Exam : [000-872](#)

"ibm tivoli storage manager v5.2 implementation", also known as 000-872 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 133 Q&As to your 000-872 exam preparation. In the 000-872 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 000-872 (ibm tivoli storage manager v5.2 implementation) examination of original title complete coverage. 000-872 exam questions help you pass the exam.

Just4Study 000-872 Feature:

* High quality - High quality and valued for the 000-872 Exam: 100% Guarantee to Pass Your 000-872 exam and get your IBM certifications I certification.

* Authoritative - Authoritative braindumps with complete details about 000-872 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 000-872 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-872 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-872 Demo Download

Just4Study offers free demo for IBM certifications I 000-872 exam (ibm tivoli storage manager v5.2 implementation). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I 000-872** examination of original title complete coverage.000-872 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-872

Exam Name: ibm tivoli storage manager v5.2 implementation(IBM certifications I)

Questions and Answers: 133 Q&A

[IBM 000-872](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

Just4Study professional provide IBM certifications I 000-872 the newest Q&A, completely covers 000-872 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-872 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-872

Title : IBM Tivoli Storage Manager V5.2 Implementation

1. What are two ways the Storage Manager Scheduler Service can be installed and configured on a Windows 2000 client? (Choose two.)

- A. Use the dsmdutil command line utility.
- B. Use the dsmservinst command line utility.
- C. Use the Storage Manager client Setup wizard.
- D. Activate the service from the Storage Manager server.
- E. The service is automatically configured upon client install.

Answer: AC

2. Which IBM Tivoli Storage Manager option can be used to decrease elapsed time by backing up more files between database commits?

- A. TCPBUFSIZE
- B. TXNGROUPMAX
- C. MOVEBATCHSIZE
- D. TCPWINDOWSIZE

Answer: B

3. Which IBM Tivoli Storage Manager structure contains definitions of client nodes, users, policies, schedules and storage pools?

- A. database
- B. recovery log
- C. definition files
- D. device configuration file

Answer: A

4. An employment agency has a corporate headquarters and several branch offices. The branch offices have a Windows server with three 72GB internal disks and an internal tape library with a single tape drive. Which feature makes it possible to implement IBM Tivoli Storage Manager in this environment?

- A. Backup storage pool
- B. Single disk reclamation
- C. Single drive reclamation
- D. Generation of backupsets

Answer: C

5. A customer wants to restore files that were backed up to a Storage Manager server, but the customer's workstation is no longer on the network. What can the customer do to get the files back to the workstation?

- A. reclaim the files to a CD-ROM
- B. collocate the files on a standalone tape
- C. create a backupset and write it to removable media
- D. There is no way to recover files to a workstation no longer on the network.

Answer: C

6. Which three actions can occur if a file on a UNIX managed node is in use when IBM Tivoli Storage Manager attempts to perform a backup? (Choose three.)

- A. Storage Manager issues a prompt.
- B. Storage Manager rejects the backup request.
- C. Storage Manager backs up the file while it is in use.
- D. Storage Manager retries until the retry limit is reached.
- E. Storage Manager uses adaptive sub-file differencing to back up the file.
- F. Storage Manager skips the file and reattempts to back it up after the other files in the file system are backed up.

Answer: BCD

7. In an environment where the average file size is less than 5KB, what are three benefits of file aggregation? (Choose three.)

- A. improved tape utilization
- B. reduced tape seek time
- C. improved performance of single file restore
- D. improved performance of migration processes
- E. improved performance of incremental backups
- F. reduced overhead of IBM Tivoli Storage Manager database updates

Answer: DEF

8. What is an inactive version of a file?

- A. one that has been sent off-site
- B. one that is no longer backed up
- C. one that has exceeded the retention date
- D. one that is not the latest backed up version

Answer: D

9. How does IBM Tivoli Storage Manager support tape reclamation of copy pool volumes in an offsite vault?

- A. backs up unexpired data from the client to the new copy pool volumes
- B. marks tape volumes as being eligible for reuse when the last remaining active files status changes to inactive
- C. writes unexpired data from primary storage pools to copy pool tapes that are taken offsite and the original copy pool tapes are then recalled
- D. recalls copy pool tapes from the offsite vault, copies expired data to new copy pool tape volumes and directs the new volumes to the vault, then returns the original tapes to scratch status

Answer: C

10. Click the Exhibit button.

A customer has a large central site and 50 remote offices each with a small network of five Windows NT servers. The offices all have a 64 Kb link (TCP/IP) to the central site with a 10 percent daily change rate for all servers in all locations.

