Citrix Citrix Other Certification

1Y0-256: Citrix MetaFrame Presentation Server 4.0 Administration

Practice Exam: 1Y0-256 Exams

Exam Number/Code: 1Y0-256

Exam Name: Citrix MetaFrame Presentation Server 4.0 Administration

Questions and Answers: 146 Q&As

([Citrix Other Certification](#))

Exam : [1Y0-256](#)

"Citrix MetaFrame Presentation Server 4.0 Administration", also known as 1Y0-256 exam, is a Citrix certification. With the complete collection of exam questions, Just4Study has assembled to take you through 146 Q&As to your 1Y0-256 exam preparation. In the 1Y0-256 exam resources, you will cover every field and category in Citrix Certification helping to ready you for your successful Citrix Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Citrix Citrix Other Certification 1Y0-256 (Citrix MetaFrame Presentation Server 4.0 Administration) examination of original title complete coverage. 1Y0-256 exam questions help you pass the exam.

Just4Study 1Y0-256 Feature:

* High quality - High quality and valued for the 1Y0-256 Exam: 100% Guarantee to Pass Your 1Y0-256 exam and get your Citrix Other Certification certification.

* Authoritative - Authoritative braindumps with complete details about 1Y0-256 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Citrix Other Certification resources, you will minimize your **Citrix Citrix Other Certification** cost and be ready to pass your 1Y0-256 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Citrix Other Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1Y0-256 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1Y0-256 Demo Download

Just4Study offers free demo for Citrix Other Certification 1Y0-256 exam (Citrix MetaFrame Presentation Server 4.0 Administration). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Citrix Citrix Other Certification 1Y0-256** examination of original title complete coverage. 1Y0-256 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 1Y0-256

Exam Name: Citrix MetaFrame Presentation Server 4.0 Administration(Citrix Other Certification)

Questions and Answers: 146 Q&A

[Citrix 1Y0-256](#) Test belongs to one of the Citrix Other Certification certified test, if needs to obtain the Citrix Other Certification certificate, you also need to participate in other related test, the details you may visit the [Citrix Other Certification](#) certified topic, in there, you will see all related Citrix Other Certification certified subject of examination. Just4Study professional provide Citrix Other Certification 1Y0-256 the newest Q&A, completely covers 1Y0-256 test original topic. With our complete Citrix Other Certification resources, you will minimize your Citrix Other Certification cost and be ready to pass your 1Y0-256 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Citrix 1Y0-256

Title : Citrix MetaFrame Presentation Server 4.0 Administration

1. Scenario: You are an administrator of a farm at a software engineering firm where users are experiencing delayed log-in times. Although network printers have been imported and assigned, users typically use their default printer and only change printers when their default printer does not support a needed feature such as duplexing or color printing. Users are technically competent and usually manage access to both the default and network printers on their own within ICA sessions.

After enabling the auto-creation printing policy rule, which connection option should be selected to optimize the users' experience?

- A. Auto-create all client printers
- B. Do not auto-create client printers
- C. Auto-create the client's default printer only
- D. Auto-create local (non-network) client printers only

Answer: C

2. Scenario: While planning a Presentation Server deployment on multiple servers, an organization wants to ensure that there is no single point of failure. Which three database options eliminate the single point of failure? (Choose three.)

- A. Oracle
- B. IBM DB2
- C. Microsoft Access
- D. Microsoft SQL Server
- E. Microsoft SQL Desktop Engine (MSDE)

Answer: ABD

3. Scenario: John, a Citrix administrator, needs to enable the synchronization of PDA devices for both local and remote users. Users will connect from the LAN to Web Interface.

Which two options allow John to accomplish this? (Choose two.)

- A. In the Microsoft Management Console, John can add the Device Manager snap-in.
- B. In the Presentation Server Console, John can enable the automatic sharing of PDA devices in server properties.
- C. In the Presentation Server Console, John can create a policy under properties and enable the policy rule "Turn on automatic virtual COM port mapping".
- D. In the Access Suite Console, John can create a MetaFrame Presentation Server site, select the Manage Client Connection settings and enable the PDA settings.

Answer: CD

4. For which two scenarios would it be most appropriate to implement universal printing? (Choose two.)

- A. At a company with a diverse printing architecture

- B. At an organization with a small IT staff and management of print drivers is not a desired task
- C. At a small advertising company which requires color printouts exclusively from Mac clients
- D. In an organization in which most users print to locally attached printers using the same print drivers

Answer: AB

5. In an environment in which universal printing is not being used, when is configuring printer driver mapping recommended?

- A. Whenever network printing is in use
- B. Whenever local printers exist in the environment
- C. When clients are allowed to print from an application running on a Presentation Server
- D. When there are Windows 9X clients with drivers installed that are allowed to print from the server

Answer: D

6. Scenario: A production company has Presentation Server enabled for local and remote users. All users belong to the "Production" user group. In addition, a remote user group is configured.

Several proprietary applications, which are critical to the organization's business, require audio. Remote users complain of degraded performance for these applications. The administrator limits the audio bandwidth for the remote users through a policy called Remote Audio. An additional policy, Production Audio, is configured for the entire Production group, which optimizes the audio for all employees in that group.

To ensure that the "Remote Audio" policy is applied to remote user sessions only, which policy should be ranked highest?

- A. Default user
- B. SpeedScreen
- C. Remote Audio
- D. Production Audio

Answer: C

7. Client network printers _____. (Fill in the blank with the correct option.)

- A. always route through the client device
- B. can have routing configured within printer management properties
- C. can have routing configured by means of the print job routing policy
- D. always route directly from the Presentation Server to the network printer

Answer: C

8. Scenario: You created several policies and configured filters for them in the Presentation Server Console. You now wish to verify the enforcement of these policies on specific user accounts in your enterprise.

