Oracle Other Oracle Certification

1z0-036: Managing Oracle9i on linux

Practice Exam: 1z0-036 Exams

Exam Number/Code: 1z0-036

Exam Name: Managing Oracle9i on linux

Questions and Answers: 144 Q&As

([Other Oracle Certification](#))

Exam : [1z0-036](#)

"Managing Oracle9i on linux ", also known as 1z0-036 exam, is a Oracle certification. With the complete collection of exam questions, Just4Study has assembled to take you through 144 Q&As to your 1z0-036 exam preparation. In the 1z0-036 exam resources, you will cover every field and category in Oracle Certification helping to ready you for your successful Oracle Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Oracle Other Oracle Certification 1z0-036 (Managing Oracle9i on linux) examination of original title complete coverage. 1z0-036 exam questions help you pass the exam.

Just4Study 1z0-036 Feature:

* High quality - High quality and valued for the 1z0-036 Exam: 100% Guarantee to Pass Your 1z0-036 exam and get your Other Oracle Certification certification.

* Authoritative - Authoritative braindumps with complete details about 1z0-036 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Oracle Certification resources, you will minimize your **Oracle Other Oracle Certification** cost and be ready to pass your 1z0-036 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Oracle Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1z0-036 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1z0-036 Demo Download

Just4Study offers free demo for Other Oracle Certification 1z0-036 exam (Managing Oracle9i on linux). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Oracle Other Oracle Certification 1z0-036** examination of original title complete coverage.1z0-036 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 1z0-036

Exam Name: Managing Oracle9i on linux (Other Oracle Certification)

Questions and Answers: 144 Q&A

[Oracle 1z0-036](#) Test belongs to one of the Other Oracle Certification certified test, if needs to obtain the Other Oracle

Certification certificate, you also need to participate in other related test, the details you may visit the [Other Oracle Certification](#) certified topic, in there, you will see all related Other Oracle Certification certified subject of examination. Just4Study professional provide Other Oracle Certification 1z0-036 the newest Q&A, completely covers 1z0-036 test original topic. With our complete Other Oracle Certification resources, you will minimize your Other Oracle Certification cost and be ready to pass your 1z0-036 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

Just4Study.com offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Oracle 1Z0-036

Title : Managing Oracle9i on Linux

1. You are accessing a remote database by using the following username, password, and connect string:

user1/user1@orcl_hr

You need the following details:

- the host name on which the remote database resides
- whether the remote database is using dedicated server mode or shared server mode
- the protocol being used to access the remote database

Which command or utility will give you the desired information?

- A. tnsping command
- B. trcroute command
- C. Oracle Names Control utility
- D. Oracle Net Configuration Assistant
- E. Oracle Connection Manager Control utility

Answer: A

2. You have the following entry in the /etc/fstab file:

```
/ dev/hda5 /opt ext3 data=writeback 1 0
```

What is true about the data=writeback part of the entry with respect to the ext3 file system?

- A. The entry resizes the file system.
- B. The entry changes the run level to single-user mode.
- C. The entry specifies a tuning parameter for asynchronous input/output (I/O).
- D. The entry sets the journaling level so that only the changes to the file system metadata are logged.
- E. The entry sets the journaling level so that the changes to the file system data as well as the metadata are logged.

Answer: D

3. What are the four roles of the semaphores parameters? (Choose four.)

- A. The semmni parameter sets the maximum number of semaphore sets.
- B. The semmsl parameter sets the maximum number of semaphore sets.
- C. The semmsl parameter sets the maximum number of semaphores per set.
- D. The semmns parameter sets the maximum number of semaphores per set.
- E. The semmns parameter sets the total number of semaphores in the system.
- F. The semopm parameter sets the total number of semaphores in the system.
- G. The semmni parameter sets the maximum number of operations per semop call.
- H. The semopm parameter sets the maximum number of operations per semop call.

Answer: ACEH

4. You are creating a database using Database Configuration Assistant (DBCA). You need to save the SQL scripts that are being used to create the database. Which set of options would you select?

