### IBM Solutions Expert

**000-915: system administration for infomix dynamic server v9**

**Practice Exam:** 000-915 Exams

**Exam Number/Code:** 000-915

**Exam Name:** system administration for infomix dynamic server v9

**Questions and Answers:** 163 Q&As

( [Solutions Expert](#) )

Exam : [000-915](#)

"system administration for infomix dynamic server v9", also known as 000-915 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 163 Q&As to your 000-915 exam preparation. In the 000-915 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM Solutions Expert 000-915 (system administration for infomix dynamic server v9) examination of original title complete coverage. 000-915 exam questions help you pass the exam.

#### **Just4Study 000-915 Feature:**

\* High quality - High quality and valued for the 000-915 Exam: 100% Guarantee to Pass Your 000-915 exam and get your Solutions Expert certification.

\* Authoritative - Authoritative braindumps with complete details about 000-915 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Solutions Expert resources, you will minimize your **IBM Solutions Expert** cost and be ready to pass your 000-915 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Solutions Expert demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-915 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 000-915 Demo Download**

Just4Study offers free demo for Solutions Expert 000-915 exam (system administration for infomix dynamic server v9). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **IBM Solutions Expert 000-915** examination of original title complete coverage. 000-915 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: 000-915**

Exam Name: system administration for infomix dynamic server v9( Solutions Expert )

Questions and Answers: 163 Q&A

[IBM 000-915](#) Test belongs to one of the Solutions Expert certified test, if needs to obtain the Solutions Expert certificate, you also need to participate in other related test, the details you may visit the [Solutions Expert](#) certified topic, in there, you will see all related Solutions Expert certified subject of examination.

Just4Study professional provide Solutions Expert 000-915 the newest Q&A, completely covers 000-915 test original topic. With our complete Solutions Expert resources, you will minimize your Solutions Expert cost and be ready to pass your 000-915 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-915

Title : System Administration for Infromix Dynamic Server V9

1. A non-critical dbspace has been taken offline due to a disk failure. This dbspace contained 10% of the production data. A level-0 archive and logical log backups are available for a restore of the database server, which normally takes up to ten hours.

Which of the following is the best solution to restore the database server?

- A. Do a cold restore and apply the logical logs
- B. Do a warm restore and apply the logical logs
- C. Do a warm restore without applying the logical logs
- D. Do a cold restore without applying the logical logs.

Answer: B

2. The database server configuration file contains the following parameter settings.

According to the message log, checkpoints are occurring every 10 to 15 seconds. Checkpoint duration is less than one second.

Which of the following changes will most likely cause checkpoints to occur less frequently?

- A. Decrease BUFFERS
- B. Increase PHYSFILE
- C. Increase CKPTINTVL
- D. Decrease LRU\_MIN\_DIRTY and LRU\_MAX\_DIRTY
- E. Increase LRU\_MIN\_DIRTY and LRU\_MAX\_DIRTY

Answer: B

3. Given a partnum of 0x300034 for a table, which table in the sysmaster database could be queried to determine that actual table name?

- A. systables
- B. sysptnhdr
- C. systabnames
- D. sysdatabases

Answer: C

4. The database server has marked several chunks as "down" in a non-critical dbspac, but the database server is still online. Which of the following methods ould restore the data while providing the least amount of downtime to the users of that dbspace?

- A. A whole system restore
- B. A warm restore of the dbspace
- C. A cold restore of the dbspace
- D. A warm restore of the whole system

Answer: B

5. The following is extracted from the output of an onstat -k command.

From the above excerpt, how many exclusive locks are present in the engine?

- A. 0
- B. 1
- C. 4
- D. 6

Answer: C

6. Which of the following best describes external backups on the IBM Informix Dynamic Server?

- A. An external backup allows backups using onbar or ontape, database transactions are active during external backups.
- B. An external backup allows backups using onbar or ontape, database transactions are suspended during external backups.
- C. An external backup allows backups using operating system or third-party utilities transactions are active during external backups.
- D. An external backup allows backups using operating system or third-party utilities, transactions are suspended during external backups.

Answer: D

7. Users are reporting slow response time. It appears that it may be related to cpu utilization. Which of the following commands would show a list of virtual processors and their statistics?

