Exam : Lotus 190-735

Title : Administering IBM Lotus Sametime7.5

1. During a Sametime meeting that contains interactive IP audio, the audio can interact in which of the following two ways?

- A.Cached and instant audio
- B.Encapsulated and open speaker
- C.Delayed and immediate transmit
- DAutomatic and request microphone

Answer: D

2. Users are complaining that while in meetings containing video, the image is switching too rapidly between users. What steps are you able to perform, as the administrator, to slow the video from switching?

- A.Disable video switching on the server
- B.Change the time to wait before switching to a longer interval
- C.Restrict the number of users that may have video in a meeting
- D.Apply a user policy with a setting that controls the interval between video changes

Answer: B

3. Certain files that users are uploading for the whiteboard function of meetings are not being formatted correctly. In order to preserve the formatting, which of the following may be utilized for the whiteboard?

- A.Sametime Print Capture
- B.Sametime File Extender
- C.Sametime Meeting Toolset
- D.Sametime Screen Reflector

Answer: A

4. You are attending a scheduled meeting that you are participating in with audio and video. During the meeting you start a breakout session with Barbara from another department and were the last person to talk over IP in the main scheduled meeting. However, once in the breakout session, Barbara is unable to see your video. Which of following best describes why she is unable to see your video?

- A.Video is not allowed in breakout sessions, so Barbara would not be able to see you
- B.The breakout session must be performed on a different server than the scheduled meeting
- C.Whiteboard and screensharing control in the scheduled meeting must be given to someone else before you enter a breakout session
- D.As the last person to talk in the scheduled meeting, your microphone must be muted and someone else must speak in the scheduled meeting to switch to their video and release yours to be shown in the breakout session

Answer: D

5. Paul is attempting to log into server4/acme with his Sametime Connect client while visiting a corporate branch office overseas that has its own Sametime server. The following scenario exists:

- He is not listed in the Allow Access field for that Domino server
- His home Sametime server is server1/acme and both share a common directory
- The two servers are not in a Community Cluster.

Which of the following steps will Sametime perform in this scenario?

- A. Paul will be immediately denied access and will receive a prompt to that effect
- B. Paul will attempt to log into server4/acme and after a lookup occurs he will be passed to server1/acme
- C. Paul will successfully log into server4/acme and that server will grab his privacy data and buddylist from server1/acme for him
- D. Paul will be logged into both servers simultaneously and his privacy data will not be in effect for anyone with a home server of server4/acme

Answer: B

6. Two of your employees are having a voice conversation over IP. The microphone is being controlled by the Sametime server. Which of the following is the term that describes that mode?

- A. Request
- B. Variable
- C. Automatic
- D. Performance

Answer: C

7. While recording a scheduled meeting, the server runs out of space to store the recording. Which of the following steps will the Sametime server perform next?

- A. The meeting manager will receive a prompt in the Meeting Room client that the space threshold is about to be reached
- B. The current meeting will stop recording with a partial recording completed and a note will be made in the Meeting Details document
- C. Meetings older than a specific date, as configured in the Sametime administrator, will be removed to make room for recording to continue
- D. The participants in the meeting will be unable to complete any more actions in the online meeting until more space is made available for recording to continue

Answer: B

8. Users are actively attending scheduled meetings with no issues. During the meeting, teams are created to work on certain projects. Team leaders begin to create chat only breakout meetings. However, some team leaders are unable to successfully create the breakout meetings. Which of the following best represents the reason they were unsuccessful?

- A. The policies for some team leaders do not allow instant meetings
- B. The unsuccessful team leaders do not have video cameras attached to their computers
- C. You have administratively limited the number of breakout meetings on the meeting server
- D. The meeting moderator did not properly assign some team leaders the rights to create the chat only breakout meetings

Answer: A

9. Which of the following users are not allowed to receive file transfers through the Sametime server?

- A. In the Sametime Connect client with the status of Online - Away
- B. In the Sametime Meeting client with the status of Online - Away
- C. In the Sametime Connect client with the status of Online - Active
- D. In the Sametime Connect client with the status of Online - Do Not Disturb

Answer: B

10. You have chosen LDAP as the directory for your Sametime server. However, you have a Sametime administrator

in the local Domino Directory. You are able to successfully log into administer the server through the Sametime Administration Tool. Which of the following will not function correctly in this scenario?

- A.You will not have the Assign Users function for policies
- B.You will not be able to perform or view Sametime logging
- C.You will not be able to establish Sametime capacity warning settings
- D.You will not be able to change any Community or Meeting Service settings

Answer: A