- A. Enable SQL tracing for the DBCA session
- B. Choose the "New Database" template and select the "Save as a Database Template" option while creating the database
- C. Choose the "General Purpose" template and select the "Save as a Database Template" option while creating the database
- D. Create the database using the "General Purpose" template and then create a new template from the existing database
- E. Choose the "New Database" template and select the "Generate Database Creation Scripts" option while creating the database

Answer: E

5. You have scheduled a job on a remote host. At the scheduled time, the following is the scenario: - -You are not connected to the remote host.
- The Intelligent Agent (IA) is running on the remote host.
 - The Oracle Enterprise Manager (OEM) console and Oracle Management Server (OMS) are not running on your local host. What happens to the scheduled job?

- A. The job fails.
- B. IA executes the job at the scheduled time.
- C. IA executes the job at the scheduled time provided it is a Fixit job.
- D. IA places the job in a queue and executes the job when you connect to the remote host.
- E. IA executes the job at the scheduled time provided the local and remote hosts are using the same operating system.
- F. IA places the job in a queue and executes the job when you run the O EM console and OMS on your local host.

Answer: B

6. Which four network components or services can be configured by using Oracle Net Manager? (Choose four.)

- A. profile
- B. listener
- C. names server
- D. service naming
- E. Oracle HTTP Server
- F. connection manager

Answer: ABCD

7. You have specified the configuration in the sysctl.conf file. However, when you restart the system, Linux does not start. Which statement describes the steps that you would take to troubleshoot the problem?

- A. Use the root login to mount the file system and edit the sysctl.conf file.
- B. Use the boot loader to enter the emergency mode and switch to runlevel 3.
- C. Use the boot loader program to boot into runlevel 1 and edit the sysctl.conf file.
- D. Use the boot loader program to access the available kernels and recompile the kernel.
- E. Use the root login to access the system in runlevel 6 and edit the /root/.bashrc file.
- F. Use the single-user mode to access the /proc file system and edit the kernel parameters.

Answer: C

8. Which three commands can you use to display an overview of the memory usage in a system? (Choose three.)

- A. top
- B. free
- C. vmstat
- D. mpstat
- E. iostat

Answer: ABC

9. You want the default database to participate in automatic startup and have configured the startup script and

runlevels. However, the dbstart script does not start the instance. Which two methods can you use to work around the problem? (Choose two.)

- A. Specify the command: SQL>CREATE PFILE = '?/dbs/init@.ora' FROM SPFILE = '?/dbs/spfile@.ora' ;
- B. Specify the command: SQL>CREATE SPFILE = '?/dbs/spfile@.ora' FROM PFILE = '?/dbs/init@.ora' ;
- C. Edit the dbstart script: Add the line: PFILE=\${ORACLE_HOME }/dbs/init@.ora' Replace the line: if [-f \$PFILE] ; then with if [-f \$PFILE -o -f \$SPFILE] ; then
- D. Edit the dbstart script: Add the line: SPFILE=\${ORACLE_HOME }/dbs/spfile\${ORACLE_SID }.ora Replace the line: if [-f \$PFILE] ; then with if [-f \$PFILE -o -f \$SPFILE] ; then
- E. Edit the startup script: Add the line: CREATE SPFILE = '?/dbs/spfile@.ora' FROM PFILE = '?/dbs/init@.ora' ; Replace the line: if [-f \$PFILE] ; then with if [-f \$PFILE -o -f \$SPFILE] ; then

Answer: AD

10. Which package displays system usage graphs for CPU usage, memory usage, and system load?

- A. top
- B. free
- C. xosview
- D. xcpustate

Answer: C

11. Which statistics enable you to view the impact of SQL statements on input/output (I/O) statistics?

- A. file statistics in Performance Manager
- B. sorts and parse calls values in Top SQL
- C. CPU chart group in Performance Manager
- D. buffer gets and disk reads values in Top SQL
- E. statistics obtained from the sar and vmstat commands

Answer: D

12. Examine the following entry in the sysctl.conf file: fs.file-max = 65536 What is the significance of this entry?

- A. The entry sets the maximum number of open files for each process to 65536.
- B. The entry sets the maximum number of subprocesses that a process can spawn to 65536.
- C. The entry sets the maximum number of files in the operating system (OS) file system to 65536.
- D. The entry sets the maximum number of background processes of the Oracle database to 65536.

