Exam : Lotus 190-739

Title : IBM Lotus Notes Domino 7 Configuring Domino Web Server

1. Barbara wants to use the same Web Site document for mutple servers. What must be done to enable this?
- A. The Web Site document must be copied and pasted into each server document manually.
 - B. By default, Web Site documents are not associated with specific Domino servers, so no additional steps are necessary.
 - C. The Web Site document must be manually modified by a design change that allows all servers in the domain to see the Web Site document.
 - D. By default, Web Site documents may not be utilized for more than one server in the domain. A new document must be created for each server.

Answer: B

2. David wants to view the expired certificates in the Certification Revocation List (CRL). In which one of the following would David find this information?
- A. In the CRL document in the Domino Directory
 - B. In the Domain document in the Domino Directory
 - C. In the Server document in the Domino Directory
 - D. In the Certifier document in the Domino Directory

Answer: D

3. Carl, a user, performs a domain search against a Domino server from his browser. One of the returned databases resides on a server outside of the search server. What must be configured on the Domino server to present Carl with a correct link to the other server?
- A. The DIIOP field must be enabled.
 - B. The second Domino server must have SMTP enabled.
 - C. The 'Generating References to this Server' field must be configured.
 - D. The 'Allow Remote Searches to Include this Server' field must be set to 'Yes'.

Answer: C

4. Josie made a change to the Web site's Site configuration document which caused WebDav to stop functioning. Which ONE of the following changes would cause WebDAV to stop working?
- A. A DSAPI filter was enabled.
 - B. Session Authentication was enabled.
 - C. POP3 was loaded on the same server.
 - D. Internet Site documents were created.

Answer: B

5. Andrea, the Domino administrator, is attempting to provide SSL authentication for each Internet Site Document.

Which of the following is required to accomplish this?

- A. A single keyring file for the Web server
- B. A server keyring file for each site document
- C. Multiple HTTP instances on the Domino server
- D. Multiple keyring files for each site document

Answer: B

6. To run Java applets created with Java Notes classes on a Domino Web server, which of the following server tasks must be running?

- A. LDAP
- B. SMTP
- C. DIIOp
- D. NNTP

Answer: C
