1Y0-259: Citrix Presentation Server 4.5: Administration

Practice Exam: 1Y0-259 Exams

Exam Number/Code: 1Y0-259

Exam Name: Citrix Presentation Server 4.5: Administration

Questions and Answers: 126 Q&As

([CCEA XP](#))

Exam : [1Y0-259](#)

"Citrix Presentation Server 4.5: Administration", also known as 1Y0-259 exam, is a Citrix certification. With the complete collection of exam questions, Just4Study has assembled to take you through 126 Q&As to your 1Y0-259 exam preparation. In the 1Y0-259 exam resources, you will cover every field and category in Citrix Certification helping to ready you for your successful Citrix Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Citrix CCEA XP 1Y0-259 (Citrix Presentation Server 4.5: Administration) examination of original title complete coverage. 1Y0-259 exam questions help you pass the exam.

Just4Study 1Y0-259 Feature:

* High quality - High quality and valued for the 1Y0-259 Exam: 100% Guarantee to Pass Your 1Y0-259 exam and get your CCEA XP certification.

* Authoritative - Authoritative braindumps with complete details about 1Y0-259 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CCEA XP resources, you will minimize your **Citrix CCEA XP** cost and be ready to pass your 1Y0-259 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free CCEA XP demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1Y0-259 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1Y0-259 Demo Download

Just4Study offers free demo for CCEA XP 1Y0-259 exam (Citrix Presentation Server 4.5: Administration). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Citrix CCEA XP 1Y0-259** examination of original title complete coverage. 1Y0-259 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 1Y0-259

Exam Name: Citrix Presentation Server 4.5: Administration(CCEA XP)

Questions and Answers: 126 Q&A

[Citrix 1Y0-259](#) Test belongs to one of the CCEA XP certified test, if needs to obtain the CCEA XP certificate, you also need to participate in other related test, the details you may visit the [CCEA XP](#) certified topic, in there, you will see all related CCEA XP certified subject of examination.

Just4Study professional provide CCEA XP 1Y0-259 the newest Q&A, completely covers 1Y0-259 test original topic. With our complete CCEA XP resources, you will minimize your CCEA XP cost and be ready to pass your 1Y0-259 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Citrix 1Y0-259

Title : Citrix Presentation Server 4.5: Administration

1. Which two steps are required when using Active Directory to deploy client packages to Windows 2000 Professional clients? (Choose two.)

- A. Assign the package to a user or group of users.
- B. Assign the package to a computer or to a group of computers.
- C. Go to a command line on the client device and type GPUPDATE /FORCE.
- D. Restart the client machine to allow the Active Directory Group Policy to automatically install the client.

Answer: BD

2. Scenario: An administrator wants to create and deploy a client package that includes the Web Client using the Client Packager.

The administrator wants:

To be able to make modifications to the file

The client name to be different from the computer name

Users to specify a username and password to log on to a session

Clients to be deployed from a web page using Web Interface

Based on these requirements, which two steps must be completed when creating and deploying the client package? (Choose two.)

- A. Create a network share.
- B. Select the manage client deployment task.
- C. Accept the default value for the client name option.
- D. Enable users to choose how their applications are launched.
- E. Select UNCOMPRESSED in the "Create a Windows Installer" option.
- F. Select use of Kerberos Authentication in combination with Security Support Provider Interface.

Answer: BE

3. Scenario: Currently, an administrator does not want to publish resources using the Web Interface. However, the administrator plans to implement Web Interface at a later time and may grant access to published resources through the Web Interface at that time. Based on future plans, which client should be deployed now?

- A. Web Client
- B. Secure Access Client
- C. Program Neighborhood Client
- D. Program Neighborhood Agent Client

Answer: C

4. Scenario: An administrator installs a new database application that uses a .ZTC extension for its data files on servers running Presentation Server. The .ZTC extension does not show as a file type association option when

attempting to publish the application. Why is .ZTC not listed as a file type association when publishing applications?

- A. The servers that host the application have not been rebooted.
- B. The file type association function is not supported for that extension.
- C. The administrator has not run the "Update from registry..." option from the console.
- D. The administrator is attempting to publish the application to a server that does not have the application installed.

Answer: C

5. A new IT policy requires the use of configuration logging. What is the first step the Citrix Administrator must take to set up configuration logging?

- A. Create a configuration logging database
- B. Configure a configuration logging database
- C. Configure the configuration logging settings
- D. Create report specification for configuration logging reports

Answer: A

6. Which step is required to obtain the license file when implementing Citrix Presentation Server 4.5 after installing the Citrix License Server?

- A. Download the license file from MyCitrix.com and upload it to the License Management Console through the License Files node.
- B. Download the license file from MyCitrix.com and upload it to the License Management Console through the File Locations node.
- C. Download the license code from MyCitrix.com and enter it in the License Management Console through the License Files node.
- D. Download the license code from MyCitrix.com and enter it in the License Management Console through the File Locations node.

Answer: A

7. Which two Health Monitoring and Recovery tests are enabled by default? (Choose two.)

- A. Citrix IMA Service
- B. Citrix XML Service
- C. Citrix SMA Service
- D. Citrix XTE Server Service

Answer: AB

8. Scenario: An administrator plans on deploying a CPU-intensive application and has determined that CPU Utilization Management should be implemented. Based on testing, the administrator expects to maximize each server at 40 users with the assumption that only this application is being deployed. What will be the approximate CPU slice that would be allocated to each user?

- A. 2%
- B. 3%
- C. 4%
- D. 5%

Answer: A

9. Which benefit is the result of enabling Memory Optimization?

- A. Memory is allocated to each user proportionately.
- B. Each server can more efficiently initiate applications.
- C. Memory is dynamically reallocated based on specific user need.
- D. The administrator controls the maximum amount of memory per user.

