000-S02: DR550 Technical Mastery

Practice Exam: 000-S02 Exams

Exam Number/Code: 000-S02

Exam Name: DR550 Technical Mastery

Questions and Answers: 138 Q&As

([IBM certifications I](#))

Exam : [000-S02](#)

"DR550 Technical Mastery", also known as 000-S02 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 138 Q&As to your 000-S02 exam preparation. In the 000-S02 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 000-S02 (DR550 Technical Mastery) examination of original title complete coverage. 000-S02 exam questions help you pass the exam.

Just4Study 000-S02 Feature:

* High quality - High quality and valued for the 000-S02 Exam: 100% Guarantee to Pass Your 000-S02 exam and get your IBM certifications I certification.

* Authoritative - Authoritative braindumps with complete details about 000-S02 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 000-S02 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 000-S02 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 000-S02 Demo Download

Just4Study offers free demo for IBM certifications I 000-S02 exam (DR550 Technical Mastery). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I 000-S02** examination of original title complete coverage.000-S02 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 000-S02

Exam Name: DR550 Technical Mastery(IBM certifications I)

Questions and Answers: 138 Q&A

[IBM 000-S02](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I

certificate, you also need to participate in other related test, the details you may visit the [IBM certifications](#) | certified topic, in there, you will see all related IBM certifications | certified subject of examination.

Just4Study professional provide IBM certifications | 000-S02 the newest Q&A, completely covers 000-S02 test original topic. With our complete IBM certifications | resources, you will minimize your IBM certifications | cost and be ready to pass your 000-S02 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : IBM 000-S02

Title : DR550 Technical Mastery

1. How is "DS4000 Service Alert" implemented on the DR550?

- A. Remote Support option uses dial modem to send alerts to IBM.
- B. Storage Manager runs on HMC and uses dial modem to send alerts to IBM.
- C. Remote Support option sends alerts to email addresses supplied by customer.
- D. Storage Manager sends an SNMP alert notification to an SNMP server on the customer network.

Answer: D

2. Which of the following can be used to validate that the DR550 is working properly?

- A. Run AIX configuration manager
- B. Start the DR550 HMC Graphical User Interface
- C. Open the rack door and ensure that the LEDs and lights are on
- D. Run the AIX configuration manager and IBM TotalStorage DS6000 Storage Manager

Answer: B

3. System Storage Archive Manager script files are stored in which volume group?

- A. /lib
- B. /usr
- C. TSMApps
- D. TSMDBLogs

Answer: C

4. What is required when planning for the network environment for a dual node DR550?

- A. Six LAN cables
- B. Five TCP/IP addresses
- C. Four Ethernet switches
- D. A network protocol converter

Answer: B

5. Which of the following is used to create a backup of rootvg?

- A. smit mkdvd
- B. backup
- C. copydvd
- D. lssavevg

Answer: A

6. After modifying the state of a volume using the DRM command "move drmedia", which command would the administrator use to verify the results of the action?

- A. Isvol
- B. query move
- C. query actlog
- D. query tostate

Answer: C

7. What is the process for setting up the client to enable data to be sent to the DR550?

- A. Create CIFS mapping on each client to map to DR550
- B. Create NFS connection to /archive directory on the DR550 then map this directory to clients
- C. Load System Storage Archive Manager API on each client and edit dsm.sys or dsm.opt and register clients
- D. Load System Storage Archive Manager driver on each client and edit dsm.sys or dsm.opt on server to register clients

Answer: C

8. Which of the following components are involved in archiving and retrieving data from the DR550?

- A. IBM DB2 Content Management, System Storage Archive Manager and the DS6000 Storage device disks
- B. IBM DB2 Information Management, System Storage Archive Manager and the DS4100 Storage device disks
- C. A document management system or archive client, IBM DB2 Information Management and the DS4100 Storage device disks
- D. A document management system or archive client, System Storage Archive Manager and the DS4100 Storage device disks

Answer: D

9. In order for a content management application to access System Storage Archive Manager, which two items must be set up in the System Storage Archive Manager server?

- A. A backup schedule
- B. A client node
- C. A database backup schedule
- D. A management class
- E. A tape storage pool

Answer: BD

10. Which two of the following IBM products enable Information Lifecycle Management?

- A. IBM DB2 Content Manager
- B. IBM DB2 UDB for Data Retention
- C. IBM Lotus Notes for Data Retention
- D. IBM System Storage Archive Manager
- E. IBM WebSphere for Data Retention

Answer: AD

11. What must be configured on the content management application machine to communicate with the System Storage Archive Manager server?

- A. Archive client installed, dsmserv.opt configured
- B. TSM backup client installed, dsm.opt or dsm.sys configured
- C. System Storage Archive Manager API installed, dsmserv.opt configured
- D. System Storage Archive Manager API installed, dsm.opt or dsm.sys configured

Answer: D

12. During the Solution Assurance Review (SAR), a customer expresses plans to attach an unsupported tape library. What is the most appropriate response for the sales team?

- A. Explain to the customer that this unsupported configuration will prevent IBM from completing the order.
- B. Explain that an RPQ is NOT required if the sale of the DR550 was made through a certified Business Partner.
- C. Allow IBM to ship the DR550 with the customer understanding that it is their responsibility to make it work.

D. Complete the order and ship the DR550 to the customer while waiting for the configuration to be tested and certified.

Answer: A

13. What should be done when defining tape drives and libraries to System Storage Archive Manager?

- A. First make sure AIX can see the devices
- B. Always dedicate a drive for database backup use
- C. First define the tape drives and then the library
- D. Always use the System Storage Archive Manager device drivers only

Answer: A

14. When stopping the cluster service on a dual node DR550 system, which of the following statements is true?

- A. Cluster services can be stopped from either node using the AIX command HACMP - stop.
- B. Cluster services can be stopped from either node using the AIX command smitty clstop.
- C. Cluster services must be stopped from both nodes individually using the AIX command HACMP - stop.
- D. Cluster services must be stopped from both nodes individually using the AIX command smitty clstart.

Answer: B

15. How many rack power connections are required in a 28TB "disk only" DR550 configuration?

- A. Two connections on both racks
- B. Four 220 Volt 30 amp connections
- C. Eight 220 Volt 30 amp connections
- D. Eight 110/220 Volt 20 amp connections

Answer: B

16. Which of the following statements is true regarding IBM Content Manager Products?

- A. They address the needs of a small implementation up to a medium size business at only local locations.
- B. They contain APIs that cover some of the content management functionality needed for a localized solution.
- C. They provide all of the repository backend services necessary to address an enterprise content management system.
- D. They provide some of the repository backend services necessary to address an enterprise content management system.

Answer: C

17. Which AIX command changes or modifies networking addresses?

- A. smitty chfs
- B. smitty mktcpip
- C. ipconfig /c
- D. ipconfig /m

Answer: B

18. How can content management applications retrieve data from the System Storage Archive Manager?

- A. System Storage Archive Manager API calls
- B. System Storage Archive Manager import/export
- C. System Storage Archive Manager server to server connections
- D. Directly from the System Storage Archive Manager disk storage pools

Answer: A

19. Which version of the Tivoli Storage Manager API must be installed and configured on the content management resource server?

- A. TSM API 5.3.2 or later
- B. TSM API 5.2.2 or later
- C. TSM API 5.0.0 or later

D. DR550 supports all versions of the TSM API

Answer: B

20. Which step is required in the DR550 initial configuration?

A. Set up Call Home

B. Zone the SAN switches

C. Configure network addresses

D. Assign spare drives in the DS4100

Answer: C
