SUN SCBCD

310-090: Sun Certified Business Component Developer for J2EE 1.3

Practice Exam: 310-090 Exams

Exam Number/Code: 310-090

Exam Name: Sun Certified Business Component Developer for J2EE 1.3

Questions and Answers: 245 Q&As

([SCBCD](#))

"Sun Certified Business Component Developer for J2EE 1.3", also known as 310-090 exam, is a SUN certification. With the complete collection of exam questions, Just4Study has assembled to take you through 245 Q&As to your 310-090 exam preparation. In the 310-090 exam resources, you will cover every field and category in SUN Certification helping to ready you for your successful SUN Certification.

Exam : [310-090](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for SUN SCBCD 310-090 (Sun Certified Business Component Developer for J2EE 1.3) examination of original title complete coverage. 310-090 exam questions help you pass the exam.

Just4Study 310-090 Feature:

* High quality - High quality and valued for the 310-090 Exam: 100% Guarantee to Pass Your 310-090 exam and get your SCBCD certification.

* Authoritative - Authoritative braindumps with complete details about 310-090 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed SCBCD resources, you will minimize your **SUN SCBCD** cost and be ready to pass your 310-090 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free SCBCD demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 310-090 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 310-090 Demo Download

Just4Study offers free demo for SCBCD 310-090 exam (Sun Certified Business Component Developer for J2EE 1.3). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **SUN SCBCD 310-090** examination of original title complete coverage. 310-090 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 310-090

Exam Name: Sun Certified Business Component Developer for J2EE 1.3(SCBCD)

Questions and Answers: 245 Q&A

[SUN 310-090](#) Test belongs to one of the SCBCD certified test, if needs to obtain the SCBCD certificate, you also need to participate in other related test, the details you may visit the [SCBCD](#) certified topic, in there, you will see all related SCBCD certified subject of examination.

Just4Study professional provide SCBCD 310-090 the newest Q&A, completely covers 310-090 test original topic. With our complete SCBCD resources, you will minimize your SCBCD cost and be ready to pass your 310-090 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : SUN 310-090

Title : Sun Certified Business Component Developer for J2EE 1.3

1. Which statement is true about a session bean's lifecycle?

- A. Session beans cannot receive re-entrant loopback calls.
- B. A stateless session bean's home interface can have overloaded create methods.
- C. Stateless session beans can implement javax.ejb.SessionSynchronization.
- D. The EJB 2.0 container can make concurrent calls to any stateful session bean instance.

Answer: A

2. Which two are valid types for persistent fields in a CMP 2.0 entity bean? (Choose two.)

- A. Java primitives
- B. entity bean local interfaces
- C. classes implementing java.io.Serializable
- D. either java.util.Collection or java.util.Set

Answer: A C

3. Which method from javax.ejb.EJBContext returns an object that allows a Bean Provider to demarcate transactions?

- A. begin()
- B. getAutoCommit()
- C. getTransaction()
- D. beginTransaction()
- E. getUserTransaction()

Answer: E

4. Which is a Bean Provider's security-related responsibility?

- A. assigns principals to roles in the application server
- B. declares the role-link element in the deployment descriptor
- C. declares the security-role element in the deployment descriptor
- D. declares the security-role-ref element in the deployment descriptor

Answer: D

5. Which is a feature of EJB 2.0?

- A. It provides synchronous message handling through message driven beans.
- B. It provides support for both local and remote client views for session beans.
- C. It provides support for both local and remote client views for message driven beans.
- D. It guarantees that all services represented by an object will have conversational state.

