Exam : Lotus 190-831

Title : Developing Web Sites using IBM Workplace Web Content Mgt2.5

1. The Tornados football team wants to list their games chronologically on their Workplace Web Content Management Web site. How can this be accomplished?

- A. For each content item, a content creator enters the game date in the General Date One field and restarts the workflow. The content proceeds through workflow. A developer creates a menu which uses General Date One as a Sort Key.
- B. For each content item, a content creator enters the game date in the General Date One field and restarts the workflow. The content proceeds through workflow. A developer creates a navigator which uses General Date One as a Sort Key.
- C. For each existing content item, a content approver must restart the workflow. A content creator then enters the game date in the General Date One field of each content item and the content proceeds through workflow. A developer creates a menu which uses General Date One as a Sort Key.
- D. For each existing content item, a content approver must restart the workflow. A content creator then enters the game date in the General Date One field of each content item and the content proceeds through workflow. A developer creates a navigator which uses General Date One as a Sort Key.

Answer: C

2. Damian is building a Workplace Web Content Management Web site. He will create menus to display the content. He wants the authors to decide which content items will be displayed in which menu, but wants them to choose from a predefined list of choices. Which one of the following answers will allow him to do this?

- A. Keywords
- B. Categories
- C. A taxonomy and a list of keywords
- D. A category taxonomy and a list of categories

Answer: D

3. Herman is a Workplace Web Content Management developer. What must he do in order for his Events site area to properly display as a Web page?

- A. He must create a content item and select the Events category in the Profile section.
- B. He must create a content item and choose the Events site area as the content's site area
- C. He must create a content item and reference this in the Event site area item Default Content field.
- D. He must reference the Event authoring template and Detail presentation template in the authoring template and presentation template fields of the Event site area item.

Answer: C

4. Refer to the exhibit.

David created a version of the News and Events site area. What must he do to retrieve a previous version of the "News" site area?

- A. There is no version of the "News" site area.
- B. Open the "News" site area and click the Restore button.
- C. Go to the version library and click the News and Events object. Click the Versions button. Select the News site area and click the Restore button.
- D. Go to the version library and expand the News and Events object. Select the News site area and click the Versions button. Click the Restore button.

Answer: A

5. XYZ Corporation has a product information content item published live on their Workplace Web Content Management Web site. The product information has changed; therefore, the content must be updated. How can the item be sent back through the workflow while it remains on the live Web site, and what happens to the previous version once the updated item is published?

- A. A content approver clicks the Save Version button. The previous version is retained in the Version Library.
- B. A content approver clicks the Create Draft button. The previous object is replaced by the updated copy.
- C. A content approver clicks the Restart Workflow button. The previous version is retained in the version library.
- D. An editor clicks the Save As button to create a new version of the document. A content approver opens the previous version and clicks the Restart Workflow button to put it into Draft mode.

Answer: B
