IBM IBM certifications I

000-939: IBM Tivoli Change & Configuration Manager Database V7.1.1

Practice Exam: 000-939 Exams

Exam Number/Code: 000-939

Exam Name: IBM Tivoli Change & Configuration Manager Database V7.1.1

Questions and Answers: 144 Q&As

([IBM certifications I](#))

"IBM Tivoli Change & Configuration Manager Database V7.1.1", also known as 000-939 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 144 Q&As to your 000-939 exam preparation. In the 000-939 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

Exam : [000-939](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 000-939 (IBM Tivoli Change & Configuration Manager Database V7.1.1) examination of original title complete coverage. 000-939 exam questions help you pass the exam.

Just4Study 000-939 Feature:

* High quality - High quality and valued for the 000-939 Exam: 100% Guarantee to Pass Your 000-939 exam and get your IBM certifications I certification.

* Authoritative - Authoritative braindumps with complete details about 000-939 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 000-939 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-939 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-939 Demo Download

Just4Study offers free demo for IBM certifications I 000-939 exam (IBM Tivoli Change & Configuration Manager Database V7.1.1). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I 000-939** examination of original title complete coverage.000-939 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-939

Exam Name: IBM Tivoli Change & Configuration Manager Database V7.1.1(IBM certifications I)

Questions and Answers: 144 Q&A

[IBM 000-939](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I certificate, you also need to participate in other related test, the details you may visit the [IBM certifications I](#) certified topic, in there, you will see all related IBM certifications I certified subject of examination.

Just4Study professional provide IBM certifications I 000-939 the newest Q&A, completely covers 000-939 test original topic. With our complete IBM certifications I resources, you will minimize your IBM certifications I cost and be ready to pass your 000-939 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-939

Title : IBM Tivoli Change & Configuration Manager Database V7.1.1

1. When should existing middleware be reused?

- A.when reusing existing access policies
- B.when a quick CCMDB deployment is top priority
- C.when security policies prevent administrator access to new hardware
- D.when security policies prevent the creation of a new database or application server

Answer: A

2. Which two actions are performed from the CCMDB administrative workstation? (Choose two.)

- A.import TADDM data
- B.install patches and upgrades
- C.control user IDs and Security groups
- D.install WebSphere Application Servers
- E.build CCMDB EAR (Enterprise Archive) files

Answer: BE

3. Click the Exhibit button.

The Exhibit shows the top level definition of the Standard Change Job Plan. A user needs to modify it so that the Assessment task needs to be completed before Approval can start, and the Approval and the Schedule can start in parallel.

How can this be accomplished?

- A.set the Approval and Schedule predecessors to 10
- B.set the Assessment, Approval, and Schedule predecessors to 10
- C.set the Assessment, Approval, and Schedule predecessors to none
- D.set the Approval predecessors to 10 and the Schedule predecessors to none

Answer: A

4. Given that the customer's IT environment has been verified, which two prerequisite steps need to be taken to ensure that CCMDB requirements have been met? (Choose two.)

- A.examine the DBMS to be utilized for meeting requirements
- B.examine the platform (OS) for the DB server for meeting requirements
- C.examine the LDAP interface with the Common Data Model for meeting requirements
- D.examine the SOAP interface with the Common Data Model for meeting requirements
- E.examine the communication between the authentication client and the authentication server for meeting requirements

Answer: AB

5. What will impact analysis in CCMDB influence?

- A.the increase of tasks
- B.the creation of Change requests
- C.the reduction of Change requests
- D.the creation of implementation tasks

Answer: D

6. What is the purpose of auditing CIs?

- A.to identify Discovered CIs whose attributes do match the authorized attributes, and to take steps to reconcile all child attributes
- B.to identify Authorized CIs whose attributes do match the Discovered attributes, and to take steps to reconcile all child attributes
- C.to identify CIs whose actual status or other attributes do not match the authorized values, and to take steps to resolve the variances
- D.to identify CIs whose actual status or other attributes do match the authorized values, and to take steps to synchronize all child attributes

Answer: C

7. Which two options are a prerequisite for configuring single sign-on (SSO) so that users can navigate between TADDM and CCMDB using SSO? (Choose two.)

- A.SSL
- B.SSH
- C.Kerberos
- D.Client-authentication
- E.File-based repository

Answer: AD

8. One of the tasks that must be performed to install CCMDB is to analyze the roles and responsibilities of individuals in the project.

Which step must be performed to create a document to map the activities and tasks to specific roles in a CCMDB deployment?

- A.define the level of effort for each task
- B.define the roles involved in the process
- C.define the tasks that will be performed during the project
- D.create a Project Plan to outline what steps will be performed

Answer: B

9. One of the tasks that must be performed to install CCMDB is to analyze the roles and responsibilities of individuals in the project.