Answer: B

10. Scenario: Users in the Human Resources department experience long wait times when loading graphics in published Internet Explorer and Microsoft Outlook. Which SpeedScreen solution should be configured to lower the

resolution of these graphics and optimize the user experience?

- A. SpeedScreen Image Acceleration
- B. SpeedScreen Progressive Display
- C. SpeedScreen Browser Acceleration
- D. SpeedScreen Multimedia Acceleration

Answer: C

11. Scenario: An administrator notices that there are occasional issues with traffic traversing TCP port 2512, in the farm running Citrix Presentation Server. Which Health Monitoring and Recovery test should the administrator configure?

- A. Citrix IMA Service
- B. Citrix XTE Service
- C. Citrix XML Service
- D. Terminal Services

Answer: A

12. Scenario: Administrators currently have the Health Monitoring and Recovery test relating to logons enabled to alert them in the event of a failure. Server "CPS14" has alerted them many times today, and they are aware of the problem but do not have time to remedy this issue until tomorrow. Which configuration change should the administrative staff make?

- A. Set the server properties to reboot the server if the Logon test fails.
- B. Set the server farm properties to reboot the server if the Logon test fails.
- C. Set the server properties to remove the server from load balancing if the test fails.
- D. Set the server farm properties to remove the server from load balancing if the test fails.

Answer: C

13. Scenario: When planning a Presentation Server deployment on multiple servers, an organization wants to ensure that there is no Presentation Server as a single point of failure. Which three database options eliminate the single point of failure? (Choose three.)

- A. Oracle
- B. IBM DB2
- C. Microsoft Access
- D. Microsoft SQL Server
- E. Microsoft SQL Express

Answer: ABD

14. Scenario: An administrator is installing Presentation Server 4.5. The company requires the use of the Program Neighborhood Agent as the pass-through client and that users should be explicitly prompted for authentication to Citrix Presentation Server. Which two steps must the administrator take during the installation to meet the company's requirements? (Choose two.)

- A. Select "no" for pass-through authentication for the pass-through client.
- B. Select "yes" for pass-through authentication for the pass-through client.
- C. Replace the default Client with the Program Neighborhood Agent as the pass-through client.
- D. Specify the URLs of the web server running the Program Neighborhood Agent Services Site.

Answer: AD

15. Scenario: A company has a Citrix Presentation Server 4.0 on Windows Server 2003 implementation and will upgrade to Citrix Presentation Server 4.5. The administrator must migrate the current farm while preserving the current custom configuration settings. Which type of installation should the administrator follow?

- A. The automatic upgrade path, choosing custom settings in the autorun installations
- B. The automatic upgrade path, accepting the default settings in the autorun installations
- C. The phased migration path, joining a server running Citrix Presentation Server 4.5 on Windows Server 2003 to the current farm and acquiring the configuration settings

D. The phased migration path, installing Citrix Presentation Server 4.5 on a server running on Windows Server 2003 independent of the current farm and manually configuring the custom settings

Answer: B

16. Scenario: A published application requires an explicit IP address for each of its 200 concurrent clients for licensing purposes. The administrator decided to achieve this by using Virtual IP addresses. What should be added to maintain the licensing requirements?

- A. The process to the "Virtual Loopback Processes"
- B. A new IP address to the Virtual IP Address Configuration
- C. The process executable to the Virtual IP Process monitored list
- D. A set of IP addresses from a different subnet than the Virtual IP addresses

Answer: C

17. Which three steps are required to deploy clients using Microsoft Active Directory? (Choose three.)

- A. Create a network share.
- B. Configure a policy in Presentation Server for Client deployment.
- C. Add users to an Organizational Unit designated for Presentation Server environment.
- D. Create a new package in the Software Installation object for an Active Directory group policy object.
- E. Browse to the installation files on the network share and assign them to the Organizational Unit which includes the client devices.

Answer: ADE

18. Scenario: During the course of one day, the administrator of a large server farm comprised of a single zone notices that the IMA Work Item Queue Ready Count metric on the data collector for the zone has repeatedly been just above zero. The data collector supports 50 servers and hosts 10 productivity applications. There is no backup data collector configured for the zone. There is one server that only has one proprietary application suite published. This proprietary application suite is only used by the Finance department but is mission critical for that department. Which two actions would best address the needs of the environment described in this scenario? (Choose two.)

- A. Restart the IMA service on the data collector.
- B. Increase the preference of one of the 50 servers to Preferred status.
- C. Increase the preference of the server hosting the proprietary application suite to Most Preferred status.
- D. Add the registry key entry MaxHostAddressCacheEntries to the data collector for the zone and set it to 50.
- E. Dedicate the existing data collector by removing the productivity applications from the server and setting it to Most Preferred status.

Answer: BE

19. Scenario: An administrator enables CPU Optimization for the entire farm. After installing a CPU-intensive Computer Aided Drawing and Design (CADD) application, several power users ask how additional CPU may be allocated specifically to them. Which statement is correct?

- A. CPU allocation is defined by network bandwidth.
- B. CPU allocation can be configured in the registry.
- C. The administrator cannot configure CPU allocation.
- D. The administrator can configure CPU allocation in the farm properties.

Answer: B

20. Scenario: An environment consists of all expert-level computer users. Therefore, the administrator feels comfortable allowing users to access resources through an interface from their desktops, which they can use to configure options. Navigating through the interface should be easy, as users will be expected to not only be able to do this but also understand the implications of any changes they make. Which client is most appropriate for this environment?

- A. Client for Web
- B. Access Gateway
- C. Program Neighborhood

D. Program Neighborhood Agent

Answer: C
