CIW CIW Certified Instructor

1D0-538: OBJECT ORIENTED ANALYSIS AND DESIGN TEST(JCERT)

Practice Exam: 1D0-538 Exams

Exam Number/Code: 1D0-538

Exam Name: OBJECT ORIENTED ANALYSIS AND DESIGN TEST(JCERT)

Questions and Answers: 112 Q&As

([CIW Certified Instructor](#))

"OBJECT ORIENTED ANALYSIS AND DESIGN TEST(JCERT)", also known as 1D0-538 exam, is a CIW certification. With the complete collection of exam questions, Just4Study has assembled to take you through 112 Q&As to your 1D0-538 exam preparation. In the 1D0-538 exam resources, you will cover every field and category in CIW Certification helping to ready you for your successful CIW Certification.

Exam : [1D0-538](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for CIW CIW Certified Instructor 1D0-538 (OBJECT ORIENTED ANALYSIS AND DESIGN TEST(JCERT)) examination of original title complete coverage. 1D0-538 exam questions help you pass the exam.

Just4Study 1D0-538 Feature:

* High quality - High quality and valued for the 1D0-538 Exam: 100% Guarantee to Pass Your 1D0-538 exam and get your CIW Certified Instructor certification.

* Authoritative - Authoritative braindumps with complete details about 1D0-538 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CIW Certified Instructor resources, you will minimize your **CIW CIW Certified Instructor** cost and be ready to pass your 1D0-538 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free CIW Certified Instructor demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1D0-538 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1D0-538 Demo Download

Just4Study offers free demo for CIW Certified Instructor 1D0-538 exam (OBJECT ORIENTED ANALYSIS AND DESIGN TEST(JCERT)). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **CIW CIW Certified Instructor 1D0-538** examination of original title complete coverage.1D0-538 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 1D0-538

Exam Name: OBJECT ORIENTED ANALYSIS AND DESIGN TEST(JCERT)(CIW Certified Instructor)

Questions and Answers: 112 Q&A

[CIW 1D0-538](#) Test belongs to one of the CIW Certified Instructor certified test, if needs to obtain the CIW Certified Instructor certificate, you also need to participate in other related test, the details you may visit the [CIW Certified Instructor](#) certified topic, in there, you will see all related CIW Certified Instructor certified subject of examination. Just4Study professional provide CIW Certified Instructor 1D0-538 the newest Q&A, completely covers 1D0-538 test original topic. With our complete CIW Certified Instructor resources, you will minimize your CIW Certified Instructor cost and be ready to pass your 1D0-538 tests on Your First Try, 100% Money Back Guarantee included!

Exam : CIW 1D0-538

Title : OBJECT ORIENTED ANALYSIS AND DESIGN TEST (JCERT)

1. When doing domain analysis, the class diagram should be drawn PRIMARILY to represent:

- A. messages sent between objects.
- B. implementation objects such as wrappers and devices.
- C. business objects and implementation objects such as wrappers and devices.
- D. business objects.

Answer: D

2. Consider the following statements from a domain expert on a project:

An automated bill-payment functionality needs to be added to our online banking application. The bank's customer can make online bill payments to vendors (such as the electric company, telephone company, rental agency). Only vendors who have already signed up with the bank can be paid. There are two ways to make payments:

- 1. Specify a one-time payment for a specific amount, or
- 2. Establish regular payments to be made on a specific interval such as monthly or weekly.

Customers are notified of the details of successful payments via email. Their email addresses are already available.

Which of the following are requirements that MUST be reflected in use cases?

- A. The customer must be given a choice of notification modes, via email or surface mail.
- B. The customer must be given a choice of adding a new vendor to the bank's list of payees.
- C. The customer must be given a choice of payment modes, one-time payment mode and recurring payment mode.
- D. When a payment attempt succeeds, the customer must be notified of the details via email.

Answer: CD

3. An Interaction Diagram should be associated with:

- A. a Use Case.
- B. an Activity Diagram.
- C. a CRC card.
- D. a State Transition Diagram.

Answer: A

4. Refer to the exhibit to answer the question.

The Acme Ticketing System is to be updated so customers can also purchase tickets directly via the Internet. Besides the Agent which already exists, which of the following are also actor(s) for the updated system?

- A. Internet Browser
- B. Customer
- C. Customer, Ticketing System
- D. Customer, Internet Browser
- E. Customer, Internet Browser, Ticketing System

Answer: B

5. Refer to the exhibits to answer the question.

There are new requirements to create seating configurations that are reusable, store those configurations in an external database, and automatically create a weekly event status report. What new use cases are necessary?

- A. Create a seating configuration, Store seating configuration, Generate event status report.
- B. Create a seating configuration, Generate event status report.
- C. Create a seating configuration, Modify a seating configuration, Delete a seating configuration.
- D. Store seating configuration, Generate event status report.

Answer: B

6. Each credit card service provider has its own interface that all client programs must use. What is the BEST way to design a system so that it may easily switch between multiple providers and add new providers as required, while keeping the complexity low?

- A. Create an object with a common API for business objects to use. This object covers all credit card providers and routes requests from the business objects to the adaptor object of the designated credit card service provider, which handles the interface conversions.
- B. Create an ordered collection of credit card service providers and have each try to handle the service requests from the business objects. If one cannot handle the request it passes the request to the next one until it is eventually handled or discarded.
- C. Have the business objects communicate directly to the service providers using each service provider's API.
- D. Maintain a global pool of credit card service requests from the business objects. Each credit card service goes through the pool to find and claim the requests that it can handle. It then processes each request.

