Exam : Lotus 190-701

Title : IBM Lotus Notes Domino Application Development Update

1. Jose needs to modify a Domino application that has a Web service as part of the application design. Where can he find the Web service design element?

- A. Other - Web Services
- B. Shared Code - Agents
- C. Shared Code - Web Services
- D. Shared Resources - Web Services

Answer: C

2. Tony has deleted a Shared Column in Domino Designer, but it was still used in a view. What will happen to that column in the view?

- A. The column will remain in the view.
- B. The column will be flagged as "hidden".
- C. The column will be deleted from the view.
- D. Domino Designer will not let you delete a Shared Column that is still being used in at least one view.

Answer: A

3. Gail has a complex column defined in an existing view in her Domino application. She would like to use this column in four other views. How should she make this a shared column to be used in the other views?

- A. Select the column and choose Create - Copy As Shared Column.
- B. Select the Share this column option in the Column Properties dialog box.
- C. Copy the column into the other views and choose Share this column in the Column Properties dialog box.
- D. Copy the column from the existing design and paste it into the Shared Column design area in Domino Designer.

Answer: A

4. Jackie has a number of shared actions in her Domino application, and she needs to make sure the action buttons are all using standard Notes icons. What new feature in Domino Designer can she check to find this information?

- A. The Icon Type section of the Design Synopsis.
- B. The shared actions design column for icon type.
- C. The Icon field in the Shared Action property dialog box.
- D. The Find Shared Actions button in the Action Bar design element.

Answer: B

5. Tom needs to add a form alias named frmInvoice to his Invoice form design element. How can he add this information to the form design?

- A. Add the alias in the Alias field in the Form Properties dialog box.
- B. On the Object tab in the Programmer's pane, select Alias and add the form alias.

- C. Select the Invoice form in the Domino Designer client and click in the Alias column to edit the alias.
- D. Delete the existing form and recreate it, specifying the alias name when the form is initially created.

Answer: C

6. Paul is viewing the list of form elements in the Policy Invoice application. He moves the right edge of the Name column in the Domino Designer list to show the complete form name. How can he make sure that the width of the column retains this setting?

- A. Design - Preferences - Retain column widths
- B. Tools - Designer - Retain column widths in Designer
- C. Domino Designer column widths are persistent between sessions.
- D. File - Preferences - User Preferences - Retain column widths in Designer

Answer: C

7. Tony has created a Shared Column to display the processing status of an order. The target views for the Shared Column do not share a common display format. Can Tony still use a Shared Column in his views?

- A. No, because Shared Columns must all use the same format.
- B. Yes, but the column display format will not match the rest of the view.
- C. Yes, by selecting "Use Formula Only" when adding the Shared Column to the view.
- D. No, because Shared Columns automatically use the format of the previous field column.

Answer: C

8. Tony needs to change a Shared Column formula, but he needs to know what views will be affected by this change. How can Tony determine which views use a specific Shared Column?

- A. In Domino Designer, Tools - Find Shared Columns
- B. In Domino Designer, File - Database - Design Synopsis
- C. In Domino Designer, Design - Design Properties - Shared Column Use
- D. In Domino Designer, Shared Columns - Who is using this Shared Column

Answer: D

9. Sally has a JavaScript library design element in a Domino application that was last signed by a developer who no longer works for the company. What new feature can she use in ND7 to resign that single design element with her ID?

- A. Edit the JavaScript library design element and resave it.
- B. Highlight the library in Domino Designer and click the Sign button.
- C. Click the Sign button on the Design tab of the Design Properties box.
- D. Launch the Administrator client and use Tools - Sign - Script Libraries.

Answer: B

10. Rebecca has a number of shared actions in her Domino application, but she needs to quickly determine which actions display in the action bar and which actions display in the menu. What feature in Domino Designer can she check to find this information?

- A. The Shared Action Location section of the Design Synopsis.
- B. The Location field in the Shared Action property dialog box.
- C. The Find Shared Actions button in the Action Bar design element.
- D. The shared actions design columns for action bar and menu locations.

Answer: D

11. Which option controls the frequency of the AutoSave process?

- A. Actions - AutoSave - Every nn minutes
- B. Edit - AutoSave - Save every nn minutes
- C. AutoSave Frequency on the Design tab of Database Properties
- D. File - Preferences - User Preferences - AutoSave every nn minutes

Answer: D

12. Chaz has a number of action buttons in the action bar of his view. The action buttons are already using all the available space in the action bar, and he must add five more options. What is an alternate method Chaz can use to make those options available to the user?

- A. Remove the icons from the Action buttons.
- B. Set the Action buttons to "Compress to fit".
- C. Set the Action Bar Display Height to "Double".
- D. Set the Action button to "Include in right mouse button menu".

Answer: D

13. What information is reported on the Profile document for an agent that has been profiled?

- A. Class, Method, Operation, Calls, Time
- B. Statement, Execution Count, Execution Time
- C. Start Time, End Time, Total Statements Executed
- D. Agent, Server, Statement, Calls, Milliseconds Run

Answer: A

14. Chris has written a LotusScript agent that is taking longer than expected to run. Which steps should he take to analyze the agent's performance?

- A. File - Tools - Remote LotusScript Debugger
- B. Select "Profile This Agent" in the Agent Properties.
- C. Select "Enable agent profiling" in Database Properties.
- D. Add "Option Profile" to the "(Options)" object in the agent.

Answer: B
