Symantec Symantec Certified Security program

251-351: Admin of Veritas Storage Foundation HA 5.0 for Windows

Practice Exam: 251-351 Exams

Exam Number/Code: 251-351

Exam Name: Admin of Veritas Storage Foundation HA 5.0 for Windows

Questions and Answers: 253 Q&As

([Symantec Certified Security program](#))

Exam : [251-351](#)

"Admin of Veritas Storage Foundation HA 5.0 for Windows", also known as 251-351 exam, is a Symantec certification. With the complete collection of exam questions, Just4Study has assembled to take you through 253 Q&As to your 251-351 exam preparation. In the 251-351 exam resources, you will cover every field and category in Symantec Certification helping to ready you for your successful Symantec Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Symantec Symantec Certified Security program 251-351 (Admin of Veritas Storage Foundation HA 5.0 for Windows) examination of original title complete coverage. 251-351 exam questions help you pass the exam.

Just4Study 251-351 Feature:

* High quality - High quality and valued for the 251-351 Exam: 100% Guarantee to Pass Your 251-351 exam and get your Symantec Certified Security program certification.

* Authoritative - Authoritative braindumps with complete details about 251-351 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Symantec Certified Security program resources, you will minimize your **Symantec Symantec Certified Security program** cost and be ready to pass your 251-351 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Symantec Certified Security program demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 251-351 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 251-351 Demo Download

Just4Study offers free demo for Symantec Certified Security program 251-351 exam (Admin of Veritas Storage Foundation HA 5.0 for Windows). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Symantec Symantec Certified Security program 251-351** examination of original title complete coverage. 251-351 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 251-351

Exam Name: Admin of Veritas Storage Foundation HA 5.0 for Windows(Symantec Certified Security program)

Questions and Answers: 253 Q&A

[Symantec 251-351](#) Test belongs to one of the Symantec Certified Security program certified test, if needs to obtain the Symantec Certified Security program certificate, you also need to participate in other related test, the details you may visit the [Symantec Certified Security program](#) certified topic, in there, you will see all related Symantec Certified Security program certified subject of examination.

Just4Study professional provide Symantec Certified Security program 251-351 the newest Q&A, completely covers 251-351 test original topic. With our complete Symantec Certified Security program resources, you will minimize your Symantec Certified Security program cost and be ready to pass your 251-351 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Symantec 251-351

Title : Admin of Veritas Storage Foundation HA 5.0 for Windows

1. A new file share service group is configured using the FileShare Configuration Wizard. What is the default value for the ForceUnmount attribute for the MountV resource?

- A. NONE
- B. ALL
- C. READ_ONLY
- D. READ_WRITE

Answer: C

2. What is the default level of authorization of a new Veritas Cluster Server user?

- A. Cluster Administrator
- B. Cluster Operator
- C. Cluster Guest
- D. Group Administrator
- E. Group Operator

Answer: C

3. Given the following information:

```
include "types.cf"
cluster default_clus (
  UserNames = {
    aaron = alkdsjfdjaldfaH,
    barbara = ieruhrkafhkhake,
    carmen = urHkjREOHGkajhuel,
    dionne = lasdfasiLjirrlj,
    edward = asdfjaielajfLKio,
    fung = ElwfjsldfjaldfjaM,
    georgia = LIkJLriLKjrleirka }
  Administrators = { aaron }
  Operators = { barbara }
  CounterInterval = 5
)
group group1 (
  SystemList = { sys1 = 0, sys2 = 1 }
```

```
AutoStartList = { sys1 }
Administrators = { carmen }
Operators = { dionne }
)
group group2 (
SystemList = { sys2 = 0, sys1 = 1 }
AutoStartList = { sys2 }
Administrators = { edward }
Operators = { fung }
)
```

Which two users can persistently freeze group2? (Choose two.)

- A. aaron
- B. barbara
- C. carmen
- D. edward
- E. fung
- F. georgia

Answer: AD

4. Refer to the exhibit.

A new VMDg resource is manually added to an existing service group, but the VMDg resource fails to probe and shows a red question mark on the Veritas Cluster Server Java console.

What is a possible reason for this condition?

- A. The DiskGroupName attribute was typed incorrectly.
- B. The ForceImport attribute was set to True.
- C. The DGGuid attribute was left blank.
- D. The VMDg resource was set to non-critical.

Answer: A

5. An update to SQL Server makes changes to registry keys on the active system. Which type of resource copies these changes to the target system on failover?

- A. RegKey
- B. KeyRep
- C. Replicate
- D. RegRep

Answer: D

6. A cluster has three systems: S1, S2, and S3; and six service groups: SGa, SGb, SGc, SGd, SGe, and SGf. The SGa, SGd, and SGf service groups are online on the S1 system. The SGc and SGe service groups are online on the S2 system. The SGb service group is online on the S3 system.

