

## 642-067 braindumps

### Cisco Access Routing and LAN Switching

**642-067: Advanced Routing and Switching for Field Engineers**

**Practice Exam:** 642-067 Exams

**Exam Number/Code:** 642-067

**Exam Name:** Advanced Routing and Switching for Field Engineers

**Questions and Answers:** 60 Q&As

( [Access Routing and LAN Switching](#) )

"Advanced Routing and Switching for Field Engineers", also known as 642-067 exam, is a Cisco certification. With the complete collection of exam questions, Just4Study has assembled to take you through 60 Q&As to your 642-067 exam preparation. In the 642-067 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Exam : [642-067](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Cisco Access Routing and LAN Switching 642-067 (Advanced Routing and Switching for Field Engineers) examination of original title complete coverage. 642-067 exam questions help you pass the exam.

#### **Just4Study 642-067 Feature:**

\* High quality - High quality and valued for the 642-067 Exam: 100% Guarantee to Pass Your 642-067 exam and get your Access Routing and LAN Switching certification.

\* Authoritative - Authoritative braindumps with complete details about 642-067 exam.

\* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Access Routing and LAN Switching resources, you will minimize your **Cisco Access Routing and LAN Switching** cost and be ready to pass your 642-067 exam on Your First Try, 100% Money Back Guarantee included!

\* Free - Try free Access Routing and LAN Switching demo before you decide to buy it in <http://www.Just4Study.com>.

#### **Just4Study Guarantee:**

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 642-067 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

#### **Free 642-067 Demo Download**

Just4Study offers free demo for Access Routing and LAN Switching 642-067 exam (Advanced Routing and Switching for Field Engineers). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Cisco Access Routing and LAN Switching 642-067** examination of original title complete coverage. 642-067 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

**VUE/Prometric Code: 642-067**

Exam Name: Advanced Routing and Switching for Field Engineers( [Access Routing and LAN Switching](#) )

Questions and Answers: 60 Q&A

[Cisco 642-067](#) Test belongs to one of the Access Routing and LAN Switching certified test, if needs to obtain the Access Routing and LAN Switching certificate, you also need to participate in other related test, the details you may visit the [Access Routing and LAN Switching](#) certified topic, in there, you will see all related Access Routing and LAN Switching certified subject of examination.

Just4Study professional provide Access Routing and LAN Switching 642-067 the newest Q&A, completely covers 642-067 test original topic. With our complete Access Routing and LAN Switching resources, you will minimize your Access Routing and LAN Switching cost and be ready to pass your 642-067 tests on Your First Try, 100% Money Back Guarantee included!

### **Just4Study Help You Pass Any IT Exam**

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-067

Title : Advanced Routing and Switching for Field Engineers

1. Which two of the following statements are true about HSRP load sharing? (Choose two)

- A. It is achieved by using more than one HSRP group.
- B. It is done in regards to either round robin or weight basis.
- C. It is used to offload the active router in a certain HSRP group.
- D. Single group HSRP is used to achieve more efficient link utilization.
- E. The return traffic is influenced by HSRP load sharing configuration.

Answer: AC

2. How are RIP routing contexts implemented in MPLS VPN?

- A. RIP does not support routing contexts
- B. routing contexts are implemented in a single routing process
- C. routing contexts are implemented using multiple routing processes
- D. routing contexts are implemented as several instances of a single routing process
- E. routing contexts are implemented as a single instance of several routing processes

Answer: D

3. Why is it appropriate to use conditional label advertising when deploying MPLS?

- A. to make CEF tables smaller
- B. to enable label switching on the frame mode interface
- C. to restrict MPLS availability to predefined time periods
- D. to restrict label switching to a limited number of networks
- E. to restrict end users from seeing the routers in the MPLS network

Answer: D

4. Which three of the following steps are mandatory when configuring MPLS on Cisco IOS? (Choose three.)

- A. start LDP
- B. enable CEF switching
- C. configure the MPLS ID
- D. disable IP TTL propagation
- E. configure conditional label advertising
- F. enable label switching on frame mode interfaces

Answer: ABF

5. Which of the following statements about authentication responses and conditions is true? (Choose two.)

- A. When a router receives a failure response, it stops querying authentication methods.
- B. When a router receives an error response, it stops querying authentication methods.
- C. If the router receives a failure response from an authentication method, it queries the next method.
- D. The router does not differentiate between failure and error responses; the authentication process is always interrupted.
- E. If it receives no response from the authentication method, a router will determine the error condition on its own; the router also has the option to proceed to the next method in a list if configured accordingly.

Answer: AE
