

## 1z0-033 braindumps

### Oracle 9i DBA

#### 1z0-033: Oracle9i Database:Performance Tuning

**Practice Exam:** 1z0-033 Exams

**Exam Number/Code:** 1z0-033

**Exam Name:** Oracle9i Database:Performance Tuning

**Questions and Answers:** 149 Q&As

( [9i DBA](#) )

"Oracle9i Database:Performance Tuning", also known as 1z0-033 exam, is a Oracle certification. With the complete collection of exam questions, Just4Study has assembled to take you through 149 Q&As to your 1z0-033 exam preparation. In the 1z0-033 exam resources, you will cover every field and category in Oracle Certification helping to ready you for your successful Oracle Certification.

Exam : [1z0-033](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Oracle 9i DBA 1z0-033 (Oracle9i Database:Performance Tuning) examination of original title complete coverage. 1z0-033 exam questions help you pass the exam.

#### **Just4Study 1z0-033 Feature:**

\* High quality - High quality and valued for the 1z0-033 Exam: 100% Guarantee to Pass Your 1z0-033 exam and get your 9i DBA certification.

\* Authoritative - Authoritative braindumps with complete details about 1z0-033 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed 9i DBA resources, you will minimize your **Oracle 9i DBA** cost and be ready to pass your 1z0-033 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free 9i DBA demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1z0-033 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 1z0-033 Demo Download**

Just4Study offers free demo for 9i DBA 1z0-033 exam (Oracle9i Database:Performance Tuning). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Oracle 9i DBA 1z0-033** examination of original title complete coverage.1z0-033 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

**VUE/Prometric Code: 1z0-033**

Exam Name: Oracle9i Database:Performance Tuning( 9i DBA )

Questions and Answers: 149 Q&A

[Oracle 1z0-033](#) Test belongs to one of the 9i DBA certified test, if needs to obtain the 9i DBA certificate, you also need to participate in other related test, the details you may visit the [9i DBA](#) certified topic, in there, you will see all related 9i DBA certified subject of examination.

Just4Study professional provide 9i DBA 1z0-033 the newest Q&A, completely covers 1z0-033 test original topic. With our complete 9i DBA resources, you will minimize your 9i DBA cost and be ready to pass your 1z0-033 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Oracle 1Z0-033

Title : Oracle 9i Database:Performance Tuning

1. When tuning a database server, which three goals should you focus on? (Choose three.)

- A.minimize response time for OLTP users
- B.maximize throughput for batch processing
- C.minimize response time for batch processing
- D.increase load capability for the decision-support systems
- E.minimize parallelism for online transaction processing (OLTP) systems

Answer: ABD

2. You executed the following query to know about users and their consumer groups:

```
SQL> SELECT * FROM DBA_RSRC_CONSUMER_GROUP_PRIVS;  
GRANTEE GRANTED_GROUP GRANT_OPTION INITIAL_GROUP
```

```
-----  
SCOTT LOW_GROUP NO NO  
PUBLIC LOW_GROUP NO NO  
PUBLIC DEFAULT_CONSUMER_GROUP YES YES  
SYSTEM SYS_GROUP NO YES
```

If the user SCOTT starts a session, to which consumer group will the session belong?

- A.The session belongs to LOW\_GROUP.
- B.The session belongs to SYS\_GROUP.
- C.The session belongs to DEFAULT\_CONSUMER\_GROUP.
- D.The session does not belong to any group because the user is not assigned to any group.

Answer: C

3. The following are the tasks that you need to perform to create a resource plan:

- A) Creating resource consumer groups
- B) Validating pending area
- C) Creating a pending area
- D) Creating resource plans
- E) Creating plan directives
- F) Submitting pending area

In which order would you perform these tasks?

- A.C, D, A, E, B, F
- B.C, B, F, E, A, D
- C.C, B, E, D, A, F
- D.C, F, E, A, D, B

tings with users once each two weeks to discuss performance

Answer: A

4. View the Exhibit.

In your database, you find that the fy05q1 table in a dictionary managed tablespace has excess space. Further, you find that the table consists of three extents. The size of the first extent is 100KB, the second is 200KB, and the third is 300K. The high water mark is in the middle of the second extent, and there is 400KB of unused space.

You want to release the unused space so that it can be used by other segments. You execute the following command to achieve this task:

```
SQL> ALTER TABLE fy05q1 DEALLOCATE UNUSED;
```

What would this command do?

