Citrix Citrix Other Certification

1Y0-740: Citrix WANScaler 4.2: Administration Exam

Practice Exam: 1Y0-740 Exams

Exam Number/Code: 1Y0-740

Exam Name: Citrix WANScaler 4.2: Administration Exam

Questions and Answers: 106 Q&As

([Citrix Other Certification](#))

"Citrix WANScaler 4.2: Administration Exam", also known as 1Y0-740 exam, is a Citrix certification. With the complete collection of exam questions, Just4Study has assembled to take you through 106 Q&As to your 1Y0-740 exam preparation. In the 1Y0-740 exam resources, you will cover every field and category in Citrix Certification helping to ready you for your successful Citrix Certification.

Exam : [1Y0-740](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Citrix Citrix Other Certification 1Y0-740 (Citrix WANScaler 4.2: Administration Exam) examination of original title complete coverage. 1Y0-740 exam questions help you pass the exam.

Just4Study 1Y0-740 Feature:

* High quality - High quality and valued for the 1Y0-740 Exam: 100% Guarantee to Pass Your 1Y0-740 exam and get your Citrix Other Certification certification.

* Authoritative - Authoritative braindumps with complete details about 1Y0-740 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Citrix Other Certification resources, you will minimize your **Citrix Citrix Other Certification** cost and be ready to pass your 1Y0-740 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Citrix Other Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1Y0-740 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1Y0-740 Demo Download

Just4Study offers free demo for Citrix Other Certification 1Y0-740 exam (Citrix WANScaler 4.2: Administration Exam). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Citrix Citrix Other Certification 1Y0-740** examination of original title complete coverage. 1Y0-740 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 1Y0-740

Exam Name: Citrix WANScaler 4.2: Administration Exam(Citrix Other Certification)

Questions and Answers: 106 Q&A

[Citrix 1Y0-740](#) Test belongs to one of the Citrix Other Certification certified test, if needs to obtain the Citrix Other Certification certificate, you also need to participate in other related test, the details you may visit the [Citrix Other Certification](#) certified topic, in there, you will see all related Citrix Other Certification certified subject of examination. Just4Study professional provide Citrix Other Certification 1Y0-740 the newest Q&A, completely covers 1Y0-740 test original topic. With our complete Citrix Other Certification resources, you will minimize your Citrix Other Certification cost and be ready to pass your 1Y0-740 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Citrix 1Y0-740

Title : Citrix WANScaler 4.2: Administration Exam

1. During the TCP handshake process, the Maximum Segment Size (MSS) of a packet is reduced in order to _____. (Choose the correct phrase to complete the sentence.)

- A. increase interactive performance
- B. compress the traffic across the WAN
- C. allow room in the packet header for custom WANScaler options
- D. indicate the existence of a WANScaler appliance to other WANScaler appliances across the WAN

Answer: C

2. An administrator is implementing a WANScaler appliance in WCCP mode in a single LAN, single WAN implementation. What is the minimum number of Ethernet cables required to set up the WANScaler appliance on the local LAN?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

3. An administrator is implementing WANScaler appliances in an environment. The administrator has been instructed to configure WANScaler appliances to accelerate traffic. What are three types of traffic that can be accelerated by WANScaler appliances? (Choose three.)

- A. SIP
- B. FTP
- C. NFS
- D. CIFS
- E. TFTP

Answer: BCD

4. Scenario: An administrator is implementing a WANScaler appliance in an environment where the majority of the traffic types are candidates for acceleration. There is an undetermined amount of critical unaccelerated traffic that needs to be considered.

Which two options should the administrator implement to ensure that unaccelerated network traffic types are not suppressed in this environment? (Choose two.)

- A. Select hardboost.
- B. Select partial bandwidth.
- C. Fix the bandwidth limit to 50%.
- D. Set the initial bandwidth to 90%.

