Exam : Lotus 190-833

Title : Creating App.Components Using IBM Workplace Designer 2.5

1. Ellen created a schema data element early in her project, before she had established standards. Now she wants to rename the data element. Where can this performed?

- A. In the associated component script
- B. While placing the schema element on a form
- C. While defining the available values for a computed view column
- D. In the Basics tab of the Properties panel of the schema element

Answer: D

2. Julian wants to create a new Workplace application using Workplace Designer. He will create a component. Which of the following sets of design elements properly describes the high-level design elements in a component?

- A. Forms, views, images and buttons
- B. Forms, schemas, scripts and images
- C. Forms, images, schemas and templates
- D. Forms, templates, schemas and UI design controls

Answer: B

3. George has completed his schema definitions, and a new requirement has surfaced to add default values to several edit controls. Where is this option found?

- A. Only in the XSD text editor
- B. In the list of schema elements
- C. On each form where the element is used
- D. On the schema element properties palette

Answer: D

4. Heather is going to create template for her Workplace Collaboration Services environment. However when she logs into the server she does not see the Templates button from the window top menu. What is the most likely reason?

- A. The environment already has a template deployed.
- B. The environment does not support templates.
- C. She can only do this by authenticating as an administrator.
- D. She does not have access to create Templates for her environment.

Answer: D

5. As Sean completes his schema, he realizes that much of the data his users will enter will be copied and pasted, and some imported, potentially adding whitespace to the data. What are his options for dealing with whitespace?

- A. Remove all, replace with spaces, or preserve all
- B. Remove all, replace with delimiters, or preserve all

- C. Trim ending spaces, trim beginning spaces, or preserve all spaces
- D. Remove all, preserve all, or activate a script to handle the whitespace

Answer: A

6. Access to components can be set by mapping Workplace Designer roles to Workplace Collaboration Services template roles. Which of the following Designer roles would give a user access to read documents only?

- A. Evaluator
- B. Reader
- C. Contributor
- D. Author

Answer: B

7. Hank needs to create a deployment profile for his new component. How can he go about this within Workplace Designer?

- A. Select File - Preferences from the menu bar and then click on the Deployment option in the navigation pane of the Preferences dialog to Add a new profile.
- B. Select File - Deployment from the menu bar and then click on the Profile option in the navigation pane of the Deployment dialog to Add a new profile.
- C. Import a new profile using the import dialog.
- D. Create a profile component to be specified in the deployment dialog.

Answer: A

8. To see a deployed component from the Workplace Collaborations Services server, what must you do first?

- A. None of these.
- B. Add the component to an application template
- C. Add the component to a portlet
- D. Add the component to a page

Answer: D

9. The check for Show BiDi Options in the Workplace Designer Preferences is for what purpose?

- A. It controls the Bi-Directional display of event code.
- B. It controls the Bi-Directional display for Forms or UI Controls.
- C. It controls the Bi-Directional display for Data Schemas
- D. It controls the Bi-Directional display of Container Controls

Answer: B

10. Troy wants very granular control of the data elements he places on his forms. Which of the following are properties he can control using the schema Properties panel?

- A. Basics, Connections, Constraints, and Values
- B. Basics, XSD Validation, Security and Connections
- C. Basics, Security, Enumerate Values and Constraints
- D. Basics, Enumerate Values, Constraints, and Annotation

Answer: D

11. Sean wants to define a data element and have users choose from a specific list of available values. Which of the following should he do to accomplish this in the element's schema definition?

- A. Specify a pattern for element value matching
- B. In the form layout, specify a schema override definition
- C. Define values in the Enumerate Values tab of the element Properties panel
- D. Associate the element with a constraint set in the drop-down element type choice

Answer: C

12. As Sean is defining a data element using a schema, he wants to place some boundaries on how it is used.

Where is this accomplished?

- A. UI controls palette
- B. On a form where the data element is used
- C. Element Constraints tab of Properties palette
- D. In the right-click menu of the schema element

Answer: C

13. Web Archive (WAR) files can be deployed using via the portal administrator, but are missing what type of information found in the Java Archive (JAR) file exports?

- A. Information about the component data store
- B. Information about client side scripts
- C. Information about UI Control Properties
- D. Information about Java components

Answer: A

14. Monica needs to set the roles for her application template. Where will she need to do this?

- A. Within Workplace Designer under the Roles component
- B. Within Workplace Designer by creating a Roles control
- C. On the Workplace Collaboration Services server on the Applications page.
- D. On the Workplace Collaboration Services server on the Roles page

Answer: D

15. The level of access that a role has to each page or application component is assigned how?

- A. From the deployed component schema definition.
- B. From the "Level of Access" drop downs on the Role page.
- C. From the Access page for each defined role.
- D. From the Administrators provisioning page.

Answer: B

16. Tom has noticed that when opening a form with the Properties panel open, it defaults to the text properties on the form. How can he view the Form properties?

- A. Use the menu item Form-Properties
- B. Right click on the form in the forms list and choose Properties
- C. Change the context by clicking on the form and choosing Form Properties
- D. Use the arrow control on the top right of the Properties panel to switch context

Answer: D

17. As George is building a new schema, he creates an element of the type Integer. He has several options for its properties. Which of the following is a valid option for the element as defined at the schema level?

- A. Set the display type
- B. Set the text color and style
- C. Associate with a data entry control
- D. Define element events and program them using the Script Editor

Answer: C
