Novell, Inc Novell Other Certification

050-664-(575b): novell edirectory design and implementation

Practice Exam: 050-664-(575b) Exams

Exam Number/Code: 050-664-(575b)

Exam Name: novell edirectory design and implementation

Questions and Answers: 116 Q&As

([Novell Other Certification](#))

"novell edirectory design and implementation", also known as 050-664-(575b) exam, is a Novell, Inc certification. With the complete collection of exam questions, Just4Study has assembled to take you through 116 Q&As to your 050-664-(575b) exam preparation. In the 050-664-(575b) exam resources, you will cover every field and category in Novell, Inc Certification helping to ready you for your successful Novell, Inc Certification. Exam : [050-664-\(575b\)](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Novell, Inc Novell Other Certification 050-664-(575b) (novell edirectory design and implementation) examination of original title complete coverage. 050-664-(575b) exam questions help you pass the exam.

Just4Study 050-664-(575b) Feature:

* High quality - High quality and valued for the 050-664-(575b) Exam: 100% Guarantee to Pass Your 050-664-(575b) exam and get your Novell Other Certification certification.

* Authoritative - Authoritative braindumps with complete details about 050-664-(575b) exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Novell Other Certification resources, you will minimize your **Novell, Inc Novell Other Certification** cost and be ready to pass your 050-664-(575b) exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Novell Other Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 050-664-(575b) exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 050-664-(575b) Demo Download

Just4Study offers free demo for Novell Other Certification 050-664-(575b) exam (novell edirectory design and implementation). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Novell, Inc Novell Other Certification 050-664-(575b)** examination of original title complete coverage. 050-664-(575b) Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 050-664-(575b)

Exam Name: novell edirectory design and implementation(Novell Other Certification)

Questions and Answers: 116 Q&A

[Novell, Inc 050-664-\(575b\)](#) Test belongs to one of the Novell Other Certification certified test, if needs to obtain the Novell Other Certification certificate, you also need to participate in other related test, the details you may visit the [Novell Other Certification](#) certified topic, in there, you will see all related Novell Other Certification certified subject of examination.

Just4Study professional provide Novell Other Certification 050-664-(575b) the newest Q&A, completely covers 050-664-(575b) test original topic. With our complete Novell Other Certification resources, you will minimize your Novell Other Certification cost and be ready to pass your 050-664-(575b) tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Novell 050-664-(575b)

Title : Novell Edirectory Design and Implementation

1. After you create object naming standards, what should be defined for the attribute standards? (Choose 2.)

- A. Which object types require attributes
- B. Whether the attribute of an object is required
- C. Whether the attribute of an object is purgeable
- D. Whether the attribute of an object is unique from other object attributes
- E. Whether the attribute of an object is a system attribute that is automatically populated by eDirectory

Answer: BE

2. What is a good recommendation to follow when designing partitions for lower layers in the tree?

- A. Create a partition for each container.
- B. Partition the Directory by function regardless of location.
- C. Use organizational divisions and workgroups to define lower-level partitions.
- D. Place all servers, including servers at different locations, in the same partition.
- E. Partition the Directory with more partitions at the top and fewer partitions at lower-levels.

Answer: C

3. Your company has 15 sites connected by a WAN link to corporate headquarters. Corporate headquarters has 50 servers and each of the 15 sites has 30 servers. You are implementing a multiple time provider group time synchronization strategy. Which are considerations you should make before implementing this strategy? (Choose 2.)

- A. If possible, create local time providers.
- B. There will be a single point of failure at each location.
- C. You cannot exceed 7 primary time servers in your network.
- D. Make sure each reference server will synchronize with the same external source.
- E. The single reference time synchronization strategy will provide a better strategy for this network structure.

Answer: AD

4. You have just finished executing a tree merge. Which tasks are left to complete the tree merge process? (Choose 2.)

- A. Correct bindery services commands.
- B. Update workstation configurations.
- C. Delete and re-create volume objects.
- D. Restore the taped backup of the file system.
- E. Verify trustee assignments to the file system.

Answer: AB

5. Examine the exhibit by clicking the Exhibit button.

Shown in the exhibit is a partition and replica table, and a partitioned eDirectory tree. Which servers automatically receive a subordinate reference of the PR partition?

- A. Serv2, Serv5, and Serv6
- B. Serv2, Serv4, and Serv6
- C. Serv3, Serv5, and Serv6
- D. Serv2, Serv3, Serv5, and Serv6
- E. Serv2, Serv3, Serv4, Serv5, and Serv6

Answer: C

6. You are implementing an NDPS printing environment. Where is it recommended to place the NDPS print manager object in the eDirectory tree?

