IBM IBM certifications I

006-002: Certified MySQL 5.0 DBA Part I

Practice Exam: 006-002 Exams

Exam Number/Code: 006-002

Exam Name: Certified MySQL 5.0 DBA Part I

Questions and Answers: 140 Q&As

([IBM certifications I](#))

Exam : [006-002](#)

"Certified MySQL 5.0 DBA Part I", also known as 006-002 exam, is a IBM certification. With the complete collection of exam questions, Just4Study has assembled to take you through 140 Q&As to your 006-002 exam preparation. In the 006-002 exam resources, you will cover every field and category in IBM Certification helping to ready you for your successful IBM Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for IBM IBM certifications I 006-002 (Certified MySQL 5.0 DBA Part I) examination of original title complete coverage. 006-002 exam questions help you pass the exam.

Just4Study 006-002 Feature:

* High quality - High quality and valued for the 006-002 Exam: 100% Guarantee to Pass Your 006-002 exam and get your IBM certifications I certification.

* Authoritative - Authoritative braindumps with complete details about 006-002 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed IBM certifications I resources, you will minimize your **IBM IBM certifications I** cost and be ready to pass your 006-002 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free IBM certifications I demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 006-002 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 006-002 Demo Download

Just4Study offers free demo for IBM certifications I 006-002 exam (Certified MySQL 5.0 DBA Part I). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **IBM IBM certifications I 006-002** examination of original title complete coverage.006-002 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 006-002

Exam Name: Certified MySQL 5.0 DBA Part I(IBM certifications I)

Questions and Answers: 140 Q&A

[IBM 006-002](#) Test belongs to one of the IBM certifications I certified test, if needs to obtain the IBM certifications I

certificate, you also need to participate in other related test, the details you may visit the [IBM certifications](#) | certified topic, in there, you will see all related IBM certifications | certified subject of examination.

Just4Study professional provide IBM certifications | 006-002 the newest Q&A, completely covers 006-002 test original topic. With our complete IBM certifications | resources, you will minimize your IBM certifications | cost and be ready to pass your 006-002 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : MySQL 006-002

Title : Certified MySQL 5.0 DBA Part II

1. Is it possible to tell the MySQL server to throw an error on division-by-zero rather than converting it to NULL and a warning?

- A. No, it has to be done programmatically.
- B. Yes, by updating a system variable.
- C. Yes, there is a SQL mode that exists for that.
- D. No, division-by-zero is always converted regardless of any setting.

Answer: C

2. Which of the following best describes why InnoDB tables should always have primary keys and why they should be short?

- A. Because InnoDB uses primary keys to locate tables, and shorter keys make quicker lookups.
- B. Because InnoDB uses primary keys to locate table rows, and shorter keys make quicker lookups.
- C. Because InnoDB stores pointers in a log to all the primary keys and shorter keys make this log smaller.

Answer: B

3. Which of the following statements are true regarding the structure of grant tables in new distributions?

- A. They change with every upgrade.
- B. They are often changed.
- C. They remain the same for backwards compatibility.

Answer: B

4. Which of the following best describes what MASTER_LOG_FILE and MASTER_LOG_POS provides?

- A. The path of the log file.
- B. The file to log replication actions to.
- C. The masters binary log name used for replication.
- D. The position in the masters binary log in which to start replication.

Answer: CD

5. Which of the following statements are true regarding wildcards in the host name of an account specification?

- A. The '%' character is used to match any number of characters or numbers
- B. The '*' character is used to match any number of characters or numbers
- C. The '_' character is used to match any number of characters or numbers
- D. The '.' character is used to match any single character or number
- E. Wildcards may be used to match any number of characters at the beginning of the host name or IP address only
- F. Wildcards may be used to match any number of characters at the end of the host name or IP address only
- G. Wildcards may be used to match any number of characters anywhere in the host name or IP address

Answer: AG

6. Which of the following best describe the effects on performance for the dynamic-row format for MyISAM has?

- A. Retrievals are more complex and slower.
- B. Retrievals are less complex and are faster.
- C. Rows generally take up less disk space than fixed-row format.
- D. Rows generally take up more disk space than fixed-row format.

Answer: AC

7. How can stored routines be used to check for constraints or legality of incoming data?

- A. They can make use of the VALIDATE DEFINER setting.
- B. They can not be used to check for constraints or legality of data.
- C. They can check and only perform an action if the incoming values match a specified value.

Answer: C

8. The stored function year_to_date is created by the 'root'@'localhost' account as follows:

```
CREATE FUNCTION year_to_date ()  
RETURNS DECIMAL(10,2)  
SQL SECURITY DEFINER  
BEGIN
```

...

```
END;
```

Within the routine body, a number of calculations are made on data in the financials table and the calculated value is returned. The only account which can access the financials table is 'root'@'localhost'.

