Exam : [642-383](#)

"Cisco Express Foundation for Field Engineers", also known as 642-383 exam, is a Cisco certification. With the complete collection of exam questions, Just4Study has assembled to take you through 69 Q&As to your 642-383 exam preparation. In the 642-383 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Cisco Others 642-383 (Cisco Express Foundation for Field Engineers) examination of original title complete coverage. 642-383 exam questions help you pass the exam.

Just4Study 642-383 Feature:

* High quality - High quality and valued for the 642-383 Exam: 100% Guarantee to Pass Your 642-383 exam and get your Others certification.

* Authoritative - Authoritative braindumps with complete details about 642-383 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed Others resources, you will minimize your **Cisco Others** cost and be ready to pass your 642-383 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free Others demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 642-383 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 642-383 Demo Download

Just4Study offers free demo for Others 642-383 exam (Cisco Express Foundation for Field Engineers). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Cisco Others 642-383** examination of original title complete coverage. 642-383 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 642-383

Exam Name: Cisco Express Foundation for Field Engineers(Others)

Questions and Answers: 69 Q&A

[Cisco 642-383](#) Test belongs to one of the Others certified test, if needs to obtain the Others certificate, you also need to participate in other related test, the details you may visit the [Others](#) certified topic, in there, you will see all related Others certified subject of examination.

Just4Study professional provide Others 642-383 the newest Q&A, completely covers 642-383 test original topic. With our complete Others resources, you will minimize your Others cost and be ready to pass your 642-383 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-383

Title : Cisco Express Foundation for Field Engineers

1. Which statement correctly describes the keyswitch model of deployment for call processing?

- A. All IP Phones are able to answer any incoming PSTN call on any line.
- B. PSTN calls are routed through a receptionist or automated attendant.
- C. All IP Phones in the system have a single unique extension number.

Answer: A

2. Which interface on the Cisco UC520 is assigned an IP address either statically or through DHCP?

- A. WAN interface
- B. LAN interface
- C. Switchport
- D. PSTN Interface

Answer: A

3. Which of these is an accurate list of Cisco Lifecycle Services phases?

- A. initiation, planning, analysis, design, development, implementation, operations and maintenance
- B. project planning, site assessment, risk assessment, solution selection and acquisition, testing, and operations
- C. prepare, plan, design, implement, operate, and optimize
- D. analysis, design, deployment, testing, implementation, and production
- E. presales, project planning, development, implementation, operations testing, and operations sign-off

Answer: C

4. How can the proper configuration of Voice Mail be tested at an end user's IP phone?

- A. Press the "i" button.
- B. Press the "Settings" button.
- C. Press the "Services" button.
- D. Press the "Messages" button.

Answer: D

5. What port role assignment would you make for the Gigabit Ethernet port on the Cisco CE520 used in the Smart Business Communications System?

- A. IP Phone and desktop
- B. Cisco UC520
- C. Cisco CE520
- D. Cisco 871W

Answer: B

6. Which of the following best describe the customer benefits of change management in the operate phase?
- A. reduce unnecessary disruption, delays, rework, and other problems by establishing test cases for use in verifying that the system meets operational, functional, and interface requirements
 - B. improve its ability to make sound financial decisions by developing a business case based on its business requirements and establishing a basis for developing a technology strategy
 - C. reduce operating costs and limit change-related incidents by providing a consistent and efficient set of processes
 - D. improve the return on investment and hasten migration by identifying and planning for necessary infrastructure changes and resource additions, as well as reduce deployment costs by analyzing gaps early in the planning process to determine what is needed to support the system

Answer: C

7. Refer to the exhibit. Switches A and C are running PVST+ STP, and Switch B is running 802.1Q STP. If the BPDU of the root in VLAN 1 is better than the BPDU of the root in VLAN 2, then there is no blocking port in the VLAN 2 topology. The BPDU of VLAN 2 never makes a "full circle" around the topology; it is replaced by the VLAN 1 BPDU on the B-C link, because B runs only one STP merged with VLAN 1 STP of PVST+. Thus, there is a forwarding loop. What does PVST+ do to correct this?

