IBM Solutions Expert

000-910: managing and optimizing informix dynamic server databases

Practice Exam: 000-910 Exams

Exam Number/Code: 000-910

Exam Name: managing and optimizing informix dynamic server databases

Questions and Answers: 140 Q&As

([Solutions Expert](#))

"managing and optimizing informix dynamic server databases", also known as 000-910 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 140 Q&As to your 000-910 exam preparation. In the 000-910 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-910](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM Solutions Expert 000-910 (managing and optimizing informix dynamic server databases) examination of original title complete coverage. 000-910 exam questions help you pass the exam.

Just4Study 000-910 Feature:

* High quality - High quality and valued for the 000-910 Exam: 100% Guarantee to Pass Your 000-910 exam and get your Solutions Expert certification.

* Authoritative - Authoritative braindumps with complete details about 000-910 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Solutions Expert resources, you will minimize your **IBM Solutions Expert** cost and be ready to pass your 000-910 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Solutions Expert demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-910 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-910 Demo Download

Just4Study offers free demo for Solutions Expert 000-910 exam (managing and optimizing informix dynamic server databases). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM Solutions Expert 000-910** examination of original title complete coverage.000-910 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-910

Exam Name: managing and optimizing informix dynamic server databases(Solutions Expert)

Questions and Answers: 140 Q&A

[IBM 000-910](#) Test belongs to one of the Solutions Expert certified test, if needs to obtain the Solutions Expert certificate, you also need to participate in other related test, the details you may visit the [Solutions Expert](#) certified topic, in there, you will see all related Solutions Expert certified subject of examination.

Just4Study professional provide Solutions Expert 000-910 the newest Q&A, completely covers 000-910 test original topic. With our complete Solutions Expert resources, you will minimize your Solutions Expert cost and be ready to pass your 000-910 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-910

Title : Managing and Optimizing Informix Dynamic Server Databases

1. Which three can be locked?

- A. a row
- B. a page
- C. a column
- D. a key
- E. shared memory

Answer: ABD

2. Which isolation level does a database without logging default to?

- A. committed read
- B. dirty read
- C. mode ANSI
- D. repeatable read

Answer: B

3. What are three advantages of fragmentation?

- A. higher availability.
- B. reduced disk space requirements.
- C. parallel scans are possible with PDQ.
- D. finer granularity of archives and resources.

Answer: ACD

4. What are four valid logical and relational operators that can be used with expression-based distribution?

- A. AND
- B. IN
- C. <
- D. >=
- E. !=
- F. MATCHES

Answer: ABCD

5. In which two situations would you use a round robin fragmentation strategy?

- A. When all fragments must be scanned.
- B. To create uneven data distributions.
- C. When queries perform sequential scans and you have little information about the data being stored.
- D. When tables are accessed with a high degree of selectivity.

Answer: AC

6. Disk space for a table is allocated in one or more units called what?

- A. tablespaces
- B. extents
- C. blobs
- D. chunks

Answer: B

7. Why is a hash function advantageous in an expression-based distribution?

- A. Because it creates an even distribution of data.
- B. Because it creates an uneven distribution of data.
- C. Because it does not do expression testing.
- D. Because it places all data in one dbspace.

Answer: AB

8. What is a chunk when using raw devices?

- A. a contiguous unit of disk space.
- B. a dynamic unit of disk space.
- C. a location in shared memory
- D. a data table.

Answer: A

9. What does the ATTACH clause in the ALTER FRAGMENT statement do?

- A. It adds extents to a table.
- B. It attaches a raw data file to a table.
- C. It combines two unfragmented tables.
- D. It combines two fragmented tables.

Answer: C

10. What is database administration NOT concerned with?

- A. indexing
- B. creating tables
- C. accessing data
- D. application building

Answer: D

11. Which two types of fragmentation are allowed in a CREATE TABLE statement?

- A. disk striping
- B. dbspace
- C. indexing
- D. round robin
- E. mirroring
- F. tblspace
- G. sorting
- H. expression

Answer: DH

12. Given that the SQL statement SET LOCK MODE TO WAIT has not been executed, if a statement attempts to alter a row that another process has locked, what happens?

- A. The lock is released.
- B. An error is returned.
- C. The row is immediately updated.

D. The row is updated after the lock is removed.

Answer: B

13. Which statement fragments a table as round robin?

- A. `FRAGMENT AS ROUND ROBIN IN dbspace1, dbspace2.`
- B. `FRAGMENT TABLE BY ROUND ROBIN IN dbspace1, dbspace2.`
- C. `FRAGMENT BY ROUND ROBIN IN dbspace1, dbspace2.`
- D. `FRAGMENT BY ROUND ROBIN`

Answer: C

14. What is the system catalog?

- A. A catalogued set of index criteria.
- B. A set of tables created by the administrator
- C. A set of tables that manage the operating system
- D. A set of tables that describe the structure of the database.

Answer: A

15. With database logging, where are transaction records first placed?

- A. in a temporary database table.
- B. in the logical log buffer.
- C. in the primary chunk
- D. in the physical buffer.

Answer: B

16. Where are table spaces (tblspaces) created?

- A. in dbspaces
- B. in pages
- C. in extents
- D. in chunks

Answer: A

17. Where is fragment information stored?

- A. in the system catalog tables.
- B. in the physical logs.
- C. in the reserved pages.
- D. in the first page of the database tblspace.

Answer: A

18. Which two happen when the `ALTER FRAGMENT` statement is run?

- A. Transaction logging, if present, is suspended.
- B. The table is locked until the statement is completed.
- C. The database is locked until the statement is completed.
- D. For databases with logging, the statement executes as a single transaction.

Answer: BD

19. Which statement correctly changes the next extent size?

- A. `ALTER TABLE customer MODIFY NEXT SIZE 300`
- B. `ALTER TABLE customer MODIFY NEXT EXTENT SIZE 300`
- C. `ALTER TABLE customer MODIFY EXTENT SIZE 300`
- D. `ALTER TABLE customer NEXT SIZE 300`

Answer: A

20. Which fragments an index by expression?

- A. FRAGMENT BY EXPRESSION col_1
 - B. FRAGMENT BY EXPRESSION col_2 > = 10000 IN dbspace1
AND col_2 < 10000 IN dbspace2
 - C. FRAGMENT BY EXPRESSION col_1 < 10000
AND col_2 IN dbspace2
 - D. FRAGMENT BY EXPRESSION col < 20000 IN dbspace1, col >= 20000 IN dbspace2
- Answer: D