- A. Next to user objects
- B. Next to the NDPS printer object
- C. In the same container where the server object resides
- D. At least one level higher than the printers it manages
- E. In the same container as the user object that has administrative rights to manage it

Answer: D

7. What does DSMERGE allow you to do?

- A. Create replicas
- B. Create partitions
- C. Rename the eDirectory tree
- D. Configure time synchronization
- E. Rename objects within the eDirectory tree

Answer: C

8. You have completed a tree merge and want to confirm the new tree name by ensuring that all servers in the tree are configured to support the new tree. Which utility will provide you the status of every server in the tree and the name of the tree it is servicing?

- A. DSMMAINT
- B. DSMERGE
- C. DSREPAIR
- D. ConsoleOne
- E. NDS Manager

Answer: B

9. You have just created an eDirectory tree and installed 3 servers into the tree. The tree has one partition. Server1, Server2, and Server3 were installed into the Corp container. Server2 crashed and you removed it from the tree before you installed additional servers. The additional servers installed in the tree were Server4, Server5, Server6, and Server7. Server4 and Server5 were installed into the Prod container. Server6 and Server7 were installed into the Acct container. The Corp, Prod, and Acct containers are children of the tree root. The servers were placed in the tree in the following order: Server4, Server5, Server6, Server7. You haven't had the chance to manually add replicas to any server. Which servers hold replicas?

- A. Server1 and Server3
- B. Server1, Server3, and Server4
- C. Server1, Server3, Server4, and Server6
- D. Server1, Server3, Server4, and Server5
- E. Server1, Server3, Server6, and Server7
- F. Server1, Server3, Server4, Server5, Server6, and Server7

Answer: B

10. A secondary server is not synchronized with a single reference time server. During the next polling process, what percent of the time difference does the secondary time server adjust?

- A. 0%
- B. 16%
- C. 25%
- D. 50%
- E. 75%
- F. 100%

Answer: F

11. You are the network administrator for your company and are in charge of your company's eDirectory design and implementation project. You have completed the project approach phase of the eDirectory design cycle. Which tasks still need to be completed before you begin the implementation phase? (Choose)

- A. Design the eDirectory tree
- B. Fine-tune the eDirectory design
- C. Determine accessibility needs
- D. Plan a time synchronization strategy
- E. Gather business information related to network design

Answer: AC

12. Which replica or replicas contain a complete copy of all object information of a partition?

- A. Master
- B. Master and filtered
- C. Master and read/only
- D. Master and read/write
- E. Master, read/write, and read-only
- F. Master, read/write, and filtered
- G. Master, read/write, read-only, and subordinate reference

Answer: E

13. What does the following WAN Traffic Manager policy control? TCP/IP, NA

- A. Prevents background traffic generated by TCP/IP
- B. Prevents background traffic unless the traffic is generated by TCP/IP
- C. Restricts TCP/IP traffic unless the traffic is in the same TCP/IP network area
- D. Restricts TCP/IP traffic unless the traffic comes from a different TCP/IP network area

Answer: B

14. What does WAN Traffic Manager control? (Choose 2.)

- A. Events initiated by administrators or users
- B. Server-to-server traffic generated by eDirectory
- C. Server-to-server traffic generated by time synchronization
- D. The amount of eDirectory traffic based on cost of traffic and time of day
- E. Which servers the master replica server synchronizes to by using configured lists

Answer: BD

15. Which DNS/DHCP object contains resource record sets for DNS root servers?

- A. DNS Zone object
- B. DNS Group object
- C. DNS Locator object
- D. DNS Name Server object
- E. RootSrvrInfo Zone object

Answer: E

16. In which file do you configure time on a Linux server?

- A. ntp.conf
- B. init.conf
- C. time.conf
- D. tsync.conf
- E. clock.conf

Answer: A

17. Begin by clicking the Exhibit button.

Which eDirectory tree upper-layer design does the graph indicate?

- A. Region-based design
- B. Function-based design
- C. Location-based design
- D. Organization-based design
- E. Combination approach design

Answer: E

18. You are getting ready to merge 2 eDirectory trees. What should be done before attempting to merge trees? (Choose 2.)

- A. Back up both eDirectory trees.
- B. Rename the Admin user object in the target tree.
- C. Remove the source server from all replica rings.
- D. Use DSREPAIR to update the schema so it is the same on both servers.
- E. Rename the first level container objects in both trees to be identical.

Answer: AD

19. Which statement is true of queue-based printing?

- A. The print server object must be associated with a volume object.
- B. The printer object must be associated with a print server object.
- C. The print queue object must be associated with a print server object.
- D. The print server, print queue, and printer objects must all reside in the same container.
- E. The print server, print queue, and printer objects must all reside in the same container as the corresponding server object.

Answer: B

20. In which eDirectory objects do WAN traffic policies reside? (Choose 2.)

- A. The Admin object
- B. The Server object
- C. The LAN Area object
- D. Any container object
- E. The partition root object

Answer: BC