What is the best performing IBM Tivoli Storage Manager solution using its defaults?

- A. multiple Storage Manager servers at the main site
- B. one Storage Manager server at the main site only
- C. one Storage Manager server each remote site only
- D. one Storage Manager server at the main site, one at each remote site

Answer: D

11. Which server command can be used to verify that the Storage Manager client machines are connected to the Storage Manager server and are performing the backup/archive task?

- A. query status
- B. query clients
- C. query sessions
- D. query connections

Answer: C

12. A Storage Manager client uses multiple sessions to back up directly to tape. One client starts to monopolize all the existing tape devices on the server. How can this be avoided?

- A. introduce virtual mount points
- B. increase MAXSESSIONS server option
- C. set MAXNUMMP and KEEPMP parameter for the client node
- D. increase the MOUNTLIMIT parameter of the affected device class

Answer: C

13. A customer wants to make archives every day of 10 GB of important financial data that must be retained 10 years. During an average working day, 8000 retrievals are performed. What should a consultant propose as a solution to the customer?

- A. backup sets
- B. optical library
- C. DLT tape library
- D. IBM Tivoli Storage Manager for Space Management

Answer: B

14. On a Windows BM Tivoli Storage Manager server which option should be set to improve high speed tape performance for LAN-based managed nodes?

- A. streaming=ON
- B. movebatchsize=2
- C. IPXbuffersize=YES
- D. uselargebuffers=YES

Answer: D

15. Given the following include/exclude list:

```
exclude /.../core
```

```
include /home/gibes/options.scr
```

```
include /home/ross/arianna
```

```
include /home/gibes/doodads/drivers
```

```
exclude /home/gibes/*
```

```
include /core/data
```

```
exclude.dir /home/ross
```

Which file is included?

- A. /core/data
- B. /home/ross/coffee
- C. /home/gibes/options.scr
- D. /home/ross/arianna/coffee

Answer: A

16. An IBM Tivoli Storage Manager customer with six NetWare servers has the following requirements:

1. two versions of backups of live files
2. one version of the backup must be kept for 30 days after a file has been deleted
3. two of the clients keep financial data for seven years

Using one management class, which copygroup definition accomplishes the customer's requirement?

- A. verexists=2retextra=30verdeleted=1reonly=30retain = 30archive copygroup
- B. verexists=2retextra=nolimitverdeleted=1reonly=30retain = 2556archive copygroup
- C. verexists=2retextra=nolimitverdeleted=2reonly=nolimitretain = 2556archive copygroup
- D. verexists=2retextra=2556verdeleted=1reonly=2556retain = No archive archive copygroup

Answer: B

17. In a current customer environment there is a requirement to back up multiple Oracle servers with large databases using IBM Tivoli Storage Manager. Performance analyses showed that the backup of a database over the existing LAN cannot be completed in the given backup window. Recently, there was a SAN introduced to this environment. Which configuration, in addition to IBM Tivoli Storage Manager for Databases, solves the performance challenges with minimum additional hardware costs?

- A. install a multi-processor Storage Manager server system with an optical juke box
- B. install Managed System for SAN (Storage Agent) on each database server
- C. install a multi-processor Storage Manager server system with an automated tape library on the SAN
- D. install Storage Manager server software with an automated tape library on each database server

Answer: B

18. A customer using a SAN has experienced several hardware failures over the last several months. A storage consultant has decided to validate data as it is being backed up to ensure its integrity. What is the best way to perform this validation?

- A. Setup new copy storage pool.
- B. Schedule an audit library on a daily basis.
- C. Use the volumevalidate option in the server options file.
- D. Use the validateprotocol option to enable Cyclical Redundancy Checking (CRC) at the client.

Answer: D

19. Which dsm.sys file option is used to backup a raw volume during a scheduled backup?

- A. image.raw
- B. include.image
- C. rawbackup=yes
- D. enablerawbackup

Answer: B

20. A new administrative schedule did not run when it was scheduled. What is the most likely cause?

- A. The Priority = 0.
- B. It was not active.
- C. The node was not registered.
- D. It was not associated with a node.

Answer: B
