IBM IBM certifications II

000-833: Object Oriented Analysis and Design-Part1(Analysis)

Practice Exam: 000-833 Exams

Exam Number/Code: 000-833

Exam Name: Object Oriented Analysis and Design-Part1(Analysis)

Questions and Answers: 50 Q&As

([IBM certifications II](#))

"Object Oriented Analysis and Design-Part1(Analysis)", also known as 000-833 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 50 Q&As to your 000-833 exam preparation. In the 000-833 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-833](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications II 000-833 (Object Oriented Analysis and Design-Part1(Analysis)) examination of original title complete coverage. 000-833 exam questions help you pass the exam.

Just4Study 000-833 Feature:

* High quality - High quality and valued for the 000-833 Exam: 100% Guarantee to Pass Your 000-833 exam and get your IBM certifications II certification.

* Authoritative - Authoritative braindumps with complete details about 000-833 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications II resources, you will minimize your **IBM IBM certifications II** cost and be ready to pass your 000-833 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications II demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-833 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-833 Demo Download

Just4Study offers free demo for IBM certifications II 000-833 exam (Object Oriented Analysis and Design-Part1 (Analysis)). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications II 000-833** examination of original title complete coverage.000-833 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-833

Exam Name: Object Oriented Analysis and Design-Part1(Analysis)(IBM certifications II)

Questions and Answers: 50 Q&A

[IBM 000-833](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination.

Just4Study professional provide IBM certifications II 000-833 the newest Q&A, completely covers 000-833 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-833 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-833

Title : Object Oriented Analysis and Design-Part1(Analysis)

1. Why is encapsulation important? (Choose two.)

- A. It describes the relationship between two subclasses.
- B. It places operations and attributes in the same object.
- C. It allows other objects to change private operations and attributes of an object.
- D. It prevents other objects from directly changing the attributes of an object.

Answer: BD

2. Which statement is true about an iterative development process?

- A. Testing and integration take place in every iteration.
- B. An iteration focuses on partial completion of selected use-case realizations.
- C. It encourages user feedback in later iterations.
- D. It is based on functional decomposition of a system.

Answer: A

3. What are two important considerations when diagramming state? (Choose two.)

- A. Any time a message is received; there may be a change of state.
- B. Any time a message is received; there must be a change of state.
- C. Whenever there is a change of state, there is a transition.
- D. Changing state may not change transition.

Answer: AC

4. Which statement is true about circular dependencies?

- A. They do not matter.
- B. They are prohibited.
- C. They must be avoided.
- D. When there are more than two packages, they are irrelevant.

Answer: C

5. Which two questions does the use of multiplicity on relationships allow you to answer? (Choose two.)

- A. Is the relationship mandatory or optional?
- B. How many links can an object of one type maintain with objects of another type?
- C. Is an object of a given type permitted to interact with objects of another type?
- D. Is the relationship between objects permanent or temporary?

Answer: AB

6. In a sequence diagram, each interaction on the diagram maps to _____.

- A. a choice point on a state diagram
- B. the transition on a state diagram
- C. a state on the diagram
- D. the initial state

Answer: B

7. What is the purpose of Architectural Analysis?

- A. to detail the design of the system
- B. to review the architecture of the system
- C. to define a candidate architecture for the system
- D. to define the layers of the architecture

Answer: C

8. Objects that are polymorphic _____.

- A. must have the same attributes
- B. share all the same operations, and the operations perform the same
- C. can only be implemented through interfaces
- D. may have the same operation names but the operations perform differently

Answer: D

9. What is the focus of analysis?

- A. translating functional requirements into code
- B. translating requirements into a system design
- C. translating real-world concepts into solution-oriented objects
- D. translating functional requirements into software concepts

Answer: D

10. What are analysis classes?

- A. early conjectures on the composition of the system that usually change over time, rarely surviving intact into Implementation
- B. incomplete classes that require a programmer to formalize operation signatures and attribute types before they can be implemented
- C. the classes inside a systems Business Object or Domain Model, in UML form
- D. a prototype of a systems user interface, developed during the Analysis Phase, which allows users to define the systems look and feel

Answer: A

11. What are the three purposes of Analysis and Design? (Choose three.)

- A. to provide an organizational context for the system
- B. to transform the requirements into a design of the to-be system
- C. to evolve a robust architecture for the system
- D. to scope the system to be built and describe what it must do
- E. to adapt the design to match the implementation environment

Answer: BCE

12. Which is a characteristic of a structured class?

- A. must have one interface for each role it plays
- B. can play only one role, no matter how many objects transact with it
- C. can play multiple roles that vary on the objects that interact with it
- D. is limited to one role, but can have multiple interfaces

Answer: C

13. When the interfaces between two classes have been defined from a sequence diagram, the ports are defined by

the _____.

- A. interface
- B. operations the class performs
- C. user of the system
- D. attributes passed in the sequence diagram

Answer: A

14. Which statement is true about attributes?

- A. They cannot change once the object is instantiated.
- B. They change value from object to object of the same class.
- C. They can only be primitives.
- D. They are required for every class.

Answer: B

15. Which two statements are true about interfaces? (Choose two.)

- A. The interface should have a clear purpose.
- B. A single interface should include as many possible methods, if not all methods, that may be shared by objects that implement the interface.
- C. An interface should be used to restrict which methods are exposed to a client.
- D. Classes may have multiple interfaces depending on the purpose of each interface it implements.

Answer: AD

16. Which statement is true?

- A. The UML is a development process for software intensive systems.
- B. The UML is a process-dependent language used for visualizing software artifacts.
- C. The UML is a modeling language for software blueprints.
- D. The UML is a visual programming language.

Answer: C

17. What does a required interface do?

- A. exposes services to anonymous requestors
- B. uses the services that a classifier requires to request from anonymous providers
- C. declares the services that a classifier offers to provide anonymous requestors
- D. exposes methods that the requestor must use

Answer: B

18. An architect looks at two classes. The first class has the following operations: getName(), getSize(), getTotal(), and findAverage(). The second class has the following operations: getName(), getSize(), findAverage(), findMinimum(), and findMaximum(). The two classes share the same superclass. Which operations are most likely contained in the superclass?

- A. getName(), getSize(), and findAverage()
- B. findMaximum(), findMinimum(), getSize(), and getTotal()
- C. getName(), findAverage(), and findMaximum()
- D. getName(), getSize(), getTotal(), and findAverage()

Answer: A

19. An architect is responsible for creating an Analysis Model for a system. Which area of focus is essential for the creation of this model?

- A. hardware on which the system will be deployed
- B. behavior of the objects that comprise the system
- C. evolution of analysis classes into design classes
- D. performance requirements of the system

Answer: B

20. In which three ways does a structured class differ from a traditional class? (Choose three.)

- A. It clearly defines the class boundary via an encapsulation shell.
- B. It brings public interfaces into the class via ports.
- C. It shows the role that the class plays.
- D. It defines messages between itself and other classes.

Answer: ABC