Answer: BD

5. Which TCP variant would be appropriate in an environment where a site is connected to multiple WAN links, each of which has no guaranteed bandwidth?

- A. Inline
- B. Variable
- C. Softboost
- D. Hardboost
- E. Full bandwidth

Answer: C

6. Which three operating parameters are defined in the TCP header of a packet and exchanged during the autoconfiguration process? (Choose three.)

- A. Bandwidth limits
- B. Acceleration mode
- C. Service class rules
- D. Compression mode
- E. Compression history

Answer: ABD

7. What should an administrator do to ensure that traffic is sent to the desired appliance when configuring WANScaler appliances in group mode?

- A. Turn one of the appliances off in the group mode.
- B. Assign the virtual IP address to the primary appliance.
- C. Create forwarding rules that use explicit IP addresses.
- D. Create a service class policy to manage the distribution of traffic.

Answer: C

8. Scenario: An administrator would like to implement five WANScaler appliances in an environment. Four of the appliances are deployed in the branch offices and one in the data center. Each office has a single circuit to the data center. All appliances will be implemented in inline mode. The administrator wants to leverage the automatic bandwidth allocation feature. The administrator has decided that WANScaler QoS will not be implemented in this environment.

Which physical WANScaler topology will be appropriate for this implementation?

- A. Mesh
- B. Full Mesh
- C. Point-to-point
- D. Hub-and-spoke

Answer: D

9. An administrator implementing WANScaler appliances in an appliance only environment has been instructed by the IT Manager to not bring down the network while installing the WANScaler appliances. In which two deployment modes could the administrator implement the WANScaler appliances to meet the stated requirements? (Choose two.)

- A. Inline
- B. WCCP
- C. Redirector
- D. Virtual inline

Answer: BD

10. Scenario: An administrator designing a WANScaler implementation would like the implementation to be set up based on the following considerations:

- 1.The data center supports multiple branch offices, of which only one has a WANScaler appliance.
- 2.The branch office WANScaler appliance should connect directly to the WAN router for the branch office.
- 3.The headquarters WANScaler appliance should connect directly to the WAN router for the headquarters.
- 4.All traffic from the branch office to servers at the headquarters should flow through the branch office WANScaler

appliance.

Which WANScaler deployment topology should be used in this type of implementation?

- A. Star
- B. Token Ring
- C. Point-to-point
- D. Hub-and-spoke

Answer: C

11. Scenario: An administrator is implementing a WANScaler appliance in the branch office of a telemarketing environment. Most of the traffic in this environment is voice over IP based. However, the billing and collections team needs access to web servers in the corporate office. Users in this environment have complained that it takes too long for them to access data in the morning, between 9:00 AM and 10:30 AM. Coincidentally, this is when most of the billing and collections employees begin their day.

Which traffic type could the administrator accelerate in this environment?

- A. FTP
- B. UDP
- C. HTTP
- D. Telnet

Answer: C

12. An administrator would like to implement a WANScaler appliance as depicted in the attached diagram.

Click the 'Exhibit' button to view the diagram.

In which deployment mode will the WANScaler appliance be implemented in this environment?

- A. Inline
- B. WCCP
- C. Point-to-point
- D. Virtual inline with policy-based routing

Answer: D

13. Scenario: An administrator is instructed to implement two WANScaler appliances in high availability mode for a virtual inline deployment. In this environment, the switches and routers are already connected. What is the minimum number of Ethernet cables required to set up the WANScaler appliances in a single LAN, single WAN deployment?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: B

14. The _____ is where the set of rules that map accelerated subnets to appliances is created and the _____ is what examines the rules. (Choose the correct option to complete the sentence.)

- A. Client; Controller
- B. Client; Appliance
- C. Controller; Client
- D. Controller; Appliance

Answer: C

15. In a high availability pair, configuration changes should be made using which IP address?

- A. Virtual IP address
- B. Subnet IP address
- C. WANScaler IP address
- D. Management IP address

Answer: A
