Cisco CCSP

642-503: Securing Networks with Cisco Routers and Switches

Practice Exam: 642-503 Exams

Exam Number/Code: 642-503

Exam Name: Securing Networks with Cisco Routers and Switches

Questions and Answers: 53 Q&As

([CCSP](#))

"Securing Networks with Cisco Routers and Switches", also known as 642-503 exam, is a Cisco certification. With the complete collection of exam questions, Just4Study has assembled to take you through 53 Q&As to your 642-503 exam preparation. In the 642-503 exam resources, you will cover every field and category in Cisco Certification helping to ready you for your successful Cisco Certification.

Exam : [642-503](#)

The exam questions cover the latest real test and with all the correct answer. we promise the Q&A for Cisco CCSP 642-503 (Securing Networks with Cisco Routers and Switches) examination of original title complete coverage. 642-503 exam questions help you pass the exam.

Just4Study 642-503 Feature:

* High quality - High quality and valued for the 642-503 Exam: 100% Guarantee to Pass Your 642-503 exam and get your CCSP certification.

* Authoritative - Authoritative braindumps with complete details about 642-503 exam.

* Cheaper - Our Just4Study products are cheaper than any other website. With our completed CCSP resources, you will minimize your **Cisco CCSP** cost and be ready to pass your 642-503 exam on Your First Try, 100% Money Back Guarantee included!

* Free - Try free CCSP demo before you decide to buy it in <http://www.Just4Study.com>.

Just4Study Guarantee:

Just4Study provides the most competitive quality of all exams for the customers, we guarantee your success at the first attempt with only our Certification Question&Answers, if you do not pass the 642-503 exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

Free 642-503 Demo Download

Just4Study offers free demo for CCSP 642-503 exam (Securing Networks with Cisco Routers and Switches). You can check out the interface, question quality and usability of our practice exams before you decide to buy it. We are the only one site can offer demo for almost all products.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Cisco CCSP 642-503** examination of original title complete coverage. 642-503 Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

VUE/Prometric Code: 642-503

Exam Name: Securing Networks with Cisco Routers and Switches(CCSP)

Questions and Answers: 53 Q&A

[Cisco 642-503](#) Test belongs to one of the CCSP certified test, if needs to obtain the CCSP certificate, you also need to participate in other related test, the details you may visit the [CCSP](#) certified topic, in there, you will see all related CCSP certified subject of examination.

Just4Study professional provide CCSP 642-503 the newest Q&A, completely covers 642-503 test original topic. With our complete CCSP resources, you will minimize your CCSP cost and be ready to pass your 642-503 tests on Your First Try, 100% Money Back Guarantee included!

Just4Study Help You Pass Any IT Exam

[Just4Study.com](#) offers incredible career enhancing opportunities. We are a team of IT professionals that focus on providing our customers with the most up to date material for any IT certification exam. This material is so effective that we Guarantee you will pass the exam or your money back.

Exam : Cisco 642-503

Title : Cisco(r) Securing Networks with Cisco Routers and Switches

1. Refer to the exhibit. Which two statements are true about the configurations shown? (Choose two.)

- A. The clickable links will have a heading entitled "MYLINKS".
- B. The home page will have three clickable links on it.
- C. ACS will be used for remote-user authentication by default.
- D. This is an example of a clientless configuration.
- E. Thin client (port forwarding) has been enabled using the url-text command.

Answer: BD

2. Which three configurations are required to enable the Cisco IOS Firewall to inspect a user-defined application which uses TCP ports 8000 and 8001? (Choose three.)

- A.

```
access-list 101 permit tcp any any eq 8000
access-list 101 permit tcp any any eq 8001
class-map user-10
match access-group 101
```
- B.

```
policy-map user-10
class user-10
inspect
```
- C.

```
ip port-map user-10 port tcp 8000 8001 description "TEST PROTOCOL"
```
- D.

```
ip inspect name test appfw user-10
```
- E.

```
ip inspect name test user-10
```
- F.

```
int {type|number}
 ip inspect name test in
```

Answer: CEF

3. When configuring FPM, what should be the next step after the PHDFs have been loaded?

- A. Define a stack of protocol headers.
- B. Define a traffic policy.
- C. Define a service policy.
- D. Define a class map of type "access-control" for classifying packets.
- E. Reload the router.
- F. Save the PHDFs to startup-config.

Answer: A

4. Refer to the DMVPN topology diagram in the exhibit. Which two statements are correct? (Choose two.)

- A. The hub router needs to have EIGRP split horizon disabled.
- B. At the Spoke A router, the next hop to reach the 192.168.2.0/24 network is 10.0.0.1.

- C. Before a spoke-to-spoke tunnel can be built, the spoke router needs to send an NHRP query to the hub to resolve the remote spoke router physical interface IP address.
- D. At the Spoke B router, the next hop to reach the 192.168.1.0/24 network is 172.17.0.1.
- E. The spoke routers act as the NHRP servers for resolving the remote spoke physical interface IP address.
- F. At the Spoke A router, the next hop to reach the 192.168.0.0/24 network is 172.17.0.1.

Answer: AC

5. Refer to the exhibit. Why is the Cisco IOS Firewall authentication proxy not working?

- A. The aaa authentication auth-proxy default group tacacs+ command is missing in the configuration.
- B. The router local username and password database is not configured.
- C. Cisco IOS authentication proxy only supports RADIUS and not TACACS+.
- D. HTTP server and AAA authentication for the HTTP server is not enabled.
- E. The AAA method lists used for authentication proxy should be named "pxy" rather than "default" to match the authentication proxy rule name.

