### IBM IBM certifications II

**000-863: System i IT Simplification:Linux Technical V5R4**

**Practice Exam:** 000-863 Exams

**Exam Number/Code:** 000-863

**Exam Name:** System i IT Simplification:Linux Technical V5R4

**Questions and Answers:** 114 Q&As

( [IBM certifications II](#) )

Exam : [000-863](#)

"System i IT Simplification:Linux Technical V5R4", also known as 000-863 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 114 Q&As to your 000-863 exam preparation. In the 000-863 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications II 000-863 (System i IT Simplification:Linux Technical V5R4) examination of original title complete coverage. 000-863 exam questions help you pass the exam.

#### **Just4Study 000-863 Feature:**

\* High quality - High quality and valued for the 000-863 Exam: 100% Guarantee to Pass Your 000-863 exam and get your IBM certifications II certification.

\* Authoritative - Authoritative braindumps with complete details about 000-863 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications II resources, you will minimize your **IBM IBM certifications II** cost and be ready to pass your 000-863 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free IBM certifications II demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-863 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 000-863 Demo Download**

Just4Study offers free demo for IBM certifications II 000-863 exam (System i IT Simplification:Linux Technical V5R4). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications II 000-863** examination of original title complete coverage.000-863 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 000-863**

Exam Name: System i IT Simplification:Linux Technical V5R4( IBM certifications II )

Questions and Answers: 114 Q&A

[IBM 000-863](#) Test belongs to one of the IBM certifications II certified test, if needs to obtain the IBM certifications II certificate, you also need to participate in other related test, the details you may visit the [IBM certifications II](#) certified topic, in there, you will see all related IBM certifications II certified subject of examination.

Just4Study professional provide IBM certifications II 000-863 the newest Q&A, completely covers 000-863 test original topic. With our complete IBM certifications II resources, you will minimize your IBM certifications II cost and be ready to pass your 000-863 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-863

Title : System I IT Simplification: Linux Technical V5R4

1. What command can be used to list the Linux firewall rules in effect?

- A. iptables -L
- B. cat /proc/firewall
- C. cat /etc/firewall.conf
- D. chkconfig -l iptables

Answer: A

2. What is the minimum user authority needed to create a Linux partition on an HMC?

- A. SuperAdmin
- B. Operator
- C. PE
- D. Admin

Answer: B

3. Which of the following commands will allow a Linux on System i administrator to quickly scan backup tapes for files saved via a tar command on a Linux system?

- A. The Linux command 'mt'
- B. The Linux command 'cpio'
- C. The i5/OS command 'RST option(\*print)'
- D. The i5/OS command 'DSPTAP option(\*savrst)'

Answer: B

4. A System i model 520 customer is setting up multiple VLANs that need access to the Internet via the i5/OS partition's LAN card. What parameter should be set to \*YES to allow this?

- A. Network file cache enablement
- B. IP dead gateway detection enablement
- C. IP datagram forwarding
- D. IP source routing

Answer: C

5. A customer wants to write a Linux program that performs SQL queries against a DB2/400 database in the PAYROLL library. Which of the following is the best way to accomplish this?

- A. Use NFS to mount the i5/OS IFS and access the files in the directory /QSYS.LIB/PAYROLL.LIB.
- B. Use SAMBA to mount the i5/OS IFS and access the files in the directory /QSYS.LIB/PAYROLL.LIB.
- C. Install the Service and Productivity Tools For Linux on POWER systems to get an SQL driver for accessing DB2/400 databases.

D. Install the iSeries Access for Linux RPM and use ODBC to access the DB2/400 database.

Answer: D

6. A customer with a Linux partition will create a subnet with a mask of 255.255.255.252. The subnet will provide two usable IP addresses that are 172.27.16.5 and 172.27.16.6. What will the network ID be?

- A. 172.27.16.0
- B. 172.27.16.2
- C. 172.27.16.4
- D. 172.27.16.7

Answer: C

7. What authority does an SST profile need in order to connect to the Linux virtual console via i5/OS?

- A. Service tool security
- B. Hardware Service Manager
- C. Partition remote panel key
- D. System partitions - administration

Answer: C

8. A hosted Linux partition on a System i family model 810 changes to failed state immediately when varied on. Which of the following sources of information would help identify the failure?

- A. DSPMSG QLINUX
- B. View the /QNTC/etc/error.log.
- C. View the Linux console log from OS/400.
- D. Use System Service Tools to view the SRCs for the Linux partition.

