Oracle Other Oracle Certification Oracle 11i

1z0-232: Oracle 11i system administration fundamentals

Practice Exam: 1z0-232 Exams

Exam Number/Code: 1z0-232

Exam Name: Oracle 11i system administration fundamentals

Questions and Answers: 131 Q&As

([Other Oracle Certification Oracle 11i](#))

"Oracle 11i system administration fundamentals", also known as 1z0-232 exam, is a Oracle certification. With the complete collection of exam questions, Just4Study has assembled to take you through 131 Q&As to your 1z0-232 exam preparation. In the 1z0-232 exam resources, you will cover every field and category in Oracle Certification helping to ready you for your successful Oracle Certification.

Exam : [1z0-232](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Oracle Other Oracle Certification 1z0-232 (Oracle 11i system administration fundamentals) examination of original title complete coverage. 1z0-232 exam questions help you pass the exam.

Just4Study 1z0-232 Feature:

* High quality - High quality and valued for the 1z0-232 Exam: 100% Guarantee to Pass Your 1z0-232 exam and get your Other Oracle Certification certification.

* Authoritative - Authoritative braindumps with complete details about 1z0-232 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Other Oracle Certification resources, you will minimize your **Oracle Other Oracle Certification** cost and be ready to pass your 1z0-232 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Other Oracle Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 1z0-232 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 1z0-232 Demo Download

Just4Study offers free demo for Other Oracle Certification 1z0-232 exam (Oracle 11i system administration fundamentals). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Oracle Other Oracle Certification Oracle 11i 1z0-232** examination of original title complete coverage.1z0-232 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 1z0-232

Exam Name: Oracle 11i system administration fundamentals(Other Oracle Certification Oracle 11i)

Questions and Answers: 131 Q&A

[Oracle 1z0-232](#) Test belongs to one of the Other Oracle Certification Oracle 11i certified test, if needs to obtain the Other Oracle Certification Oracle 11i certificate, you also need to participate in other related test, the details you may visit the [Other Oracle Certification Oracle 11i](#) certified topic, in there, you will see all related Other Oracle Certification Oracle 11i certified subject of examination.

Just4Study professional provide Other Oracle Certification Oracle 11i 1z0-232 the newest Q&A, completely covers 1z0-232 test original topic. With our complete Other Oracle Certification Oracle 11i resources, you will minimize your Other Oracle Certification Oracle 11i cost and be ready to pass your 1z0-232 tests on Your First Try, 100% Money Back Guarantee included!

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Oracle 1Z0-232

Title : Oracle? 11i system administration fundamentals

1. Choose the concurrent program to execute in order to understand or document a menu structure.

- A. Object Security Report
- B. Function Security Report
- C. Menu Profile Report
- D. Object Function Report

Answer: B

2. Which three properties of a user account drive function security within Oracle Applications? (Choose three.)

- A. Securing Attributes
- B. Password Expiration
- C. Direct Responsibilities
- D. Indirect Responsibilities
- E. User name and Password

Answer: ACD

3. Which two statements are true regarding request set stages? (Choose two)

- A. Stages in a request set can be run in parallel.
- B. Stages can complete with two statuses, Complete or Error.
- C. Stage status is treated as Error if at least one request completes with Error.
- D. Stages are executed by the concurrent manager on the basis of how they are linked, and not by the sequence number assigned to them.

Answer: CD

4. One of the Administrators indicated that even 10 minutes after starting the Standard Manager, it is still not running any requests, and the pending jobs are piling up in the queue. The administrator has requested for your help. You are looking at the Administer Concurrent Manager screen, and you notice the following: For the Internal Manager the number of actual processes is 0, target processes is 0, and pending requests is 1. For the Standard Manager the number of actual processes is 0, target processes is 3, and pending requests is 56. For the Conflict Resolution Manager the number of actual processes is 0, target processes is 0, and pending requests is 1. Analyze the state of the concurrent managers and identify the solution for resolving this issue.

- A. The Internal Manager is not running, it must be started before the request to start the Standard Manager can be executed. Enter the operating system and start the Internal Manager.
- B. The Internal Manager is not running, it must be started before the request to start the Standard Manager can be executed. Place the cursor on the Internal Manager record and press the Restart button.

C. The Conflict Resolution Manager is not running, it must be started before the request to start the Standard Manager can be executed. Place the cursor on the Conflict Resolution Manager record and press the Restart button.

Answer: A

5. You are using the System Profile Option screen to initialize the value of a profile option at several levels. You select the levels, the level context, and the profile option to change. You are able to default the value for the site, application and responsibility, but you are unable to change the value for the user level. Which statement explains this situation?

- A. The responsibility secures the ability to control profile options.
- B. The application prevents the changing of canned profile options at that level.
- C. Another profile option toggles changing of profile options at the user level by the system administrator and is currently false.
- D. Only users are permitted to set their profile option values by using the personal profile settings.
- E. The profile option definition prohibits changing the value of the profile option at that level.

Answer: E

6. You have just submitted a concurrent request. The concurrent program has incompatibilities. The concurrent program spawns a child concurrent program. The concurrent request would not be placed on hold. You decide to kill the concurrent request after the sub program has completed, but before the main program is completed. Identify which statement accurately reflects, in the proper sequence, the phases and statuses that the concurrent request would have.

