156-215.65: Check Point Security Administration I NGX

Practice Exam: 156-215.65 Exams

Exam Number/Code: 156-215.65

Exam Name: Check Point Security Administration I NGX

Questions and Answers: 329 Q&As

([CheckPoint](#))

"Check Point Security Administration I NGX", also known as 156-215.65 exam, is a CheckPoint certification. With the complete collection of exam questions, Just4Study has assembled to take you through 329 Q&As to your 156-215.65 exam preparation. In the 156-215.65 exam resources, you will cover every field and category in CheckPoint Certification helping to ready you for your successful CheckPoint Certification.

Exam : [156-215.65](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for CheckPoint CheckPoint 156-215.65 (Check Point Security Administration I NGX) examination of original title complete coverage. 156-215.65 exam questions help you pass the exam.

Just4Study 156-215.65 Feature:

- * High quality - High quality and valued for the 156-215.65 Exam: 100% Guarantee to Pass Your 156-215.65 exam and get your CheckPoint certification.
- * Authoritative - Authoritative braindumps with complete details about 156-215.65 exam.
- * Cheaper - Our Just4Study products are cheaper than any other website. With our completed CheckPoint resources, you will minimize your **CheckPoint CheckPoint** cost and be ready to pass your 156-215.65 exam on Your First Try, 100% Money Back Guarantee included!
- * Free - Try free CheckPoint demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 156-215.65 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 156-215.65 Demo Download

Just4Study offers free demo for CheckPoint 156-215.65 exam (Check Point Security Administration I NGX). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **CheckPoint CheckPoint 156-215.65** examination of original title complete coverage.156-215.65 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 156-215.65

Exam Name: Check Point Security Administration I NGX(CheckPoint)

Questions and Answers: 329 Q&A

[CheckPoint 156-215.65](#) Test belongs to one of the CheckPoint certified test, if needs to obtain the CheckPoint certificate, you also need to participate in other related test, the details you may visit the [CheckPoint](#) certified topic, in there, you will see all related CheckPoint certified subject of examination.

Just4Study professional provide CheckPoint 156-215.65 the newest Q&A, completely covers 156-215.65 test original topic. With our complete CheckPoint resources, you will minimize your CheckPoint cost and be ready to pass your 156-215.65 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Check Point 156-215.65

Title : Check Point Security Administration I NGX

1. Which SmartConsole component can Administrators use to track remote administrative activities?

- A. The WebUI
- B. SmartView Monitor
- C. Eventia Reporter
- D. SmartView Tracker

Answer: D

2. Which R65 SmartConsole tool would you use to verify the current installed Security Policy name on a Security Gateway?

- A. SmartView Status
- B. SmartUpdate
- C. SmartView Monitor
- D. None, SmartConsole applications only communicate with the SmartCenter Server.

Answer: C

3. Which statement below is TRUE about management plug-ins?

- A. The plug-in is a package installed on the Security Gateway.
- B. Using a plug-in offers full central management only if special licensing is applied to specific features of the plug-in.
- C. A management plug-in interacts with a SmartCenter Server to provide new features and support for new products.
- D. Installing a management plug-in is just like an upgrade process. (It overwrites existing components.)

Answer: C

4. When troubleshooting the behavior of Check Point Stateful Inspection, it is important to consider "inbound" vs "outbound" packet inspection from the point of view of the _____.

- A. Logical Topology
- B. Administrator
- C. Security Gateway
- D. Internet

Answer: C

5. The Check Point Security Gateway's virtual machine (kernel) exists between which two layers of the OSI model?

- A. Network and Data Link layers
- B. Session and Network layers
- C. Application and Presentation layers
- D. Physical and Data Link layers

Answer: A

6. Your bank's distributed VPN-1 NGX R65 installation has Security Gateways up for renewal. Which SmartConsole application will tell you which Security Gateways have licenses that will expire within the next 30 days?

- A. SmartUpdate
- B. SmartPortal
- C. SmartDashboard
- D. SmartView Tracker

Answer: A

7. You are installing a SmartCenter server. Your security plan calls for three administrators for this particular server. How many can you create during installation?