Answer: A

7. An application project is being built that enables users to research stocks interactively over the Internet.

- Mary has been a stock analyst for years and understands how to use technical indicators, such as price movements, to determine when to buy and sell stocks.
- Sam has been a stock analyst for years and understands how to use techniques such as Price/Earnings (P/E) valuation and growth rates to determine when to buy and sell stocks.
- Harry is the company webmaster and knows a lot about the Internet.
- Denise is the manager in charge of the project and is ultimately authorized to decide what requirements are to be delivered in the different releases.

Who would be MOST effective to include in the use case writing sessions for this application?

- A. Mary, Sam, Harry and Denise during requirements discussions.
- B. Mary, Sam, and Harry during requirements discussions. Denise occasionally to approve the decisions.
- C. Mary during requirements discussions that relate to technical trading techniques. Sam during discussions that relate to valuation trading techniques. Harry occasionally to answer technical feasibility questions. Denise as much as possible to make scope decisions in realtime.
- D. Mary during requirements discussions that relate to technical trading techniques. Sam during discussions that relate to valuation trading techniques. Harry occasionally to answer technical feasibility questions. Denise occasionally to approve the decisions.

Answer: C

8. Classes should be grouped into packages by:

- A. project team organization.
- B. classes that are related to the same overall services.
- C. classes that work together in the same interaction diagrams.
- D. the class diagrams they appear in.

Answer: B

9. Class A is dependent on class B if:

- A. A sends a message to B.

- B. A has a reference to B.
- C. B is used as a parameter for a message sent by A.
- D. B sends a message to A.

Answer: ABC

10. When writing the initial use cases for a project, it is MOST important to define:

- A. The job title for each user of the system.
- B. What user requirements will be fulfilled.
- C. How user requirements will be fulfilled.
- D. How external system interactions will be fulfilled.

Answer: B

11. The following are the requirements for a Report-generation module in an application:

- 1. When new data is generated, the user-interface should be refreshed automatically to reflect the latest values
- 2. Multiple view types are possible

Which of the following Model and View interactions BEST satisfies the above requirements?

- A. Establish subscribe/notify mechanism between view and model, with the model updating the view based upon the view type.
- B. Establish a subscribe/notify mechanism between the view and model layers so that the views get notified of the change.
- C. Develop intelligence within the model so that it decides which views are to be refreshed based on the view type.
- D. Combine the view and model layers into a single entity so that the interactions are localized and notifications are instantaneous.

Answer: B

12. On a large project, where it is important to architect the system so that teams can work relatively independently, what should the PRIMARY focus be?

- A. Packages and their public interfaces.
- B. Frameworks.
- C. Smaller teams.
- D. The use of interfaces.

Answer: A

13. Refer to the exhibit to answer the question.

Which packages should be placed in the Event Ticket Sales Processor that is pictured in the Deployment Diagram for the Ticketing System?

- A. Credit Card Domain
- B. Ticket Purchasing
- C. Event Ticketing Domain
- D. Ticket Purchasing Client

Answer: BC

14. Which of the following statements about designing an enterprise application is TRUE?

- A. Due to the realities of a commercial system, performance requirements should be resolved in the analysis phase of the project.
- B. A three or more tier architecture should be considered in order to facilitate scalability.
- C. By definition, each use case represents a set of actions that are performed atomically; it therefore maps directly to a transaction.
- D. In modelling a system that will have many concurrent users, collaboration diagrams are more useful than sequence diagrams.

Answer: B

15. Refer to the exhibits to answer the question.

Which one of the following labels should be used to describe lines 1, 2, 3?

- A. Include, include, include
- B. Include, include, extend
- C. Include, extend, extend
- D. Extend, include, extend
- E. Extend, extend, include

Answer: C

16. In a well-designed layered architecture, which layers should know about which?

- A. Model knows View and Persistence, View knows Model and Persistence
- B. View knows Model, Model knows Persistence
- C. View knows Model, Persistence knows View and Model
- D. View knows Model, Model knows View and Persistence, Persistence knows Model

Answer: B

17. When scheduling project iterations based on use cases, which of the following are good candidates to consider for development in early iterations? Use cases that:

- A. represent primary line-of-business processes.
- B. involve new and risky technology.
- C. involve well-established technologies.
- D. impact the architectural design significantly.

Answer: ABD

18. Which of the following is NOT a UML mechanism used to organize use cases?

- A. Generalization
- B. Override
- C. Extend
- D. Include

Answer: B

19. A GUI prototype has been demonstrated to marketing personnel and end users for a project. During the demonstration, it became clear that the terminology used and computer skill level were not a good match for the end users, but marketing was thrilled with the state-of-the-art user interface designed. What steps should the analyst take?

- A. Update the object model and GUI to match the end users' terminology and continue with development.
- B. Update the object model and GUI to match the end users' terminology, redesign the GUI to be targeted to a less-skilled user, iterate on the prototype, explain the steps you are taking to marketing, and hold another demonstration session with end users and marketing.
- C. Update the GUI to match the end users' terminology, arrange training offerings to accompany the product release to enhance end user skills, support marketing in a roadtrip to client sites as well as conference demonstrations.
- D. Update the GUI to match the end users' terminology, continue with development, and support marketing in their trips to client sites as well as conference demonstrations.

Answer: B

20. The following interaction occurs during a requirements discussion:

End user: "The trader should be able to set up multiple stock trades to be submitted together."

Developer: "So, that's like a queue that gets processed first-in, first-out, right?"

End user: "That's right. Once the trade occurs, the stocks show up in the user's portfolio."

Developer: "The portfolio is a container of the user's stocks then?"

What terms should the analyst include in the related use cases?

- A. Queue, container
- B. Trade, container
- C. Trade, portfolio

D. Trade, queue, portfolio, container

Answer: C