- A.deallocates the third and second extents
- B.deallocates the third extent; the second extent remains as it is
- C.deallocates the third extent, and the second extent is sized to 100KB
- D.returns an error because the unused space is above the high water mark

Answer: C

5. View the Exhibit and examine the output to check the resource plan directives associated with the groups in a plan.

Which three statements are true regarding the output? (Choose three.)

- A.The users belonging to OTHER\_GROUPS will never be able to run a query.
- B.Even if there is only one active session running, that session is allowed to utilize all the available CPU resources according to the directives of the plan.
- C.It is possible to raise the priority for the online transaction processing (OLTP) group from 80% to 90% without changing the priority for any other group.
- D.In a fully loaded system, sessions for OTHER\_GROUPS have to wait for other sessions to finish work if all CPU is used by first three groups.
- E.In a heavily used system, the sessions in the OLTP group have the ability to consume 80% or more of the total CPU resources available.

Answer: BDE

6. The values for the resource plan directives are set as follows:

```
SWITCH_GROUP = OLAP
```

```
SWITCH_TIME = 1000
```

```
SWITCH_ESTIMATE = True
```

What are the two implications of these values on a running session belonging to the consumer group for which these directives are set? (Choose two.)

- A.These settings are useful to limit the resources consumed by short-running operations.
- B.The resource manager switches the session to the OLAP group if the session is active for more than 1,000 seconds and after the operation the session becomes part of the OLAP group.
- C.The resource manager can switch the session to the OLAP group before an operation even starts running.
- D.The resource manager switches the session to the online analytical processing (OLAP) group if the session is active for more than 1,000 seconds and after the operation the session is moved back to the original group.

Answer: CD

7. In an online transaction processing (OLTP) system, you notice that the transactions are waiting. Which two techniques would you use to determine if it is a locking problem? (Choose two.)

- A.query V\$SESSION to determine the sessions waiting for locks
- B.query V\$LOCKED\_OBJECT to diagnose the deadlocked sessions
- C.execute the utlockt.sql script to find the list of locking and waiting transactions
- D.use the catblock.sql script to populate DBA\_BLOCKERS and DBA\_WAITERS views
- E.query the DBA\_WAITERS view to determine the sessions that are waiting for a locked resource

Answer: CE

8. You have reserved memory within the Shared Pool by using the SHARED\_POOL\_RESERVED\_SIZE parameter to accommodate large space allocations while compiling PL/SQL blocks and database triggers.

While observing the performance of the reserved area, you find that the value of the REQUEST\_FAILURES column in the V\$SHARED\_POOL\_RESERVED view is continuously increasing.

Which statement is true in this scenario?

- A. The parsing of the statement fails due to invalidations.
- B. The execution of the statement fails due to invalidations.
- C. The space allocated for the reserved area is not enough.
- D. The syntax in the PL/SQL blocks is causing the compilation failure.

Answer: C

9. A customer has various dictionary-managed tablespaces with past data. The extents in dictionary-managed tablespaces are not uniformly sized. Newly created tablespaces are locally managed. You want to make all the tablespaces locally managed. What approach would you use to change the dictionary-managed tablespaces to locally managed tablespaces to get all the performance benefits of local extent management?

- A. use only the DBMS\_SPACE\_ADMIN.TABLESPACE\_MIGRATE\_TO\_LOCAL procedure
- B. create new locally managed tablespaces and move data from existing dictionary-managed tablespaces to locally managed tablespaces
- C. use the DBMS\_SPACE\_ADMIN.TABLESPACE\_MIGRATE\_TO\_LOCAL procedure, followed by DBMS\_SPACE\_ADMIN.TABLESPACE\_FIX\_SEGMENT\_STATES
- D. use the ALTER TABLESPACE command to change extent management to local, and then use the DBMS\_SPACE\_ADMIN.TABLESPACE\_MIGRATE\_TO\_LOCAL procedure

Answer: B

10. Why does performance degrade when many UPDATE, INSERT, or DELETE statements are issued on a table that has an associated Bitmap index?

- A. Some DML operations re-create the Bitmap index blocks.
- B. The Bitmap index is rebuilt automatically after a DML operation.
- C. The smallest amount of a bitmap that can be locked is a bitmap segment.
- D. Additional time is taken to remove NULL values from the Bitmap index after a DML operation.