- A. As many as you want
- B. Depends on the license installed on the SmartCenter Server
- C. Only one with full access and one with read-only access
- D. Only one

Answer: D

8. MegaCorp's security infrastructure separates Security Gateways geographically. You must request a central license for one remote Security Gateway. You must request a central license:

- A. Using your SmartCenter Server's IP address, attach the license to the remote Gateway via SmartUpdate.
- B. Using the remote Gateway's IP address, attach the license to the remote Gateway via SmartUpdate.
- C. Using each of the Gateways' IP addresses, apply the licenses on the SmartCenter Server with the cprlic put command.
- D. Using the remote Gateway's IP address, apply the license locally with the cplc put command.

Answer: A

9. It is required to completely reboot the OS after which of the following changes are made on the Security Gateway? i.e. cprestart command is not sufficient

- 1. Adding a hot-swappable NIC to the OS for the first time.
- 2. Uninstalling the VPN-1 Power/UTM package.
- 3. Installing the VPN-1 Power/UTM package.
- 4. Re-establishing SIC to the SmartCenter Server.
- 5. Doubling the maximum number of connections accepted by the Security Gateway

- A. 1, 2, 3 only
- B. 3 only
- C. 3, 4, and 5 only
- D. 1, 2, 3, 4, and 5

Answer: A

10. What does it indicate when a Check Point product name includes the word "SMART"?

- A. Stateful Management of all Routed Traffic
- B. Security Management Architecture
- C. The Check Point product includes Artificial Intelligence
- D. This Check Point product is a GUI Client

Answer: B

11. Your current security scenario gives you the option to choose between a stand-alone installation and a distributed installation. Which of the following factors would cause you to decide in favor of the distributed installation?

- A. You are forced to use Windows as operating system.
- B. You cannot upgrade software packages on a stand-alone Security Gateway via SmartUpdate.
- C. Clientless VPN would not work in a stand-alone installation.
- D. The SmartCenter Server must be a secondary server. You are forced to install a separate primary server.

Answer: B

12. Which of the following statements about Bridge mode are TRUE?

- A. Assuming a new installation, bridge mode requires changing the existing IP routing of the network.
- B. All ClusterXL modes are supported.
- C. When managing a Security Gateway in Bridge mode, it is possible to use a bridge interface for Network Address Translation.
- D. A bridge must be configured with a pair of interfaces.

Answer: D

13. Which of the following are available SmartConsole clients which can be installed from the R65 NGX Windows CD?

Read all answers and select the most complete and valid list.

- A. SmartView Tracker, CPINFO, SmartUpdate
- B. Security Policy Editor, Log Viewer, Real Time Monitor GUI
- C. SmartView Tracker, SmartDashboard, CPINFO, SmartUpdate, SmartView Status
- D. SmartView Tracker, SmartDashboard, SmartLSM, SmartView Monitor

Answer: D

14. The customer has a small Check Point installation which includes one Window 2003 server working as SmartConsole and SmartCenter with a second server running SecurePlatform working as Security Gateway. This is an example of:

- A. Hybrid Installation
- B. Stand-Alone Installation
- C. Distributed Installation
- D. Unsupported configuration

Answer: C

15. A marketing firm's networking team is trying to troubleshoot user complaints regarding access to audio-streaming material from the Internet. The networking team asks you to check the object and rule configuration settings for the perimeter Security Gateway. Which SmartConsole application should you use to check these objects and rules?

