Cisco Optical

642-371: Foundation Express for Systems Engineers(FOUNDSE)

Practice Exam: 642-371 Exams

Exam Number/Code: 642-371

Exam Name: Foundation Express for Systems Engineers(FOUNDSE)

Questions and Answers: 83 Q&As

([Optical](#))

Exam : [642-371](#)

"Foundation Express for Systems Engineers(FOUNDSE)", also known as 642-371 exam, is a Cisco certification. With the complete collection of exam questions, Just4Study has assembled to take you through 83 Q&As to your 642-371 exam preparation. In the 642-371 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Cisco Optical 642-371 (Foundation Express for Systems Engineers(FOUNDSE)) examination of original title complete coverage. 642-371 exam questions help you pass the exam.

Just4Study 642-371 Feature:

* High quality - High quality and valued for the 642-371 Exam: 100% Guarantee to Pass Your 642-371 exam and get your Optical certification.

* Authoritative - Authoritative braindumps with complete details about 642-371 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Optical resources, you will minimize your **Cisco Optical** cost and be ready to pass your 642-371 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Optical demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 642-371 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 642-371 Demo Download

Just4Study offers free demo for Optical 642-371 exam (Foundation Express for Systems Engineers(FOUNDSE)). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **Cisco Optical 642-371** examination of original title complete coverage.642-371 Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

VUE/Prometric Code: 642-371

Exam Name: Foundation Express for Systems Engineers(FOUNDSE)(Optical)

Questions and Answers: 83 Q&A

[Cisco 642-371](#) Test belongs to one of the Optical certified test, if needs to obtain the Optical certificate, you also need to participate in other related test, the details you may visit the [Optical](#) certified topic, in there, you will see all related Optical certified subject of examination.

Just4Study professional provide Optical 642-371 the newest Q&A, completely covers 642-371 test original topic. With our complete Optical resources, you will minimize your Optical cost and be ready to pass your 642-371 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-371

Title : Cisco(r) Foundation Express for Systems Engineers (FOUNDSE)

1. Deploying ISRs with integrated security services can help lower the total cost of wnership. Which of these Cisco ISR Routers features illustrate this point?

- A. using built-in on-board VPN acceleration to reduce the amount of VPN configuration tsks
- B. using the USB port to perform fast Cisco IOS image upgrade
- C. using the security audit feature to implement inline Intrusion Prevention System
- D. using the SDM configuration tool to reduce training costs
- E. using the high performance AIM to increase the Cisco IOS Firewall performance

Answer: D

2. Which two of these statements best describe fast secure roaming for the wireless core feature set using autonomous access points? (Choose two.)

- A. It is compatible with all wireless clients.
- B. It reduces roaming latency through reduced client RF channel scanning enhancements.
- C. It reduces roaming latency to targeted times of less than 75ms.
- D. Roaming occurs without reauthentication through a centralized RADIUS server.
- E. It is enabled through WLSE deployment.

Answer: BD

3. Which of these is the Cisco IOS security feature that enhances perimeter firewall protection by taking appropriate actions on packets and flows that violate the security policy or represent malicious network activity?

- A. DDoS Mitigation (DDoS)
- B. Cisco Security Agent (CSA)
- C. Intrusion Prevention System (IPS)
- D. Authentication Proxy (Auth Proxy)
- E. Context-based Access Control (CBAC)
- F. Monitoring, Analysis and Response System (MARS)

Answer: C

4. Which of these is a benefit of VPN software integrated into a Cisco router such as the ISR?

- A. It uses the IPSec protocol to establish secure SAs.
- B. It supports digital certificates to authenticate clients.
- C. It uses Triple DES encryption to provide data integrity.
- D. It is based upon the GRE standard to provide multi-protocol support.
- E. It supports access to a Microsoft CA for security policy authentication.

Answer: B

5. What is a benefit of Cisco's anti-x defense strategy?

- A. applications security
- B. virtual firewall
- C. security events correlation for proactive response
- D. malware, virus, and worm mitigation
- E. secure connectivity (V3PN)

Answer: D

6. Which three of these are benefits of the Cisco IOS IPSec VPN feature set? (Choose three.)

- A. It provides a comprehensive VPN security management system.
- B. It is available for a wide range of platforms running IOS software.
- C. It integrates appliance design and innovative hybrid security architecture to provide stateful GRE VPN capabilities.
- D. It enables scaleable secure connectivity for remote access VPNs, including e-commerce, mobile user, and telecommuting applications.
- E. It combines IPSec VPN enhancements with robust firewall, intrusion prevention, and secure administration capabilities.
- F. It provides strong encryption and authentication through digital certificates, one-time password tokens, and pre-shared keys to the baseline Cisco Secure Integrated Software.

Answer: BEF

7. What is the benefit of using the Cisco Easy VPN Server feature along with the Cisco software VPN client for implementing remote-access VPNs?

- A. The Cisco Easy VPN Server feature and the Cisco software VPN client use the same GUI configuration tool to simplify remote-access VPN configurations.
- B. The Cisco Easy VPN Server feature allows the Cisco software VPN client to receive its security policies from the central site VPN device. This minimizes the configuration requirements at the remote location for large remote access VPN deployments.
- C. The Cisco Easy VPN Server feature and the Cisco software VPN client use hardware-based encryption to reduce the CPU overhead of the central site VPN router.
- D. The Cisco Easy VPN Server feature and the Cisco software VPN client enable scalable remote-access VPNs deployment by using a thick client/thin server model where the central site VPN router can handle thousands of incoming VPN connections.