Which step must be performed to create a document to map the activities and tasks to specific roles in a CCMDB deployment?

- A.map roles to the defined tasks
- B.define the level of effort for each task
- C.define the tasks that will be performed during the project
- D.create a Project Plan to outline what steps will be performed

Answer: A

10. What is the application that contains the impact analysis feature in CCMDB?

- A.Work Management
- B.Change Management
- C.Problem Management
- D.Workflow Management

Answer: B

11. Which category of individuals are needed to certify the validity of an impact analysis for a given CCMDB environment?

- A. Subject Matter Experts
- B. Environmental Experts
- C. Chief Information Officers
- D. Human Resources Officers

Answer: A

12. Which two actions are performed from the CCMDB administrative workstation? (Choose two.)

- A. import TADDM data
- B. apply language packages
- C. deploy CCMDB EAR (Enterprise Archive) files
- D. install patches and updates for required middleware
- E. manage CCMDB Application Runtime Information Data

Answer: BC

13. During an impact analysis exercise, which two terminologies are of utmost importance and subjects of concern for a working CCMDB environment? (Choose two.)

- A. Outage
- B. Upgrade in performance
- C. Downgrade of performance
- D. Increased Change Requests
- E. Decreased Change Requests

Answer: AC

14. There was a new Change record submitted. One can track progress of change using attribute called Progress. Which statement is true regarding tracking progress of change using an attribute called Progress?

- A. Progress value can be updated only manually by operator.
- B. Progress value can be updated by automated task defined in the Job Plan.
- C. Progress value cannot be updated manually; it gets updated only by a dedicated workflow.
- D. Progress value will be updated only automatically always when Status attribute is changed for the Change record.

Answer: B

15. What is the purpose of the Manage CI Hierarchies dialog?

- A. to provide scope for CI promotion.
- B. to provide mapping for CI promotion.
- C. to provide mapping and scope for CI promotion.
- D. to provide mapping, scope, and rules for CI promotion.

Answer: C

16. A customer wants to implement CCMDB to handle the company's IT Change Requests. The customer is considering several supported configurations to better reuse the company's existing middleware.

Which configurations are valid options for the customer?

- A. MS SQL Server as the Database Server
- MS Active Directory as the LDAP security control
- IBM WebSphere Network Deployment as the J2EE container
- B. Oracle as the Database Server
- MS Active Directory as the LDAP security control
- JBoss Application Server as the J2EE container
- C. MySQL as the Database Server
- Sun Directory Server as the LDAP security control
- IBM WebSphere Network Deployment as the J2EE container

D.IBM DB2 as the Database Server
Sun Directory Server as the LDAP security control
WebLogic as the J2EE container
Answer: A

17. A customer wants to implement CCMDB to handle the companys IT Change Requests. The customer is considering several supported configurations to better reuse the companys existent middleware.

Which configurations are valid options for the customer?

- A.reuse of MS SQL Server as the Database Server
- new installation of MS Active Directory as the LDAP security control
- reuse of IBM WebSphere Network Deployment as the J2EE container
- new installation of IBM TADDM as the topology discovery
- B.reuse of DB2 as the Database Server
- reuse of IBM Tivoli Directory as the LDAP security control
- new installation of IBM WebSphere Network Deployment as the J2EE container
- reuse of BMC Atrium as the topology discovery
- C.new installation of DB2 as the Database Server
- reuse of Sun Directory Server as the LDAP security control
- new installation of IBM WebSphere Network Deployment as the J2EE container
- reuse of BMC Atrium as the topology discovery
- D.new installation of MS SQL Server as the Database Server
- reuse of Sun Directory Server as the LDAP security control
- new installation of WebLogic as the J2EE container
- new installation of IBM TADDM as the topology discovery

Answer: A

18. Which statement is true about TADDM and CCMDB?

- A.CCMDB is a required component of TADDM.
- B.TADDM is a required component of CCMDB.
- C.TADDM and CCMDB must be installed on the same system.
- D.CCMDB serves as a discovery tool, while TADDM serves as a data repository.

Answer: B

19. When creating a document to map tasks to roles for a deployment of CCMDB, which single goal is of primary importance?

- A.create a Role Breakdown Structure of the list of all activities and tasks
- B.create a Task Breakdown Structure of the list of all activities and tasks
- C.create a Work Breakdown Structure of the list of all activities and tasks
- D.create a Responsibility Breakdown Structure of the list of all activities and tasks

Answer: C

20. A document needs to be created to show the roles that will be defined when deploying CCMDB.

What is the primary goal when creating this document?

- A.create a list of activities to map to roles
- B.create a Work Task Structure of activities
- C.identify and map roles to the defined tasks
- D.create a Task Breakdown Structure of activities

Answer: D
