Citrix CCIA Citrix Other Certification

1Y0-610: CCIA Core Technologies and Architectures

Practice Exam: 1Y0-610 Exams

Exam Number/Code: 1Y0-610

Exam Name: CCIA Core Technologies and Architectures

Questions and Answers: 104 Q&As

([CCIA Citrix Other Certification](#))

"CCIA Core Technologies and Architectures", also known as 1Y0-610 exam, is a Citrix certification. With the complete collection of exam questions, Just4Study has assembled to take you through 104 Q&As to your 1Y0-610 exam preparation. In the 1Y0-610 exam resources, you will cover every field and category in Citrix Certification helping to ready you for your successful Citrix Certification.

Exam : [1Y0-610](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Citrix CCIA 1Y0-610 (CCIA Core Technologies and Architectures) examination of original title complete coverage. 1Y0-610 exam questions help you pass the exam.

Just4Study 1Y0-610 Feature:

* High quality - High quality and valued for the 1Y0-610 Exam: 100% Guarantee to Pass Your 1Y0-610 exam and get your CCIA certification.

* Authoritative - Authoritative braindumps with complete details about 1Y0-610 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CCIA resources, you will minimize your **Citrix CCIA** cost and be ready to pass your 1Y0-610 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free CCIA demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1Y0-610 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1Y0-610 Demo Download

Just4Study offers free demo for CCIA 1Y0-610 exam (CCIA Core Technologies and Architectures). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Citrix CCIA Citrix Other Certification 1Y0-610** examination of original title complete coverage. 1Y0-610 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 1Y0-610

Exam Name: CCIA Core Technologies and Architectures(CCIA Citrix Other Certification)

Questions and Answers: 104 Q&A

[Citrix 1Y0-610](#) Test belongs to one of the CCIA Citrix Other Certification certified test, if needs to obtain the CCIA Citrix Other Certification certificate, you also need to participate in other related test, the details you may visit the [CCIA Citrix Other Certification](#) certified topic, in there, you will see all related CCIA Citrix Other Certification certified subject of examination.

Just4Study professional provide CCIA Citrix Other Certification 1Y0-610 the newest Q&A, completely covers 1Y0-610 test original topic. With our complete CCIA Citrix Other Certification resources, you will minimize your CCIA Citrix Other Certification cost and be ready to pass your 1Y0-610 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Network General Corp

1Y0-610

Title : Citrix Core Technologies and Architecture

1. Which of the following executables will be found in each terminal server session? (Choose two.)

- A. TERMSERV.EXE
- B. CSRSS.EXE
- C. SMSS.EXE
- D. WINLOGON.EXE
- E. WFSHELL.EXE

Answer: BD

2. Which of the following are user mode protocol extensions? (Choose two.)

- A. RDPWSX.DLL
- B. ICAWSX.DLL
- C. WSXRDP.DLL
- D. WSXICA.DLL

Answer: AD

3. Which machine is responsible for communication with the Summary Database?

- A. Zone Data Collector
- B. Farm Metric Server
- C. Data Connection Server
- D. MetaFrame XP Server

Answer: C

4. Which of the following does the OS kernel NOT include?

- A. An interrupt handler that handles all requests or completed I/O operations.
- B. A manager of the operating system that addresses space in memory or storage.
- C. A subsystem that is responsible for console windows and the creation and deletion of threads.
- D. A scheduler that determines which programs share the processing time in what priority.

Answer: C

5. The default IMA ping interval is ____ minute(s), and it should be ____ the time needed to reach the zone data collector.

- A. 1, equal to
- B. 3, equal to

- C. 3, greater than
- D. 1, greater than

Answer: D

6. When a MetaFrame XP server sends an SQL updated statement to the local (subscriber) SQL server and the local subscriber SQL server contacts the writable master publisher and submits the updated statement through Microsoft DTC, this is sequence is a function of?

- A. Clustering
- B. Two-phase commit
- C. Data store replication
- D. Transactional replication

Answer: B

7. Which method(s) can be used by a MetaFrame server for updating the local host cache? (Choose two.)

- A. Polling the zone data collector for changes.
- B. Syncing with the data store on server startup.
- C. Syncing with the data store when the IMA Service is stopped.
- D. Receiving a change broadcast from zone data collector.

Answer: BD

8. You have a 23 server MetaFrame XP farm. The data store was functioning well within normal parameters. Yesterday, you added an additional 30 servers to the farm, and now the data store CPU consistently exceed normal utilization. The number of concurrent user connections has not changed. Which of the following will be the best course of action to resolve this issue?