If a client connects with the account 'joe'@'localhost' and calls the year_to_date function, what will happen?

- A. The function will not execute, as 'joe'@'localhost' does not have access to the financials table
- B. The function will not execute as SQL SECURITY DEFINER has been specified. It would execute if instead SQL SECURITY INVOKER had been specified
- C. The function will always execute as if it was 'root'@'localhost' that invoked it since SQL SECURITY DEFINER has been specified.
- D. If the account 'joe'@'localhost' has the EXECUTE privilege on year_to_date, the function will complete successfully

Answer: D

9. Which of the following is/are valid reasons to consider using --skip-networking?

- A. Your server is not networked to other servers.
- B. You do not have a need for remote clients to connect.
- C. You have a need for remote clients to connect.
- D. You are not going to use replication or clustering.

Answer: B

10. What kind of replication is supported by the MySQL server?

- A. Multiple-master replication
- B. Master to slave replication
- C. Single file based clustering
- D. MySQL doesn't support replication

Answer: B

11. Which of the following best describes what the master.info file contains and how it is used?

- A. It contains the values from the CHANGE MASTER statement.
- B. When the slave restarts it looks for which master to use from this file.
- C. It contains information about the master server, its slaves and its configuration.
- D. It is used by an administrator to determine what slaves connect to the master, and other information about the master server.

Answer: AB

12. When performing diagnostic functions on a server should excessive start and stop messages be looked for in the error log, and why?

- A. No, start and stop messages are of no relevance to diagnostics.
- B. Yes, because there is a bug in mysqld that can cause multiple start and stop messages to be inserted in the log.
- C. No, because they will not provide any information as to what is wrong.
- D. Yes, because they can indicate that there is something causing the server to restart unexpectedly and not due to normal startup and shutdown.

Answer: D

13. The type of file system you chose may affect MySQL use and/or performance with regard to...

- A. Table opening time.
- B. Size limits of files.
- C. Time to recover from a crash.
- D. The number of users MySQL can handle.
- E. The type of storage engines that can be used.

Answer: ABC

14. Assuming that the user account 'joe'@'example.com' exists, executing DROP USER 'joe'@'example.com' has the following consequences:

- A. The user account will immediately be removed from the server, if no object-level privileges are in effect for that account
- B. The account will be removed from the server the next time FLUSH PRIVILEGES is executed, if no object-level privileges are in effect for that account
- C. The account and all associated privileges will immediately be removed from the server
- D. The user account and all associated privileges will be removed from the server the next time FLUSH PRIVILEGES is executed.

Answer: C

15. Does max_connections have an affect on the number of slaves that may connect to a master?

- A. No, because slaves are not really clients.
- B. Yes, because each slave is effectively a connected user.
- C. No, because slaves do not use the same type of connection as a regular client.
- D. Yes, because if the server has too many connections, it may slow the slaves down.

Answer: B

16. Can multi-column FULLTEXT indexes be used? If so, when?

- A. No, they can not be used.
- B. Yes, they should be used to search multiple columns simultaneously.
- C. Yes, they can be used to search either one or all of the indexed columns.

Answer: B

17. Consider the following EXPLAIN output.

```
mysql> EXPLAIN SELECT Name FROM City WHERE Population > 8000000
***** 1. row *****
id: 1
select_type: SIMPLE
table: City
type: ALL
possible_keys: NULL
key: NULL
key_len: NULL
ref: NULL
```

rows: 4079

Extra: Using where

Which of the following statements are true?

- A. The query cannot be optimized any better.
- B. No index could be used to perform the query.
- C. All 4079 rows of the table need to be examined.
- D. The Name column should be indexed.
- E. The Population column should be indexed.

Answer: BCE

18. Which of the following optimizations could be made based on data collected in the slow query log?

- A. Tune server parameters.
- B. Change the storage engines in use.
- C. Make changes to the network infrastructure.
- D. Rewrite queries to perform more efficiently.
- E. Normalize data or add indexes to the tables that the queries use.

Answer: ABDE

19. For which of the following objects can privileges be specified?

- A. Host
- B. Global
- C. Database
- D. Table
- E. Column
- F. Row

Answer: BCDE

20. Which of the following would be considered a good candidate table for compression?

- A. A table with data that needs only few updates in the future.
- B. A table with data that will not be updated in the future.
- C. A large table, such as those used for data warehousing.
- D. All MyISAM tables are good candidates for compression.

Answer: B
