Symantec Symantec Certified Security program

250-251: Administration of HA Solutions for UNIX (VCS 5.0)

Practice Exam: 250-251 Exams

Exam Number/Code: 250-251

Exam Name: Administration of HA Solutions for UNIX (VCS 5.0)

Questions and Answers: 120 Q&As

([Symantec Certified Security program](#))

"Administration of HA Solutions for UNIX (VCS 5.0)", also known as 250-251 exam, is a Symantec certification. With the complete collection of exam questions, Just4Study has assembled to take you through 120 Q&As to your 250-251 exam preparation. In the 250-251 exam resources, you will cover every field and category in Symantec Certification helping to ready you for your successful Symantec Certification.

Exam : [250-251](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Symantec Symantec Certified Security program 250-251 (Administration of HA Solutions for UNIX (VCS 5.0)) examination of original title complete coverage. 250-251 exam questions help you pass the exam.

Just4Study 250-251 Feature:

* High quality - High quality and valued for the 250-251 Exam: 100% Guarantee to Pass Your 250-251 exam and get your Symantec Certified Security program certification.

* Authoritative - Authoritative braindumps with complete details about 250-251 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Symantec Certified Security program resources, you will minimize your **Symantec Symantec Certified Security program** cost and be ready to pass your 250-251 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Symantec Certified Security program demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 250-251 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 250-251 Demo Download

Just4Study offers free demo for Symantec Certified Security program 250-251 exam (Administration of HA Solutions for UNIX (VCS 5.0)). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Symantec Symantec Certified Security program 250-251** examination of original title complete coverage. 250-251 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

Exam : Symantec 250-251

Title : Administration of HA Solutions for UNIX (VCS 5.0)

1. Which directive in the llttab file defines a network interface for a heartbeat?

- A. nic
- B. link
- C. heartbeat
- D. hbdev

Answer: B

2. When preparing to install VCS on the S1 and S2 systems, what should you do to verify software compatibility?

(Choose three.)

- A. check the VCS release notes for supported software
- B. run the installvcs recheck S1 S2 command
- C. let the installvcs script check compatibility at install
- D. run the installvcs ompat S1 S2 command
- E. check the Symantec Enterprise Support website

Answer: ABE

3. Which feature of VCS can prevent overloading of a system's resources in the event of service group failover?

- A. Parallel Service Groups
- B. Capacities
- C. Limits
- D. Load Failover Policy

Answer: C

4. Which VCS resource attribute setting prevents VCS from interpreting a Monitor entry point timeout as a resource fault?

- A. MonitorFault=0
- B. MonitorFaultTimeout=240
- C. FaultMonitor=240
- D. FaultOnMonitor=4

Answer: D

5. During a test of a NIC resource the VCS engine log indicates that the service group and the IP resource enter the FAULTED state on all systems in the cluster. The NIC resource enters the ONLINE state after the root cause of the

fault is corrected. Which default attribute setting allows the service group to attempt to start without manual intervention?

- A. AutoStart
- B. AutoClear
- C. AutoRestart
- D. AutoFailover

Answer: C

6. Which conditions are recommended for a successful VCS patch installation? (Choose two.)

- A. The clustered application must be shut down.
- B. VCS must be shut down only on the server being patched.
- C. VCS must be shut down on all cluster nodes.
- D. GAB and LLT must be shut down on all cluster nodes.
- E. GAB and LLT must remain running and connected.

Answer: CD

7. Which procedure must be followed to remove the resource type TypeA from an active VCS cluster?

- A. remove all resources of TypeA, remove TypeA, and remove TypeA packages
- B. remove TypeA, then execute the hatype esync command
- C. stop VCS, remove all resources of TypeA, and start VCS
- D. execute the hatype -remove command which will remove all the resources

Answer: A

8. Under which condition can a service group be AutoDisabled?

- A. when hashadow cannot restart HAD on a system
- B. when the system is in a jeopardy membership
- C. when a firm service group dependency exists between two service groups and the parent service group fails
- D. when a firm service group dependency exists between two service groups and the child service group fails

Answer: A

9. What is the default level of authorization of a new VCS user?

- A. Cluster Administrator
- B. Cluster Operator
- C. Cluster Guest
- D. Group Administrator
- E. Group Operator

Answer: C

10. VCS is to be installed in a secure environment where remote installation between systems is impossible. The VCS configuration parameters were captured in a file using the installation script on the first system. What can be used to read the contents of the configuration file when executing locally on the remaining systems?

- A. -autoconfig
- B. -configfile
- C. -vcsconfig
- D. -responsefile

Answer: D

11. You are adding a system to a running cluster. You have successfully performed these steps on the system that you are adding:

1. installed, configured, and tested all application resources required
2. installed VCS
3. configured and started VCS communications (LLT and GAB)

What is the next step that you perform?

- A. update the resource attributes to enable resources to run on the new system
- B. update the service group attributes to enable groups to run on the new system
- C. change the cluster attribute for VCS user names to match accounts on the new system
- D. change the owner of the system attributes so that all cluster systems are the same

Answer: B

12. Which resource type attributes can be set in order to tune VCS failover characteristics? (Choose two.)

- A. Flags
- B. RestartLimit
- C. ToleranceLimit
- D. OfflineTimeout
- E. OfflineMonitorInterval

Answer: BC

13. Which attributes impact service group failover? (Choose three.)

- A. FailOver
- B. AutoFailOver
- C. Faulted
- D. FaultPropagation
- E. Frozen

Answer: BDE

14. Which resource type attributes can be set in order to tune VCS failover characteristics? (Choose two.)

- A. AutoStart
- B. ConfInterval
- C. ConfTimeout
- D. MonitorInterval
- E. OfflineMonitorInterval

Answer: BD

15. Which attribute enables VCS to bring a resource online after it goes offline unexpectedly and before faulting the resource?

- A. RestartLimit
- B. OnlineRestartLimit
- C. AutoRestartLimit
- D. OnlineRetryLimit

Answer: A

16. Which types of monitoring can be performed on Oracle resources? (Choose two.)

- A. detail monitoring
- B. basic level monitoring
- C. kernel level monitoring
- D. specific monitoring
- E. service monitoring

Answer: AB

17. You are installing a VCS upgrade that does not require a system reboot, but does require a VCS restart. Which method maximizes user access to the clustered applications during the upgrade?

- A. use the VCS rolling upgrade option which restarts VCS transparently
- B. stop VCS using the orce option and then restart VCS on each system
- C. evacuate service groups while upgrading one system at a time
- D. stop VCS using the all option and then restart VCS on each system

Answer: B

18. Which statement is true about the violation trigger?
- A. A violation trigger must be written as a shell script.
 - B. A violation trigger and notification are mutually exclusive.
 - C. A violation trigger is dependent on notification to work.
 - D. A violation trigger is automatically executed when events occur.

Answer: D

19. Which text files are created at the end of a successful run of `installvcs -installonly`? (Choose three.)

- A. log
- B. response
- C. gabtab
- D. llttab
- E. summary

Answer: ABE

20. Which components are installed when you execute the `installvcs` script? (Choose two.)

- A. bundled agents
- B. database agents
- C. cluster file system
- D. GAB driver
- E. cluster volume manager

Answer: AD
