190-835: IBM Lotus Notes Domino 8 App Development Intermediate Skills

Practice Exam: 190-835 Exams

Exam Number/Code: 190-835

Exam Name: IBM Lotus Notes Domino 8 App Development Intermediate Skills

Questions and Answers: 136 Q&As

([CLP](#))

Exam : [190-835](#)

"IBM Lotus Notes Domino 8 App Development Intermediate Skills", also known as 190-835 exam, is a Lotus certification. With the complete collection of exam questions, Just4Study has assembled to take you through 136 Q&As to your 190-835 exam preparation. In the 190-835 exam resources, you will cover every field and category in Lotus Certification helping to ready you for your successful Lotus Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Lotus CLP 190-835 (IBM Lotus Notes Domino 8 App Development Intermediate Skills) examination of original title complete coverage. 190-835 exam questions help you pass the exam.

Just4Study 190-835 Feature:

* High quality - High quality and valued for the 190-835 Exam: 100% Guarantee to Pass Your 190-835 exam and get your CLP certification.

* Authoritative - Authoritative braindumps with complete details about 190-835 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CLP resources, you will minimize your **Lotus CLP** cost and be ready to pass your 190-835 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free CLP demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 190-835 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 190-835 Demo Download

Just4Study offers free demo for CLP 190-835 exam (IBM Lotus Notes Domino 8 App Development Intermediate Skills). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Lotus CLP 190-835** examination of original title complete coverage.190-835 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 190-835

Exam Name: IBM Lotus Notes Domino 8 App Development Intermediate Skills(CLP)

Questions and Answers: 136 Q&A

[Lotus 190-835](#) Test belongs to one of the CLP certified test, if needs to obtain the CLP certificate, you also need to participate in other related test, the details you may visit the [CLP](#) certified topic, in there, you will see all related CLP certified subject of examination.

Just4Study professional provide CLP 190-835 the newest Q&A, completely covers 190-835 test original topic. With our complete CLP resources, you will minimize your CLP cost and be ready to pass your 190-835 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Lotus 190-835

Title : IBM Lotus Notes Domino 8 App Development Intermediate Skills

1. Susan has enabled document locking on her Lotus Domino server. She wants to lock a document using an action button formula in a document that is currently being read. Which one of the following formulas will accomplish this?

- A. @DocLock([LOCK])
- B. @DocLock([LOCKINGENABLED])
- C. @Command([EditDocument]); @DocLock([LOCK])
- D. @Command([EditDocument]); @Lock(@ThisDoc)

Answer: A

2. Jim is designing a new application that will be deployed to multiple sites using database replicas. Which one of the following will he be able to replicate?

- A. View indexes
- B. Database launch properties
- C. Full text indexes
- D. Database file names

Answer: B

3. The disk space on the database properties Info tab of Len's database shows 4GB of space allocated to the database, with only about 70% used. The database includes many file attachments. What can Len do to minimize the storage consumed by his database?

- A. On the Advanced tab of database properties, select "Use LZ1 compression for attachments". Click the Compact button on the Info tab.
- B. On the Advanced tab of database properties, select "Use LZ1 compression for attachments", and select "Allow compression of database design". Click the Compact button on the Info tab.
- C. On the Advanced tab of database properties, select "Use LZ1 compression for attachments", and select "Allow compression of database design". From the server console or from the Domino Administrator client run a copy-style compact on the database.
- D. On the Advanced tab of database properties, select "Use LZ1 compression for attachments", select "Allow compression of database design", and ensure that "Allow compression of database documents" is selected. From the server console or from the Domino Administrator client run a copy-style compact on the database.

Answer: C

4. Susan creates a sales reporting database that has information downloaded daily from a host application.

- 1. Each document contains the monthly sales for 10,000 products, entered by part number.
- 2. Because Susan gets a complete set of data every day, her agent deletes all of the documents in the database.
- 3. New documents with the same part numbers are created so they are identical in the views.

4. The application is used globally and resides on many servers.

Which one of the following describes a problem this will cause?

- A. There will be a heavy replication burden.
- B. The maximum view index size will be exceeded in less than a year.
- C. The users will not be able to easily find the same information from day to day.
- D. There will be replication conflicts because many of the documents will be exactly the same.

Answer: A

5. The "Job Opportunities" database is accessed regularly by many employees at Gayla's company. The database has been replicated to local servers at each of the company's 20 locations. Although Gayla has created a full-text index (including the indexing of attachments) on a hub server and verified that the hub replicates to all of the distributed servers, her users complain that searches are very slow, and they are unable to use the "Fill out example form" search feature that they CAN use in some other databases. What could be done to fix this problem?

