Exam : Microsoft 190-836

Title : IBM Lotus Notes Domino 8 Developing Web Applications

1. Shawn is allowing another Web application to call his LotusScript agent via URL. Instead of seeing a formatted Web page, the other user only sees the text "Agent done". What can Shawn do provide better feedback from his agent?

- A. Use a form instead with a WebQuerySave agent.
- B. This is a Domino feature and cannot be changed.
- C. Use the Print method within the agent to output text.
- D. Use the WebPrint method within the agent to output text.

Answer: C

2. Which one of the following programming languages or language combinations can be used to build an agent that retrieves data from non-Domino servers over the Internet?

- A. Java
- B. XML, WSDL
- C. LotusScript in combination with C
- D. This is not possible in a Web agent.

Answer: A

3. Henry has an executable file stored as a file resource in his database. He wants to make this file available for use via a Web browser, using the URL syntax:

`http://server/db.nsf/filename?OpenFileResource`

What additional things does he need to do?

- A. He needs to enable the "Use File Resources on the Web" database property.
- B. An executable file cannot be made available to Web browsers as a File Resource.
- C. He does not need to do anything else. The file will be available to users as-is.
- D. He needs to update the MIME type property in the File Resource properties box to "application/executable".

Answer: C

4. Gary would like to modify a view so that links on his Web site are displayed in the second column rather than the first column. How can he accomplish this?

- A. Add another "Web" column to the view.
- B. Modify the view property "Column number for Web links".
- C. Select the column property "Show values in the column as links" in the second column, and deselect the same property for the first column.
- D. Use pass-thru HTML to achieve this effect, as there is no column or view property available.

Answer: C

5. Melissa has created a default outline in her application, and wants to display specific outline entries to Web users. How can she do this?

- A. Create a separate outline for Web users.
- B. Use Hide-when formulas on the page where the outline is embedded.
- C. Surround outline entries with HTML tags to make them visible to Web users.
- D. Select or deselect the "Hide entry from Web browsers" checkbox for the Outline entry.

Answer: D

6. Which of the following can be used to create an anchor link in a Notes database form?

- A. A link hotspot
- B. A button using Java
- C. A formula pop-up hotspot
- D. An action hotspot that uses LotusScript

Answer: A

7. Jane created a cascading style sheet that she is trying to add to her Domino database. When she clicks the "New Style Sheet Resource" button and navigates to the proper directory, she does not see the style sheet file. What can she do to correct this?

- A. Cut and paste the style-sheet file into the database.
- B. Make sure that the style-sheet file extension is .css.
- C. Add the cascading style-sheet as a File Resource first, then import it from there.
- D. Put the style code into a Page element, then save the element to include it as part of the application.

Answer: B

8. Candy created a Domino based Web site with the following site rule defined:

Type of rule:

Substitution Incoming URL pattern: /projects/*/*.html

Replacement pattern: /projects/*.nsf/*?OpenPage

Which of the following describes the destination URL that is generated by Domino when the user enters */projects/cio/index.html as the URL?

- A. /projects/cio.nsf/index?OpenPage
- B. /projects/index.nsf/cio?OpenPage
- C. /projects/projects.nsf/cio?OpenPage
- D. /projects/cio.nsf/index.html

Answer: A

9. Logan has a servlet that he wants to deploy as part of his Domino-based Web application. What does he need to do to accomplish this?

- A. Deploy the servlet to a J2EE application server.
- B. Domino does not support the use of servlets.
- C. Create a Web Configuration Settings document and change the Configuration Type to "Servlet Support".
- D. Enable servlet support for the Domino server by modifying the Java Servlet Support section of the Server Document.

Answer: D

10. Sara's application needs to use the same graphic in several forms. When she designed the application, she pasted the graphic into each form. However, when she views documents that were created with these forms, the browser reacts very slowly. What should Sara do to correct this problem?

- A. Remove the graphics from the forms.
- B. Convert the graphic format to a TIFF and paste it back into the forms.
- C. Place the graphic in the database as an image resource and reference the image resource in all related forms.
- D. Compress the graphics into a single ZIP file and place the file in the database as an image resource.

