Exam : [2B0-015](#)

"ES Wireless", also known as 2B0-015 exam, is a Enterasys Networks certification. With the complete collection of exam questions, Just4Study has assembled to take you through 90 Q&As to your 2B0-015 exam preparation. In the 2B0-015 exam resources, you will cover every field and category in Enterasys Networks Certification helping to ready you for your successful Enterasys Networks Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Enterasys Networks Enterasys Networks Certification 2B0-015 (ES Wireless) examination of original title complete coverage. 2B0-015 exam questions help you pass the exam.

Just4Study 2B0-015 Feature:

* High quality - High quality and valued for the 2B0-015 Exam: 100% Guarantee to Pass Your 2B0-015 exam and get your Enterasys Networks Certification certification.

* Authoritative - Authoritative braindumps with complete details about 2B0-015 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Enterasys Networks Certification resources, you will minimize your **Enterasys Networks Enterasys Networks Certification** cost and be ready to pass your 2B0-015 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Enterasys Networks Certification demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 2B0-015 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 2B0-015 Demo Download

Just4Study offers free demo for Enterasys Networks Certification 2B0-015 exam (ES Wireless). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Enterasys Networks Enterasys Networks Certification 2B0-015** examination of original title complete coverage.2B0-015 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 2B0-015

Exam Name: ES Wireless(Enterasys Networks Certification)

Questions and Answers: 90 Q&A

[Enterasys Networks 2B0-015](#) Test belongs to one of the Enterasys Networks Certification certified test, if needs to obtain the Enterasys Networks Certification certificate, you also need to participate in other related test, the details you may visit the [Enterasys Networks Certification](#) certified topic, in there, you will see all related Enterasys Networks Certification certified subject of examination.

Just4Study professional provide Enterasys Networks Certification 2B0-015 the newest Q&A, completely covers 2B0-015 test original topic. With our complete Enterasys Networks Certification resources, you will minimize your Enterasys Networks Certification cost and be ready to pass your 2B0-015 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Enterasys Networks 2B0-015

Title : ES Wireless

1. When configuring LAN-to-LAN Endpoint, which of the following do you need?

- A. Wired MAC Address of the remote Access Point
- B. Wireless MAC Address of the remote Access Point
- C. IP Address of the remote Access Point
- D. Different channels configured on both Access Points

Answer: B

2. What type of cable is required to connect a terminal to the console port of the AP?

- A. Cross-over
- B. Straight-through Cat 5
- C. Null Modem DB9 to DB9
- D. Multi-Mode Fiber

Answer: C

3. What file extension is used for RoamAbout Boot ROM image files?

- A. .txt
- B. .asp
- C. .WEP
- D. .BIN

Answer: D

4. Which of the following is NOT a source of radio interference?

- A. Microwave ovens
- B. Overhead power lines
- C. Cable TV
- D. Theft detection devices

Answer: C

5. Which of the following does NOT affect the size of a cell?

- A. Network utilization
- B. Radio frequency noise
- C. Transmit speeds
- D. Humidity

Answer: D

6. Why is it important to read Release Notes when installing a wireless PC Card and its drivers?

- A. To enable you to decipher LED indications
- B. They include a PC Card license key
- C. To learn about restrictions and requirements for your OS
- D. To learn what channels are supported in your geographic region

Answer: C

7. Up to how many buildings may be connected in a Point-to-Multipoint configuration?

- A. 3
- B. 7
- C. 8
- D. 12

Answer: B

8. In which of the following devices is the PC Radio Card NOT used?

- A. Laptops
- B. Carrier (adapter) modules
- C. Omni-directional antenna
- D. Wireless Ethernet Adapter

Answer: C

9. When should an Upline Dump be enabled for the AP 2000?

- A. When configuring the AP for an upgrade to its firmware
- B. When troubleshooting a poor SNR
- C. When copying configurations from one AP to another
- D. When requested by a RoamAbout service representative

Answer: D

10. How do you avoid radio frequency interference within an area when positioning multiple APs with 802.11b PC Cards installed?

- A. Configure different network names on the APs
- B. Enable Secure Access
- C. Configure overlapping cells at least five channels apart
- D. Maintain at least 100 meters distance between APs

Answer: C

11. What does the RoamAbout employ, by default, to confirm successful frame delivery?

- A. The receiving station sends a MAC level acknowledgement
- B. Resolution by upper layer protocols (i.e., TCP) at the sending station
- C. The sending station sends a source frame to verify delivery
- D. There is no method of ensuring successful delivery

Answer: A

12. What RMON groups are supported on the RoamAbout APs?

- A. Statistics, Host, Alarm, Packet Capture
- B. Statistics, History, Alarm, Events
- C. History, Alarm, Matrix, Filter
- D. All nine groups are supported

Answer: B

13. What media access method does the RoamAbout use?

- A. CSMA/CD

- B. Beacon exchange
- C. Binary Sequential Back off
- D. CSMA/CA

Answer: D

14. Which AP Manager utility is used during LAN-to-LAN installations to determine signal strength?

- A. Authentication
- B. Link test
- C. Integrity Check
- D. Site Monitor

Answer: B

15. What are two solutions to a "Hidden Station" problem?

- A. Enable the RTS/CTS Protocol
- B. Increase the transmission power of the station
- C. Increase the Density setting
- D. Move the problem station

Answer: AD

16. Where would you look to find what MIBs are supported on the RoamAbout Access Points?

- A. Firmware release notes
- B. Guide to Wireless LANs
- C. The Help file in your NMS
- D. In the device .cfg file

Answer: A

17. With Secure Access enabled on an AP with an IEEE 802.11b PC Card installed, which of the following is true?

- A. The AP allows access to wireless clients that use "ANY" as the wireless network name
- B. The AP allows access to wireless clients that leave the wireless network name configuration blank
- C. The AP denies access to wireless clients that do not provide the proper access password
- D. The AP denies access to wireless clients that do not use the correct wireless network name

Answer: D

18. What is the name of AP Manager integrated BootP/TFTP server application?

- A. RAT
- B. NetRider
- C. NetSight Atlas
- D. NCM_PCOV

Answer: B

19. What is the default password on the R2?

- A. public
- B. admin
- C. password
- D. private

Answer: C

20. IEEE 802.11 stipulates the use of which security measure to make the wireless network at least as secure as a normal wired LAN?

- A. Host key generation
- B. WEP Encryption
- C. 802.1X Authentication
- D. A lockable security box for the Access Point

Answer: B