- A. Pending - Standby, Pending - Normal, Running - Normal, Running - Terminating, and Completed - Terminated
- B. Pending - Standby, Pending - Normal, Running - Normal, Running - Terminating, and Completed - Normal
- C. Pending - Normal, Pending - Standby, Pending - Normal, Running - Normal, Running - Paused, Running - Normal, Running - Terminating, and Completed - Terminated
- D. Pending - Standby, Pending - Normal, Running - Normal, Running - Paused, Running - Normal, Running - Terminating, and Completed - Normal
- E. Pending - Standby, Pending - Normal, Running - Normal, Running - Paused, Running - Normal, Running - Terminating, and Completed - Terminated

Answer: E

7. Identify three conditions under which a concurrent request may be permitted to be placed on hold. (Choose three.)

- A. Pending - Normal
- B. Running - Normal
- C. Inactive - On Hold
- D. Running - Paused
- E. Pending - Scheduled
- F. Inactive - No Manager

Answer: AEF

8. Which two components are required to create a responsibility? (Choose two.)

- A. Menu
- B. Exclusions
- C. Data Group
- D. Request Group
- E. User Assignments

Answer: AC

9. Choose the component of the E-Business suite that the Oracle Applications Manager integrates with to perform its function. (Choose four)

- A. Metalink
- B. Oracle Technology Network
- C. ADADMIN
- D. Cloning

E. Workflow Manager

F. User Security

Answer: CDEF

10. Which three search criteria are valid when using the status monitor in Standalone Oracle workflow? (Choose three.)

A. workflow

B. workflow type

C. notification type

D. workflow started

Answer: ABD

11. XYZ company decided to implement Oracle user management, to have a flexible and scalable system for managing access privileges and user accounts. The company wants to delegate some of the security and administrative tasks to local administrators.

The company wants to have three local administrators, one for each region (North America, Europe and Asia), to manage his/her region's user accounts which have the employee role only.

To implement the requirement, the system administrator did the following:

1. Created the North America admin role, Europe admin role and Asia admin role.

2. Granted the Role administration privilege for North America admin role, Europe admin role and Asia admin role to manage employee role.

3. Granted North America admin role to Jack, who is designated as the North America region local administrator.

4. Granted Europe admin role to Joe, who is designated as the Europe region local administrator.

5. Granted Asia admin role to John, who is designated as the Asia region local administrator.

Which statement is true? (Choose all that apply.)

A. It is impossible to setup local administrators.

B. The requirement was successfully implemented.

C. The requirement was NOT successfully implemented.

D. You can implement the requirement by using traditional functional security only.

Answer: C

12. You were asked to change labels on one of the OA Framework-based application pages. You made a set of Site-level personalizations to a region by changing the labels of four fields from a, b, c and d to w, x, y, and z. You also made org-level personalizations to the same region. The org-level personalizations for Org 2 that you made include changing the label of the last field to zz. A user of Org 2 would see labels of four fields as ____.

A. w, x, y, z

B. a, b, c, d

C. a, b, c, zz

D. w, x, y, zz

Answer: D

13. Which statement is correct about the Workflow Monitor?

A. It is a Web page that enables users to monitor their workflow processes.

B. It is a stand-alone Windows PC program that enables users to monitor their workflow processes.

C. It is an administrator-only Web page that enables administrators to monitor any workflow processes.

D. It is a stand-alone Windows PC program that enables administrators to monitor workflow processes.

Answer: A

14. You modified the existing printer setup information (edit an existing Printer Type or Print Style, or Printer Driver) in Oracle applications. In order for the change to take effect, what needs to happen?

A. The database server should be restarted.

B. The application server should be restarted.

C. The concurrent manager should be restarted.

- D. The application users need to log on again.
- E. The database server and application server should be restarted.

Answer: C

15. Which three statements are true with respect to Role Based Access Control (RBAC) and Role Inheritance in Oracle User Management? (Choose three.)

- A. A user can have only one role defined.
- B. A role cannot have multiple responsibilities
- C. Permissions associated with a role are not inherited by all its superior roles.
- D. Permissions associated with a role are inherited by all its superior roles and the individuals to which any of these roles are assigned.
- E. RBAC removes the existing link the need for creating separate responsibilities for combinations of job functions.
- F. A role can be configured to consolidate the responsibilities, permissions, function security and data security polices that users require to be able to perform a specific function.

Answer: DEF

16. You are using Oracle User Management. Which statements are true? (Choose all that apply.)

- A. You can define multiple responsibilities for a single role
- B. Access to parts of responsibility, and its corresponding menu hierarchy, can be controlled by different roles.
- C. Responsibilities can be linked together, so that higher-level responsibilities include the menus and menu options of the lower level ones.
- D. Responsibility restricts user access to individual menus and menu options within the system, and restricts access to the individual data that is shown, once after a user has selected a menu or menu option.

Answer: AB

17. Identify the correct concurrent request phase and status for a request being evaluated by the Conflict Resolution Manager.

- A. Pending - Normal
- B. Running - Normal
- C. Running - Paused
- D. Pending - Standby
- E. Pending - Scheduled

Answer: D

18. Which four activities does the Event Manager enable you to perform? (Choose four.)

- A. register systems
- B. register business events
- C. register subscriptions to events
- D. register event processing engines
- E. register users and roles for events
- F. register named communication agents

Answer: ABCF

19. You used the system profile option screen to change the value of the profile option at the site level. In order for a system user to notice the change to the profile option, what do you need to do?

- A. Restart Apache
- B. Restart the database
- C. Restart forms server
- D. Restart the concurrent manager
- E. Re-initialize the applications session

Answer: E

20. A _____ is a collection of reports and concurrent programs that is used to implement security at the responsibility

level.

- A. request set
- B. request group
- C. concurrent group
- D. responsibility access group

Answer: B