- A. Refresh the LHC on all farm servers
- B. Recreate the LHC on all farm servers
- C. Decrease the value of the DCNChangePollingInterval
- D. Increase the value of the DCNChangePollingInterval

Answer: D

9. What is the main design consideration when choosing a file server to maintain your Installation Manager packages?

- A. It should be a MetaFrame server.
- B. It should be the Packager server.
- C. It must be accessible by each MetaFrame server.
- D. It must be in the same domain as the MetaFrame farm.

Answer: C

10. On Monday morning you realize that at some point over the weekend, the data store shut down and was never turned back on. Although applications are still accessible, you are unable to manage the servers using the Citrix Management Console. What should be the first troubleshooting step in order to recover database?

- A. Restore the data store from a back-up.
- B. Create a new data store and point the farm to it.
- C. Run NETSTAT to verify that the port 2512 is listening
- D. Turn the database server back on and make sure the service restarts.

Answer: D

11. Which of the following is an activity that WFSHELL.EXE is responsible for performing?

- A. Launching user applications.
- B. Authenticating user credentials.
- C. Passing display parameters to the GDI.
- D. Initializing the listener and session stacks.

Answer: A

12. How do the MetaFrame XP servers communicate with the data store database in direct mode?

- A. IMA Service
- B. ODBC Connection
- C. TCP port 2513
- D. Local Host Cache

Answer: B

13. Which of the following activities occurs when IMA service stops on the server hosting the data store? (Choose two.)

- A. The database is automatically backed up.
- B. The instance of files with a .BAK extension are deleted.
- C. The existing database is copied with a .UNK extension.
- D. The instance of files with a .UNK extensions are deleted.

Answer: AC

14. Which subsystem is responsible for transferring Summary Files from the MetaFrame servers to the Summary Database?

- A. Metrics Subsystem
- B. Distribution Subsystem
- C. Alerts Subsystem
- D. Summary Database Subsystem

Answer: B

15. In a MetaFrame XP farm that has been designed with a Microsoft SQL data store database in direct mode, changes to static server data (such as publishing an application) will result in MetaFrame XP servers sending the information to the data store. In order to configure firewalls that are in use in the network properly, TCP port access will be required on the firewalls. Which of the following processes correctly identifies which TCP ports will need to be open? (Choose two.)

- A. The configuration update is received from Citrix Management Console by the target MetaFrame XP server. This occurs over TCP port 2513.
- B. The MetaFrame XP server sends an update to the data store to be written. This occurs over TCP port 2513.
- C. The MetaFrame XP server sends a notification and the changed data to all other MetaFrame XP servers in the farm. This occurs over TCP port 2512.
- D. The MetaFrame XP servers receive the update and, in turn, update their local host cache. This occurs over TCP port 2513.

Answer: AC

16. Which one of the following describes the Listener Stack?

- A. It is responsible for managing a connection to an active session.
- B. It has no client activity and is waiting to be assigned to a connection.
- C. It is responsible for waiting incoming connection requests.
- D. It has a connected user that runs protected from all other instances with an associated ID.

Answer: C

17. How often are metrics which are being monitored polled for their value?

- A. Every second
- B. Every Minute
- C. Every 15 Seconds
- D. Every Fifteen minutes

Answer: C

18. Which is one benefit of memory-based code sharing?

- A. It allows the OS kernel to allocate memory to user processes dynamically.
- B. It is a significant optimizer, as only a single instance of the application must reside in memory.
- C. It makes Terminal Services more robust, by maintaining redundant copies of an executable in memory.
- D. It allows the memory manager to be more flexible and scalable, utilizing multiple processors when available.

Answer: B

19. Which of the following methods can be used to synchronize the Local Host Cache with the Microsoft SQL data store? (Choose two.)

- A. Execute a DSMANT command.
- B. Execute a QUERYHR command.
- C. Stop and restart the IMA service.
- D. Restart the server hosting the data store.

Answer: AC

20. Which one of the following is the "shadow key," where HKEY_CURRENT_USER changes are stored during application installation?

- A.HKEY_LOCAL_MACHINESOFTWAREMicrosoftWindows NTCurrentVersionTerminalServerUniqueSoftware
- B.HKEY_LOCAL_MACHINESOFTWAREMicrosoftWindows NTCurrentVersionTerminalServerInstallSoftware
- C.HKEY_LOCAL_MACHINESOFTWAREMicrosoftWindows NTCurrentVersionTerminalServerInstallUserSpecific
- D.HKEY_LOCAL_MACHINESOFTWAREMicrosoftWindows NTCurrentVersionTerminalServerInstallSecurity

Answer: B