Answer: C

11. You need to size the KEEP pool. Which calculation would you use to determine the initial size of the KEEP pool?

- A. 50% of the DEFAULT pool
- B. 50% of the RECYCLE pool
- C. the total number of blocks of all the candidate objects that you need in the KEEP pool / the number of objects that you need in the KEEP pool
- D. total number of blocks of all the candidate objects that you need in the KEEP pool + additional space to allow for object growth

Answer: D

12. Oracle Shared Server is best used when \_\_\_\_\_ and \_\_\_\_\_. (Choose two.)

- A. the database is experiencing database-intensive work
- B. the database is primarily used for batch or DSS operations
- C. CPU usage on your machine is consistently at 90% or higher
- D. an OLTP application is running on a machine approaching memory resource limits
- E. you do not need to scale up the number of concurrent connections to the database
- F. the database is primarily used for an interactive application where dedicated servers are mainly idle

Answer: DF

13. You create a stored outline and apply it for use. What strategy would you adopt to verify that the stored outline is being used for a statement?

- A. verify OL\$,OL\$HINTS, and OL\$NODES tables after running the statement with USE\_STORED\_OUTLINES set

- B.examine the V\$SQL dynamic performance view after running the statement with the USE\_STORED\_OUTLINES set
- C.compare the explain plan output for the statement when running with and without the USE\_STORED\_OUTLINES set
- D.compare the statspack output by taking snaps before and after running the statement with the USE\_STORED\_OUTLINES set

Answer: C

14. Smith is a DBA with ABC Corp. He is in the process of tuning the database. He has received various problem statements from the customers. Identify three appropriately defined problem statements that Smith can use to tune the database correctly. (Choose three.)

- A.The system is too slow.
- B.Online response is very slow.
- C.Sometimes the batch process throws errors.
- D.The weekly backup took 30 minutes, and earlier it used to take 5 minutes.
- E.The batch process is taking 2 hours, whereas it should take only 30 minutes.
- F.The system currently has 100 users. We wish to increase the number of users to 250. The users' response time should not be affected.

Answer: DEF

15. ABC Corp. plans to build an online transaction processing (OLTP) system. The company plans to tune all the components during the development life cycle.

From the list given below, identify the order in which the components should be tuned.

1: logical and physical model

2: cursor sharing

3: Oracle instance memory structures

4: operating system

5: data file I/O

- A.1, 2, 3, 5, 4
- B.1, 3, 2, 4, 5
- C.1, 2, 3, 4, 5
- D.1, 2, 5, 3, 4

Answer: A

16. Smith is a DBA with XYZ Corp. There are 500 data entry users in an online transaction processing (OLTP) environment. The current response time is 15-20 seconds. The company wants the response time to be brought down to 10 seconds or less.

What is the first thing that Smith should do to diagnose the cause of the slow response time?

- A.determine whether there is contention for locks
- B.determine whether the file system is fast enough
- C.determine whether more memory needs to be allocated to PGA
- D.determine whether more memory needs to be allocated to SGA
- E.determine whether the slow response is wait bound or CPU bound

Answer: E

17. Which two activities would adversely affect database performance? (Choose two.)

- A.doing a soft parse
- B.performing archiving
- C.less frequent checkpointing
- D.defining multiple buffer pools
- E.taking online back up of data files

Answer: BE

18. You have online application users who are interested in seeing a few initial results of a query. Therefore you

require the query to produce a few initial rows quickly regardless of the presence of statistics. Which optimizer mode would you choose?

- A.RULE
- B.CHOOSE
- C.ALL\_ROWS
- D.FIRST\_ROWS\_n

Answer: D

19. View the Exhibit and examine the steps to create a database resource plan. Execution of the following procedure resulted in an error:

```
SQL> EXECUTE dbms_resource_manager.validate_pending_area();
```

What could be the reason for this?

- A.The ADMINISTER\_RESOURCE\_MANAGER privilege is not granted to the user.
- B.The procedure should be executed before creating the resource plan directive.
- C.The SYS\_GROUP resource consumer group is not included in the resource plan directive.
- D.The OTHER\_GROUPS resource consumer group is not included in the resource plan directive.

Answer: D

20. ABC Corp. has an online transaction processing (OLTP) system that has just gone into production. The system was rigorously tested during the development phases.

What is the first recommended activity that the DBA should perform before starting to monitor the performance of the system on a regular basis?

- A.running SQL\*Trace
- B.collecting baseline statistics
- C.analyzing indexes and user tables
- D.arranging meetings with users once each two weeks to discuss performance

Answer: B