How can you view the effective Citrix policies for these user accounts?

- A. Filter the policies by user in the Policy Management Console.
- B. From the client device execute the GPRESULT application.
- C. In the Presentation Server Console, select Tools, Wizards, Effective Policy Wizard.
- D. In the Presentation Server Console, execute the search function focused on the target user accounts and click "View Resultant Policy".

Answer: D

9. Scenario: A user in a company logs on to the farm and launches the published application, Microsoft Excel. Sometimes the user must wait for a minute or longer for Presentation Server to create all of the printers before the application can be used.

How can the administrator improve the user's experience?

- A. The administrator can give the user workspace control.
- B. The administrator can configure the "Inherit client printer" settings option.
- C. The administrator can switch from a synchronous to an asynchronous configuration for printer creation.
- D. The administrator can use a policy to limit the bandwidth the user consumes in an ICA session to improve user logon time.

Answer: C

10. Scenario: Your environment includes Terminal Services mandatory profiles. Users have complained that the printing properties designated during each session are not retained.

Which two options within the printer properties retention policy will address this complaint? (Choose two.)

- A. Enable session printers
- B. Retained in user profile only
- C. Saved on the client device only
- D. Held in profile if not saved on client

Answer: CD

11. Which consideration does an administrator need to keep in mind when configuring printer drivers using the auto-replication method instead of the manual replication method?

- A. The auto-replication method always overwrites any existing drivers.
- B. Auto-replication of printer drivers cannot be performed over a WAN.
- C. All servers need to be manually refreshed after an auto-replication of printer drivers is performed.
- D. Auto-replication increases server load and consumes network bandwidth, so it should be done during off-peak hours.

Answer: D

12. Scenario: A farm at an architectural firm requires that users have access to a variety of networked speciality printers, including large format 1200 dpi printers for architectural drawings that require special drivers. For these printers, native drivers are installed. Remote users also have a wide variety of client printers.

Which universal printing policy setting is recommended for this environment ?

- A. Use universal driver only
- B. Both universal and native drivers
- C. Use only printer model specific drivers
- D. Use universal driver only if requested driver is unavailable

Answer: D

13. Through which three management tools or utilities can shadowing be enabled for users of Presentation Server?

(Choose three.)

- A. Access Suite Console
- B. Presentation Server Console
- C. Presentation Server Installation
- D. Citrix Connection Configuration Utility
- E. Web Interface Administration Console

Answer: BCD

14. When applying a newly created policy to a farm, in which three ways can the policy be filtered? (Choose three.)

- A. By farm
- B. By server
- C. By location
- D. By client IP address
- E. By user or user group

Answer: BDE

15. Scenario: Two weeks ago you imported a print server and assigned a printer to all users using a session printers policy. Now a new printer has been added to the same print server.

If you want all users to have access to the newly added printer which two steps should you take? (Choose two.)

- A. Map the required driver.
- B. Enable universal driver policy.
- C. Configure the auto-creation rule for all clients.

- D. Add the printer to the existing session printers policy.
- E. Update the network print server in the Printer Management node.

Answer: DE

16. Scenario: You created a policy for the Human Resources group which restricts the users in that group from accessing local drives. Human Resources has recently added five new recruiters to the team who will travel to universities throughout the country to recruit candidates. While on these trips the recruiters will need to save data to their laptops and upload information nightly to the database which is published and load-balanced across all servers in the farm. You create a new policy for the recruiters called "HR recruitment" and disable the rule which restricts the access to the client drives.

Which two filter types should be applied to the "HR recruitment" policy to exclude the recruiters from the client drive mapping rule? (Choose two.)

- A. Server
- B. Location
- C. Client names
- D. Users and user groups
- E. Connections made through controlled access

Answer: CD

17. Scenario: You created a policy for the Human Resources group called "HR standard" which restricts the users in that group from accessing local drives. Human Resources has recently added five new recruiters to the team who will travel to universities throughout the country to recruit candidates. While on these trips the recruiters will need to save data on their laptops and upload information nightly to the database which is published on a Presentation Server. You create a new policy for the recruiters called "HR recruitment" and disable the rule which restricts the access to the client drives.

Which two steps are required to ensure that the recruiters are able to access their local drives? (Choose two.)

- A. Rank the "HR recruitment" policy higher than the "HR standard" policy.
- B. Rank the "HR standard" policy higher than the "HR recruitment" policy.
- C. Filter the "HR standard" policy by users, specify the five recruiter accounts and allow access.
- D. Filter the "HR recruitment" policy by users, specify the five recruiter accounts and allow access.

Answer: AD

18. During the setup of Presentation Server, which two options must an administrator select if company policy dictates that shadowing can only be performed with user permission? (Choose two.)

- A. Prohibit remote control
- B. Log all shadow requests
- C. Force a shadow acceptance popup
- D. Allow shadowing of user sessions on this server
- E. Prohibit shadowing of user sessions on this server

Answer: CD

19. What are two technical considerations for deciding to create more than one farm in a Presentation Server environment? (Choose two.)

- A. The brand of network hardware
- B. The types of published applications
- C. The geographic location of the servers
- D. The type of network connection between the servers

Answer: CD

20. Scenario: An administrator renamed a server from PSServ01 to W2K3PSServ01. The old name is still included in the server list and referred to in the data collector ranking, published application references and license assignments. What should the administrator do to remove the old server name from the farm data?

- A. Uninstall Presentation Server from the system

- B. Force the removal of Presentation Server from the system
- C. Select Remove server from farm in the Presentation Server Console
- D. Update the references to the old name in the appropriate management consoles

Answer: C