Answer: B

6. Which two are guaranteed to a Bean Provider using an EJB 2.0 container? (Choose two.)

- A. access to the JCE API
- B. access to JavaMail API
- C. access to the JXTA API
- D. access to the JAXP API

Answer: B D

7. Which two must be in an ejb-jar file, either by inclusion or reference? (Choose two.)

- A. an enterprise archive (.ear) file
- B. a deployment descriptor in the format defined by the EJB 2.0 specification
- C. the class files for the classes that implement the home and remote interfaces
- D. the class files for the interfaces and superinterfaces used by the bean, except J2SE or J2EE interfaces
- E. the class files for the stub classes of the EJBHome andEJBObject interfaces, if remote interfaces are deployed for the bean

Answer: B D

8. What two statements are true about EJB 2.0 container crashes? (Choose two.)

- A. Entities will survive.
- B. An entity bean's primary key will survive.
- C. Message-driven bean instances will survive.
- D. Stateful session bean instances will survive.
- E. Crashes are guaranteed to be transparent to clients using entity beans.

Answer: A B

9. Which two statements about a client's reference to a session bean's remote home interface are true? (Choose two.)

- A. The reference can be passed as a method argument.
- B. The reference provides the client with the IP address of the bean instance.
- C. The reference provides the client with access to at least one create method.
- D. A new home reference must be obtained for each new reference to a remote component interface.

Answer: A C

10. Given:

Which two elements must be included in the <resource-ref> tag? (Choose two.)

- A. <res-type>
- B. <res-ref-name>
- C. <resource-env-ref>
- D. <environment-resource>

Answer: A B

11. Label the methods according to whether the container ensures that the identity of the associated entity object is available or unavailable to the instance during the method.

Answer:

12. Which accurately describes a characteristic of EJB 2.0?

- A. EJB 2.0 is an example of a web-based component model.
- B. EJB 2.0 components must be directly accessible via HTTP.
- C. EJB 2.0 is an example of a component model for GUI applications.
- D. EJB 2.0 applications can link to legacy systems using a J2EE connector.

Answer: D

13. Which is a capability guaranteed by all EJB 2.0 containers?

- A. JTA support

- B. server failover
- C. load balancing
- D. serMet support
- E. server clustering

Answer: A

14. Which method can be found in BOTH the EJBHome and EJBLocalHome interface?

- A. getHomeHandle()
- B. getEJBMetaData()
- C. remove(Handle handle)
- D. remove(Object primaryKey)

Answer: D

15. Which statement about EJB QL is true?

- A. An EJB QL query must contain the ORDER BY clause.
- B. An EJB QL query is statically defined in the ejb-jar.xml deployment descriptor.
- C. Duplicate values are always removed from EJB QL query results by the container.
- D. It is legal to use an input parameter in the FROM clause or the SELECT clause of an EJB QL query.

Answer: B

16. Which transaction attribute may cause a javax.transaction.TransactionRequiredException to be thrown?

- A. Required
- B. Supports
- C. Mandatory
- D. RequiresNew

Answer: C

17. Click the Exhibit button.

All beans involved use container-managed transactions and all methods are marked as Required. At runtime, methodB is unable to communicate with its resource and calls the setRollbackOnly method. What is the result?

- A. JMS message redelivery semantics will apply.
- B. The rollback will propagate to the sender of the message.
- C. The bean's onMessage method will reattempt the sequence.
- D. Transactions started by the onMessage method will always commit.

Answer: A

18. Which two are required to properly implement a CMP entity bean class? (Choose two.)

- A. Declare variables for all persistent fields.
- B. Provide constructors to initialize the CMP fields.
- C. Do not implement the ejbFind<METHOD> methods.
- D. Provide implementation code for get and set methods to store and retrieve the persistent fields.
- E. Implement ejbCreate<METHOD> methods for all home interface create<METHOD> methods.

Answer: C E

19. Which exception can be thrown by the findByPrimaryKey method of a remotely called entity bean using container-managed persistence?

- A. javax.ejb.EJBException
- B. javax.ejb.DuplicateKeyException
- C. javax.ejb.NoSuchEntityException
- D. javax.ejb.ObjectNotFoundException

Answer: D

20. Which two APIs are provided to the Bean Provider by an EJB 2.0 container? (Choose two.)

- A. JTA
- B. JMX
- C. JSP
- D. JDO
- E. JAXP

Answer: A E
