Symantec Symantec Certified Security program

250-351: Administration of HA Solutions for Windows using VCS 5.0

Practice Exam: 250-351 Exams

Exam Number/Code: 250-351

Exam Name: Administration of HA Solutions for Windows using VCS 5.0

Questions and Answers: 253 Q&As

([Symantec Certified Security program](#))

"Administration of HA Solutions for Windows using VCS 5.0", also known as 250-351 exam, is a Symantec certification. With the complete collection of exam questions, Just4Study has assembled to take you through 253 Q&As to your 250-351 exam preparation. In the 250-351 exam resources, you will cover every field and category in Symantec Certification helping to ready you for your successful Symantec Certification.

Exam : [250-351](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Symantec Symantec Certified Security program 250-351 (Administration of HA Solutions for Windows using VCS 5.0) examination of original title complete coverage. 250-351 exam questions help you pass the exam.

Just4Study 250-351 Feature:

* High quality - High quality and valued for the 250-351 Exam: 100% Guarantee to Pass Your 250-351 exam and get your Symantec Certified Security program certification.

* Authoritative - Authoritative braindumps with complete details about 250-351 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Symantec Certified Security program resources, you will minimize your **Symantec Symantec Certified Security program** cost and be ready to pass your 250-351 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Symantec Certified Security program demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 250-351 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 250-351 Demo Download

Just4Study offers free demo for Symantec Certified Security program 250-351 exam (Administration of HA Solutions for Windows using VCS 5.0). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Symantec Symantec Certified Security program 250-351** examination of original title complete coverage.250-351 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 250-351

Exam Name: Administration of HA Solutions for Windows using VCS 5.0(Symantec Certified Security program)
Questions and Answers: 253 Q&A

[Symantec 250-351](#) Test belongs to one of the Symantec Certified Security program certified test, if needs to obtain the Symantec Certified Security program certificate, you also need to participate in other related test, the details you may visit the [Symantec Certified Security program](#) certified topic, in there, you will see all related Symantec Certified Security program certified subject of examination.

Just4Study professional provide Symantec Certified Security program 250-351 the newest Q&A, completely covers 250-351 test original topic. Exam : Symantec 250-351

Title : Administration of Veritas Storage Foundation High Availability 5.0 for Windows

1. What are three valid reasons for adding a mirror to a volume? (Choose three.)

- A. to add redundancy through parity
- B. to eliminate a single point of failure
- C. to improve write performance
- D. to improve read performance
- E. to migrate data

Answer: BDE

2. An application is started and stopped using custom scripts and consists of a single running process.

Which type of resource is recommended to cluster this application?

- A. Process
- B. Program
- C. Application
- D. GenericService

Answer: A

3. Which management interface is useful for managing storage in a Veritas Cluster Server (VCS) environment?

- A. Logical Disk Manager
- B. Microsoft Management Console
- C. VCS Simulator
- D. Veritas Enterprise Administrator

Answer: B

4. A failover service group uses the Process agent to start and stop an application and to monitor a process. After bringing the group to an ONLINE state on a cluster system, you stop the monitored process outside of Veritas Cluster Server (VCS). The Enabled and Critical attributes of the resource are both set to a value of 1. The RestartLimit attribute for the resource is still set to the default value.

Which action does VCS take?

- A. increment the TotalFault attribute
- B. initiate service group failover
- C. automatically restart the application
- D. take the service group offline without failover

Answer: B

5. What is the required driver signing option when you push install Storage Foundation High Availability to a Windows 2003 Server system?

- A. Accept
- B. Ignore
- C. Warn
- D. Block

Answer: B

6. Which support tool is used to gather troubleshooting information for Storage Foundation High Availability?

- A. haconf
- B. hagetcf
- C. haexplorer
- D. hacf

Answer: B

7. An administrator verified compatibility of a Windows Service Pack.

What is the next step involved in applying the Service Pack on a Veritas Cluster Service (VCS) node?