Answer: D

9. A customer with multiple divisions needs to ensure the Linux kernel and tool set used at each division are the same. Which of the following would ensure kernel uniformity at each division?

- A. Use IBM Supplied Linux fixpack SI99607.
- B. Copy NWSSTG feature in i5/OS.
- C. Use IBM flashcopy in binary mode.
- D. Install a Linux distribution from the United Linux Standards Base.

Answer: B

10. A System i customer successfully installed a hosted Linux partition using all virtual resources on a model 520 with an HMC. After logging onto the Linux partition through the console, the administrator attempts to setup the network but could not find the LAN adapter in the Linux partition. Which of the following is the probable cause for the missing LAN adapter?

- A. The virtual LAN adapter was not created during the initial partition creation.
- B. The FC #5706 Ethernet adapter in the system unit was not assigned to the Linux partition as a desired device.
- C. The virtual IOP driving the virtual Ethernet adapter was not assigned as a required device.
- D. The hosting partition virtual TCP IP host servers were not started.

Answer: A

11. A customer wants to access the Linux console device through an i5/OS partition (via port 2301); however, the Linux partition is not included in the list of guest partitions. What is the most likely cause?

- A. The Linux console device is currently being accessed through HMC.
- B. Virtual serial adapters have not been correctly configured.
- C. The DST user ID being used does not have remote panel key authority.
- D. Virtual SCSI adapters have not been correctly configured.

Answer: B

12. A System i customer is planning to install Linux as an Apache Web server. They require a browser interface to

manage the server. Which of the following best satisfies this requirement?

- A. ApacheConfig
- B. VNC
- C. SAMBA
- D. Webmin

Answer: D

13. In an i5/OS hosted I/O environment, what i5/OS state must a tape drive be in before the Linux partition can use the drive?

- A. Available
- B. Varied off
- C. Not Detected
- D. Occupied

Answer: B

14. A System i customer with a model 520 and no expansion towers wants to perform file-level Linux backup without mounting directories via NFS or SMB/CIFS. Which of the following backup solutions satisfies this requirement?

- A. Backup the Linux data on a Linux formatted tape from Linux.
- B. Backup the Linux data on the i5/OS formatted backup tape from Linux.
- C. Use the SAVOBJ command in the i5/OS host partition.
- D. Use the SAV command in the i5/OS host partition.

Answer: A

15. Which task will enable Linux to access an i5/OS image catalog?

- A. Vary off the image catalog and allocate it to the Linux partition
- B. Link the image catalog to the NWSD
- C. fsmount to the /dev/vrtcdrom
- D. Mount the CD

Answer: D

16. On a System i model 570, which of the following is used to create a Linux partition?

- A. SST in the i5/OS partition that will host Linux
- B. SST in the Primary i5/OS partition
- C. Hardware Management Console (HMC)
- D. iSeries Navigator in the i5/OS partition

Answer: C

17. A System i5 Linux environment has three partitions, all uncapped with weights P1:64, P2:128 and P3:255. Partitions P1 and P2 are busy. If there are available processor resources, how much processor resource will be allocated to P1 and P2 respectively?

- A. 33%, 67%
- B. 14%, 28%
- C. 64%, 128%
- D. 67%, 33%

Answer: A

18. A customer with a uniprocessor 9406-270 (FC 2248, 150 CPW) at V5R2 running at 85% processor utilization with 50% disk utilization plans to add a small Linux application and needs a dedicated Ethernet connection for the application. Which of the following actions best meets the customer's requirements?

- A. Implement LPAR on the 270 and purchase a LAN card and a Linux license.
- B. Migrate to an eServer i5 520 and implement LPAR with a LAN card in the Linux partition and a Linux license.
- C. Order an MES upgrade to a dual processor 270 and implement LPAR with a LAN card in the Linux partition and a Linux license.

D. Install the Linux binary in the PASE environment.

Answer: B

19. As part of the installation procedure, the customer wants to ensure that Linux can provide file sharing services to MS Windows clients. Which of the following tasks must be accomplished?

A. Use the package selection feature of the installation procedure to ensure that the SAMBA package will be installed.

B. Ensure that the SAMBA administrator user is created as part of the installation procedure.

C. Ensure that the Linux file system is formatted as either FAT or FAT32.

D. Create a SAMBA shared called windowsfs.

Answer: A

20. A customer wants to implement a Linux instance on System i that lets them take advantage of the features presented by the Secure Enterprise Linux (SELinux) initiative. Which of the following Linux distributions provides this capability?

A. Ubuntu

B. Novell/SUSE

C. Red Hat

D. turbolinux

Answer: C
