create scheduled backups through the firewall?

- A. use web ports
- B. use tcpadminport
- C. set schedmode polling
- D. set schedmode prompted

Answer: C

18. Why would EXPInterval be set to zero?

- A. To disable expiration functionality so that it does not degrade performance during backup operations.
- B. To specify whether IBM Tivoli Storage Manager (Storage Manager) sends detailed messages during expiration processing.
- C. To disable export policy information from a Storage Manager server to sequential media or directly to another server for immediate import.
- D. To disable export so that you cannot copy administrator definitions, client node definitions, policy definitions, server control information, or file data to external media directly another server.

Answer: A

19. A prospective IBM Tivoli Storage Manager (Storage Manager) customer has:

- 10 UNIX file servers, each with 50 GB of data with a 10% daily change rate
- 2 Windows 2003 file servers, each with 10 GB and a 5% daily change rate

Assuming all data is backed up to disk with a high threshold of 100% and the next storage pool is tape, what is the minimum size of the disk storage pool?

- A. 200 MB
- B. 520 MB
- C. 55 GB
- D. 520 GB

Answer: C

20. Which three issues should the IBM Tivoli Storage Manager (Storage Manager) project team consider before beginning implementation? (Choose three.)

- A. if the archive bit is set in the file attributes
- B. bandwidth and settings of hubs and switches
- C. the number of applications installed on the client
- D. Storage Manager client restore time requirements
- E. number of disk storage devices on a client platform
- F. amount of Storage Manager client data that changes each day

Answer: BDF