- A. start the Service Pack installation process
- B. freeze service groups and then evacuate the node
- C. switch online service groups to another node
- D. stop the VCS engine, LLT, and GAB on all nodes

Answer: C

8. What are two advantages of using Storage Foundation for Windows instead of Microsoft's native Logical Disk Manager (LDM)? (Choose two.)

- A. capability of mirroring data volumes
- B. drag-and-drop movement of data volumes
- C. disk-based snapshot capability
- D. ability to migrate data between arrays easily
- E. capability of expanding data volumes while online

Answer: BD

9. What are three benefits of using Storage Foundation for Windows? (Choose three.)

- A. storage that is managed from one interface
- B. online operations that reduce planned downtime
- C. secure management by managing only the local machine
- D. quick recovery options through the Volume Shadowcopy Service (VSS)
- E. ability to use Veritas File System

Answer: ABD

10. Given the partial main.cf definition:

```
group AppSG (  
SystemList = { SystemA = 0, SystemB = 1, SystemC = 2, SystemD = 4 }  
AutoStartList = { SystemA, SystemD }  
OnlineRetryLimit = 3  
OnlineRetryInterval = 120)
```

AppSG is online on SystemA. All other systems are up and available.

To which system will AppSG fail over when SystemA faults?

- A. SystemA
- B. SystemB
- C. SystemC
- D. SystemD

Answer: B

11. The account used for the Veritas Cluster Server Helper (HadHelper) service is used for which two activities? (Choose two.)

- A. providing the security context for the HAD service
- B. providing the security context for network access
- C. accessing and updating Active Directory objects
- D. providing read-only access to the cluster
- E. restarting HAD in case the service stops for any reason

Answer: BC

12. Which two attributes must be defined for a SQLServer2005 resource? (Choose two.)

- A. UserAccount
- B. Instance
- C. DetailMonitor
- D. LanmanResName
- E. MountV

Answer: BD

13. Which set of records stores detailed information about related Storage Foundation for Windows objects in a disk group, their attributes, and their connections?

- A. a disk group attribute
- B. a dynamic disk configuration
- C. a dynamic disk attribute
- D. a disk group configuration

Answer: D

14. A resource has the ResourceOwner attribute set to Marc. The resource has faulted.

Who can clear the fault?

- A. any Cluster Administrator
- B. any Cluster Guest
- C. a Windows domain user named Marc, with or without a Veritas Cluster Server account
- D. a Veritas Cluster Server user named Marc, with Cluster Guest privileges

Answer: A

15. What happens to the notifier if it is correctly configured, and the system on which it is running in a multisystem cluster fails?

- A. The notifier goes offline.
- B. The notifier fails over and runs on another system.
- C. The notifier is in a parallel service group and is already running elsewhere.
- D. The notifier is faulted.

Answer: B

16. Which two ways can you determine if an application clustered with Veritas Cluster Server has been successfully started or stopped? (Choose two.)

- A. view the online_A.txt log file
- B. view the engine_A.txt log file
- C. access the Log View Wizard
- D. view the Log Desk from the Java console
- E. view the application_A.txt log file

Answer: BD

17. How can Storage Foundation for Windows increase I/O throughput?

- A. by removing disks from the disk group while storage remains online
- B. by increasing the size of the private region of the volume
- C. by changing the disk group from dynamic to private
- D. by modifying volume layouts while storage remains online

Answer: D

18. Which event trigger is called when a service group is unable to fail over?

- A. failovernone
- B. nofailover
- C. sgnofailover
- D. failover

Answer: B

19. You are the administrator of a cluster and want to add another system to the cluster.

Which security group membership is required, in addition to Domain Administrator, on the new system to add the system to the cluster?

- A. Veritas Cluster Server Administrator
- B. Enterprise Administrator
- C. Local Administrator
- D. Security Administrator

Answer: C

20. Volume status descriptions are displayed in the graphical view of the volume and in the Status column of the volume in the list view.

What are three Storage Foundation volume status descriptions? (Choose three.)

- A. Healthy
- B. Resynching
- C. Frozen
- D. Failed
- E. Halted

Answer: ABD