Answer: A

13. You executed the following command:

```
cat /proc/slabinfo | grep kio
```

You received the following output:

```
kiocx 270 270 128 9 9 1
```

```
kiocb 66080 66080 96 1652 1652 1
```

```
kiobuf 236 236 64 4 4 1
```

What do you infer from the output?

- A. The CPU usage is 100%.
- B. There are no inactive pages.
- C. The disk activity needs to be tuned.
- D. There are waits for the buffer cache.
- E. The Linux system has asynchronous input/output (I/O) configured on it.
- F. The value for the shmmax parameter needs to be increased.

Answer: E

14. Which set of steps must user21a perform to schedule a cron task?

- A. Log in as root . Specify the crontab -e command.
- B. Log in as user21a . Specify the crontab -e command.
- C. Log in as user21a . Specify the crontab -l command. Save the cron task to the /etc/crontab file.

D. Log in as root . Specify the crontab -l command. Save the cron task to the /var/spool/cron/user21a file.

Answer: B

15. When you restarted the machine after editing the display settings, the monitor displays red, green, and blue lines. Which set of steps should you use to troubleshoot the problem?

A. Restart the system. Open a terminal window. Log in as root . Edit the X Windows configuration files. Start up the X Server. Specify the telinit 5 command.

B. Restart the system. Open a terminal window. Log in as root . Set the DISPLAY variable. Start up the X Server. Specify the telinit 5 command.

C. Switch to the text console. Log in as oracle . Edit the X Windows configuration files. Set the DISPLAY and PATH variables. Start up the X Server. Restart the system.

D. Switch to the text console. Log in as root . Turn off GUI by using the telinit 3 command. Edit the X Windows configuration files. Start up the X Server. Restart the system.

Answer: D

16. You have created the automatic database startup script oracle_start in /etc/rc.d/init.d . While starting up the server, you have been receiving the error service oracle_start does not support chkconfig . What must you do to fix this error?

A. Schedule a cron task to start up the database.

B. Specify the path to the startup script in the oratab file.

C. Run the root.sh script to add the script to the runlevel directories.

D. Include the line #chkconfig: 2345 20 90 in the oracle_start script.

E. Place a copy of the oracle_start script in the rc2.d and rc3.d runlevel directories.

Answer: D

17. Which two statements are true about Oracle Clustered File System (OCFS)? (Choose two.)

A. There is no limit on the number of files on OCFS.

B. You can create an OCFS on Logical Volume Manager (LVM).

C. You can use OCFS for database files as well as general files.

D. You must modify Linux kernel parameters before mounting OCFS.

E. Standard file system commands, such as mkdir , rmdir , and mv , are available on OCFS.

Answer: AE

18. Which two methods would you use to boot to a nondefault runlevel? (Choose two.)

A. Specify the runlevel in the rc#.d directory.

B. Specify the runlevel in the init command.

C. Specify the runlevel in the chmod command.

D. Specify the runlevel as an argument for the inittab file.

E. Specify the runlevel at startup by using the boot loader program.

Answer: BE

19. Which three statements about shared server configuration are true? (Choose three.)

A. There is a large pool area.

B. It reduces memory usage.

C. It increases the number of server processes.

D. Automatic undo management is recommended.

E. The user global area (UGA) memory is taken from buffer pool.

F. Portions of PGA are allocated from the System Global Area (SGA).

Answer: ABF

20. Which information about your system will help you determine if CPU is a bottleneck? (Choose three.)

A. pages in

B. bigpages

- C. load factor
 - D. average load
 - E. number of CPUs
- Answer: CDE