Given the partial main.cf definition:

```
Group SGb (
SystemList = { S1 = 0, S2 = 1, S3 = 1 }
AutoStartList = { S1, S2, S3 }
FailOverPolicy = RoundRobin
)
```

If the S3 system reboots, what happens to SGb?

- A. It goes to system S1.
- B. It goes to system S2.
- C. It goes to system S3.
- D. It remains offline.

Answer: B

7. What is the correct configuration of Exchange to enable failover in a cluster?

- A. Active/Passive with four systems and two Exchange instances
- B. Active/Active with four systems and five Exchange instances
- C. Active/Active with four systems each running multiple Exchange instances
- D. Active/Passive with four systems and four Exchange instances

Answer: A

8. Which service group attribute setting calls a user-defined script that checks for external conditions before bringing the service group online?

- A. PreOnlining
- B. PreOnline
- C. Priority
- D. Probed

Answer: B

9. A PostOnline trigger is being tested on a three-system cluster with systems named SystemA, SystemB, and SystemC. The trigger works on SystemA, but it fails to run on SystemB and SystemC. What is a possible reason for this?

- A. The PostOnline trigger is missing from SystemB and SystemC.
- B. The hatrigger script must be run on all systems to enable the PostOnline trigger.
- C. The PostOnline attribute is set to False on SystemB and SystemC.
- D. The Veritas Cluster Server engine had an error while replicating the trigger to SystemB and SystemC.

Answer: A

10. A resource has the ResourceOwner attribute set to Marc. The resource has faulted. Who can clear the fault?

- A. any Cluster Administrator
- B. any Cluster Guest
- C. a Windows domain user named Marc, with or without a Veritas Cluster Server account
- D. a Veritas Cluster Server user named Marc, with Cluster Guest privileges

Answer: A

11. Which two attributes must be defined for a SQLServer2005 resource? (Choose two.)

- A. UserAccount
- B. Instance
- C. DetailMonitor
- D. LanmanResName
- E. MountV

Answer: BD

12. Which two files are required in order to start the Veritas Cluster Server Simulator? (Choose two.)

- A. main.cf
- B. main.cf.previous
- C. main.cf.sim
- D. types.cf
- E. types.cf.previous
- F. types.cf.sim

Answer: AD

13. Given a three-node cluster running two instances of Exchange with an any-to-any configuration, which FailOverPolicy prevents one instance of Exchange from attempting to fail over to the node with Exchange running on it?

- A. Round-robin

- B. Priority
- C. Load
- D. Exclusive

Answer: C

14. A Web hosting company has an eight-node cluster running 60 Web servers. Their failover objective is to distribute the load equally among all nodes. Each Web server has approximately the same load on the servers. All servers are identical.

Which FailOverPolicy accomplishes this with the least amount of effort on the part of the administrator?

- A. Load
- B. Priority
- C. RoundRobin
- D. Average

Answer: C

15. You are using the Veritas Cluster Server (VCS) Java console to connect to a VCS Simulator session that is running within a production VCS cluster. The Java console is unable to connect to the VCS Simulator session. What are two possible causes for the connection problem? (Choose two.)

- A. HAD for the production VCS cluster is not running.
- B. The VCS Simulator is not running.
- C. The port number is incorrect.
- D. The hashadow process for the VCS cluster is hung.
- E. The ClusterService group is offline.

Answer: BC

16. Which resource type attribute is modified to reduce the fault detection time?

- A. MonitorTimeOut
- B. MonitorInterval
- C. FaultOnMonitorTimeouts
- D. OnlineMonitorInterval

Answer: B

17. If a persistent resource in a service group named SG1 faults, Veritas Cluster Server fails the service group over to another system if which two conditions are met? (Choose two.)

- A. The ManageFault attribute is set.
- B. The AutoFailOver attribute is set.
- C. Another system in the cluster is available to which SG1 can failover.
- D. The AutoRestart attribute is set.
- E. Another system in a different cluster is available to which SG1 can failover.

Answer: BC

18. Which functionality is added to the Java console when accessing the Veritas Cluster Server Simulator rather than a running cluster? (Choose two.)

- A. power off/on a system
- B. delete a system
- C. fault a resource
- D. fault a heartbeat link
- E. power off/on a disk array
- F. remove a heartbeat link

Answer: AC

19. During a test of a persistent resource, the Veritas Cluster Server engine log indicates that the service group and the persistent resource enter the FAULTED state on all systems in the cluster. The resource enters the ONLINE state

after the root cause of the fault is corrected. Which default attribute setting allows the service group to attempt to start without manual intervention?

- A. AutoStart
- B. AutoClear
- C. AutoRestart
- D. AutoFailover

Answer: C

20. What are two valid settings for FailOverPolicy? (Choose two.)

- A. Priority
- B. RoundRobin
- C. Order
- D. Failover
- E. Capacity

Answer: AB
