#### 132-s-900.7: Specialist-IP Telephony Design Elective Exam

**Practice Exam:** 132-s-900.7 Exams

**Exam Number/Code:** 132-s-900.7

**Exam Name:** Specialist-IP Telephony Design Elective Exam

**Questions and Answers:** 76 Q&As

( [Avaya Certification](#) )

"Specialist-IP Telephony Design Elective Exam", also known as 132-s-900.7 Exam : [132-s-900.7](#) exam, is a Avaya certification. With the complete collection of exam questions, Just4Study has assembled to take you through 76 Q&As to your 132-s-900.7 exam preparation. In the 132-s-900.7 exam resources, you will cover every field and category in Avaya Certification helping to ready you for your successful Avaya Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Avaya Avaya Certification 132-s-900.7 (Specialist-IP Telephony Design Elective Exam) examination of original title complete coverage. 132-s-900.7 exam questions help you pass the exam.

#### **Just4Study 132-s-900.7 Feature:**

\* High quality - High quality and valued for the 132-s-900.7 Exam: 100% Guarantee to Pass Your 132-s-900.7 exam and get your Avaya Certification certification.

\* Authoritative - Authoritative braindumps with complete details about 132-s-900.7 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Avaya Certification resources, you will minimize your **Avaya Avaya Certification** cost and be ready to pass your 132-s-900.7 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Avaya Certification demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 132-s-900.7 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 132-s-900.7 Demo Download**

Just4Study offers free demo for Avaya Certification 132-s-900.7 exam (Specialist-IP Telephony Design Elective Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Avaya Avaya Certification 132-s-900.7** examination of original title complete coverage.132-s-900.7 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 132-s-900.7**

Exam Name: Specialist-IP Telephony Design Elective Exam( Avaya Certification )

Questions and Answers: 76 Q&A

[Avaya 132-s-900.7](#) Test belongs to one of the Avaya Certification certified test, if needs to obtain the Avaya Certification certificate, you also need to participate in other related test, the details you may visit the [Avaya Certification](#) certified topic, in there, you will see all related Avaya Certification certified subject of examination. Just4Study professional provide Avaya Certification 132-s-900.7 the newest Q&A, completely covers 132-s-900.7 test original topic. With our complete Avaya Certification resources, you will minimize your Avaya Certification cost and be ready to pass your 132-s-900.7 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Avaya 132-S-900.7

Title : Specialist-IP Telephony Design Elective Exam

1. A customer has two sites connected over a 512k serial WAN link. There are 40 employees at the main site and 20 employees at the remote site. Since the server bank and all trunks terminate at the main location, the customer has concerns about the bandwidth over the WAN link. They request a network assessment.

Which two design considerations are pertinent to the bandwidth on the WAN link? (Choose two.)

- A. VLAN capable Ethernet switch
- B. telecommuters using IP Softphone to access network resources
- C. number of voice calls going through the WAN link during peak time
- D. graphic-based programs used on the network between the two sites

Answer: CD

2. Which of the following does a typical Cisco design include?

- A. Right to Use for Call Manager
- B. Right to Use for Growth
- C. Right to Use for Phones
- D. Right to Use for Redundancy

Answer: C

3. A client is implementing an S87xx Media Server with several G650 Media Gateways. They are concerned with overheating in the equipment room, especially in the equipment power units.

Which two conditions cause a G650 power supply to initiate an emergency shutdown? (Choose two.)

- A. overvoltage
- B. overheating
- C. undervoltage
- D. high humidity

Answer: AB

4. Your client is planning to implement IP Telephony on their recently installed S8500. They will have local IP sets and IP connected remote users (IP Softphone). In addition, they need connectivity to a limited-bandwidth WAN between headquarters and their manufacturing plant. The client is interested in setting up network regions.

What are three reasons to consider network regions in your overall design? (Choose three.)

- A. to associate parameters such as codecs and locations to groups of IP endpoints
- B. to provide IP endpoints certain mandatory use of resources that belong in the same region as the endpoint
- C. to provide IP endpoints certain preference to use resources that belong in the same region as the endpoint
- D. to associate IP endpoints with a type of signaling resource (CLANS) to load balance registration among the CLANS in multiple regions

E. to associate IP endpoints with a type of signaling resource (CLANS) to load balance registration among the CLANS in the same region

Answer: ACE

5. You are developing IP Telephony bandwidth requirements for WAN traffic between two S87xx sites. The client estimates that simultaneous non-IP Telephony traffic will occupy 1.5 Mbps. In addition, they estimate that using G.729, 55 simultaneous IP calls need to be provided access to the WAN link.

What estimated bandwidth will the IP Telephony traffic add to the WAN traffic?

- A. 1.5 Mbps
- B. 275 Kbps
- C. 1650 Kbps
- D. 4675 Kbps

Answer: C

6. The customer plans to add remote IP users when they implement VoIP on their network.

What information about the customer's data network do you need to know to verify that remote users can be supported? (Choose three.)

- A. codec administration
- B. network region for each remote user
- C. applications the remote user will be using
- D. bandwidth the remote user will have access to
- E. the average round trip between the VPN users and the voice network

Answer: CDE

7. What needs to be considered at an Enterprise Survivability Server (ESS) location when implementing an agent recording solution?

- A. H.323 trunks
- B. locally sourced announcements
- C. Application Enablement Services (AES)
- D. Separation of Bearer and Signaling (SBS)

Answer: C

8. Which two recommendations of a network assessment allow Avaya IP phones to boot up properly with dynamic addressing? (Choose two.)

- A. DHCP Site Specific Option 167 being set up correctly
- B. DHCP Site Specific Option 176 being set up correctly
- C. using Fast Spanning Tree Protocol (FSTP) at the port level
- D. turning off Spanning Tree Protocol (STP) at the switch level

Answer: BC

9. An Avaya customer with a large contact center is IP enabling their S87xx and will allow 25 users to work from home via IP Agent in the Telecommuter mode.

What is the minimum hardware required in the S87xx to provide this application?

- A. one CLAN board only
- B. one Media Processor board only
- C. one CLAN and one Media Processor board
- D. no hardware is required, only software.

Answer: A

10. Within an S8500 Server, 25 IP telephony endpoints are simultaneously connected to 10 digital sets, 10 IP sets, and 5 CO trunks.

How many DSPs are in use if G.711 is incorporated?

- A. 15

- B. 25
  - C. 30
  - D. 50
- Answer: A