Answer: D

6. Refer to the exhibit. Which optional AAA or RADIUS configuration command is used to support 802.1x guest VLAN functionality?

- A. aaa authentication dot1x default group radius
- B. aaa authorization network default group radius
- C. aaa accounting dot1x default start-stop group radius
- D. aaa accounting system default start-stop group radius
- E. radius-server host 10.1.1.1 auth-port 1812 acct-port 1813

Answer: B

7. Referring to a DMVPN hub router tunnel interface configuration, what can happen if the ip nhrp map multicast dynamic command is missing on the tunnel interface?

- A. The NHRP request and response between the spoke router and hub router will fail.
- B. The GRE tunnel between the hub router and the spoke router will be down.
- C. The IPsec peering between the hub router and the spoke router will fail.
- D. The dynamic routing protocol between the hub router and the spoke router will fail.
- E. The NHRP mappings at the spoke routers will be incorrect.
- F. The NHRP mappings at the hub router will be incorrect.

Answer: D

8. Which three of these statements are correct regarding DMVPN configuration? (Choose three.)

- A. If running EIGRP over DMVPN, the hub router tunnel interface must have "next hop self" enabled: ip next-hop-self eigrp AS-Number
- B. If running EIGRP over DMVPN, the hub router tunnel interface must have split horizon disabled: no ip split-horizon eigrp AS-Number
- C. The spoke routers must be configured as the NHRP servers: ip nhrp nhs spoke-tunnel-ip-address
- D. At the spoke routers, static NHRP mapping to the hub router is required: ip nhrp map hub-tunnel-ip-address hub-physical-ip-address
- E. The GRE tunnel mode must be set to point-to-point mode: tunnel mode gre point-to-point
- F. The GRE tunnel must be associated with an IPsec profile: tunnel protection ipsec profile profile-name

Answer: BDF

9. Refer to the exhibit. Why is the Total Active Signatures count zero?

- A. The 128MB.sdf file in flash is corrupted.
- B. IPS is in fail-open mode.
- C. IPS is in fail-closed mode.
- D. IPS has not been enabled on an interface yet.
- E. The flash:/128MB.sdf needs to be merged with the built-in signatures first.

Answer: D

10. Refer to the exhibit. What additional configuration is required for the Cisco IOS Firewall to reset the TCP connection if any peer-to-peer, tunneling, or instant messaging traffic is detected over HTTP?

- A. class-map configuration for matching peer-to-peer, tunneling, and instant messaging traffic over HTTP, and a policy map specifying the reset action
- B. the port-misuse default action reset alarm command in the HTTP application firewall policy configuration
- C. the PAM configuration for mapping the peer-to-peer, tunneling, and instant messaging TCP ports to the HTTP application
- D. the ip inspect name firewall im, ip inspect name firewall p2p, and ip inspect name firewall tunnel commands
- E. the service default action reset command in the HTTP application firewall policy configuration

Answer: B

11. Which two commands are used to only allow SSH traffic to the router Eth0 interface and deny other management traffic (BEEP, FTP, HTTP, HTTPS, SNMP, Telnet, TFTP) to the router interfaces? (Choose two.)

- A. interface eth0
- B. control-plane host
- C. policy-map type port-filter policy-name
- D. service-policy type port-filter input policy-name
- E. management-interface eth0 allow ssh
- F. line vty 0 5
transport input ssh

Answer: BE

12. Which two statements are true regarding classic Cisco IOS Firewall configurations? (Choose two.)

- A. You can apply the IP inspection rule in the inbound direction on the trusted interface.
- B. You can apply the IP inspection rule in the outbound direction on the untrusted interface.
- C. For temporary openings to be created dynamically by Cisco IOS Firewall, the access list for the returning traffic must be a standard ACL.
- D. For temporary openings to be created dynamically by Cisco IOS Firewall, you must apply the IP inspection rule to the trusted interface.
- E. For temporary openings to be created dynamically by Cisco IOS Firewall, the inbound access list on the trusted interface must be an extended ACL.

Answer: AB

13. What are two benefits of using an IPsec GRE tunnel? (Choose two.)

- A. It allows dynamic routing protocol to run over the tunnel interface.
- B. It has less overhead than running IPsec in tunnel mode.
- C. It allows IP multicast traffic.
- D. It requires a more restrictive crypto ACL to provide finer security control.
- E. It supports the use of dynamic crypto maps to reduce configuration complexity.

Answer: AC

14. When you configure Cisco IOS WebVPN, you can use the port-forward command to enable which function?

- A. web-enabled applications
- B. Cisco Secure Desktop
- C. full-tunnel client
- D. thin client
- E. CIFS
- F. OWA

Answer: D

15. Refer to the exhibit. What additional configuration is required to enable split tunneling?

- A. the reverse-route command under "crypto dynamic-map mode 1"
- B. the include-local-lan under "crypto dynamic-map mode 1"
- C. the match address 199 command under "crypto dynamic-map mode 1"
- D. the acl 199 command under "crypto isakmp client configuration group cisco"
- E. the include-local-lan command under "crypto isakmp client configuration group cisco"
- F. the reverse-route command under "crypto isakmp client configuration group cisco"

Answer: D
