Lotus CLP

190-513: Lotus Using JavaScript in Domino R5 Applications

Practice Exam: 190-513 Exams

Exam Number/Code: 190-513

Exam Name: Lotus Using JavaScript in Domino R5 Applications

Questions and Answers: 90 Q&As

([CLP](#))

"Lotus Using JavaScript in Domino R5 Applications", also known as 190-513 exam, is a Lotus certification. With the complete collection of exam questions, Just4Study has assembled to take you through 90 Q&As to your 190-513 exam preparation. In the 190-513 exam resources, you will cover every field and category in Lotus Certification helping to ready you for your successful Lotus Certification.

Exam : [190-513](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Lotus CLP 190-513 (Lotus Using JavaScript in Domino R5 Applications) examination of original title complete coverage. 190-513 exam questions help you pass the exam.

Just4Study 190-513 Feature:

* High quality - High quality and valued for the 190-513 Exam: 100% Guarantee to Pass Your 190-513 exam and get your CLP certification.

* Authoritative - Authoritative braindumps with complete details about 190-513 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CLP resources, you will minimize your **Lotus CLP** cost and be ready to pass your 190-513 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free CLP demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 190-513 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 190-513 Demo Download

Just4Study offers free demo for CLP 190-513 exam (Lotus Using JavaScript in Domino R5 Applications). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Lotus CLP 190-513** examination of original title complete coverage. 190-513 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 190-513

Exam Name: Lotus Using JavaScript in Domino R5 Applications(CLP)

Questions and Answers: 90 Q&A

[Lotus 190-513](#) Test belongs to one of the CLP certified test, if needs to obtain the CLP certificate, you also need to participate in other related test, the details you may visit the [CLP](#) certified topic, in there, you will see all related CLP certified subject of examination.

Just4Study professional provide CLP 190-513 the newest Q&A, completely covers 190-513 test original topic. With our complete CLP resources, you will minimize your CLP cost and be ready to pass your 190-513 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Lotus 190-513

Title : Lotus Using JavaScript in Domino R5 Applications

1. Harvey has three numeric, editable fields on his form: unitprice, quantity, and total. He wants to have a button to compute the total. So far he has written:

```
theForm = document.forms[0];
```

```
theForm.total.value = theForm.quantity.value + theForm.unitprice.value;
```

Which one of the following will happen when the user enters 10 in the unitprice field and 30 in the quantity field and the button is pressed?

- A. A JavaScript error will occur.
- B. 300 will be placed in the total field.
- C. 3010 will be placed in the total field.
- D. The Domino Designer will not let Harvey save the form since the above code has an error.

Answer: C

2. Ann has written the following code in the Submit button onClick event:

```
if(window.document.forms[0].Email.value=="")
```

```
{
```

```
  alert("Please enter an email we can use to reply to your question.");
```

```
  window.document.forms[0].Email.focus()
```

```
}
```

```
else
```

```
{
```

```
  window.document.forms[0].submit()
```

```
}
```

When she runs it, the else statement is never executed. Which one of the following code changes will correct the error?

- A. `if(Email.value=="")`
- B. `if(window.document.forms[0].email.value=="")`
- C. `if(window.document.forms[0].Email.value=="")`
- D. The code is correct. It needs to be moved to the onBlur event of the Email field.

Answer: C

3. Bahar is creating a form that will open a new window with a location object. Which one of the following describes the location object?

- A. It contains the URL of a hypertext link.
- B. It is an object under the history object.
- C. It is an object under the document object.
- D. It contains the URL of the current document.

Answer: D

4. Jon used the `@IsMember` @Function in his Notes application to search for the word "member" in a line of text.

Which one of the following JavaScript string methods would allow him to do a similar thing?

- A. `find()`
- B. `split()`
- C. `substr()`
- D. `indexOf()`

Answer: D

5. Given the following code:

```
var x = document.forms[0];
```

Which one of the following is contained in the variable x?

- A. A form object for the current page.
- B. A document object with the form referrer.
- C. A string that represents the form of the current page.
- D. A string that contains the form name of the current page.

Answer: A

6. Marjorie created the following JavaScript code segment to check whether data had been entered into a required field:

```
var frm=document.forms[0];  
if(frm.LastName.value <missing code> "")
```

Which one of the following operators should she have used for the <missing code>?

- A. `=`
- B. `==`
- C. `:=`
- D. `is`

Answer: B

7. When a user clicks on a button and a new window is opened, which one of the following properties refers to the parent window that has generated the new window?

- A. `window.top`
- B. `window.self`
- C. `window.opener`
- D. `window.parent`

Answer: C

8. Which one of the following describes how variables are declared and typed in JavaScript?

- A. explicit initialization
loosely typed
- B. implicit declaration
loosely typed
- C. implicit declaration
strongly typed
- D. explicit declaration
strongly typed

Answer: B

9. Consider the following:

```
<INPUT TYPE=button NAME="submitBtn" VALUE="Submit" onClick  
="submitMe(this.form)">
```

Which one of the following does the JavaScript event handler do?

- A. It submits the current HTML form.
- B. It submits the current HTML page.
- C. It calls a JavaScript function called submitMe() and passes the form object for the current page.
- D. It calls a JavaScript function called submitMe() and passes the form object for the button object to the function.

Answer: D

10. Look at the following application specification. An application's data is entered via either a Web or Notes client. Both clients must have similar functionality. There is a form which displays/allows for data entry of the video. Its name is "Product Description," with the alias "PD." The form also has a facility to make the video available once inventory is checked. When placed in the browser, which one of the following is the NAME attribute of the <FORM> tag for the Product Description form?