- A. Gayla needs to click the Create index button on the Full Text tab of the database Properties on each of the replica databases.
- B. Gayla needs to select the "Replicate view search indices" parameter on the database Properties Advanced tab on each of the replica databases.
- C. The Notes administrator needs to increase the number of minutes specified by the ReplicationTimeLimit parameter in the hub server's Notes.ini file.
- D. Gayla needs to select the "Replicate view search indices" parameter on the database Properties Advanced tab on the database on the hub server.

Answer: A

6. Which one of the following contains data types stored as summary data by default?

- A. Text, number, date/time, reader names
- B. Text, text lists, rich text
- C. All data types are stored in the summary buffer
- D. Rich text, file attachments, embedded OLE objects

Answer: A

7. Donna would like to examine the actual WSDL for the Wiring Properties/Action Definition of her Composite Application. How can she do this?

- A. Open the Domino application using Domino Designer. Select Composite Applications > Wiring Properties. Double-click on the desired Wiring Properties.
- B. Open the Composite Application using Composite Designer. Select Wiring Properties. Select the desired Wiring Properties and click the Open File button.
- C. Open the Domino application using Domino Designer. Select Composite Applications > Wiring Properties. Select the desired Wiring Properties, and click the Open With... button, and select a text editor (such as Windows Notepad).
- D. Open the Composite Application using Composite Designer. Select Wiring Properties. Select the desired Wiring Properties and click the Export WSDL button to save the WSDL as an external file. Open the saved file using a text editor.

Answer: C

8. Marie's Windows PC has recently been upgraded to use Notes 8 Standard edition. She is preparing to develop her first Composite Applications. Marie notices that Eclipse is not listed among the applications on her PC. What steps should Marie follow so that Eclipse is properly installed and configured for use with her Notes environment?

- A. Run the Notes setup program and enable the options for "Eclipse runtime" and "Eclipse Developer tools".
- B. Marie should back up her files, uninstall Notes, and then install Notes 8 Basic edition. Eclipse will be integrated automatically.
- C. There is nothing Marie needs to do. Eclipse was automatically integrated into her Notes environment when Notes 8 Standard edition was installed.
- D. Marie should back up her files, uninstall Notes, and then install Notes 8 Basic edition. During the install process, enable the options for "Eclipse runtime" and "Eclipse Developer tools".

Answer: C

9. Jason supports a suite of Notes applications related to the sales process. For a user to see a list of product alerts pertaining to a given customer's order, the user will currently open a Customer document from a view, then open an Order document from an embedded view, and then select a line item from the order and click a button to open a list of any product alerts. How could the user experience change if Jason were to offer his users a Composite Application?

- A. Composite Applications are used to wire Notes and non-Notes applications. Since Jason's applications are entirely Notes-based, Composite Applications are not applicable.
- B. The user could select a Customer in one pane, see a list of orders display in a second pane, and select an order to see the line items display in a 3rd pane. This could all be in a single context within the Notes client.
- C. The user could hover the mouse over a Customer in one pane, see a list of orders display in a second pane, and hover the mouse over an order to see the line items display in a 3rd pane. This could all be in a single context within the Notes client.
- D. Composite Applications allow the use of AJAX features for a richer user experience and subjectively-faster data transfers. Using OnMouseOver and other JavaScript events enables context-sensitive popup displays. This results in a more Web-like interface from within the Notes client.

Answer: B

10. Roselia changed the "By Status" view in her workflow database. She selected the "Don't show empty categories" row property for the view. Why would she have done this?

- A. Database performance needs to be improved. Roselia has set this property so that the view index will be smaller, allowing for faster indexing and faster opening of the view.
- B. Document access is restricted with Readers fields. Roselia needs to ensure that each Status category only displays when the category contains at least one document to which the user has access.
- C. There are 5 different values possible for the Status field, but often all documents have a Status of "Closed". Roselia wants to show each category only when there is at least one request with that Status.
- D. Many new requests entered into this database every week. Roselia is worried about the database size. She has set this property to reduce the size of the index of the main view of the database to save disk space.

Answer: B

11. Greg has created a form with several fields that get their data from an external relational database system based on a key field. DECS is installed. Which one of the following must he have done to achieve this functionality?

- A. Created an embedded RDBMS link
- B. Created a data connection resource
- C. Created an ODBC connection resource
- D. Manually imported the data from the relational database

Answer: B

12. Andre has hidden the design of a database. Which one of the following describes how to re-sign the database with a different ID?

- A. Once the design of a database has been hidden, the database cannot be re-signed.
- B. Deselect the 'Hide formulas and LotusScript' database property and re-sign the database.
- C. Make a copy of the database without the ACL. This will unhide the design, and allow re-signing.
- D. Sign the design template using the new ID, and replace the design of the database with this template.

Answer: D

13. Norah wants to provide navigation on the left side of the screen and content on the right side. The navigation should have links to views, with some links inside collapsed folders. It should also have links for actions, using custom icons for the links. Can this be done?