Answer: C

11. A system administrator needs to give Web users access to databases on DomServer1/Acme. Presently, only Notes clients are allowed to access the database via TCP/IP. What should the system administrator do?

- A. Add HTTP access to the DomServer1/Acme Domino Directory.
- B. Add WebService access to the DomServer1/Acme Domino Directory.
- C. Add HTTP to the list of server tasks in the DomServer1/Acme Notes.ini file.
- D. Add WebService to the list of server tasks in the DomServer1/Acme Notes.ini file.

Answer: C

12. Web users using Robert's Domino-based site are able to submit formatted text. How does he accomplish this on his form?

- A. Display a text field as an editor applet.
- B. Display a rich text field as an editor applet.
- C. Display a rich text field within an HTML text area.
- D. Display a rich text lite field within an HTML text area.

Answer: B

13. Serge wants to store some user preferences in a database, so that each user can set custom settings and have those settings available the next time they use the database. What kind of special Notes design element should he use?

- A. User Form
- B. Preference Form
- C. Profile Document
- D. Settings Document

Answer: C

14. Hank is investigating navigation options for his Web application, and wants to come up with something that is flexible and easy to use. Which of the following provides this in Domino?

- A. A Web navigator
- B. A custom Java applet
- C. HTML views embedded onto pages
- D. An outline embedded onto a page

Answer: D

15. Chris is creating a Web service consumer in Domino. He has a URL that he has used from a Web browser to browse the WSDL for the web service he will consume. He does not have a copy of the WSDL file on his computer. When he selected the option to import the WSDL, he was presented with a window prompting him to enter a file name. How can Chris get the WSDL imported into his Web service consumer?

- A. Chris cannot enter a WSDL URL here. He must save the WSDL file to his local machine first.
- B. Enter the URL of the WSDL as the file name, and click the Open button. Domino will then import the WSDL.
- C. Change the http:// part of the WSDL URL to file://, and enter that as the file name. After you click the Open button, Domino will import the WSDL.
- D. Select the "Retrieve WSDL from Web" option. A window displays prompting for the "WSDL Web address". Enter the URL of the WSDL as the Web address, and click the Open button. Domino will then import the WSDL.

Answer: B

16. Pierre wants to add a company logo to the top of all the views in his database when they are displayed on the Web. He knows he can create a special form that defines how all the views are displayed by Domino. What does he need to name this special form?

- A. \$\$ViewTemplate
- B. \$\$ViewTemplateDefault
- C. \$\$DominoViewTemplate
- D. \$\$WebViewTemplate

Answer: B

17. Marc is creating a Web application. He wants to let Web users with "No Access" view specific pages created with forms. How can he accomplish this?

- A. Create a form with a Readers field, and give the field a computed value of "\$PublicAccess". Create a view with "\$PublicAccess" in the access list.
- B. Create a form with a \$PublicAccess field. Set the "Available to public access users" form property. Create a view with "\$PublicAccess" in the access list.
- C. Create a form with a \$PublicAccess field. Set the "Available to public access users" form property. Create a view with the "Available to public access users" property set.
- D. Create a form with a \$PublicAccess field. Set a Readers field to "Available to public access users". Create a view with the "Available to public access users" property set.

Answer: C

18. Which of the following server tasks must be enabled in order for a Domino application to be accessed from a Web browser?

- A. WEB
- B. HTTP
- C. HTML
- D. DOMINO

Answer: B

19. Martin just moved his Domino Web application to a new server. Now, when a Web user calls an agent, a new security error occurs that did not occur on the old server. What is a possible cause for this?

- A. Martin needs to rewrite his Script Libraries to utilize JavaScript.
- B. Martin is using outdated Java code that cannot run on the new server.
- C. Martin needs to register his Web application in the catalog.nsf database.
- D. Martin needs to be added to the Server Document's "Sign script libraries to run on behalf of someone else" field.

Answer: D

20. Maggie wants to display the authenticated user's name on her Web site's welcome page. How can she do this?

- A. Use the JavaScript document.userName property.
- B. Display the name using the USER_NAME CGI field.
- C. Write a JavaScript function that gets the name from the session cookie.
- D. Create computed text on the page that computes to the current user's name.

Answer: D