- A. SmartDashboard
- B. SmartView Monitor
- C. SmartView Status
- D. SmartView Tracker

Answer: A

16. How do you view a Security Administrator's activities, using SmartConsole tools?

- A. Eventia Suite
- B. SmartView Monitor using the Administrator Activity filter
- C. SmartView Tracker in Audit mode
- D. SmartView Tracker in Log mode

Answer: C

17. The customer has a small Check Point installation which includes one Window XP workstation working as SmartConsole , one Solaris server working as SmartCenter, and a third server running SecurePlatform working as Security Gateway. This is an example of:

- A. Distributed Installation
- B. Hybrid Installation
- C. Unsupported configuration
- D. Stand-Alone Installation

Answer: A

18. UDP packets are delivered if they are _____.

- A. bypassing the kernel by the "forwarding layer" of ClusterXL
- B. a legal response to an allowed request on the inverse UDP ports and IP
- C. a stateful ACK to a valid SYN-SYN/ACK on the inverse UDP ports and IP
- D. referenced in the SAM related dynamic tables

Answer: B

19. The customer has a small Check Point installation which includes one Window 2003 server working as SmartConsole and a second server running SPLAT working as both SmartCenter server and the Security Gateway.

This is an example of:

- A. Distributed Installation
- B. Unsupported configuration
- C. Stand-Alone Installation
- D. Hybrid Installation

Answer: C

20. UDP packets are delivered if they are _____.

- A. a new client > server packet allowed by the Rule Base
- B. a new server > client packet allowed by the Rule Base
- C. a stateful ACK to a valid SYN-SYN/ACK on the inverse UDP ports and IP
- D. any UDP packet in any direction (client > server; server > client) allowed by the Rule Base

Answer: A

21. Of the three mechanisms Check Point uses for controlling traffic, which enables firewalls to incorporate layer 4 awareness in packet inspection?

- A. Stateful Inspection
- B. SmartDefense
- C. Application Intelligence
- D. Packet filtering

Answer: A

22. In a "Stand-Alone Installation" the functionality of the SmartCenter Server would be installed together with which other Check Point architecture component?

- A. SecureClient
- B. SmartConsole
- C. Security Gateway
- D. None, SmartCenter Server would be installed by itself

Answer: C

23. Which SmartConsole tool would you use to see the last policy pushed in the audit log?

- A. SmartView Status
- B. SmartView Server
- C. SmartView Monitor
- D. SmartView Tracker

Answer: D

24. Which R65 SmartConsole tool would you use to verify the installed Security Policy name on a Security Gateway?

- A. SmartUpdate
- B. None, SmartConsole applications only communicate with the SmartCenter Server.
- C. SmartView Server
- D. SmartView Tracker

Answer: D

25. Some control operations and user interactions are difficult or impossible to execute at the kernel level. The

_____ component provides a mechanism for such operations.

- A. encryption
- B. daemon
- C. management
- D. security

Answer: B

26. The customer has a small Check Point installation which includes one Linux Enterprise 3.0 server working as SmartConsole and a second server running Windows 2003 working as both SmartCenter server and the Security Gateway. This is an example of:

- A. Hybrid Installation
- B. Stand-Alone Installation
- C. Distributed Installation
- D. Unsupported configuration

Answer: D

27. VPN-1 NGX R65's INSPECT Engine inserts itself into the kernel between which two layers of the OSI model?

- A. Presentation and Application
- B. Session and Transport
- C. Data and Network
- D. Physical and Data

Answer: C

28. You manage a global network extending from your base in Chicago to Tokyo, Calcutta and Dallas. Management wants a report detailing the current software level of each Enterprise class Security Gateway. You plan to take the opportunity to create a proposal outline, listing the most cost-effective way to upgrade your Gateways. Which two SmartConsole applications will you use to create this report and outline?

- A. SmartView Monitor and SmartUpdate
- B. SmartLSM and SmartUpdate
- C. SmartView Tracker and SmartView Monitor
- D. SmartDashboard and SmartView Tracker

Answer: A

29. When launching SmartDashboard, what information is required to log into VPN-1 NGX R65?

- A. User Name, SmartCenter Server IP, certificate fingerprint file
- B. Password, SmartCenter Server IP
- C. User Name, Password, SmartCenter Server IP
- D. Password, SmartCenter Server IP, LDAP Server

Answer: C

30. Once installed, the VPN-1 NGX R65 kernel resides directly below what layer of the TCP/IP stack? Note: Application is the top and Physical is the bottom of the IP stack.

- A. Data Link
- B. Network
- C. Session
- D. Transport

Answer: B