- A. No. Notes navigators are no longer supported, and Pages, Frames, and Framesets are for Web applications.
- B. No. Most of this can be built using outlines, pages, frames, and framesets. But icon graphics must be selected from those provided in the notesdatadominoicons folder.
- C. Yes. Create an outline with links for views and actions. Custom icons can be used. Put the outline on a page. Put

the page in the left-hand frame of a frameset. The right-hand frame will hold the content.

D. Yes. Create a Notes navigator object with an image bitmap for the navigation, placing an embedded editor on the right for the content. Create clickable areas on the navigator image to link to views and actions.

Answer: C

14. If possible, Shannon would like to take advantage of the features of Composite Applications within a single Notes database. She has no need to access data from any other application. Can she deploy a Composite Application that includes the composite application definitions and the NSF component all within a single NSF?

A. Yes. She can store the Composite Application definitions and the NSF component in the same database. When specifying the Notes URL of the Component Properties, Shannon should designate the url as notes:/// _self

B. Yes. She can store the Composite Application definitions and the NSF component in the same database. When specifying the Notes URL of the Component Properties, Shannon should designate the url as notes:///000000000000000000

C. No, but although the Composite Application definitions and the NSF component cannot be stored in the same database, they can be referenced from the same database. From this composite application, she can then refer to other Notes databases and NSF components using Notes URLs.

D. No. Composite Applications are intended to leverage pieces of separate applications to combine in a single context. There would be no benefit to be gained from placing the overhead of Composite Applications on a single Notes application.

Answer: B

15. Felix has been receiving a number of support calls from users who have customized the Monthly Sales view, reordering and resizing columns and setting color options to the point where the view is hard to use. What can Felix do to prevent these problems in the future?

A. Deselect the "Allow customizations" option on the Info tab of the view properties.

B. Deselect the "Editable column" option on the column properties for each column that needs to retain its formatting.

C. Deselect the "Resizable" option on the column properties for each column that needs to retain its formatting, and delete the hidden columns that have the "Use value as color" option selected.

D. Ask the Notes administrators to push a profile to the users to lock the "Disable View updates as a background task" as selected, and the "Retain View column sorting" as deselected in User Preferences.

Answer: A

16. Cindy locked a design element and left on vacation. The design element has to be changed. Who can change it?

A. Only Cindy

B. Anyone with Designer access or higher

C. Only those with Manager access

D. Anyone with Editor access or higher

Answer: C

17. Jason coded and saved a scheduled Java server agent that should execute on ServerX. The agent does not run at all, even though Jason signed it with his Notes ID. Given that the Agent Manager is running on the server, which one of the following should Jason check first to diagnose the problem?

A. Check whether an Anonymous user is allowed to run agents on the server.

B. Check the Agent security tab to make sure that "Run as Web user" is selected.

C. Check whether Jason is in either the "restricted" or "unrestricted" agents list on the server.

D. Check whether Jason is in the "Database administrators" list on the server document.

Answer: C

18. The graphics department has sent Horacio a JPEG image to be used as the icon for his new database. What should Horacio do so that this image appears as the database icon?

A. Use a graphics program to convert the image to a 16x16 pixel GIF. Copy the GIF to the Clipboard. Open the database in Designer, and from the Design pane, select Other > Database Resources. Double-click Icon and click Paste.

B. Use a graphics program to convert the image to a 32x32 pixel bitmap. Copy the bitmap to the Clipboard. Open the database in Designer, and from the Design pane, select Other > Database Resources. Double-click Icon and click Paste.

C. Use a graphics program to convert the image to a 32x32 pixel GIF. Open the database in Designer, and from the Design pane, select Shared Resources > Images. Click "New Image Resource" and select the filename of the image. From the Design pane, select Other > Database Resources. Double-click Icon, click "Select from Image Resource" and select the image.

D. Use a graphics program to convert the image to a 16x16 or larger square image. Open the database in Designer, and from the Design pane, select Shared Resources > Images. Click "New Image Resource" and select the filename of the image. From the Design pane, select Other > Database Resources. Double-click Icon, click "Select from Image Resource" and select the image.

Answer: B

19. Jim created a discussion database with documents and response documents. When changes are made to a response document, Jim wants to update the parent document. Which one of the following system fields in the response document indicates the associated parent document?

A. \$Ref

B. \$Doc

C. \$ParentDoc

D. \$ParentRef

Answer: A

20. Daniel is designing a Suggestions application and wants to minimize replication conflicts. Which one of the following will accomplish this?

A. Assign users Editor access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Comment and name the form 'Comments'.

Use Authors fields on both forms.

B. Assign users Author access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Comment and name the form 'Comments'.

Use Readers fields on both forms.

C. Assign users Author access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Response and name the form 'Comments'.

Use Authors fields on both forms.

D. Assign users Editor access to the database.

Create a form of type Document and name the form 'Suggestion'. Create a form of type Response and name the form 'Comments'.

Use Readers fields on both forms.

Answer: C
