Exam : [000-851](#)

"iseries linux soluton sales v5r3", also known as 000-851 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 58 Q&As to your 000-851 exam preparation. In the 000-851 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications III 000-851 (iseries linux soluton sales v5r3) examination of original title complete coverage. 000-851 exam questions help you pass the exam.

#### **Just4Study 000-851 Feature:**

\* High quality - High quality and valued for the 000-851 Exam: 100% Guarantee to Pass Your 000-851 exam and get your IBM certifications III certification.

\* Authoritative - Authoritative braindumps with complete details about 000-851 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications III resources, you will minimize your **IBM IBM certifications III** cost and be ready to pass your 000-851 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free IBM certifications III demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-851 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 000-851 Demo Download**

Just4Study offers free demo for IBM certifications III 000-851 exam (iseries linux soluton sales v5r3). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications III 000-851** examination of original title complete coverage.000-851 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

#### **VUE/Prometric Code: 000-851**

Exam Name: iseries linux soluton sales v5r3( IBM certifications III )

Questions and Answers: 58 Q&A

[IBM 000-851](#) Test belongs to one of the IBM certifications III certified test, if needs to obtain the IBM certifications III

certificate, you also need to participate in other related test, the details you may visit the [IBM certifications III](#) certified topic, in there, you will see all related IBM certifications III certified subject of examination.

Just4Study professional provide IBM certifications III 000-851 the newest Q&A, completely covers 000-851 test original topic. With our complete IBM certifications III resources, you will minimize your IBM certifications III cost and be ready to pass your 000-851 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

*Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.*

Exam : IBM 000-851

Title : Iseries Linux Soluton Sales v5r3

1. A customer with an i810 is considering adding a dedicated Linux server to host a new application. The current iSeries application has significant off-hour processing requirements, and the Linux application has large processing requirements during normal business hours. Which of the following would be an advantage of running Linux on iSeries?

- A. The OS/400 Dynamic resource allocation will move processor capacity as needed.
- B. The i810 provides On/Off Capacity on Demand support for Linux on iSeries.
- C. Adding a Linux partition to the existing iSeries can be implemented by activating a processor for Linux.
- D. Using OS/400 dynamic partition assignments, processor resources can be moved between OS/400 and Linux partitions on a scheduled basis.

Answer: D

2. An iSeries customer with V5R2 plans to change I/O and memory resources in a Linux partition. Which of the following describes when the Linux partition must be restarted?

- A. When resources except memory are moved
- B. When memory resources are added or removed from the partition
- C. When processor resources are moved without using iSeries Navigator
- D. When processor resources are removed from the partition but not when resources are added

Answer: B

3. A customer has an i810 with two Linux partitions. Which of the following describes how the partitions communicate at lowest cost?

- A. Virtual LAN
- B. External LAN connections
- C. V.24 connection with a modem eliminator
- D. OS/400 Linux integration virtual console

Answer: A

4. A global company wants to implement their WebSphere applications on an iSeries Linux partition. Which of the following distributions will allow the customer to minimize help desk time by offering a consistent code base for all geographies?

- A. Fedora
- B. Caldera
- C. Mandrake
- D. Red Hat

Answer: D

5. A customer is considering a proposal to add Linux to their eServer i5 server to replace Windows infrastructure

applications. Because this will be the first Linux server in the environment, what skill issues should be discussed?

- A. i5/OS and Linux integration minimize skill requirements.
- B. Managing Linux is very similar to managing Windows servers.
- C. Windows technicians currently supporting the infrastructure applications can be trained on Linux.
- D. The customer should hire additional Linux skills.

Answer: C

6. An iSeries customer has a model 810 processor with FC #2469 (2700 CPW). Processor utilization averages 75% or higher through the business day. Their customer website currently runs on an Intel processor-based system under Apache/Linux and utilizes Perl and Java, requiring several CPU cycles. The website accesses data from the iSeries. The customer wants to move the website onto the iSeries to leverage its reliability and provide a single-point backup solution.

Which of the following is the best solution for this customer?

- A. Move the website onto the Apache server under OS/400 on the current iSeries 810.
- B. Upgrade the processor to an eServer i5 520 FC #8955 (6000 CPW) and move the website onto the Apache server under i5/OS.
- C. Connect an xSeries model 445 (8870-42X) with four 3.0 GHz processors with an IXA. Run Linux on the xSeries to support the website.
- D. Upgrade the processor to an eServer i5 520 FC #8955 (6000 CPW) and move the website onto the Apache server on a Linux partition.

Answer: C

7. What is the maximum number of active Linux partitions that are supported on an iSeries POWER4 processor?

- A. 1
- B. 4
- C. 10
- D. 31

Answer: C

8. A customer with a single eServer i5 520 is planning a file serving solution using SAMBA. Which of the following is an advantage of using Virtual storage on the iSeries?

- A. Existing disk drives can be leveraged.
- B. New high performance drives can be purchased for Linux.
- C. FastT storage can be attached to each Linux partition.
- D. Virtual storage can be managed with Management Central.

Answer: A

9. An i830 customer is planning to implement a Linux partition on their existing system. Which of the following is the minimum requirement to implement a Linux partition?

- A. The i830 must be upgraded to an i825.
- B. Create a logical partition on the i830 containing at least .25 of a processor.
- C. Create a logical partition on the i830 containing at least one full processor.
- D. Create a logical partition on the i830 containing at least .10 of a processor.

Answer: C

10. A customer has an i820 FC #2437 (2-way SStar) with one DVD-RAM installed as the alternate IPL device. Three Linux partitions are planned: one for a firewall application and the others to host applications with occasional DVD requirements. What is the minimum required number of DVD-RAM drives to be added?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

11. A customer with an i825 is considering a three-tier CRM package with a DB2 database backend, Linux Apache, and browser access. Which of the following recommendations satisfies this need at the lowest cost?

- A. Implement LPAR with OS/400 and Linux partition with a separate server for Web access and firewall.
- B. Implement a Linux partition on the customer's existing iSeries and connect the partitions with the Virtual LAN
- C. Implement LPAR with two OS/400 partitions and a Linux partition and connect the partitions with their existing LAN
- D. Implement a dedicated Linux system with DB2 for Linux and the server function. Use a LAN link to the existing iSeries server.

Answer: B

12. Which of the following describes Linux implementation on an iSeries?

- A. Linux uses the iSeries Virtual storage.
- B. Linux runs in separate dedicated ASP.
- C. Linux runs on an iSeries with a Pulsar processor.
- D. Linux requires an iSeries system with more than one processor.

Answer: A

13. How is virtual disk I/O provided in an iSeries Linux partition?

- A. An independent disk storage pool (ASP) is assigned to Linux.
- B. An iSeries disk controller and associated drives are assigned to Linux.
- C. An OS/400 server storage space object is defined and assigned to Linux.
- D. iSeries service tools define a disk pool that is assigned to Linux.

Answer: C

14. An iSeries customer with an i810 is running SAMBA for file and print sharing on a Linux partition and is experiencing performance problems. Which of the following would most likely need additional resources to resolve this issue?

- A. L2 cache
- B. Disk
- C. Memory
- D. Network

Answer: C

15. An iSeries customer with an i810 is running the Apache Web server on a Linux partition. The users are not satisfied with the performance of the website. Which of the following is the proper course of action?

- A. Add a processor using CUoD.
- B. Upgrade the L2 cache memory on the i810 processor.
- C. Add a second Linux partition to balance the workload.
- D. Dynamically allocate additional CPW to the Linux partition.

Answer: D
