Exam : [250-700](#)

"Implementation & Custom. of HA Solutions for Windows using VCS 4.1", also known as 250-700 exam, is a Symantec certification. With the complete collection of exam questions, Just4Study has assembled to take you through 73 Q&As to your 250-700 exam preparation. In the 250-700 exam resources, you will cover every field and category in Symantec Certification helping to ready you for your successful Symantec Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Symantec Symantec Certified Security program 250-700 (Implementation & Custom. of HA Solutions for Windows using VCS 4.1) examination of original title complete coverage. 250-700 exam questions help you pass the exam.

Just4Study 250-700 Feature:

* High quality - High quality and valued for the 250-700 Exam: 100% Guarantee to Pass Your 250-700 exam and get your Symantec Certified Security program certification.

* Authoritative - Authoritative braindumps with complete details about 250-700 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Symantec Certified Security program resources, you will minimize your **Symantec Symantec Certified Security program** cost and be ready to pass your 250-700 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Symantec Certified Security program demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 250-700 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 250-700 Demo Download

Just4Study offers free demo for Symantec Certified Security program 250-700 exam (Implementation & Custom. of HA Solutions for Windows using VCS 4.1). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Symantec Symantec Certified Security program 250-700** examination of original title complete coverage. 250-700 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

Exam : Symantec 250-700

Title : Implementation of HA Solutions for Windows using VCS 4.1

1. You are the administrator of a VCS cluster. You want to add another system to the cluster. Which two security group memberships are required on the new system to add the system to the cluster? (Choose two.)

- A. Domain Administrator
- B. Enterprise Administrator
- C. Local Administrator
- D. Domain User

Answer: AC

2. You want to verify that systems are suitable for a VCS clustered application. Which three items do you verify on the systems? (Choose three.)

- A. operating system licenses
- B. operating system patch levels
- C. amount of memory in each system
- D. systems listed in VCS Hardware Compatibility List

Answer: BCD

3. Which two things need to be confirmed before installing VCS? (Choose two.)

- A. verify that all required Operating System patches are installed on each system
- B. verify that private Ethernet heartbeats reside on consecutive network subnets
- C. identify the Cluster ID of any other VCS cluster with heartbeat connections on the same subnet
- D. all applications that are to be clustered are offline prior to installing VCS
- E. ensure that one system is set up as a license manager for all applications that will be clustered

Answer: AC

4. During VCS configuration, the VCS notifier is to be configured to send messages to the SNMP console named snmpsrv. Which two additional pieces of information are needed to configure the notifier for SNMP? (Choose two.)

- A. the location of the SNMP VCS MIB
- B. the port number to use on the console
- C. the e-mail address of the user to whom to send traps
- D. the severity of messages to send to the console
- E. the user name on the system in which to send the messages

Answer: BD

5. Which three elements are components of a base VCS installation? (Choose three.)

- A. bundled agents
- B. custom agents
- C. PERL
- D. GAB Drivers
- E. cluster simulator

Answer: ACD

6. You can determine if resource attributes are valid in VCS by running the _____.

- A. hares -probe command and checking the VCS probe log
- B. hares -probe command and checking the VCS engine log
- C. haprobe -resource command and checking the VCS resource log
- D. haprobe -resource command and checking the VCS engine log

Answer: B

7. Which command is used to install VCS for Windows in an unattended mode?

- A. setup.exe
- B. vxinstall.exe
- C. install.exe
- D. vxsilent.exe

Answer: A

8. Which two security group memberships are required to add a system to a cluster? (Choose two.)

- A. Domain Administrator in the domain
- B. Enterprise Administrator in the domain
- C. Local Administrator for the new system
- D. Domain User in the domain

Answer: AC

9. There is a requirement for an application to remain online when a public network interface fails in a two-system VCS cluster. Which hardware configuration is required to configure this behavior in VCS?

- A. Multiple public network interfaces must be present on each system.
- B. One network interface per system will work as long as two or more switches are present.
- C. VCS will fail over the application any time any network interface fails on a system.
- D. Multiple network interfaces must be on the same controller card on each system.

Answer: A

10. VCS needs to be patched on systems running in a production environment. There are two service groups currently running in a cluster that has two systems. VCS must be stopped on all systems in the cluster in order to apply the patch without any application downtime. What is the proper VCS command to accomplish this?

- A. hastop -all
- B. hastop -all -force
- C. hapause -upgrade
- D. hasys -stop

Answer: B

11. You are planning to install both VERITAS Cluster Server and VERITAS Storage Foundation. You will also be changing the application environment over the course of the next 18 months. Increasing the number of _____ will require modification of the VCS configuration. (Choose three.)

- A. highly available applications
- B. file systems used by the highly available applications

- C. disk groups used by the highly available applications
- D. disks in the disk group used by the highly available applications

Answer: ABC

12. Click the Exhibit button.

The diagram shows a proposed HA configuration.

What effect would configuring the public NIC to handle low-priority heartbeats have?

- A. provides additional protection from split brain
- B. improves LLT and GAB traffic load balance
- C. prevents the cluster from going into jeopardy if both private heartbeats fail
- D. provides additional availability for the public NIC

Answer: A

13. What are two functions of service group dependencies? (Choose two.)

- A. provide a mechanism by which service groups can fail over based on network bandwidth availability
- B. control VCS user parameters following events like faults, auto group start, and system shutdown
- C. provide a mechanism by which two service groups can be linked by rules similar to the way that resources are linked
- D. provide a mechanism by which two service groups can change their resource structure during failover
- E. control where VCS brings a group online following events like faults, auto group start, and system shutdown

Answer: CE

14. AutoStartList is dependent on which service group attribute?

- A. SystemList
- B. SystemPolicy
- C. FailoverList
- D. FailoverPolicy

Answer: A

15. How many systems in the cluster can the NotifierMngr run on at one time?

- A. 1
- B. 2
- C. 4
- D. an unlimited number

Answer: A