Answer: B

8. Which of these is the Cisco IOS Firewall feature that creates specific security policies for each user with LAN-based, dynamic, per-user authentication and authorization?

- A. DDoS Mitigation
- B. Cisco Security Agent
- C. Intrusion Prevention System
- D. Authentication Proxy
- E. Context-based Access Control
- F. Monitoring, Analysis and Response System

Answer: D

9. Your customer is concerned that adding firewall-based security will require major hardware changes. Which Cisco IOS Firewall benefit would you highlight?

- A. Cisco IOS Firewall is available for a wide variety of router platforms. It scales to meet the bandwidth and performance requirements of any network.
- B. Integrating firewall functions into a multiprotocol router takes advantage of an existing router investment, without the cost and learning curve associated with a new platform.
- C. Because it is installed on a Cisco router, Cisco IOS Firewall is an all-in-one, scalable solution that performs multiprotocol routing, perimeter security, intrusion prevention, VPN functions, and per-user authentication and authorization.

D. Combining the Cisco CNS 2100 Series Intelligence Engine and the Cisco IOS Software Extensible Markup Language application helps a network administrator deploy any Cisco router with little or no preconfiguration to a given destination.

Answer: B

10. Which two of these statements best describe the benefits of WPAv2? (Choose two.)

- A. SSID broadcast prevention
- B. man-in-the-middle attack protection
- C. cost reduction through software upgrades in all existing hardware
- D. dynamic key generation
- E. RF jamming prevention

Answer: BD

11. Which of these is the Cisco IOS feature that allows you to create secure site-to-site VPNs?

- A. GRE
- B. IPSec
- C. L2TP
- D. MPLS
- E. AToM
- F. pseudo wire

Answer: B

12. Which SDM feature secures the router using a set of recommended security configurations based on Cisco IOS AutoSecure and ICSA recommendations?

- A. security wizard
- B. security audit
- C. one-step lockdown
- D. Easy VPN Server
- E. auto setup wizard

Answer: C

13. Which two of these statements best describe the benefits of the Cisco Compatible Extensions Program? (Choose two.)

- A. offers a feature-rich implementation alternative to Wi-Fi certification
- B. accelerates the availability of innovative features while maintaining interoperability
- C. provides innovative features only on Cisco's wireless client adapters
- D. provides an evolving set of specifications for interoperability
- E. eliminates the need for testing by providing innovative features to wireless client vendors through a one-time license fee

Answer: BD

14. Which of these is the Cisco IOS Firewall feature that provides secure, per-application access control across network perimeters?

- A. DDoS Mitigation
- B. Cisco Security Agent
- C. Intrusion Prevention System
- D. Authentication Proxy
- E. Context-based Access Control
- F. Monitoring, Analysis and Response System

Answer: E

15. Which three of these features are supported on the Cisco VPN software client release 4.0.5? (Choose three.)

- A. application programming interface which allows you to control operation of the VPN client from another application

- B. integrated personal firewall
- C. transparent tunneling-IPSec over UDP and IPSec over TCP
- D. provides automatic software updates for Windows 2000 and Windows XP
- E. load balancing and backup server support

Answer: BCE

16. Which item is a feature of Cisco Compatible Extensions, Version 3?

- A. full 802.11e compliance
- B. full WPAv2 compliance
- C. wireless IDS
- D. NAC

Answer: B

17. Which two of these statements best describe fast secure roaming? (Choose two.)

- A. available only in autonomous APs
- B. available in autonomous and lightweight APs
- C. a feature of WDS in autonomous APs
- D. a feature of WDS in lightweight APs
- E. requires at least one AP and one Wireless LAN Services Module

Answer: BC

18. Your customer is concerned about the flexibility of the security design. Which Cisco IOS Firewall benefit would you highlight?

- A. Cisco IOS Firewall is available for a wide variety of router platforms. It scales to meet the bandwidth and performance requirements of any network.
- B. Integrating firewall functions into a multiprotocol router takes advantage of an existing router investment, without the cost and learning curve associated with a new platform.
- C. Cisco SDM allows GUI-based configuration of router security features.
- D. Because it is installed on a Cisco router, Cisco IOS Firewall is an all-in-one, scalable solution that performs multiprotocol routing, perimeter security, intrusion prevention, VPN functions, and per-user authentication and authorization.

Answer: D

19. Your customer is concerned that adding firewall-based security will require complicated management. Which Cisco IOS Firewall benefit would you highlight?

- A. Integrating firewall functions into a multiprotocol router takes advantage of an existing router investment, without the cost and learning curve associated with a new platform.
- B. Cisco SDM allows GUI-based configuration of router security features, greatly reducing the need to learn complex CLI command syntaxes.
- C. Because it is installed on a Cisco router, Cisco IOS Firewall is an all-in-one, scalable solution.
- D. Combining the Cisco CNS 2100 Series Intelligence Engine and the Cisco IOS Software Extensible Markup Language application helps a network administrator deploy any Cisco router with little or no preconfiguration to a given destination. The router has the most current Cisco IOS software release and its security policy configuration for the firewall when it is connected to the Internet.

Answer: B

20. Which two of these statements best describe the benefits of WPAv1? (Choose two.)

- A. SSID broadcast prevention
- B. improved mutual authentication
- C. improved encryption through AES
- D. improved protection against sniffing initialization vectors
- E. RF jamming prevention

Answer: BD