- A. onstat -g ath
- B. onstat -g glo
- C. onstat -g st
- D. onstat -g act
- E. onstat -g ssc all

Answer: B

8. An Informix System Administrator needs to know how many pool threads are running on a CPU VP. Which of the following commands can be used to do this task?

- A. onstat -g ath
- B. onstat -g dsc
- C. onstat -g glo
- D. onstat -g sts

Answer: A

9. A data warehousing system has 1TB of data. A batch job is run every night to load new data. No data or schema changes occur during the daytime. Which of the following is the best backup strategy for this database system?

- A. Perform a physical backup after daily batch job completes; run logical log backups
- B. Perform a physical backup before the daily batch job completes; run logical log backups
- C. Perform a physical backup after the daily batch job completes; do not run logical log backups
- D. Perform a physical backup before the daily batch job completes; do not run logical log backups

Answer: C

10. A dbspace is almost full and more space is needed. When adding a new chunk to the dbspace, which of following must be considered when specifying the size of the new chunk?

- A. The size of the chunk should be considered but it can be changed after it is created.
- B. Choose the chunk size carefully because its size cannot be changed once it is created.
- C. For better performance, it is better to add a lot of small chunks than one very large chunk.
- D. As a rule of thumb, the size of the new chunk should be twice the size of the previous chunk.
- E. The size of the new chunk should not exceed the total size of all chunks currently allocated to the dbspace.

Answer: B

11. The System Administrator needs to implement a fast system backup strategy. The only requirement is that the backup utility needs to be able to perform parallel backups and restores. Which of the following utilities would work best for this situation?

- A. onbar
- B. ontape
- C. dbexport
- D. external backup

Answer: A

12. Which of the following is a performance benchmark for a data warehousing environment?

- A. Write cache rate
- B. Checkpoint durations
- C. Number of lock overflows
- D. Response time of complex queries

Answer: D

13. Using ontape, a level-0 backup is taken on a weekly basis and logs are backed up as they fill. A user recently delete a table from a non-logged database and the table data must be restored. Which of the following will restore as much of the table as possible?

- A. A level-0 restore
- B. A logical log restore
- C. A warm restore of the dbspace
- D. A level-0 restore followed by a full logical log restore

Answer: A

14. Which of the following sysmaster tables contains similar information as the output from the oncheck - pe command?

- A. syserrors
- B. syschunks
- C. sysptprof
- D. sysextents

Answer: D

15. The System Administrator needs to know when the latest "update statistics medium" has been run. Which of the following tables will most likely contain this information?

- A. systables
- B. sysdistrib
- C. sysindexes
- D. syscolumns

Answer: B

16. The database server is offline. There is a concern about chunk paths and their allocation. Which of the following commands would show the path for each chunk?

- A. oncheck -pr
- B. oncheck -pt
- C. oncheck -pp
- D. onheck -Cdi

Answer: A

17. Given the following information.

Which of the following best describes what the output represents?

- A. The database server was started for the first time and performed normal fast-recovery tasks.
- B. The database server was restarted after a normal shutdown and performed normal fast-recovery tasks
- C. The database server was restarted after an abnormal shutdown and performed normal fast-recovery tasks.
- D. The database server was restarted after restoring dbspaces from an archive and a post-archive fast recovery was performed.

Answer: C

18. TestInside.com wants the ability to back up only certain tables within their database system. Which of the following methods would satisfy this requirement?

- A. Backup those tables using onbar.
- B. Back up those tables using ontape.
- C. Place the tables in their own dbspaces and backup those dbspaces using onbar.
- D. Place the tables in their own dbspaces and back up those dbspaces using ontape.

Answer: C

19. A system Administrator needs to know the physical location of a table. Which of the following commands would show this information?

- A. oncheck -pe
- B. oncheck -pr
- C. oncheck -Pr
- D. oncheck -pp

Answer: A

20. The System Administrator is configuring the NETTYPE parameter to set the number of poll threads, for network connections. The administrator would like to allow 100 total users, 2 poll threads, and run the poll threads on network virtual processors.

Which of the following NETTYPE values should be used?

- A. soctcp, 50,2, CPU
- B. soctcp, 2,50,NET
- C. ipcshm, 2,50, NET
- D. soctcp, 2,100, NET

Answer: B