- A. "PD"
- B. "_PD"
- C. "_DominoForm"
- D. "Product Description"

Answer: B

11. Danielle has written the following function, which appears in the JS Header of the ShipTo form.

```
function getkeyval()
{
<code segment>
}
```

It opens when the client clicks on the Alternate Ship To address in the Video Order form. The ShipTo form appears in a smaller window allowing the user to select a different ShipTo address for the current order.

Which one of the following best describes how to trigger the function in the ShipTo form and then close the open window?

- A. In the OnChange event of the ShipToAddress field, enter "getkeyval()".
- B. Choose Create>Hotspot>Link Hotspot. Select the HTML tab, and enter the following in the Other field:
onClick="getkeyval()"
- C. Choose Create>Hotspot>Link Hotspot. Select the HTML tab, and enter the following in the Class field:
onClick="getkeyval()"
- D. Create a close link on the form using passthru HTML as follows:

Close

Answer: D

12. Look at the following button code:

```
var x = 42;
x = "this is a string";
alert ("The value of x is " + x);
```

Which one of the following will happen when this code is run?

- A. A "Type Mismatch" error will occur when the button is clicked.
- B. A run-time JavaScript error will occur when the button is clicked.
- C. The Domino Designer will not save the form since there is an error.
- D. An alert will appear with the message "The value of x is this is a string".

Answer: D

13. Which one of the following would Jim do to set up a global variable that will hold the initial value of a field on the page?

- A. Declare and set the variable in the onClick event of the field.
- B. Declare and set the variable in the JS Header event of the form.
- C. Declare the variable in the JS Header event of the form and set the value in the onClick event of the field.
- D. Declare the variable in the JS Header event of the form and set the variable in the onLoad event of the form.

Answer: D

14. Which one of the following designated lines has incorrect code?

```
// initialize the variables
secsPerMin = 60; // <LINE A>
var minsPerHour = 60;
var hoursPerDay = 24;
var daysPerYear = 365;
// perform calculations
var secsPerDay = secsPerMin * minsPerHour * hoursPerDay; //<LINE B>
var secsPerYear = secsPerDay * daysPerYear;
document.writeln("<b>There are ");
document.writeln(secsperYear); //<LINE C>
document.writeln(" seconds per year.</b><p>"); //<LINE D>
```

- A. <LINE A>
- B. <LINE B>
- C. <LINE C>
- D. <LINE D>

Answer: C

15. Look at the following JavaScript function:

```
function clickButton
{
document.forms[0].submitMe.onClick( )
}
```

Which one of the following will this function do?

- A. Run a global JavaScript function named onClick().
- B. Run the onClick event of an object named submitMe.
- C. Place the cursor in an input on the form named submitMe.
- D. Run a JavaScript function named onClick() that is on a form object named submitMe.

Answer: B

16. The following statements appear in a function Pat is writing to calculate how many weeks before a video is released.

```
if (numDays <= 7 ) // First Condition
{ varMsg = "The video will be released this week";
}
else if((numDays > 7) && (numDays <=14)) // Second Condition
{varMsg = "The video will be released in 2 weeks";
}
else if((numDays > 14) && (numDays <=21)) // Third condition
{varMsg = "The video will be released in 3 weeks";
}
else if((numDays > 21) && (numDays <=28)) // Fourth condition
{varMsg= "The video will be released in 4 weeks";
}
else {varMsg="The video will be released next month";
}
alert(varMsg);
```

When Pat tests the button that calls the function, which one of the following will occur?

- A. If numDays = 7, the first condition will be true, varMsg will equal "The video will be released this week", and the alert statement will execute.
- B. If numDays = 7, the first condition will be true, varMsg will equal "The video will be released this week", and then the following conditions will be tested before the alert statement is executed.
- C. If numDays = 14, the third condition will be true, varMsg will equal "The video will be released in 3 weeks", and then

the following conditions will be tested before the alert statement is executed.

D. If numDays = 21, the third condition will be true, varMsg will equal "The video will be released in 3 weeks", and then the following conditions will be tested before the alert statement is executed.

Answer: A

17. The following code will produce a run-time error:

```
Line 1 {  
Line 2 path=location.pathname.toLowerCase( );  
Line 3 nsfPos=path.indexOf(".nsf");  
Line 4 path=path.substring(0, nsfpos+5);  
Line 5 }
```

Which one of the following lines is incorrect?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: D

18. Look at the following JavaScript code:

```
var textvalue = "This video stars Steve M...";
```

Which one of the following code lines will return the index of the first occurrence of the substring "Steve"?

- A. indexOf("Steve");
- B. textvalue.mid("Steve");
- C. textvalue.indexOf("Steve");
- D. textvalue.substring("Steve");

Answer: C

19. Edith wants to change a graphic whenever the user passes the cursor over the graphic in a Web browser. Which one of the following describes how she can do this?

- A. She cannot do this; images cannot be changed.
- B. She should write the location (URL) of the new image to the src property of the image in the onSelect event and set it back to the original image in the onMouseUp event.
- C. She should write the location (URL) of the new image to the src property of the image in the onMouseOver event and set it back to the original image in the onMouseOut event.
- D. She should write the location (URL) of the new image to the value property of the image in the onMouseOver event and set it back to the original image in the onMouseUp event.

Answer: C

20. Phil has some JavaScript code that he wants to add to a new form he is designing. In R6, he would have put this code in a field named \$\$HTMLHEAD. In which one of the following should he put it using the R5 Designer?

- A. In the same place
- B. In a field named \$\$JSHEADER
- C. In the JS Header event of the Form object
- D. In the HTML Head Content section of the Form object

Answer: C