- A. Switch A sends PVST+ BPDUs of VLAN 2 (to the SSTP address that is flooded by Switch B) towards Switch C. Switch C will put port C-B into a type-inconsistent state, which prevents the loop.
- B. Switch B sends PVST+ BPDUs of VLAN 1 (to the SSTP address that is flooded by Switch A) towards Switch C. Switch C will put port C-B into a type-inconsistent state, which prevents the loop.
- C. Switch C sends PVST+ BPDUs of VLAN 2 (to the SSTP address that is flooded by Switch B) towards Switch C. Switch A will put port C-B into a type-inconsistent state, which prevents the loop.
- D. Switch A sends PVST+ BPDUs of VLAN 1 (to the SSTP address that is flooded by Switch B) towards Switch B. Switch A will put port C-B into a type-inconsistent state, which prevents the loop.

Answer: A

8. Which benefit can be obtained by using the change management service component in the operate phase?

- A. reduced operating costs, due to a consistent framework for making necessary changes in an efficient and accountable manner
- B. greater accuracy, completeness, and timeliness of network configuration information
- C. notification provided to interested parties regarding problems that have been identified, and a system that scales with customer requirements
- D. improved system service quality and fewer disruptions

Answer: A

9. Which of these is the best definition of the Cisco Lifecycle Services approach?

- A. It defines the minimum set of services required to successfully deploy and operate a set of Cisco technologies.
- B. It determines how best to price Cisco products.
- C. It provides partners with a useful way to leverage Cisco resources.
- D. It consists of these phases: plan, deploy, support, and troubleshoot.

Answer: A

10. Which statement correctly describes configuration of the VPN server?

- A. It requires definition of a Group ID for remote clients.
- B. It requires configuration of port settings for the VPN server on the Cisco UC520.
- C. It uses a preshared key for remote device authentication.
- D. The WAN interface is preselected.

Answer: C

11. What two types of telephony interfaces are used for PSTN connectivity? (Choose two.)

- A. Digital
- B. Optical
- C. Analog

D. CDMA

Answer: AC

12. In what location is it recommended that the Cisco Catalyst 6500 Series WLSM be placed?

A. distribution layer

B. core layer

C. access layer

D. network management functional module

Answer: A

13. Which definition best describes the implementation service component within the implement phase?

A. providing a step-by-step plan that details the installation and service-commission tasks required in order to create a controlled-implementation environment that emulates a customer network

B. assessing the ability of site facilities to accommodate proposed infrastructure changes

C. developing and executing proof-of-concept tests, validating high-level infrastructure design, and identifying any design enhancements

D. installing, configuring, and integrating systems components based on an implementation plan developed in earlier phases

E. improving a customer's infrastructure security system

Answer: D

14. What are two ways to test the LAN connectivity on the Cisco CE520? (Choose two.)

A. Ping the IP address of the Cisco-Data Access VLAN from the Cisco UC520 console.

B. Ping the IP address of the Cisco-Data VLAN from a device attached to the Cisco CE520.

C. Ping default gateway from the Cisco UC520.

D. Ping the IP address of the Cisco-Voice VLAN from a device attached to the Cisco CE520.

E. Ping default gateway from the Cisco CE520.

F. Ping the IP address of the Cisco-Distribution VLAN from the Cisco UC520 console.

Answer: BD

15. A customer with a small enterprise network of 15 remote sites is trying to optimize its VPN by migrating some remote sites using Frame Relay connections to the Internet to using cable connections to the Internet. Minimizing costs is one of the customer's highest priorities. Only a moderate amount of IP traffic is passing through the network, most of which is from the remote sites to the central site. IPSec should be used to provide VPN functionality and basic confidentiality is desired.

Based on the traffic patterns, which topology would be the easiest for this customer to set up and manage?

A. full mesh

B. partial mesh

C. point-to-multipoint

D. hub-and-spoke

Answer: D
